THE MAKEUP CONGRESSIONAL BASEBALL GAME

(Mr. CONTE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. CONTE. Mr. Speaker—

Half a league, half a league,
half a league onward
Into the valley of death
rode the six hundred—

So goes the poem, "The Charge of the Light Brigade."

Well, Mr. Speaker, the British Cavalry in the Crimea had no greater challenge than the Republican Baseball Team at Four Mile Run last night.

There were Democrats to the left of us, Democrats to the right of us, Democrats in front of us. They were everywhere. And we, only nine stouthearted souls, rode into the valley of death.

The score was 8 to 6 in favor of the Democrats, but we never gave up. In fact if the spaceman, BILL NELSON had not made the last spectacular catch—routine for most—but spectacular for him, the game would have been tied.

Nonetheless, the public must know that by the end of two innings, after MAC SWEENEY broke his thumb, we only had eight players.

The Democrats offered us a player, but his wheelchair broke down on the way to our dugout. So we had to call CARL PURSELL out of retirement,

We drew our sabres and rode valiantly into the valley of death, but the outcome was the same as it was outside Sevastopol over a 100 years ago. We charged headlong into the never-ending flow of Democrats to a heroic defeat.

I want to thank all my players, they gave it all. We were outmanned and outgunned. I now know how Custer felt at the Little Bighorn. This time it wasn't Crazy Horse and Sitting Bull, but BULL CHAPPELL and CRAZY RUSSO. But the dust of game settled quickly. We sat down afterwards and smoked a "peace" cigar.

Mr. Speaker, I'd recommend we play a similar game to settle the fiscal matters before us so we can go home. But just as we found in last night's game we are surrounded on all sides.

The SPEAKER. The next game is the first Tuesday in November.

AIR CARRIER ACCESS ACT OF 1986

Mr. MINETA. Mr. Speaker, I ask unanimous consent that the Committee on Public Works and Transportation be discharged from further consideration of the Senate bill (S. 2703) to amend the Federal Aviation Act of 1958 to provide that prohibitions of discrimination against handicapped individuals shall apply to air carriers, and ask for its immediate consideration.

The Clerk read the title of the Senate bill.

The SPEAKER. Is there objection to the request of the gentleman from California?

Mr. HAMMERSCHMIDT. Reserving the right to object, Mr. Speaker, under my reservation I yield to the distinguished chairman of the Aviation Subcommittee, the gentleman from California [Mr. MINETA] to explain his request to the Members of the House.

Mr. MINETA. Mr. Speaker, I thank my distinguished colleague from Arkansas for yielding.

The bill now before us, S. 2703, will help ensure that airlines do not discriminate against handicapped passengers.

During the past year I had a number of meetings with representatives of handicapped groups and I have been concerned with the special difficulties which handicapped persons sometimes face when they travel. One cause of these difficulties appears to be that there is considerable confusion among airlines and their employees about the obligations of an airline to furnish the same air transportation services to the handicapped as are furnished to other passengers. The confusion has been increased by a recent Supreme Court decision which ruled that nonsubsidized airlines are not subject to the requirements of section 504 of the Rehabilitation Act of 1973 prohibiting discrimination against the handicapped.

The bill now before us, S. 2703, will make it clear that airlines may not discriminate against handicapped persons. The bill requires the Secretary of Transportation to enact regulations to ensure that handicapped passengers are treated fairly and are not subject to discrimination.

In addition, we expect the Secretary of Transportation to review the procedures for transporting the handicapped which the airlines have filed with the Federal Aviation Administration. The review will ensure that airline procedures do not discriminate and impose only those restrictions necessary for safety.

In carrying out its responsibilities DOT should bear in mind that all disabilities are not equally limiting and that many handicapped individuals are able to use air transportation in precisely the same manner as travelers who are not handicapped. DOT should ensure that handicapped persons will receive air transportation services geared to their capabilities.

The legislation now before us is similar to H.R. 5274 which was introduced in the House by my distinguished colleague from Arkansas. H.R. 5274 is cosponsored by 33 of our colleagues. The bill is supported by the Departments of Justice and Transportation, and by a large number of organizations representing the disabled.

In conclusion, I strongly believe that handicapped passengers are entitled to take full advantage of the mobility afforded by air transportation and that handicapped persons are entitled to be treated with dignity when they travel. The legislation which we are considering will help ensure that handicapped passengers can travel without any special problems arising from their handicapped status.

Mr. HAMMERSCHMIDT. Further reserving the right to object, Mr. Speaker, I want to thank my friend for his explanation.

Mr. Speaker, I rise in support of this bill. I am pleased that we are moving quickly to address the problems of handicapped air travelers.

Two years ago, after extensive hearings, we moved to pass the Civil Aeronautics Board [CAB] Sunset Act. The purpose of that legislation was to ensure that rules to protect airline passengers would continue to be enforced by the Department of Transportation [DOT]. One of the regulations we sought to preserve was the rule that prohibited discrimination against handicapped airline passengers.

Unfortunately, our efforts on behalf of the handicapped were set back by the recent Supreme Court decision in the case of Paralyzed Veterans of America versus DOT. In that case, the Court decided that the Rehabilitation Act, which prohibits discrimination against the handicapped, did not apply to air travel.

As a result, the obligation of airlines to carry handicapped passengers without discrimination has been thrown into doubt. While I believe that the CAB Sunset Act imposes obligations on airlines with respect to the handicapped, it is apparent that further legislation is needed to make this clear.

That is why I am pleased to support S. 2703 which passed the other body unanimously. This bill is very similar to the bill I introduced, H.R. 5274. Both state explicitly that airlines may not discriminate against handicapped individuals. Neither would impose any financial burdens on the airlines. In order to ensure that all air travelers receive the necessary protections as soon as possible, I favor the passage of S. 2703 at this time.

There is one difference between the two bills that should be noted. H.R. 5274 requires DOT to review existing airline policies to ensure that they are not discriminatory. This review is not required by S. 2703, the bill before us today.

Nevertheless, I would urge DOT to undertake this review. Such a review could help root out many of the problems and inconsistencies that handicapped travelers now face when dealing with the airlines.

Mr. Speaker, I need not remind my colleagues that many people became handicapped as a result of injuries received while serving their country. Others are handicapped through no fault of their own. They should all be able to travel by air without discrimination like any other American.

The bill before us today has widespread support. The administration supports it. The airlines, while claiming that they do not discriminate, are not opposing this bill. The Paralyzed Veterans of America have worked tirelessly to see that this bill is passed. I also have letters of support from the Epilepsy Foundation of America, Goodwill Industries, National Easter Seal Society, Military Order of the Purple Heart, Handicapped Organized Women [HOW], and many others who support this bill.

I would like to take this opportunity to thank Chairman MINETA for his support on this issue.

I urge my colleagues to support this bill.

Mr. ACKERMAN. Mr. Speaker, I rise in strong support of S. 2703, legislation that would prohibit discrimination against handicapped persons by air carriers. I am particularly pleased to be working with the distinguished majority leader in the Senate, Mr. DOLE, toward a common goal of eliminating discrimination and providing airline accessibility for all air travelers.

As you know, Mr. Speaker, last summer I introduced similar legislation to amend the Federal Aviation Act immediately following the Supreme Court ruling that major airlines cannot be forced to comply with the Rehabilitation Act, because they do not receive direct Federal assistance. The ruling, in keeping with the precedent set by the Court's controversial Grove City ruling, was a major setback for all people with disabilities and a shameful retreat in our national effort to combat discrimination in this country.

As a result of the ruling, millions of Americans continue to be subjected to humiliating and just plain offensive airline policies. Sometimes physically disabled people are forced to wait in a separate area before they may board an aircraft. At times they are charged more than able-bodied passengers. I've heard from a number of people who were not permitted to board flights at all because of their disability. At a time when technology permits disabled citizens unlimited opportunities to participate in America's mainstream activities, it is intolerable that airlines continue to allow dis-

abled individuals to be singled out for discriminatory treatment.

The unfortunate Supreme Court decision left Congress no choice but to change the law and undo the damage that the Court has done. Although I believe additional reforms may be needed to ensure that disabled individuals are able to use an airline's services, equipment and facilities, and obtain equitable relief from an airline which violates the law and injustly discriminates, I believe the legislation before us is a good basis from which to begin our efforts to eliminate inconsistent and unfair airline procedures. I strongly urge my colleagues to support the measure before us, so that there will no longer be any excuse for treating handicapped Americans as second-class citizens when it comes to air travel.

Mr. HOWARD. Mr. Speaker, I rise in strong support of S. 2703, a bill that will require the Secretary of Transportation to promulgate regulations to ensure that handicapped airline passengers are treated fairly and are not subjected to discrimination by the airlines.

The Nation's economy, as well as its political, social, and cultural life, is very closely tied to the air transportation system. Equal and nondiscriminatory access to the air transportation system is vital to economic opportunity for all citizens and to participation in the political, social, and cultural life of our country.

The bill enjoys wide support in the Congress, the executive branch, and among a large number of organizations involved in issues affecting handicapped persons.

Finally, Mr. Speaker, I am proud that it is the Committee on Public Works and Transportation that brings this bill before the House. I urged my colleagues to support this legislation.

Mr. EDGAR. Mr. Speaker, on behalf of 36 million disabled Americans, many of whom reside in the State of Pennsylvania, I rise in support of the "Air Carrier Access Act of 1986." This legislation is in response to the recent Supreme Court decision in the case of U.S. Department of Transportation versus Paralyzed Veterans of America, which held that nonfederally subsidized commercial air carriers are not required to adhere to antidiscriminatory statutes under current law.

The result is that commercial airlines can continue to single out disabled individuals for disparate and discriminatory treatment. It is important to emphasize that this legislation has nothing whatsoever to do with safety regulations. The injustices this legislation will remedy are humiliating and degrading regulations or practices by commercial air carriers or its personnel. For instance, there have been cases where handicapped passengers were segregated on flights and in separate waiting areas and were also charged greater airfare than others. Handicapped individuals have witnessed their expensive wheelchairs and other necessary medical equipment lost, damaged or misplaced. Certain carriers even go so far as to require disabled travelers to sit on blankets in case of alleged incontinence, a practice which I find particularly degrading. Some airline carriers require ticketing so far in advance that the independence of all disabled travelers and in particular disabled individuals of the business community find it nearly impossible to carry out the daily functions of a busy, mobile society.

Mr. Speaker, this legislation is acceptable to the Air Transport Association and the administration has formally supported it by letters of endorsement from the Secretary of Transportation and the Attorney General. In addition, this measure is endorsed by many, many organizations serving the needs of, and representing the disabled community, veterans groups, and other interested parties.

The other body has already passed, by unanimous consent, a similar bill, S. 2703. I call upon my colleagues to support this bipartisan measure and ensure that handicapped persons are not subjected to humiliating and degrading practices by commercial airlines.

Mr. Speaker, in closing I would like to commend my distinguished colleagues; the gentleman from Arkansas [Mr. HAMMERSCHMIDT] and the gentleman from California [Mr. MINETA] for introducing H.R. 5274 in the House of Representatives. It is particularly fitting to enact legislation of this nature as we are approaching the fourth year in the United Nations and National "Decade of the Disabled." I urge consideration of this important legislation without delay.

Mr. SNYDER. Mr. Speaker, I rise in strong support of S. 2703, which would prohibit air carriers from discriminating against handicapped individuals in the provision of air transportation. According to this legislation, the Secretary of Transportation would be required to promulgate regulations within 120 days after the date of enactment of the act to ensure nondiscriminatory treatment by air carriers of qualified handicapped individuals consistent with safe carriage of all passengers on air carriers.

In June of this year, the U.S. Supreme Court held in the case of DOT versus Paralyzed Veterans of America that section 504 of the Rehabilitation Act of 1973 does not apply to commercial air carriers not receiving direct Federal financial assistance. Because of this decision, it became unclear as to whether or not the Federal Aviation Act of 1958 was sufficient statutory authority to support comprehensive antidiscrimination regulations in furtherance of the air carrier's legal duty to provide safe and adequate service. Because of this uncertainty, handicapped air travelers could find themselves subjected to discriminatory practices by air carriers.

Over the past several months, we have been informed of numerous instances where certain handicapped individuals have been forced to comply with airline procedures which seemingly are unrelated to safety. Furthermore, these procedures vary from airline to airline, thus presenting an intolerable and inconsistent situation whereby handicapped air travelers have no idea as to how they will be treated from one airline to the next.

I believe the Senate bill now before us will provide much needed relief to the 36 million handicapped Americans in this country. By making it clear through this legislation that no air carrier can discriminate against a handicapped individual in the provision of air transportation, the handicapped community will now have a firm basis upon which to travel freely without being subjected to discriminatory practices.

As I mentioned before, the bill gives the Secretary of Transportation 120 days to enact regulations prohibiting discrimination against handicapped individuals. I would expect that these regulations will be drafted in such a way as to assure that handicapped individuals are treated consistently from airline to airline. Clearly, it is not too much to ask for the airline industry to adopt a predictable and consistent set of procedures for handling handicapped individuals.

Mr. Speaker, travel by air is a means of transportation which should be make available to all Americans without discrimination. Air travel is not a luxury but a necessity in today's world, and there is no reason whatsoever to treat the handicapped as second-class citizens. I urge my colleagues to support this legislation.

I would like to take this opportunity to commend the gentleman from Arkansas [Mr. HAMMERSCHMIDT] and the gentleman from California [Mr. MINETA] for their leadership in promoting passage of this legislation.

Mr. HAMMERSCHMIDT. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

The Clerk read the Senate bill, as follows:

S. 2703

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Air Carrier Access Act of 1986".

SEC. 2. (a) Section 404 of the Federal Aviation Act of 1958 (49 U.S.C 1374) is amended by adding at the end thereof the following new subsection:

"(c)(1) No air carrier may discriminate against any otherwise qualified handicapped individual, by reason of such handicap, in the provision of air transportation.

"(2) For the purposes of paragraph (1) of this subsection the term 'handicapped individual' means any individual who has a physical or mental impairment that substantially limits one or more major life activities, has a record of such an impairment, or is regarded as having such an impairment.".

SEC. 3. Within one hundred and twenty days after the date of enactment of this Act, the Secretary of Transportation shall promulgate regulations to ensure non-discriminatory treatment of qualified handicapped individuals consistent with safe carriage of all passengers on air carriers.

The Senate bill was ordered to be read a third time, was read a third time, and passed, and a motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. MINETA. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the Senate bill just passed.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

PERMISSION TO CHANGE CONFEREES ON S. 2638, NATIONAL DEFENSE AUTHORIZATION ACT FOR FISCAL YEAR 1987

Mr. ASPIN. Mr. Speaker, I ask unanimous consent for a change in the conferees on the Senate bill, S. 2638, the National Defense Authorization Act for fiscal year 1987, in section 911 of the bill. As I understand, on the Republican side this has been worked out. There would be a change, appointing the gentleman from Michigan [Mr. BROOMFIELD] in place of the gentleman from Pennsylvania [Mr. MCDADE] as a conferee for the consideration of sections 911 and 936 of the House amendments and modifications committed to conference.

The SPEAKER. Without objection, the gentleman from Pennsylvania [Mr. MCDADE] is excused and the gentleman from Michigan [Mr. BROOMFIELD] will take his place.

There was no objection.

The SPEAKER. The Clerk will notify the Senate of the change in conferees.

MOTION TO CLOSE CONFERENCE COMMITTEE MEETINGS ON S. 2638, NATIONAL DEFENSE AUTHORIZATION ACT, 1987, WHEN CLASSIFIED NATIONAL SECURITY INFORMATION IS UNDER CONSIDERATION

Mr. ASPIN. Mr. Speaker, I offer a privileged motion.

The SPEAKER. The Clerk will report the motion.

The Clerk read as follows:

Mr. ASPIN moves that, pursuant to clause 6(a) of rule XXVIII, conference meetings between the House and the Senate on S. 2638, the National Defense Authorization Act for fiscal year 1987, may be closed to the public at such times as classified national security information may come under consideration; Provided, however, that any sitting Member of Congress shall have the right to attend any closed or open meeting.

The SPEAKER. The question is on the motion offered by the gentleman from Wisconsin [Mr. ASPIN].

On this motion, the vote must be taken by the yeas and nays.

RELATING TO TELEPHONE SERVICES FOR SENATORS

Mr. ANNUNZIO. Mr. Speaker, I ask unanimous consent that the Committee on House Administration be discharged from further consideration of the Senate bill (S. 2759) relating to telephone services for Senators, and ask for its immediate consideration in the House.

The Clerk read the title of the Senate bill.

The SPEAKER pro tempore (Mr. WHITLEY). Is there objection to the request of the gentleman from Illinois?

There was no objection.

The Clerk read the Senate bill, as follows:

S. 2759

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 1205(a) of the Supplemental Appropriations Act, 1984 (2 U.S.C. 58a) is amended by striking out "(except services for which the charge is based on the amount of time the service is used)".

Mr. ANNUNZIO. Mr. Speaker, yesterday the Committee on House Administration unanimously ordered S. 2759 reported from the committee. And as a matter of comity, I am bringing the bill to the floor at this time.

The Senate Sergeant at Arms currently pays the cost of FTS service in each Senator's State offices. This bill merely allows the Sergeant at Arms to pay the cost of alternative service, not to exceed the cost of FTS, where there is improved accessibility, or transmission quality is better than FTS, or where it is more economical than FTS.

As a matter of regular practice, the Senate enacts these changes to its allowance provisions. As a matter of comity we should approve this matter, which affects only the internal operations of the Senate.

The Senate bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. FRENZEL. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks on the Senate bill just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Minnesota?

There was no objection.

MINIMUM ALTITUDE FOR AIRCRAFT FLYING OVER NATIONAL PARK SYSTEM UNITS

Mr. BEILENSON. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 533 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 533

Resolved, That at any time after the adoption of this resolution the Speaker may, pursuant to clause 1(b) of rule XXIII, declare the House resolved into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 4430) to require the Secretary of the Interior to conduct a study to determine the appropriate minimum altitude for aircraft flying over national park system units, and the first reading of the bill shall be dispensed with. After general debate, which shall be confined to the bill and which shall continue not to exceed one hour, thirty minutes to be equally divided and controlled by the chairman and ranking minority member of the Committee on Interior and Insular Affairs and thirty minutes to be equally divided and controlled by the Chairman and ranking minority member of the Committee on Public Works and Transportation, the bill shall be considered for amendment under the five-minute rule. It shall be in order to consider the amendment in the nature of a substitute recommended by the Committee on Interior and Insular Affairs as an original bill for the purpose of amendment under the five-minute rule, and each section of said substitute shall be considered as having been read, and all points of order against said substitute for failure to comply with the provisions of clause 7 of rule 16 are hereby waived. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and any Member may demand a separate vote on any amendment adopted in the Committee of the Whole to the bill or to the amendment in the nature of a substitute made in order as original text by this resolution. The previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit with or without instructions.

The SPEAKER pro tempore. The gentleman from California [Mr. BEILENSON] is recognized for 1 hour.

Mr. BEILENSON. Mr. Speaker, for purposes of debate only, I yield the customary 30 minutes to the gentleman from Mississippi [Mr. LOTT], pending which I yield myself such time as I may consume.

Mr. Speaker, House Resolution 533 is an open rule providing for the consideration of H.R. 4430, regarding aircraft flights at low levels over national parks.

The rule provides for 1 hour of general debate, with 30 minutes to be controlled by the chairman and ranking minority member of the Committee on Interior and Insular Affairs and 30 minutes to be controlled by the chairman and ranking minority member of the Committee on Public Works and Transportation.

The rule makes in order an amendment in the nature of a substitute recommended by the Committee on Interior and Insular Affairs as original text for the purpose of amendment. The substitute shall be considered under the 5-minute rule by sections, with each section considered as read.

In addition, the resolution waives points of order against the substitute for failure to comply with the provisions of clause 7 of rule XVI, the germaneness waiver. The bill, as introduced, was a simple study measure designed to examine possible aircraft limitations over some national parks where air tour and recreational flights are taking place. During consideration of the bill, sections 2 and 3 were added to mandate certain aircraft restrictions at the Grand Canyon, Yosemite and Haleakala National Parks. These new provisions were not included when the bill was originally introduced, and as a result a waiver of clause 7 of rule XVI is required.

Finally, House Resolution 533 provides for one motion to recommit with or without instructions.

H.R. 4430 is a bill requiring the Secretary of the Interior to conduct a 3-year study to determine the appropriate minimum altitude for aircraft flying over certain national parks. It is an important bill which addresses a growing problem of noise and danger from uncontrolled aircraft over many of our parks. The study would target 10 park units and would include an evaluation of the value of air tours, the impact of noise from aircraft, and the safety of the public and the parks.

Tragically, the incident which recently cost the lives of 26 persons at the Grand Canyon was the impetus for adding language to the bill which would begin controlling aircraft flights in and around three of our parks. H.R. 4430, as amended, would set minimum flight levels at Yosemite and Haleakala Parks. It would ban flights below the canyon rim at the Grand Canyon, except those necessary for emergency and administrative purposes, and would require the National Park Service to submit to the FAA an aircraft management plan for prompt review and implementation.

Mr. Speaker, H.R. 4430 would begin the process of putting sensible controls on low-flying aircraft over our National Park System. It strikes a reasonable balance between the need to preserve the wilderness experience for visitors who want to hike or climb in the parks against the needs of those who wish to view the scenery from the air. This is an important bill, and I urge adoption of House Resolution 533 so that we can proceed to its timely consideration.

(Mr. LOTT asked and was given permission to revise and extend his remarks.)

□ 1155

Mr. LOTT. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, this is an open rule and I urge its adoption.

H.R. 4430 comes forward in response to the increasing number of aircraft flights within our national parks. At the Rules Committee hearing on this bill, we received testimony that in the Grand Canyon alone, there are about 50,000 aircraft flights per year, and the number is rising. One can well imagine the affect these flights have on the noise level in the Grand Canyon and other parks. Also, Members will recall the recent tragic air crash over the Grand Canyon in which 26 people were killed. In the past 5 years, 54 people have been killed in air accidents at Grand Canyon.

H.R. 4430 does a number of things. It requires the Secretary of the Interior to conduct a study to determine altitude limits for aircraft over the national parks and to establish strict controls over aircraft flights at Grand Canyon, Yosemite, and Haleakala.

So, this is perhaps a minor bill but it is an important one. This is an open

rule permitting a full and fair debate. I ask for a "yes" vote on the rule so that we may begin consideration of the bill.

Mr. Speaker, I yield back the balance of my time.

Mr. BEILENSON. Mr. Speaker, I have no requests for time, and I move the previous question on the resolution.

The previous question was ordered.

The resolution was agreed to.

A motion to reconsider was laid on the table.

The SPEAKER pro tempore. Pursuant to House Resolution 533 and rule XXIII, the Chair declares the House in the Committee of the Whole House on the State of the Union for the consideration of the bill, H.R. 4430.

□ 1158

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 4430) to require the Secretary of the Interior to conduct a study to determine the appropriate minimum altitude for aircraft flying over National Park System units, with Mr. PICKLE in the chair.

The Clerk read the title of the bill.

The CHAIRMAN. Pursuant to the rule, the first reading of the bill is dispensed with.

Under the rule, the gentleman from Minnesota [Mr. VENTO] will be recognized for 15 minutes, the gentleman from Arizona [Mr. MCCAIN] will be recognized for 15 minutes, the gentleman from California [Mr. MINETA] will be recognized for 15 minutes, and the gentleman from Arkansas [Mr. HAMMERSCHMIDT] will be recognized for 15 minutes.

The Chair recognizes the gentleman from Minnesota [Mr. VENTO].

Mr. VENTO. Mr. Chairman, I yield myself 2 minutes.

Mr. Chairman, the controversy over aircraft flights at low elevation above certain units of the National Park System has existed for several years. Because of the severity of the problem, the Subcommittee on Public Lands and National Parks urged the Federal Aviation Administration [FAA] and the National Park Service [NPS] to work together on the problem. A memorandum of agreement was signed in September 1984 which was designed to promote compliance with the FAA advisory rule to maintain 2,000-feet elevation above units of the National Park System. While I understand these efforts have had positive effects at some units, especially with general aviation pilots, there has been increasing concern expressed about other park units and about the flight patterns of the rapidly expanding scenic overflight industry.

Even though numerous complaints are made each year by park users offended by noise intrusion of aircraft or expressing concern over the safety of rock climbers, horseback riders, and other park users, NPS has not conducted any systematic study of the park system to determine how widespread and how severe the problem is. Neither has there been any systematic study of the noise levels of different types of aircraft flying at different elevations and the impact of such noise on park users or resources.

Mr. Chairman, H.R. 4430 requires a 3-year study of the National Park System with indepth research limited to 10 park units and would include an evaluation of the values of overflights as well as the adverse impacts and would provide for requirements that the Administrator of the FAA evaluate the study and recommendations for possible problems to the safety of aircraft operations.

Also the FAA would be required to submit a study of aviation safety related to overflights of selected park units.

Aircraft overflight restrictions are required for Yosemite and Haleakala National Parks. At Yosemite the FAA advisory to fly on visual flight rules at 2,000 feet above national parks would be made mandatory and at Haleakala, aircraft would be required to operate at or above a 9,500-foot elevation over the Haleakala crater and certain other features in the park. The restrictions imposed on overflights of Yosemite and Haleakala would terminate 2 years after submittal of the required report to the Congress.

Additionally, language is included to require joint action by the National Park Service and the Federal Aviation Administration to establish overflight controls at Grand Canyon National Park including a ban on flights below the canyon rim.

The committee has worked closely with the Subcommittee on Aviation of the Public Works Committee to assure that this bill reflected the best possible approach to resolving the problems of overflights of national parks and include equitable involvement of both the National Park Service and the Federal Aviation Administration.

I believe we have accomplished that goal.

Mr. Chairman, this bill has been the product of a truly broad based, bipartisan, cooperative effort on the part of several of our colleagues. The chairman of the Interior and Insular Affairs Committee, MO UDALL and the other outstanding member from Arizona, JOHN MCCAIN put in many hours working out a solution to the conflicting and controversial problems associated with aircraft overflights at Grand Canyon National Park. I am very appreciative of the help they have given me.

Of course we would not be here today if it had not been for the foresight and interest of our colleague TONY COELHO, in protecting the great resources of our national parks. He not only introduced the bill but has been unrelenting in his efforts to craft this excellent bill that we have before us today. I want to commend the gentleman for his knowledge and hard work. Our former colleague, Ceci Heftel also dedicated many hours to this effort and was very helpful.

I am especially appreciative of the cooperation and assistance we have received from the chairman of the Aviation Subcommittee, NORM MINETA. His understanding and commitment to developing sound public policy was crucial to bringing the bill to the House floor. The list of supporter wouldn't be complete without mention of SALA BURTON and her early concerns as a former member of the House Interior Committee—voicing strong objection to the aircraft overflights of our national parks and monuments, it is indeed this type of support which has guided this measure through the House process.

Mr. Chairman, this is a good bill, a bill that is needed and one we can all support.

Mr. Chairman, I reserve the balance of my time.

Mr. MCCAIN. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I rise today in strong support of H.R. 4430, a measure which requires the National Park Service to evaluate the impact of air traffic on our National Park System. Chairman VENTO has already explained the salient features of this bill. I would like to devote the balance of my remarks to that aspect of the bill dealing with the Grand Canyon. However, before I turn to that subject, I would like to make a few general comments.

Our national heritage, as embodied in our National Park System, used to be self-regulating. Particularly when we talk about western parks. By and large, they were situated out in the middle of nowhere with few humans, let alone human activity, around. Well, the middle of nowhere is increasingly on the edge of somewhere. More and more, human activities are encroaching on our national parks. This, I believe, requires a more active and forward looking role on the part of those charged with the stewardship of our National Park System.

The measure before us represents such a role. The Interior Committee, in approving this legislation, has not stated that aircraft and national parks are incompatible, nor has it found air tour activities to be inappropriate. What it has done is recognize that the entities are making use of the park in some fashion, and that, like any other activity in our parks, its impact on

other users must be measured and evaluated. Our national parks, for the most part, are not wilderness areas, but rather are meant to be seen and experienced by the American public. Aircraft use is one way to do this. However, it must be harmonized with other uses.

When the Interior Committee first took up H.R. 4430, I joined with Chairman UDALL to author an amendment which dealt specifically with the Grand Canyon. I am sure that everyone is award of the recent tragic event over the Grand Canyon in which a collision of two aircraft, flying below the rim of the canyon, resulted in the deaths of 25 people. In the time between the Interior Committee reporting out this measure and the House's consideration of it, two more people have died in yet another accident in the canyon. In fact, over the last 5 years, there have been 12 accidents resulting in the deaths of 56 people.

One year ago a report by National Park Service planners in Grand Canyon National Park made the following statement, "The mixture over Grand Canyon of numerous scheduled air-tour operator flights with randomly flying recreational pilots creates a high possibility for midair collisions." This was not the first such warning. A year earlier, after a 1984 air crash killed 10 people, the National Transportation Safety Board called for the Federal Aviation Administration to control sightseeing flights over the canyon.

While the safety issue is a very serious one, it is by no means the only one. Flights at the Grand Canyon currently number 50,000 a year, and they are expected to increase. These flights are having a significant affect on the natural quiet of the canyon. For the last year, the National Park Service, under the direction of the Superintendent of Grand Canyon National Park, Dick Marks, has been studying the issue of noise from aircraft operations over the Park and its effect on the natural quiet and experience of the park. They have been doing so under the legislative direction of the Grand Canyon Enlargement Act of 1974. A recent Park Service survey found that aircraft noise was audible up to 95 percent of the time during the day, with an average of 50 percent of the day in all locations monitored by the Park Service; 70–80 percent of the back country visitors stated that their experience was degraded by aircraft.

Mr. Chairman, sometime at the end of this month or the beginning of the next, the National Park Service will issue its recommendations to the Administrator of the FAA regarding the appropriate action that should be taken to control aircraft use of the park. Of course, I wholeheartedly support this effort. We control everything from dogs to bikes to campfires at the park; I see no reason aircraft should be an exception. This legislation directs the FAA to evaluate the Park Service recommendations as to their impact on safety, make the necessary changes if any need to be made, then implement the management plan.

I realize the FAA is not enamoured with the Park Service's involvement in this area. However, I would hope they realize that, just as the National Park Service does not quite have the resources to analyze aircraft safety issues, the FAA does not possess the expertise to evaluate the conditions of our natural resources. I am very happy to see that the FAA has begun taking action on this matter. It is my hope that they and the Park Service can join together and produce a plan which protects the canyon as well as the flying public.

Let me close, Mr. Chairman, with the following observation. The Grand Canyon has been described in a number of ways: one of the Seven Wonders of the World, one of our Nation's crown jewels, Nature's masterpiece. But I see it as a symbol of our commitment to our natural heritage, not only for today, but for our children and their children. We must be willing to take the steps necessary to maintain its integrity. to keep alive the true meaning of a Grand Canyon experience. If we are to keep our commitment to the American people to maintain a viable park system, I urge all my colleagues to give this measure their enthusiastic support.

The CHAIRMAN. The gentleman from Arkansas [Mr. HAMMERSCHMIDT] is recognized for 15 minutes.

Mr. HAMMERSCHMIDT. Mr. Chairman, I yield myself such time as I may consume. For the last few years, there has been a growing controversy about aircraft overflights of the Grand Canyon and other national parks. Environmentalists, backpackers, and hikers complain that aircraft noise ruins their enjoyment of the national parks. Aircraft owners, particularly those offering sightseeing tours of the parks, say that for many tourists a flight over the park is the best way to see it and enjoy it. This controversy came to a head recently as a result of the tragic aircraft collision over the Grand Canyon.

The bill before us today would direct the Secretary of the Interior to study this problem. The study would consider the proper minimum altitude that should be maintained while flying over our national parks. The study would focus on three national parks, including the Grand Canyon.

The bill also requires the Secretary of the Interior to submit a plan for the management of airspace over the Grand Canyon to the FAA. The FAA then must implement this plan unless it finds that it would adversely affect aviation safety.

The crucial point here is that the FAA has the primary role in establishing airspace restrictions. Although some may disagree with its previous approach to this issue, the fact remains that only the FAA has the background and technical expertise to deal with these sorts of restrictions. I don't believe we should support a bill that gives the final say over airspace restrictions to a nonaviation agency.

I am therefore pleased that this bill keeps the ultimate say over airspace restrictions at our national parks in the hands of the FAA.

I further think that I ought to relate to my colleagues what the administration's position is on this bill.

While the administration shares congressional concerns regarding overflights of national parks, it opposes H.R. 4430 as overly restrictive and unnecessary. Current law already authorizes the Department of the Interior to conduct studies such as that required by the bill and authorizes the Department of Transportation to impose whatever restrictions prove necessary to protect park resources and visitors. New flight restrictions at Grand Canyon National Park are being developed by the Department of Transportation under existing authorities. The administration prefers these new restrictions to be developed under established procedures, instead of the special requirements of H.R. 4430, which would confuse regulatory authority over airspace by granting the Department of the Interior primary authority for developing air traffic restrictions at Grand Canyon National Park.

Mr. Chairman, I reserve the balance of my time.

Mr. VENTO. Mr. Chairman, I yield 2 minutes to the gentleman from Nevada [Mr. REID].

Mr. REID. Mr. Chairman, I rise in support of H.R. 4430, a bill to address the problems associated with aircraft flights over our national parks.

When introduced in March, the legislation focused upon the need to identify problems that are created when aircraft fly over our national parks. Aircraft sound adversely affects the natural quiet and visitor experience and may have negative impact on the natural, historical and cultural resources of each park as well. Following the tragic June 18 midair collision over the Grand Canyon that killed 25 people, the issue of aircraft safety was brought to the forefront.

Specifically the legislation requires the National Park Service and the Federal Aviation Administration to conduct a study to determine the minimum altitude that aircraft should maintain when flying over units of the National Park System, and to make

recommendations for legislative or regulatory action. Restrictions on aircraft flights over Yosemite National Park and Haleakala National Park are also established. In addition, H.R. 4430 requires the Park Service to submit a final plan for the management of air traffic over the Grand Canyon to the FAA providing for "substantial restoration of the natural quiet of the park." Under the plan, flights below the rim of the canyon, except for emergency purposes, are prohibited.

Tour operators in my district have raised some concerns about the legislation, particularly the blanket prohibition of flights below the rim. I agree that an overall ban is questionable and feel these legitimate concerns need to be considered.

Last year, approximately 400,000 tourists paid for scenic tours of the Grand Canyon. Flight operators estimate the tour business at Grand Canyon alone is a $50 million per year industry. Many of the flights originate from Las Vegas, NV.

Aside from the economic benefits, commercial air tours provide a unique way for thousands of people of all ages and infirmities to explore the Grand Canyon each year. Flying sightseers leave no trash or human refuse behind.

The tour operators point out the Grand Canyon is almost 300 miles long and many parts of the canyon are not accessible. Tour operators maintain they are willing to apply judicious routing methods in sound-sensitive areas and still provide a safe flight below the rim in certain areas.

When reporting the bill, the Interior and Insular Affairs Committe did not define "below the rim," but instead calls for the development of a "practical and commonsense definition" to meet the bill's objectives to restore the natural quiet of the Grand Canyon and provide for public safety.

The valid concerns of the air tour industry must be taken into consideration by the National Park Service and the Federal Avaiation Administration while developing the final management plan for the Grand Canyon. I pledge to work with the Park Service and the FAA to ensure that a well-balanced solution be reached to protect our treasured park areas and still allow for visitor safety and enjoyment.

Mr. McCAIN. Mr. Chairman, I yield 2 minutes to the gentleman from California [Mr. LAGOMARSINO].

Mr. LAGOMARSINO. Mr. Chairman, I rise in support of H.R. 4430. This bill requires a study to identify the problems associated with aircraft overflights and the impacts caused by various types of aircraft, including sightseeing, military, and commercial. The study will include research at 10 units of the National Park System including Grand Canyon, Yosemite, Hawaii Volcanoes, and Glacier National Parks and Mount Rushmore National Memorial. The study report, which will include recommendations by the Federal Aviation Administration regarding safety, is to be completed and submitted to Congress within 3 years. The bill also provides that during the study period and for 2 years after its completion, mandatory altitude restrictions will apply in the Grand Canyon, Yosemite, and Haleakala National Parks.

I believe this is a meritorious bill in that it seeks to study a serious problem. In recent years, concerns have been expressed regarding the impacts of aircraft overflights in terms of noise and safety on the resources of our National Park System and the visiting public. These concerns were heightened by the tragic midair collision over the Grand Canyon in June. Therefore, I commend the chairman of the committee, Mr. UDALL and the other distinguished member of the committee from Arizona, Mr. MCCAIN, for their diligent efforts in responding to the problems at the Grand Canyon and working to develop a viable solution. They have expended a great deal of hard work and time on this legislation and I thank them for that. Hopefully, the National Park Service's aircraft management plan for the Grand Canyon will be in place shortly and will also address these problems in a more permanent fashion. I also want to commend the bill's sponsor, my colleague from California, Mr. COELHO, for his foresight in recognizing that the overflight issue should be studied and reviewed by Congress, and I want to thank him and the subcommittee chairman, Mr. VENTO, for working with other interested Members to improve this legislation. I do feel the bill was improved in the committee process by several amendments, including one to require that the values of aircraft overflights also be included in the study and one to exempt from the bill's restrictions helicopter operations below the rim of the Grand Canyon for the purpose of transporting river runners to and from the Colorado River.

The many weeks of negotiation on this bill have resulted in a fine piece of legislation. Therefore, Mr. Chairman, I urge all of my colleagues to support H.R. 4430.

The CHAIRMAN. The gentleman from California [Mr. MINETA] is recognized for 15 minutes.

Mr. MINETA. Mr. Chairman, I yield such time as he may consume to the distinguished gentleman from California [Mr. COELHO], the author of this legislation.

Mr. COELHO. I thank the gentleman for yielding time to me.

Mr. Chairman, I will not take a great deal of time. I would just like to thank the gentleman from California [Mr. MINETA] and the members of his subcommittee and his full Committee on Public Works and thank the chairman of our subcommittee, the gentleman from Minnesota [Mr. VENTO], and the chairman of the full committee, the gentleman from Arizona [Mr. UDALL], and the Republican side as well for their efforts in helping to get this through, in particular the gentleman from Arizona [Mr. MCCAIN], who was very actively involved in trying to put something together that makes sense.

Mr. Chairman, today the House is considering legislation that is important for preserving our national parks as a place of enjoyment for the thousands of people who visit each year. We are frequently finding that the tranquility our visitors have come to expect from our parks is being shattered by the constant drone of flights over the parks. These flights occur at such low altitudes that they also threaten the very safety of the people on the ground.

The tragedy that occurred earlier this year in the Grand Canyon only reinforced the need to take action to prevent any more needless deaths. It is unfortunate that we often do not act until we are forced to; however, I hope that by passing this bill today, no further accidents will happen at Grand Canyon or other national parks in this country.

My original legislation called only for a study of the problem of overflights in the national parks so we could formulate a policy to control these flights. I am pleased that the Interior Committee agreed with my recommendations to strengthen the bill by placing specific altitude limits over three national parks that are having some of the worst problems—Yosemite, Haleakala, and Grand Canyon National Parks.

I have particular concern about the overflights problem in Yosemite National Park, which is in my district. This bill requires that all aircraft flying over the park stay 2,000 feet above the surface that is within the route of flight. For the purposes of flying over Yosemite Valley, aircraft would be required to stay 2,000 feet over the rim.

I wanted these specific altitude restrictions for Yosemite because complaints about aircraft that are flying low over a number of areas of the park are continuing, despite my previous efforts to resolve this problem.

In 1984, I was able to get officials of the National Park Service and the Federal Aviation Administration to agree on an aircraft advisory for our national parks. This advisory requested that all aircraft maintain at least a 2,000-feet-above-the-ground minimum altitude when flying over national parks.

Unfortunately, this advisory is being ignored in Yosemite National Park

and testimony we received during hearings on this legislation shows that the advisory is being ignored in other national parks.

Allowing pilots to fly wherever they please resulted in the tragic accident at Grand Canyon. Restricting overflights has become not only a matter of protecting the environment in our parks, but also a matter of safety.

I thank my colleagues on the committee, Mr. VENTO, Mr. UDALL, and Mr. MCCAIN, for their hard work in getting this bill to the House floor today. I also appreciate the assistance of our former colleague, Mr. HEFTEL, and the cooperation of the chairman of the Aviation Subcommittee, Mr. MINETA. I urge all Members to support this legislation as a means of bringing some control to the continuing overflights problem.

Mr. MINETA. Mr. Chairman, I yield myself such time as I may consume.

I thank the gentleman from California [Mr. COELHO] for his comments.

Mr. Chairman, I rise in strong support of this legislation, and commend our distinguished colleagues on the Committee on Interior and Insular Affairs and the Interior Subcommittee on National Parks for this fine work on this bill. I also thank them for their most cooperative and constructive efforts in working with the Committee on Public Works and Transportation and the Subcommittee on Aviation to accommodate our interests and concerns. Because of this cooperation, the Committee on Public Works and Transportation, which shares jurisdiction on this legislation, was able to quickly agree to the bill being brought to the floor.

My interest in the problem of overflights of the national parks is nothing new. Three years ago, Congressman SEIBERLING, then chairman of the National Parks Subcommittee, and I urged changes to FAA-recommended operating procedures covering overflights of national parks. The change was to advise pilots to fly 2,000 feet above canyon rims in units of the National Park System for noise abatement reasons. We recognized then, as did the Federal Aviation Administration, that flying below the Canyon rim in national parks, like Grand Canyon and Yosemite, produced noise incompatible with the purpose of a national park—that being establishment of areas where citizens can enjoy our Nation's natural beauty and quiet.

This change in recommended operating procedures has had a positive benefit, but it has become apparent that we now need to go beyond recommendations or advice to the pilot community, because there continue to be abuses resulting in environmental degradation of some units of the national parks.

I will not reiterate what my colleagues from the Interior Committee are proposing in this legislation. They have already ably described the comprehensive approach of study and regulation of airspace over specific units of the national parks.

I would like to take a few moments to describe how some of my initial concerns have been addressed. I began supporting wholeheartedly the concept of tighter regulation of the airspace over the Grand Canyon, Yosemite, and the Hawaiian Parks. However, I believe that when we decide to regulate the airspace over our national parks for environmental reasons that we must be crystal clear as to who is doing the regulating and who is enforcing those regulations. It is my firm belief that the regulation of airspace must remain in the hands of the Federal Aviation Administration.

It should be recognized that changes in airspace regulation can be made for reasons other than safety, such as to take account of environmental considerations, but changes in airspace regulation must never result in diminution of safety. In order that the safety implications of any changes be adequately addressed, jurisdiction over the airspace must rest with the Federal agency whose expertise and mission is aviation safety, the Federal Aviation Administration.

This legislation before us today does just that and bestows no authority on the National Park Service to regulate airspace. Any new regulations that are developed out of the studies we would authorize with this bill would be regulations of the FAA, not the Park Service. The Park Service can propose regulations, but if the FAA determines the Park Service proposal would adversely affect safety, then aviation safety concerns must be accommodated to FAA's satisfaction before any plans or regulations are put into effect.

Another important section of the legislation authorizes the FAA to conduct a study aimed at improving air safety above our national parks. In this study, I would expect a wide variety of issues to be addressed, including the need for stronger regulation of commercial operations using our national parks, the need for improved communications, the need for clearly defined flight patterns, and the need for improved surveillance and inspection of commercial aircraft operators by the FAA.

This study would be completed within 6 months of enactment of H.R. 4430, but I would urge the FAA to exercise its existing authority to get underway on the study now and not wait for enactment of the bill because, as the recent tragedy at the Grand Canyon demonstrates, there are some obvious safety problems in need of solution.

Again, I want to commend our Interior Committee colleagues, particularly Chairman UDALL, Subcommittee Chairman VENTO, ranking minority members YOUNG and LAGOMARSINO, and Congressman COELHO, the original sponsor of this legislation, for their fine work on this legislation and the opportunity they have afforded me and the Aviation Subcommittee to contribute to their efforts.

Mr. Chairman, I reserve the balance of my time.

Mr. HAMMERSCHMIDT. Mr. Chairman, I ask unanimous consent that the gentleman from Arizona [Mr. MCCAIN] be allowed to handle the rest of the time that I have remaining for the consideration of H.R. 4430.

The CHAIRMAN. Is there objection to the request of the gentleman from Arkansas?

There was no objection.

Mr. MCCAIN. Mr. Chairman, I yield 3 minutes to the distinguished gentleman from Utah [Mr. HANSEN].

Mr. HANSEN. Mr. Chairman, this has been an interesting piece of legislation that we are discussing. I find it interesting that when this first came about, it was predicated more on the idea of noise than it was on safety.

At that particular time, we found ourselves in a situation that, can you as an individual go into one of our national parks and enjoy a wilderness experience without hearing aircraft buzzing around?

I am somewhat familiar with the Grand Canyon, and I would like to address my remarks to the Grand Canyon. I hiked across the Bright Angel Trail and the Kaibab Trail. I have run the river twice. I have to say that my son is a professional river runner and runs it 12 to 14 times a year, the whole 281 miles, and then on to Lake Meade.

I have been asking some of these river runners specifically: Have you heard aircraft flying overhead? So I have asked people from the private industry and from the commercial industry and have yet to find one who actually could ever hear an airplane of those who were taking people over the park. But I have heard a lot of those people say, yes, I can hear a Western Airlines or an American Airlines at 32,000 feet flying over.

I think those of us who fly, and there are an awful lot of Members in this House who hold pilot licenses, and some of us have buzzed right through the middle of the canyon that we are sorry to admit to, but it is not an equation with altitude and noise. You know yourself that a jet aircraft makes a lot more noise at 35,000 than a Cessna 340 right over your head. So even talking to those who make aircraft engines, you do not really find noise and elevation equated. I think we realize that.

So is it really a question of noise?

Along the line as this bill was introduced, we then found a situation—unfortunately we had a deHavilland and a Ranger III that collided in midair. It was a very unfortunate thing, but the bill at that point took a new aspect. It took a giant step forward, and now it became a safety angle.

Well, I have to say that I have respect for this bill and I reluctantly support it, but I do support it, because I feel it is very important that we move toward that area.

But I would like to just have the Members of this House realize what is their philosophy regarding the parks of this Nation. There are 400,000 people a year who have the opportunity for flying over the Grand Canyon, a $50 million business. Those 400,000 people, many of them do not have the physical wherewithal to hike those trails, do not have the time, the effort, or the money that they want to get in a raft and go 281 miles through the middle of the Grand Canyon. I personally feel that their feelings are just as important as the person who wants to have a solitude experience and go through the canyon on foot.

So I think that possibly this study that we are looking at probably makes a lot of sense. I am glad the gentleman from California [Mr. MINETA] pointed out that it put no authority on the National Park Service to regulate that.

I would urge Members of the House to vote for this bill, but take into consideration there will be further things on, and everyone's interests should be considered as we look at flyovers of the canyon.

Mr. VENTO. Mr. Chairman, I yield 4 minutes to the distinguished chairman of the Interior and Insular Affairs Committee, the gentleman from Arizona [Mr. UDALL]

Mr. UDALL. Mr. Chairman, today the House is considering an important piece of legislation. H.R. 4430 addresses a growing problem in many of our national parks—the noise and danger generated by uncontrolled aircraft overflights. Although the bill generally deals with studying the problem at some parks, it mandates specific action at Grand Canyon National Park and it is these provisions with which I am most concerned.

It used to be that our parks, especially our premier western parks, were largely self-protecting because of the very nature of their isolation. That has all changed now, and our parks are virtually under siege from an army of stresses and threats that are being imported into their boundaries.

Our parks are not wilderness areas, unless the Congress otherwise so designates them. They are meant to be seen, enjoyed and experienced by the public. To do that, both the National Park Service and private business together must provide the goods and services necessary to do the job for the visiting public. I believe that air tours are a legitimate and appropriate way to provide a unique and exciting experience of a park and that to ban them would be wrong and unfair.

But some have argued that the overflights, even helicopter and fixed-wing flights below the rim, do not really bother anybody but a few elitist backpackers and that besides, more people fly over and into the canyon than walk into it. They say that we should not restrict this popular and profitable activity at all, except perhaps to zone aircraft below the rim away from areas where on-the-ground visitors go. I have great problems with these arguments.

First, neither the Congress nor the Park Service is charged with the responsibilty of making it possible for everyone to see a park whenever and in whatever manner they want. Nor is it their responsibility to allow private business to make a profit off park resources whenever and in whatever manner they want. We do not allow tramways into the Grand Canyon, or major hotels on the river, even though it would be popular and profitable to do so. Our first and overriding responsibility clearly is to protect the resources of the park and then to provide for visitor experiences that are consonant with resource protection and protect the public health and safety.

Nowhere has this fundamental conflict become more advanced than at the Grand Canyon. I have known and loved the canyon all my life. I also have been a pilot for a good deal of my life. It is obvious to me that the situation at Grand Canyon with regard to aircraft overflights has gotten out of control and that the time for action to protect both the park and the public safety has arrived. It is very obvious to me that it is not just a small minority of park visitors who are offended by the sights and sounds of these aircraft. I have received an avalanche of mail from all kinds of people who say that their experience at the rim, at the river and at all points in between has been diminished by aircraft overflights. Polls in Arizona also confirm that most people in my State believe that the presence of helicopters and airplanes buzzing around below the rim of the canyon is simply and essentially incompatible with our responsibility to protect the grandeur and serenity of this magnificent natural wonder. And make no mistake about it, part of what makes the Grand Canyon so wonderful is its quiet, which has been recognized as a "resource" of the park in previous legislation. The quiet of the Grand Canyon is every bit as much a resource of this park as the giant sequoias are of Redwood National Park or Old Faithful is of Yellowstone National Park.

The National Park Service, pursuant to directions given to it by the Grand Canyon Enlargement Act, has been studying the aircraft overflight problem and is now weighing various alternative management schemes. I think it would be very unwise at this time to simply overthrow this process. But the process has been unacceptably slow and the principal agencies involved, the Park Service and especially the Federal Aviation Administration, need some direction from the Congress.

Therefore, H.R. 4430 requires the Park Service to submit an aircraft management plan to the FAA within 30 days of enactment. This plan is to have three major elements. First, it must restore the natural quiet of the canyon; second, the plan would have to be safe for the flying public and other park visitors. Recent tragic events make this goal all the more imperative; and third the plan must have as one of its components a ban on all flights, except those for necessary emergency and administrative purposes, below the rim of the canyon.

Upon receipt of the plan, the FAA would have 60 days in order to do what it does best—determine whether the plan is safe. If it so certifies, the plan would then be implemented by the FAA. If it cannot so certify, then the FAA and the Park Service are given an additional 60 days in which to make the necessary modifications to the plan and then implement it.

Let me add a few words about what the bill does not do. First, it does not end air tours at the Grand Canyon. I expect that sightseeing flights above the rim will continue to be available and will continue to be highly popular, as well they should be. Arguments that we are denying the aged, the infirm, the handicapped, or anyone else their "right" to see the Grand Canyon are obviously misplaced. We are simply attempting to place sensible controls on this form of visitation in order, first and foremost, to protect the park, and, second, to protect the public.

Second, the bill does not interfere with the prerogatives of the FAA. We have worked very closely with Representative MINETA, chairman of the Aviation Subcommittee, to make sure that we do not. No plan for the management of aircraft at the Grand Canyon can take effect without FAA approval. The FAA is solely responsible for writing and implementing any regulations necessary to implement any plan.

I would add at this point that since the Interior Committee passed H.R. 4430, the FAA has moved to formally consider new regulations to ban all but emergency flights below the rim, specific route and altitude restrictions in the airspace from the rim to 2,000 feet above the rim, and prohibitions

against any aircraft below 2,000 feet above the rim that do not conform with these restrictions.

These provisions, if adopted, would fit in perfectly with the intentions of H.R. 4430 and I wish the FAA had moved earlier to consider them. I certainly think the FAA announcement says a great deal about the fairness of our proposal. I still believe the bill is a necessity, however, because of the uncertainty of FAA action and the specific timetables laid out in H.R. 4430.

In summary, this bill represents, in my opinion, a very reasonable compromise between those who want no restrictions and those who want far harsher restrictions, such as a mandatory minimum altitude for all aircraft of 2,000 feet above the canyon rim. It preserves the opportunity of everyone to see the Grand Canyon from the air, while mandating important steps to preserve the serenity and quiet of one of Nature's most glorious wonders. It does not in any way usurp the authorities or prerogatives of Federal agencies such as the FAA. And finally, I am convinced that although the safety record of the air-tour operators at the Grand Canyon generally has been rather good, the safety of future flights will be improved by both the restrictions mandated by the bill and the attention now being focused on this problem by the FAA.

I urge my colleagues to join the bipartisan support this bill has long enjoyed and vote in favor of this important measure.

Mr. McCAIN. Mr. Chairman, I yield 3 minutes to the gentlewoman from Nevada [Mrs. VUCANOVICH].

Mrs. VUCANOVICH. I thank the gentleman for yielding me this time.

Mr. Chairman, I rise today, not in total opposition to H.R. 4430, a bill that authorizes a study to determine the minimum altitude for aircraft flying over national parks, but to express my concerns over certain requirements of this bill. I do not object to the study altogether; I do, however, have reservations about the specific restrictions regarding the Grand Canyon.

The proposition to prohibit flights below the rim of the Grand Canyon has been very controversial. This will have a significant impact on my State as 90 percent of all flights to the Grand Canyon originate in Las Vegas. The Grand Canyon restrictions are proposed, in part, as a means to find a way to address the alleged noise in the canyon so the hikers and air visitors can coexist. I believe this can be done without the severe restrictions imposed on canyon overflights.

The national parks of this country should be available to everyone. The restrictions proposed for below-the-rim flights to the Grand Canyon may well prohibit thousands of people from enjoying the beauty and splendor the Grand Canyon has to offer. I agree with my colleague, the gentleman from Utah [Mr. HANSEN], no longer will the elderly, handicapped, or regular, nonhiking Americans be able to participate in the beauty below the rim of the canyon.

The other reason for the proposed restrictions is safety. I venture to say, however, that if all flights take place at 2,000 feet above the rim, the air space will be more congested and the risk of accident increased. The problem won't be solved, it will just be moved 2,000 feet higher.

I believe the FAA should work closely with the National Park Service in developing a safe air traffic management plan, a plan that will not deny the public the opportunity to experience the Grand Canyon from the air. Thank you.

I do support the study but hope my colleagues will consider the reservations some of us have expressed.

Mr. MINETA. Mr. Chairman, I yield 4 minutes to the gentleman from Hawaii [Mr. AKAKA].

Mr. AKAKA. I thank the gentleman for yielding me this time.

Mr. Chairman, I rise in strong support of H.R. 4430 and urge my colleagues to join me in voting for this important bill. Now is the time to confront the problems associated with overflights of our national parks.

Aircraft noise is a serious problem in Hawaii's national parks. Over the past 10 years, sightseeing aircraft operations have increased, particularly on the islands of Kauai, Maui, and Hawaii. According to FAA records, there were over 60,000 helicopter flights on Kauai in 1985. There are now 11 helicopter tour companies operating on that island alone. It is not unusual for visitors, to some wilderness areas to be subjected to a low-altitude overflight every 15 minutes. Nowhere are the problems more serious than in Hawaii's two national parks, Haleakala National Park on Maui and Hawaii Volcanoes National Park on Hawaii.

In 1984, there were over 1 million visitors to Haleakala National Park. Many came to view the spectacular volcanic crater, Haleakala, the "House of the Sun." The crater area can be reached by hiking or by air. Haleakala experiences an average of 30 tourist helicopter flights a day. The crater itself, which is about 3,000 feet deep from rim to floor, magnifies noise caused by helicopters as the sound bounces off its walls, particularly when helicopters are flown inside the crater, below, the rim.

A University of Hawaii graduate student, Al Perez, recently surveyed 44 park visitors on the trails of Haleakala. Seventy percent of those surveyed said they came to the park for silence and solitude. Without prompting from the interviewer, 41 percent said that helicopter noise was the most disagreeable aspect of their visit. In addition, I have received numerous statements, letters, and testimony from community leaders, local officials, Hawaii residents, and park visitors which further describe the problems with these overflights. I have also reviewed Park Service cases of aircraft complaints by park rangers and visitors. These records indicate that sightseeing helicopter flight practices often go beyond being a nuisance and create unnecessary safety hazards. Complaints from horseback riders have been filed after low-flying helicopters threatened to startle their mounts. Several stockmen with trail-riding concessions in the park have remarked that this is a recurring problem. Complaints have also been filed by park rangers who have observed actual unsafe flight practices, some in violation of a Federal air regulation requiring helicopters carrying paying passengers to maintain a minimum altitude of 300 feet above populated areas.

It is time to address these problems. Since 1984, an FAA advisory has been in effect requesting aircraft to fly at least 2,000 feet above the highest landform of any national park. Unfortunately, this advisory has been ignored, particularly with respect to Haleakala National Park. We need the temporary restrictions over Haleakala which H.R. 4430 provides during the 5-year study and review period. We need not only to protect our national parks but also public safety. Finally, we need to study the problems associated with aircraft overflights of our national parks by passing H.R. 4430. I urge my colleagues to join me in this effort.

Mr. McCAIN. Mr. Chairman, I yield 3 minutes to the gentleman from Arizona [Mr. KOLBE].

□ 1240

Mr. KOLBE. Mr. Chairman, the spectacle and beauty of a visit to the Grand Canyon can hardly be forgotten by anyone fortunate enough to visit this natural wonder. Whether one chooses to see the canyon from an observation point on either the south or north rim, or by rafting down the Colorado River as I was privileged to do last summer, or by hiking down some of the many trails into the park, or even by viewing it by aircraft, the Grand Canyon National Park evokes a sense of wonder and awe in all who see it. Unfortunately, these various forms of appreciation can result in conflicts between users. This conflict took on tragic scope this past summer when two sightseeing aircraft, a plane and a helicopter, both flying below the rim of the canyon, collided—resulting in the deaths of 25 people. Provisions of

this bill have been drafted in response to this conflict, and to the safety question which this accident raised.

I agree with the intent of section 3 of this bill as it requires the submission of a report by the National Park Service a final plan to the Federal Aviation Administration for the management of air traffic in the air space above the Grand Canyon. I also agree that below the rim flights have resulted in noise levels that detract from many hikers' enjoyment of the park, and this problem needs to be addressed in this plan.

This problem has been around for a long time. The first draft aircraft management plan was drawn up, but ignored, back in 1971. Since then, resolution of this problem has been elusive, largely because of benign neglect within the FAA. I would hope that the FAA will play an active role in improving management guidelines within the canyon not only to ensure the safety of park users, but also to enhance the enjoyment of all the park's visitors.

I do have concerns about some of the language in section 3. Relative to sections dealing with Yosemite and Haleakala, the applicable period for limits on flight elevation is open ended. This is not consistent with section 3(b)3, which requires a report within 2 years about the success of the plan. If the plan has not succeeded, or if technical improvements to aircraft can be implemented which substantially restores the natural quiet in the park, then we should have the opportunity to revisit the issue at that time. For Yosemite and Haleakala, this is how it is done. It would seem logical to do the same for the Grand Canyon.

I do want to commend the Interior Committee, and especially Congressmen MCCAIN, UDALL, and COELHO for the work they've done to craft this legislation given the various complex elements involved. Arizonans are very protective about their canyon, because we know it is a national treasure that to be enjoyed, needs to be shared. The various users of the park should recognize this as well. Full enjoyment of the park should not be restricted to merely the young and able-bodied. Aircraft play a significant role in enhancing the enjoyment in the park for those that cannot hike or raft. However, I believe we all recognize that the Park Service, and especially the FAA need to take decisive steps to improve the air management within the park. That is why I support this bill.

Mr. VENTO. Mr. Chairman, I yield 2 minutes to the gentleman from California [Mr. LEHMAN], a member of the committee and a sponsor of the measure before us.

Mr. LEHMAN of California. Mr. Chairman, I rise in strong support of H.R. 4430 as amended and I commend the author of the bill, Congressmen COELHO, and Chairman UDALL, VENTO, MINETA, Congressman MCCAIN, and others for their hard work to bring us legislation to both study and regulate commercial overflights in our national parks.

The recent and unfortunate crashes of small aircraft at the Grand Canyon and at Yosemite National Park have increased our awareness that the problem of overflights in national parks is far more than just an aesthetic issue. The general public relies on the Government to ensure its air safety, and we have gone far too long with business as usual with commercial overflights. If we can prevent the past overflight disasters at Yosemite and the Grand Canyon from happening in the future, we must make every effort to do so.

Mr. Chairman, I believe aviation sightseeing is an important and legitimate business. Operated properly with commonsense and courtesy, that business can be compatible with other park uses.

Because these overflights make money from the national parks, however, they are concessionaires. Though they are regulated by the FAA, they should be required to protect park values and not harm the experience of others.

It is my hope that regulations will eventually be promulgated affecting the frequency, location, time, and altitude of these flights. This bill is a good first step.

I am pleased to be a cosponsor of H.R. 4430 and I urge my colleagues to vote "yes" on the bill.

The CHAIRMAN. The Chair will advise the gentleman from Minnesota [Mr. VENTO] that he has 5 minutes remaining, the gentleman from Arizona [Mr. MCCAIN] has 10 minutes remaining, and the gentleman from California [Mr. MINETA] has 4 minutes remaining.

Mr. VENTO. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, this measure, of course, would not be here without the help of the sponsors and many others who have worked on this measure, including the gentleman from California [Mr. COELHO], the chairman of the committee, the gentleman from Arizona [Mr. UDALL], the gentleman from Arizona [Mr. MCCAIN] and, of course, as I mentioned earlier, the gentlewoman from California, SALA BURTON, was one of the first to point out the problems.

The fact is that, because of this issue, in fact, especially with regard to Grand Canyon, a study was initiated in the midseventies, 1975, and here we are today in 1986 without any effective regulation of the type of overflights that are, in fact, taking place in this national park.

Recently I received another letter, another promise, from the Federal Aviation Administration. I want to quote a paragraph from that letter. It is directed to the gentleman from Arizona [Mr. UDALL]. In the fourth paragraph, it says:

> I am considering a plan to supplement the voluntary measures now in effect with a regulation that would generally prohibit flight below the rim of the Grand Canyon except in the case of emergencies. The regulation would further prohibit flights in the airspace up to 2,000 feet above the rim of the canyon unless conducted in accordance with specific route and altitude restrictions.

The reason I am bringing this up, Mr. Chairman, I think it is important to note that this had come from Mr. Donald Engen, the U.S. Department of Transportation, and he goes on to point out the voluntary restrictions that are now in place which, for all practical purposes, I think, do not achieve the good results they intend: the training exercises, the pilots, the concerns about safety, the concerns about noise, many advisories, weather information that they provide. All of this put togeher simply does not work and I think it is necessary, because of the time that this issue has been under study by the National Park Service and the FAA, that we come through with legislation. I certainly hope that the other body recognizes the fact that this is really stymied in terms of the administration, in terms of the various agencies. While they all have good intentions, the fact of the matter is that these flights continue in such a way as to destroy the experience of the park, in the process, of course, I think, in a manner that is not as safe as it could and should be.

I would hope that with the passage of this, we will get better insights into the concerns and the safety and the visitor experience in a variety of different parks.

The question is when the parks were very often designated and set aside in perpetuity, they did not anticipate the types of flights or overflights. I think that the oversite flights that occur indicate the spectacular success of the park system in this country, but the question is, if we are to continue that success and preserve these, as was intended when they were designated under the law, then I think we have to address this particular question.

This measure before us will give us immediate limitations and relief in the Grand Canyon and a couple of parks where these oversite flights are occurring.

In the near term, they will, then, within 3 years, provide us further guidance on how we can deal with this problem so as to afford the best experience for all Americans in our national parks.

Mr. Chairman, I reserve the balance of my time.

Mr. MCCAIN. Mr. Chairman, I yield such time as he may consume to the

distinguished gentleman from Arizona [Mr. STUMP].

Mr. STUMP. Mr. Chairman, I rise in opposition to H.R. 4430.

Mr. Chairman, I am seriously concerned about the dangerous precedent we are setting by legislatively regulating airspace, and believe that existing regulatory authority in both the Departments of Interior and Transportation are sufficient to strike the balance necessary to insure the enjoyment of our national parks for all types of visitor use.

While concerned with the overall effects of this type of legislation, I would like to specifically address my comments to section 3 of H.R. 4430, regarding Grand Canyon National Park, which is a large part of Congressional District Three.

The Grand Canyon is recognized as one of the seven natural wonders of the world, and is a world heritage site. The Canyon is the major attraction site within the State of Arizona, and one of the top visitor attractions in the entire United States. Annually, the Grand Canyon attracts 2¾ to 3 million visitors, approximately a third of whom are from foreign countries.

Grand Canyon National Park provides a range of ways for those many visitors to enjoy and experience the Canyon; from running miles of the Colorado River through the depths of the Canyon to aircraft sightseeing tours over the park. It is that range of visitor use which has the potential of creating a conflict in how visitors enjoy the park.

Aircraft flights, whether for transportation to the park or for enjoying scenic tours of the park, provide a legitimate means for a large number of visitors to have access to the scenic grandeur of the Canyon which they might not otherwise have. Concerns involving aircraft overflight, whether generated from noise encroachment issues or safety issues need to be addressed. A resolution of those concerns which strikes a balance between accommodating the various types of visitor use and caring for the resources of the park can and should be developed and implemented. A simple solution of the status quo or a total ban of aircraft is not realistic, nor is it practical. Neither is a legislatively imposed resolution.

The 1975 Grand Canyon National Park Enlargement Act included a provision directing the Secretary of the Interior to work with the FAA and the EPA to develop "rules and regulations or other actions as he believes appropriate to protect the public health, welfare, and safety of the natural environment within the park." The development of an aircraft management plan in response to that provision is an ongoing process, and has been for the last 2 or more years, our legislatively addressing this matter, whether or not our actions are predicated on an issue of safety, is premature, and may be based on unsubstantiated information because the management plan process has not been completed. It should be of interest in our consideration of the bill today, that the data developed to make a decision on the management of aircraft within the park is currently under careful review within the Department of the Interior to ensure that as the plan is developed it is done so with information which truly validates both the situation at the park and the management process itself.

I hope that it will also be noted by my colleagues that the National Transportation Safety Board is this week holding an onsite public hearing regarding the tragic mid-air collision last June at the Canyon in an effort to complete the record in its investigation. The NTSB's findings and report on the probable cause of the accident will not be adopted for several months, further illustrating our lack of complete information on the subject of aircraft operations at the Canyon.

As importantly, the FAA is completing the development of a Special Federal Airspace Regulation specifically for Grand Canyon National Park, properly exercising existing regulatory authority to address safety concerns.

Mr. Chairman, while I believe that we do need to address both safety and noise encroachment concerns regarding aircraft at the Grand Canyon National Park, I believe that we are acting prematurely, and creating an unnecessary legislative mandate in an area in which we are not fully prepared to address. Only after such time as the appropriate agencies are unable to find a reasonable balance among visitors use, safety concerns and environmental impacts should we move so hastily. With ongoing efforts in both the Department of the Interior and the Department of Transportation, I do not believe that that time has come, and urge my colleagues to oppose H.R. 4430.

Mr. McCAIN. Mr. Chairman, I yield 1 minute to myself.

I would just like to say that I am pleased that this legislation is on the floor. I would like to emphasize that there is compatability between the air tours and the Grand Canyon. We regulate every aspect of this great natural treasure. We regulate camping, we regulate rafting, and I believe that the time is long overdue for us to regulate aircraft flights over the canyon as well.

I believe working together with the FAA and the Park Service, we will be able to achieve an equitable and reasonable management plan that satisfies all of the interests involved, since we all share the common goal. The preservation of one of the crown jewels of America.

Mrs. BURTON of California. Mr. Chairman, as one who has held a longstanding interest in this issue, I rise in support of H.R. 4430. When I first heard that tourist flights were scheduled over Yosemite National Park, I talked with my colleagues on the Interior Committee to see if congressional action might be necessary to prohibit this hazardous practice. It is unfortunate that the recent tragic loss of 25 lives in an aircrash over the Grand Canyon has compelled us to this action today.

You will hear some very convincing statistics today on the dangers of commercializing the airspace over our national parks. It is shocking to realize that there are 50,000 tourist flights a year over Grand Canyon National Park and that this activity represents one-sixth of the annual air traffic at Washington's National Airport. We all know how busy and congested National Airport is so you can well imagine the intensified impact for a national park area far removed from concentrated urban life.

The impressive natural wonders of our national parks should be protected from the intrusion of airborne mass transit and our park visitors should be protected from the dangers inherent in trying to circumnavigate these often massive and obtrusive natural structures.

The peace and solitude of our national parks is as much a natural resource as the tangible elements of the park environment. This legislation will simply speed the study process along for determining safe altitudes for aircraft flying over our national parks in order to protect the park environment, as well as visitors to park areas. I urge my colleagues to support H.R. 4430.

Mr. McCAIN. Mr. Chairman, I have no further requests for time, and I yield back the balance of my time.

□ 1250

Mr. VENTO. Mr. Chairman, I have no further requests for time, and I yield back the balance of my time.

Mr. PANETTA. Mr. Chairman, I have no further requests for time, and I yield back the balance of my time.

The CHAIRMAN. Pursuant to the rule, the committee amendment in the nature of a substitute recommended by the Committee on Interior and Insular Affairs now printed in the reported bill shall be considered as an original bill for the purpose of amendment and each section will be considered as having been read.

The Clerk will designate section 1.

The text of section 1 is as follows:

H.R. 4430

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. STUDY OF PARK OVERFLIGHTS.

(a) STUDY BY PARK SERVICE.—The Secretary of the Interior (hereinafter referred to as the "Secretary"), acting through the Director of the National Park Service, shall conduct a study to determine the proper minimum altitude which should be maintained by aircraft when flying over units of the national park system. The Secretary of Transportation, acting through the Administrator of the Federal Aviation Administration (hereinafter referred to as the "Administrator"), shall provide technical assistance to the Secretary of the Interior in carrying out the study.

(b) GENERAL REQUIREMENTS OF STUDY.—The study shall identify any problems associated with overflight by aircraft of units of the national park system and shall provide information regarding the types of overflight which may be impacting on park unit resources. The study shall distinguish between the impacts caused by sightseeing aircraft, military aircraft, commercial aviation, general aviation, and other forms of aircraft which affect such units. The study shall identify those park system units, and portions thereof, in which the most serious adverse impacts from aircraft overflight exist.

(c) SPECIFIC REQUIREMENTS.—The study under this section shall include research at the following units of the national park system: Cumberland Island National Sea-

shore, Yosemite National Park, Hawaii Volcanoes National Park, Haleakala National Park, Glacier National Park, and Mt. Rushmore National Memorial, and at no more than 4 additional national park system units, excluding those established by section 201 of Public Law 96-487. The research at each such unit shall provide information and an evaluation regarding each of the following:

(1) The impacts of aircraft noise on the safety of the park system users, including hikers, rock-climbers, and boaters.

(2) The impairment of visitor enjoyment associated with overflights over national park system units.

(3) Other injurious effects of flights over park system lands on the natural, historical, and cultural resources for which the park system units were established.

(4) The values of aircraft flights over park system lands in terms of visitor enjoyment, the protection of persons or property, search and rescue operations and firefighting.

Such research shall evaluate the impact of overflight by both fixed-wing aircraft and helicopters. The research shall include an evaluation of the differences in noise levels within the park system units concerned which are associated with flight by commonly used aircraft at different altitudes. The research shall apply only to overflights and shall not apply to landing fields within, or adjacent to, park system units.

(d) REPORT TO CONGRESS.—The Secretary of the Interior shall submit a report to the Congress within 3 years after the enactment of this Act containing the results of the study carried out under this section. Such report shall also contain recommendations for legislative and regulatory action which could be taken regarding the effects referred to in paragraphs (1) through (3) of subsection (c). Before submission to the Congress the Secretary shall provide a draft of the report and recommendations to the Administrator of the Federal Aviation Administration for his review. The Administrator shall review such report and recommendations and notify the Secretary of any adverse effects which the implementation of such recommendations would have on the safety of aircraft operations. The Administrator shall consult with the Secretary to resolve issues relating to such adverse effects. The final report shall include a findings by the Administrator that implementation of the recommendations of the Secretary will not have adverse effects on the safety of aircraft operations, or if the Administrator is unable to make such finding, a statement by the Administrator of the reasons be believes the Secretary's recommendations will have an adverse effect on the safety of aircraft operations.

(e) FAA REVIEW OF RULES.—The Administrator shall review current rules and regulations pertaining to flights of aircraft over units of the national park system at which research is conducted under subsection (c) and in addition over any other such units at which such a review is determined necessary by the Administrator or is requested by the Secretary. In the review under this subsection, the Administrator shall determine whether changes are needed in such rules and regulations on the basis of aviation safety. Not later than 6 months after the identification of the units of the national park system for which research is to be conducted under subsection (c), the Administrator shall submit a report to Congress containing the results of the review along with recommendations for legislative and regulatory action which is needed to implement any such changes.

(f) AUTHORIZATION.—Effective October 1, 1986, there are authorized to be appropriated such sums as may be necessary to carry out the studies and review under this section.

The CHAIRMAN. Are there any amendments to section 1? If not, the Clerk will designate section 2.

The text of section 2 is as follows:

SEC. 2. FLIGHTS OVER YOSEMITE AND HALEAKALA DURING STUDY AND REVIEW.

(a) YOSEMITE NATIONAL PARK.—During the applicable study and review period it shall be unlawful for any fixed wing aircraft or helicopter flying under visual flight rules to fly at an altitude of less than 2,000 feet over the surface of Yosemite National Park. For purposes of this subsection, the term "surface" refers to the highest terrain within the park which is within 2,000 feet laterally of the route of flight and with respect to Yosemite Valley such term refers to the uppermost rim of the valley.

(b) HALEAKALA NATIONAL PARK.—During the applicable study and review period it shall be unlawful for any fixed wing aircraft or helicopter flying under visual flight rules to fly at an altitude below 9,500 feet above mean sea level over the surface of any of the following areas in Haleakala National Park: Haleakala Crater, Crater Cabins, the Scientific Research Reserve, Halemauu Trail, Kaupo Gap Trail, or any designated tourist viewpoint.

(c) APPLICABLE PERIOD.—For purposes of the subsections (a) and (b), the applicable study and review period shall be the period comprised of the time prior to the submission of the report under section 1 plus a 2-year period for Congressional review thereafter.

(d) EXCEPTIONS.—The prohibitions contained in subsections (a) and (b) shall not apply to any of the following:

(1) Emergency situations involving the protection of persons or property, including aircraft.

(2) Search and rescue operations.

(3) Flights for purposes of firefighting.

(4) Compliance with instructions of an air traffic controller.

(e) ENFORCEMENT.—For purposes of enforcement, the prohibitions contained in subsection (a) and (b) shall be treated as requirements established pursuant to section 307 of the Federal Aviation Act of 1958. To provide information to pilots regarding the restrictions established under this Act, the Administrator of the Federal Aviation Administration shall publish notice of such restrictions in appropriate Federal Aviation Administration publications as soon as practicable after the enactment of this Act.

The CHAIRMAN. Are there any amendments to section 2? If not, the Clerk will designate section 3.

The text of section 3 is as follows:

SEC. 3. GRAND CANYON NATIONAL PARK.

(a) Noise associated with aircraft overflight at the Grand Canyon National Park is causing a significant adverse effect on the natural quiet and experience of the Park and current aircraft operations at the Grand Canyon National Park have raised serious concerns regarding public safety, including concerns regarding the safety of park users.

(b) PLAN.—

(1) SUBMISSION.—Within 30 days after the enactment of this Act, the Secretary, acting through the Director of the National Park Service, shall submit to the Administrator of the Federal Aviation Administration a final plan for the management of air traffic in the air space above Grand Canyon National Park. The plan shall provide for substantial restoration of the natural quiet and experience of the park and protection of public health and safety from adverse effects associated with aircraft overflight. Except as provided in subsection (c), the plan shall contain provisions prohibiting the flight of aircraft below the rim of the Canyon, except for purposes of administration and for emergency operations.

(2) IMPLEMENTATION.—Not later than 60 days after receipt of the plan under paragraph (1) and after notice and opportunity for hearing, the Administrator shall issue regulations implementing the recommendations in the plan unless the Administrator determines that implementing the recommendations would adversely affect aviation safety. If the Administrator determines that implementing the recommendations would adversely affect aviation safety, he shall, not later than 60 days after making such determination, in consultation with the Secretary and after notice and opportunity for hearing, revise the recommendations consistent with the requirements of paragraph (1) to eliminate the adverse effects on aviation safety and issue regulations implementing the revised recommendations in the plan. In addition to the Administrator's authority to enforce such regulations under the Federal Aviation Act of 1958, the Director may enforce the requirements of the plan under such rules and regulations applicable to the units of the national park system as he deems appropriate. The Director shall consider the appropriate use of his existing authorities as they may relate to the licensing of commercial operations in connection with national park units.

(3) REPORT.—Within 2 years after the effective date of the plan required by subsection (b)(1), the Secretary shall submit to the Congress a report discussing—

(A) whether the plan has succeeded in substantially restoring the natural quiet in the Park, and

(B) such other matters, including possible changes in the plan, as may be of interest.

The report shall include comments by the Administrator regarding the effect of the plan's implementation on aircraft safety.

(c) Helicopter Flights of River Runners.—Subsection (b) shall not prohibit the flight of helicopters—

(1) which fly a direct route between a point on the north rim outside of the Grand Canyon National Park and locations on the Hualapai Indian Reservation (as designated by the Tribe), and

(2) whose sole purpose is transporting individuals to or from boat trips on the Colorado River and any guide of such a trip.

The CHAIRMAN. Are there any amendments to section 3?

Are there further amendments to the bill?

AMENDMENT OFFERED BY MR. DORNAN OF CALIFORNIA

Mr. DORNAN of California. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. DORNAN of California: At the end of the bill add the following:

SEC. 4. COLLISION AVOIDANCE SYSTEM.

Section 312(c) of the Federal Aviation Act of 1958 (49 U.S.C. App. 1353(c)), which relates to research and development, is amended by inserting "(1)" immediately after "(c)" and by adding at the end thereof the following new paragraph:

"(2) In carrying out his functions, powers, and duties under this section pertaining to aviation safety, the Secretary of Transportation shall coordinate and take whatever steps necessary (including research and development) to promulgate standards for an airborne collision avoidance system for all United States aircraft, civil and military, to improve aviation safety. The Secretary of Transportation shall promulgate such standards within one year after the date of enactment of this Act. Such standards shall require that such collision avoidance system be designed—

"(A) to give aircraft pilots clear and unambiguous instructions concerning maneuvers to be undertaken or avoided to prevent a mid-flight collision with other aircraft;

"(B) to be totally independent of any ground-based equipment and ground stations and able to function in any remote or other area without the need for communication with ground-based equipment;

"(C) to permit modification of the performance of such system by the pilot in command of the aircraft in which such system is installed at the option of such pilot;

"(D) to prevent the functions of such system being modified in any way by signals sent from any ground-based system or equipment;

"(E) so that such system can be manufactured and sold at a cost which the Secretary of Transportation determines is sufficiently reasonable so that its use on all such aircraft would not impose an unreasonable burden on air carriers and other owners and operators of aircraft;

"(F) so that it shall not be incompatible with the air traffic control system; and

"(G) so that it shall be adequate to protect a small aircraft from a similarly equipped small private or military aircraft.".

Mr. DORNAN of California (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from California?

Mr. VENTO. Mr. Chairman, I do not object to dispensing with the reading, but I reserve a point of order against the amendment.

The CHAIRMAN. Is there objection to the request of the gentleman from California?

There was no objection.

The CHAIRMAN. The gentleman from Minnesota [Mr. VENTO] reserves a point of order.

The gentleman from California [Mr. DORNAN] is recognized for 5 minutes in support of his amendment.

Mr. DORNAN of California. Mr. Chairman, I must take this opportunity because this is a discussion of air safety, far more than a discussion of noise. Although I may vote for this bill because it is a study, I feel it is necessary to take this opportunity to bring to the attention of my colleagues for the umpteenth time and to this Nation, a bill that I have submitted going back 10 years now, on the avoidance of midair collisions.

Now, I am sure some Members will find my next statement so ironic and coincidental as almost begging disbelief; but I have my Air Force form-5 as proof, with a pencil notation, that I was flying over the Grand Canyon on June 30, 1956, in an F-86 Saber jet out of Williams Air Force Base at Phoenix, when I got a call on the Guard channel on my radio for all aircraft in the Grand Canyon area to identify themselves. That tragic midair collision had just happened in which 7 feet were lost off the wing of a United Airlines DC-7 when it cut completely the tail off a TWA constellation, with much loss of life on both sides.

Now, a few years after that, the pilot that had soloed me in an aircraft when I was 16 years of age back in 1950 died in a midair collision over Whittier, CA, when his light plane struck a Navy PV-2 Neptune patrol aircraft.

I find it more than ironic that after submitting a bill for an airborne collision avoidance system, on several occasions while I was a 4-year member of the Science and Technology Committee in the 1970's, that I resubmitted that bill on December 11 of this year and then of all the congressional districts over which a midair collision should happen, on August 31 of last month a DC-9 Aero-Mexico is struck by a Piper Archer aircraft and another collision takes place, this time with great loss of life over my own district.

Now, I went down to San Diego and walked to the horrible ground with the loss of life of 144 people, 12 of them on the ground, in San Diego, before resubmitting my bill again in 1978. That midair collision was in September 1978.

A whistle blower of the highest integrity came to my office shortly after that, Mr. James Pope. Many of you may have seen him on "60 Minutes" last week. They reran a program 5 years old where Mr. Pope made his very serious allegations that the FAA was engaged in a coverup of this whole airborne collision avoidance system.

I know that the gentleman from California [Mr. MINETA] has worked as hard as anybody in the House can work on this issue, so has the gentleman from California [Mr. BROWN] of the Science and Technology Committee, the gentleman from California [Mr. MINETA] being the chairman of the Aviation Subcommittee on Transportation and Public Works under which this bill comes to the floor; but this is the only opportunity, I tell my colleagues, that we have a chance to add to this study of noise, with all the discussion of safety here, a further study to bring to the attention of the American people that for 12 years after RCA, Minneapolis-Honeywell and McDonnell Douglas under the guidance of its chief executive officer, Sandy McDonnell, who lost two of his top test pilots, former military pilots, in a midair collision near St. Louis, that all three of these companies had ready 12 years ago under a reasonable price an airborne collision avoidance system.

Now, please, my colleagues, listen to these statistics. Presently there is an average of about 32 midair collisions occurring throughout this country, most of them small airplanes at local airports that we do not hear about.

If we have to wait for the so-called full implementation of TCAS or BCAS or FAA control systems for another 12 to 14 years, we can expect on the average 448 midair collisions involving over 896 aircraft. If just an average of three people die as a result of these collisions, we are talking about close to 2,700 people who will die needlessly.

Now, of course, statisticians will argue that this is a small number compared to those who die in automobile crashes, 40 or 50,000 a year, or would die in other airplane crashes.

Yes, it is small in a peculiar way relative to other loss of life, but what we are talking about here, my colleagues, is avoidable accidents and avoidable deaths; although there is no reason to believe that out of the 448 anticipated midair crashes at least one is going to involve an airliner and then there will be a lot more people die on the ground, as I lost 9 people in my city of Cerritos on the 31st of last month.

I would ask my colleagues to please accept this amendment, because it is the last chance we will get in the 99th Congress to do something to stop this bureaucratic blockage of an airborne inexpensive collision avoidance system.

The CHAIRMAN. The time of the gentleman from California [Mr. DORNAN] has expired.

Does the gentleman from Minnesota [Mr. VENTO] insist on his point of order?

Mr. VENTO. Yes, Mr. Chairman, I insist on my point of order.

The CHAIRMAN. The gentleman from Minnesota is recognized.

POINT OF ORDER

Mr. VENTO. Mr. Chairman, under the rule of germaneness, rule XVI, clause 7, no subject different from that under consideration shall be admitted under the color of an amendment. The amendment of the gentleman from California [Mr. DORNAN] violates that rule and I must reluctantly insist on my point of order, Mr. Chairman.

The CHAIRMAN. Does the gentleman from California wish to be heard on the point of order?

Mr. DORNAN of California. Yes, Mr. Chairman, I would like to speak to it.

The CHAIRMAN. The gentleman from California is recognized.

Mr. DORNAN of California. Mr. Chairman, I understand the gentleman's objection and I would ask for some help. Under my 5 minutes here, I would like to ask for a colloquy with my good friend and distinguished colleague, the gentleman from California [Mr. MINETA].

The CHAIRMAN. The Chair will advise the gentleman that he cannot have a colloquy during a point of order.

Mr. DORNAN of California. All right, Mr. Chairman, here is what I will ask rhetorically and publicly.

There are very few times we get to take the well or the leadership desks here to fight for directly protecting life. I stand here convinced that if we had been able to pass a bill forcing the FAA to come up with an airborne collision avoidance system back in 1977 when we first had hearings and investigated it or back in 1979 after we were responding to the September 1978 crash of an airliner and a small light plane over southern California, and I might add that every time I go into the cockpit of a large airplane and see the limited visibility I am reminded that the small aircraft at San Diego was 22 degrees below the nose level and in the cockpit of a 727 you can only look 16 degrees down, so these less maneuverable aircraft have the responsibility to avoid the small ones, although the responsibility is with the small ones in that airspace, and yet they are the ones who have even less electronic assistance available to them.

Now, I would ask the gentleman from California [Mr. MINETA] if there is anyway that we can get some kind of a hearing in the remaining 2 or 3 weeks, God forbid that we come back into a special session, so that this 99th Congress, which suffered a midair collision over the Grand Canyon on June 18 does something in this Congress.

Mr. Chairman, I ask the gentleman to withdraw his objection.

The CHAIRMAN. The Chair will advise the gentleman from California that he is still not speaking to the point of order and will ask the gentleman to conclude his remarks on the point of order, without the colloquy or the questions.

The gentleman may proceed.

Mr. DORNAN of California. That is all, Mr. Chairman.

The CHAIRMAN (Mr. PICKLE). The Chair is ready to rule.

The gentleman from California [Mr. DORNAN] has offered an amendment adding a section 4 pertaining to the collision avoidance system.

The Chair has had an opportunity to examine the amendment and it is the opinion of the Chair that the amendment is not germane. The bill before us, H.R. 4430, is a narrow one addressing only overflights over certain national park areas.

The amendment goes to an unrelated subject amending an act not amended by the bill.

Therefore, the Chair sustains the point of order.

Mr. GRAY of Illinois. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I rise at this time to associate myself with the remarks of the gentleman from California [Mr. DORNAN] on aircraft travel safety.

Thirteen years ago as a member of the Committee on Public Works and Transportation, we had before our committee the then Administrator of the FAA, Mr. Kee.

I said to him, "How are you coming on the collision avoidance device research and development?"

He said, "Mr. GRAY, we are just around the corner."

I retired from this body, as many of you know, for 10 years. When I came back, we had the present FAA Administrator, Admiral Engen before our committee a few months ago and I said, "Admiral, how are you coming on the collision avoidance device research and development?"

And believe it or not, he said the same words—13 long years later, "just around the corner."

This year in the Department of Transportation appropriations bill, the subcommittee chairman, my friend Mr. LEHMAN of Florida of the Subcommittee on Transportation has put in the bill this year additional money for T-CAS-1, T-CAS-2, and even T-CAS-3 and accelerated research and development on a collision avoidance system program. The ball is now in FAA's court.

The only reason I take this time now is to state to this body that we all should be rising up and asking the FAA to move forward now that they will soon have more funds in fiscal year 1987 appropriations starting October 1. Thanks.

Mr. DORNAN of California. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, if I could ask my good friend and distinguished colleague, the gentleman from California [Mr. MINETA], to help my frustration a little bit, as a person of responsibility and power, as head of that Aviation Subcommittee, may I ask the gentleman what can we do before this 99th Congress adjourns to light a fire under the FAA? Twelve years of foot-dragging is nothing short of a disgrace.

Mr. MINETA. Mr. Chairman, will the gentleman yield?

Mr. DORNAN of California. I am glad to yield to the gentleman from California.

Mr. MINETA. Mr. Chairman, it is not all just foot-dragging on the part of the FAA. The Air Transport Association is also concerned about the kind of device that is going to be placed in their aircraft.

We have a T-CAS-1, T-CAS-2, and T-CAS-3, as has been explained.

In T-CAS-2, there is one in a Piedmont Airlines aircraft. There are about I believe 20 more that will be installed in United, Republic, and other Piedmont aircraft very shortly; but we are moving ahead with this program.

The Air Transport Asssociation has also been concerned because they want to make sure that what is installed is really in fact going to be the right kind of equipment. There are also some issues about liability.

If there is an aircraft accident as the result of the use of a transponder, the question about liability also ensues; so there has been some concern about that.

I think at this point because of the expressions of concern and because of the Cerritos air crash and other factors, there is a great deal of movement on this and I think we are now taking very large progressive steps.

Again, hopefully with the amount of money that is available in the transportation appropriation bill for R&D and other efforts going on, that we will in fact be further along.

Mr. DORNAN of California. Mr. Chairman, reclaiming my time, I have a report here from an engineer, Mr. Ed R. Gunny, that was written 11 days before the terrible air crash into my district, and I submit this report for the RECORD, so that people reading this will understand my frustration, and I hope that something happens in this area.

The report follows:

WHY NO COLLISION AVOIDANCE EQUIPMENT FOR PILOTS? AN ENGINEER/PILOT'S LAMENT AND REVELATION

(By E.R. Gunny)

Pilots have sought some electronic means by which they can avoid mid-air collisions ever since 1956, when a mid-aid collision between two airliners occurred over the Grand Canyon. By 1967, the Air Transport Association of America set forth performance specifications for such equipment. Briefly, they included the need for a system to be able to operate independently of any ground-based equipment. Also an acceptable design is to be one able to protect all aircraft in all areas, while providing 40-second warnings to any impending threat situation. Today's technology limits such equipment to some form of cooperative inter-aircraft data exchange means. This means that all aircraft must have compatible equipment installed. Thus, there can be only one standard design.

In 1974, designs of three private firms were submitted to the FAA for evaluation. Each met the cited specifications (ANTC-117). It became the job of the FAA to determine which, if any, should be adopted as this nation's standard. The FAA rejected all three, and added the caveat that any such

design, no matter how nearly perfect, would also be rejected. Their reason was that while such equipment satisfied pilots needs, none satisfied requirements of the FAA's air traffic controllers. The given rationale was that once such equipment was installed in aircraft there could be instances when the airborne equipment (ACAS) could give maneuver directives to flight crews that were in conflict with those issued by the air traffic controller. The FAA maintained that this could not be allowed to happen. So, while rejecting private designs, the FAA preempted the Collision Avoidance System (CAS) design field and took upon itself to become the designer of this nation's only collision avoidance system, and its sole judge.

It has been over 12 years now since that decision. If you were to ask the FAA "Why so long?", you might be told that such a design is technically difficult. Added may be the words that they are just completing the design of what is called TCAS III. It is the super-deluxe version affordable by only the largest air lines, and maybe some military types. An earlier version, TCAS II, was ordered by the Department of Transportation to be a National Standard in June of 1984 (Order no. 6367.1). Thus, the FAA says they are practically there and need only to finalize a baseline design called TCAS I. The low-cost version for the little guys. The FAA will also point out that they are now flight testing their equipment in Piedmont aircraft. What you may not be told is that they have been flight testing something for over 5 years now. In the design of any avionics product, be it an aircraft or electronic equipment, flight testing is both an expensive and very inefficient way to accumulate test data. It's generally done only as a last step prior to getting certification. A step taken after a design has passed all lab and analytical tests. In the case of TCAS, in my opinion, this has not been done. Matter of fact, all of the flight testing done now is against aircraft equipped with transponders to be replaced by an entirely different one. Hence, the data accumulated is not really relevant.

Note the development order, TCAS II, TCAS III, then TCAS I. Its a little like designing the middle of a skycraper first, the top next, and the foundation last.

On technical difficulty, we have to ask "Compared to what?" We now enjoy flawless communications with satellites over 22,000 miles away and that accomplishment took less than 5 years. We have witnessed man's travel to the moon and safe return after less than a 7-year effort. Why then is it so hard to provide 2-way radio communications between aircraft less than 6 miles apart? Present day citizen's band radio exceeds this range, and even some of our kid's toy walkie-talkies. No, technical difficulty is not a valid excuse for inability to perform.

One may ask "Why have a collision-avoidance system anyway?" Here's why. If you were asked: "What is the primary objective of any flight you make." What might be your answer? While several things may go through your mind, the primary objective is really survival. Prudence dictates that every possible means be used to ensure a safe trip ever time. Yet, when pilots themselves are asked, many today remain indifferent. "Who needs it, I've flown umpteen thousand hours and haven't had any problem." The truth of the matter is that all pilots need something. For to be sure of no catastrophic collision, every pilot should spend 100% of his time looking for intruders. No pilot can, but electronics can.

Since threats can come from any direction, a pilot should be able to see in all directions about his craft. He can't, yet electronics can. To do the job right, the pilot should be able to look directly in the direction of the sun, and be able to see through clouds, inclement weather and darkness. Again, he can't but electronics can. To put things in perspective, imagine trying to drive your car on the freeway with all windows painted black, save the windshield. You might feel secure just going straight ahead, but would need help in order to be able to change lanes safely. That's the way it is with pilots. They fly virtually blind in all directions except straight ahead. Of course, you as a passenger, would like to think otherwise, but that's the way it is. Sadly, the mid-air collision that occurred between a PSA 727 jet, and a Cessna Model 172 aircraft over San Diego in 1978 is a hard example. There, the jet had the normal complement of 3 pilots, and a 4th jumprider. Air traffic control has advised them of the traffic, and all 4 were searching the sky. A bright sunlit sky that was clear. Because of the limited cockpit visibility, their looking was in vain. Subsequent studies showed that the Cessna aircraft was at a bearing 22° below straight ahead. The pilot's downward visibility was limited to about 16° down. If the PSA jet had a clear transparent nose, or if it had an airborne collision-avoidance system operating then that tragedy would not have occurred. There can be no greater graphic proof that pilots need help than this catastrophe in which so many died needlessly.

Today, pilots enjoy electronics (avionics) in many forms in aircraft. Electronics serve in the capacity of communications, navigation, and aircraft flight control. In each instance, there was initial resistance to change, but once pilots had the convenience provided by avionic equipment they were converted. None today would think of going without any of the equipment they now take for granted. If you think about it, most of the equipment is used only for a portion of the time during a flight. Take for example, a piece of equipment, called an emergency locator transmitter. It is useful only after a pilot has crash landed his craft. Yet, though its usage is most limited, pilots buy them. Collision-avoidance equipment would be something used 100 percent of the time on every flight.

Its greatest use is not in avoiding collisions, but rather in providing the knowledge of traffic location needed in order to safely navigate through the air. Now that the air line companies are changing from 3-man crews to 2-man crews, the need is even greater. For the 2-man crews still have the same in-cockpit chores needed during takeoffs and landings that the 3-man crews had. Here, the collision avoidance equipment could serve as a third man. One who can spend all of his time outside the cockpit. One, never tiring that can provide peace-of-mind to all pilots and their most precious cargo. It would be a third man that you only have to pay for once, and have available on each and every subsequent flight. Thus, such equipment has value. It would enable all flights to be made with less dog-leg vectoring saving both time and fuel costs. With it, traffic spacings between flights could be reduced with safety. This would reduce, and even eliminate some delays. Private aircraft owners would benefit additionally as there could be far fewer restrictions on the little guys. Again, making flying both more efficient and more safe. With the safety improvement, there could be a reduction in the amount of insurance premiums, thus, all-in-all such equipment would qualify as an investment and not as an expense.

Going back to the driving analogy, having such equipment would be like clearing all the windows in your car, and adding lookouts that didn't occupy much space, have much weight nor require much power. In my opinion, there is no present equipment aboard aircraft that pilots would enjoy more than a fully workable, and reliable collision avoidance system. Whether or not we ever see one remains problematical.

One man, James Pope, contends that the FAA is dead set against implementation of any collision avoidance system. Mr. Pope is a former employee of the FAA. While there, he had a chance to see first hand what was going on, and he didn't like it. His going public with the information cost him his job. The reason he gives is that once pilots have their own means of knowing the whereabouts of nearby traffic, they would not need all of the services of the FAA's air traffic controllers. The air traffic controller's responsibilities would be reduced to mainly establishing arrival and departure priorities at terminal areas. Thus, the size and the rate of growth of the FAA would be negatively impacted by collision-avoidance. This is something, Mr. Pope says, the FAA will not voluntarily allow to happen. So that you the reader can better assess the whole story, a short tutorial on designing an aircraft collision avoidance system follows. Though the subject is technical in nature, it is written so as to be easily understood by all.

The work of many engineers over the years has resulted in knowledge of just what information (data) must be exchanged between aircraft in any collision-avoidance system (CAS), and also just how best to use that information. What's left unsettled is just how best to effect the data exchange. Today, the best means remains 2-way radio. A special application of 2-way radio by combination transmitters-receivers called transponders. They function a little like 'active' radar. In operation, each aircraft would periodically (once a second) send out a transmission called an interrogation. Radar would have these transmissions reflect off of aircraft and return to the interrogator as a delayed echo. This is not done here because the strength of the echo would be too low to use, and the echo could not add any intelligence. In the case of the transponder (active radar) the interrogation signal is received by all aircraft within detection range. Its encoded intelligence is decoded telling the receiver what the interrogator's altitude is. If the receiver is within an altitude band of interest (co-altitude ±3400 feet), it is to make a return transmission called a "reply". The reply could be encoded with any desired information. This may be aircraft. ID, altitude, heading, airspeed, color, flight number, or whatever. The replier's range and bearing relative to the interrogator's can be derived from the detected reply by the interrogator's receiver. After a number of such information-exchanging cycles, each aircraft will have compiled a file on all of the aircraft within an area of interest. From that file can be drawn information on whether any may be a threat. Once one is determined to be a threat, then an on-board computer will determine a best course of action and relay guidance instructions to the flight crew. Thus, this is basically how an aircraft collision avoidance system using transponders would work.

Transponder equipment now exists for air traffic control. Here, it is known as the Air Traffic Control Radar Beacon System (ATCRBS). In use, the air traffic control ground stations do the interrogating and the in-range aircraft do the replying. This is only a one-way exchange. For collision-avoidance, all parties would have to participate in both interrogating and replying. The air traffic control stations would have to obtain equipment with which to listen for interrogations, and make reply transmissions. All aircraft would have to add equipment able to make interrogations, and listen for replies. Also, the aircraft owners would have to add another antenna aboard. Right now the single transponder antenna is located on the bottom of the aircraft's fuselage. To be sure of communications with all, a second top-side antenna would have to be added and operation alternated between the two. Just how best to design such a system is the next subject.

In this application of electronics, it is of paramount importance that inter-aircraft communications be reliable. Reliable, even in worse-case traffic conditions. You don't want any erroneous data exchanged, and you don't want to miss any data. These can lead to either false alarms, or missed alarms. Unless a flight crew can totally rely upon their equipment, the equipment will not be used. Again, the equipment is a form of 2-way radio used for inter-aircraft data communications. Like any radio equipment, a receiver can properly handle only one signal at a time. If two or more signals overlap timewise at a receiver, then the full intelligence of all will have been lost. This should not be a problem when only two aircraft are communicating, but could be when there are more. In dense traffic areas around major airports in this country there could be more than 40 aircraft all trying to communicate with one another at the same time and on the same radio frequency channel. Therein lies the problem. How does one assure reliability under circumstances where so many aircraft are tying to talk to each other during the same period of time? The following is a technical discussion that will clarify things and may prove to be quite revealing. Also, from it, you will be able to better judge for yourself just what the FAA intends for us.

Think about 40 people all on a single telephone party line. Periodically each wants to contact each of the others. To do so without interference, only one party can use the line at a time. Put another way, a listener can only understand when he (she) hears one person (signal) at a time. How to maximize the probability that this will be the case? Common sense tells us that each party need minimize the numbers of transmissions made during a certain period of time, and the length of time spent making each transmission should be kept to an absolute minimum. If the telephone line (radio channel) is unused most of the time, then the chances of your interference-free usage will be good. For example, if you want 95% chance of no interference on received signals, then the line (radio channel) should be unused 95% of the time. It's really almost just that simple.

Now let's apply this reasoning to the specific case of an aircraft collision-avoidance system design. Here, we want to make data updates once each second of time. That means that each aircraft in a communications net will make at least one interrogation, and all those detecting interrogations, and flying within an altitude band of interest will reply. Take the example of 40 aircraft within communications range. If each made one interrogation per second, there could be elicited one reply from each of the other 39 aircraft. Thus, the numbers of replies in an update period (one second) would be 40 x 39 = 1560. However, in a typical environment only about two-thirds would be within an altitude band of interest. So, for the 40 interrogations there would be 1040 replies of interest generated. Actually, while a range of interest may contain only 39 other aircraft, the signal detection range is typically twice as far implying four times the area, or 4 x 40 = 160 aircraft. So, rather than just 1040 replies being made within a period of one second, there would be more like 16,960 being made all within one second of time. Note: if the altitude difference between an aircraft detecting an interrogation and the interrogator's altitude exceeds 3400 feet then, according to the ATA, safety is implied, and a reply need not be made. The interrogation message would contain the altitude of the interrogator.

For this example, if these replies were not to overlap at an interrogator's reply message receiver then the time of receipt between any two replies would have to be greater than the time length of each reply. Let's look at a more typical case. This will involve a little arithmetic, but please put up with it as it leads to something.

The FAA has projected that worst-case traffic conditions will have .3 aircraft in each square nautical mile of airspace. An object of a collision-avoidance system is to provide pilots with a 40-second warning time to any detected threat situation. For aircraft flying under 10,000 feet above the ground level (agl), there is imposed a 250-knot speed limit. This means that the highest closing rate between two aircraft around terminal areas would be 500 knots (250+250=500). The distance covered in 40 seconds at this rate is 5.56 nautical miles (6.39 statute miles). Let's make that our maximum range of interest for this example. Now a circle having a radius of 5.56 nautical miles will encompass an area of 97 nautical miles squared. At .3 aircraft per nautical mile squared we would expect 29 in-range aircraft. If only 2/3's of those are within an altitude band of interest about an interrogator, then each would expect to get 19 replies from an interrogation. All of these 19 replies would be received in the time that it would take the radio signal to travel out to the maximum range of 5.56 nautical miles, and return. This is a time that is only 68.6 millionths of a second. Not much time for one reply, let alone 19. If there is to be no overlap of any of these 19 at the interrogator's receiver, how much time should be allowed for each reply? Certainly, it would have to be less than 68.6 divided by 19 = 3.6 millionths of a second. The better answer is that each reply should have a minimum amount of transmission time consistent with the ability to convey all of the intelligence required.

Note, as cited above, while a range of interest is just 5.56 nautical miles, a signal detection range is greater. So the number of communicating aircraft will be more like 4 x 29 = 116, each eliciting 19 replies within the range time of 68.6 microseconds.

Thus, now we can cite what is needed for an optimal transponder system design. All of the participants should be limited to just one interrogation per update period of one second (epoch). From these should be just one reply from only those aircraft within an altitude band of interest. Both the interrogations and the reply transmissions should have an absolute minimum of transmitter-on time. Nothing spectacular here, and it all should make some sense. I believe that you can now realize that since all participants in any data-exchange are free to interrogate randomly, or asynchronously, any more than one interrogation per second by any aircraft would needlessly pollute the radio spectrum, lead to a degraded 2-way link reliability, and cause unwanted interference. Also result in many unneeded replies. Now, having given you the basis for understanding, the following will describe both what is achievable today, and what the FAA intends for us.

Using the same technology we enjoy in our accurate quartz watches, we can encode virtually any message unambiguously as a period of time. One period of time to say one thing, and another different length of time to say something else. Electronics today is good at generating accurate frequencies, and in counting cycles of any frequency. Thus, an optimum design would let us encode messages as a period of time bounded by two transmitted pulses each having a minimum time length. That period of time would consist of some number of cycles of a frequency termed a 'clock' frequency. The clock frequency is chosen so that the time of each cycle represents the desired 'minimum time' length of all generated pulses. In use, there would be one pulse transmitted to denote the start of a message period, and another pulse signifying its end. In a proper system design, there would be no conflict in determining which pulses constituted a message start, and which were representative of a message end. Using two minimum-length pulses to encode messages would represent a way that utilizes an irreducible amount of transmitter-on time. This means could be used for both encoding the interrogation messages, and all reply messages. The time needed for a short pulse is primarily determined by the available radio-frequency bandwidth. The wider the bandwidth, the shorter the pulses can be.

Today, it's easy to encode messages this way, and surprisingly easy to recover pairs of pulses amidst a plurality of such pairs received overlapping timewise, and correctly decode all pairs. This is the only means to encode messages without a serious problem from overlapping. Here, whenever silence is overlapped by silence, you still get silence. In the existing radio channels used by the ATCRBS for air traffic control, each of two frequencies used has a signal bandwidth of 6 million cycles or Megahertz (MHz). One, at 1030 MHz is used for transmitting interrogations. Another at 1090 MHz is used for replies. A minimum time for a pulse of maximum power would be one having a time length of ⅓ of a million of a second (.333 microseconds). Let's see how we would fare using these bandwidths, and our novel pairs of transmitted pulses for message encoding.

The worse case would be the reply case, for where we might have 29 interrogations, we could expect 19 in-range replies, but interrogations don't just go to a range of interest and stop. They continue on with diminishing strength. A detectable range may be one that is twice the range of interest. Or in our example the detectable range would be 11.11 nautical miles. Here, we could expect to elicit 77 replies for each interrogation. The total reply transmitter-on time would be 29 x 77 x ⅔ = 1486.7 microseconds. The usage in the interrogation spectrum would be just 29 x ⅔ = 19.33 microseconds. Notice the disparity. There is far more time

used for replies than there is in generating interrogations. If the two spectrums were combined to form just one 12 MHz band, then each pulse could be halved in time length, and a single wider-band frequency could be used for both interrogations and replies. Doing this would further reduce the usage density of the radio channel and make for better reliability. (another advantage. It costs less to make a single channel transponder than it does for a dual-frequency one). However, in order to discriminate between the two types of messages, some change would be in order. Since there are fewer interrogations than replies, the makeup of the interrogation should be the one altered requiring more time. For example, make the start of an interrogation consist of a pair of closely spaced pulses, and the end of an interrogation also another pair, but a pair having a different spacing. By doing this, we would have increased the number of pulses used to send an interrogation to 4. Look now at what could be accomplished. There would be 29 x 77= 2233 replies of two pulses each for a total of 4466 pulses. In addition to these on the same spectrum would be the 29 interrogations which would require 4 x 29 =116 pulses. A combined total would be 4582 pulses each having a length of ⅛ microsecond. So, the total transmitter-on times would be just 764 microseconds for aircraft communications. If we add numbers for air traffic control operations, we would get a truer picture. A worst case area may be where signals from as many as 40 ATC stations overlapped aircraft signals. To aircraft in such an area, these would appear as just 40 more interrogations and 40 x 77 = 3,080 more replies for a total of 5313 replies, and 69 interrogations. The added added transmission time would be 1053 microseconds. Thus the transmission times of both aircraft and air traffic control stations would be 764 + 1053 = 1817 microseconds out of an available one million microseconds existing during a data update period. This means that the radio spectrum would be unused 99.82 percent of the time, and would be indicative of the 2-way link reliability attainable for this example.

If, instead, operation were to take place on the 30 MHz band centered at 1607.5 MHz., a frequency already allocated by the FCC for aircraft collision-avoidance usage, then each pulse would require only .067 microseconds for a total of 726.8 microseconds. A time so short that the spectrum would be unused for 99.93 percent of the time. One other little facet should be mentioned. In this type of a design, an interrogator's reply receiver need be on only for a period of time needed to hear a reply from an aircraft at the greatest range of interest. That would be a period of time less than 1% of a second. Hence, the reply receiver would be off 99% of the time ignoring all of the replies intended for others. Not so with the FAA's design. The FAA would necessarily have to have its reply receiver on 100% of the time so as to be able to pick up on any new in-range aircraft. This means its equipment would have to have a greater data memory capability, and have to process all replies most of which would be of no significance. Being on for 100% of the time will add to the probability of detecting phantom aircraft, and generating false alarms.

Now this past discussion was given just so that you the reader can grasp a little of what can be done today towards making a most reliable inter-aircraft data exchange means, and the reasoning behind it. Having learned how to make a reliable system, let's look at what might constitute a worst design. First, we would use some message encoding means other than a time type. One that would have all reply messages require a time that is as long as the maximum range time. In our cited example, this would be a time of 68.6 microseconds. By doing this, we could be assured that there would be overlapping interference anytime that there were more than one in-range replier. Next, instead of just one interrogation each second, let's up the count to something like 10 or more each second, and let each interrogation also take an appreciable amount of time. Something like 29 microseconds instead of the .267 microseconds cited above (4 X .067). They wouldn't provide us with any more intelligence, but would serve to further overload the spectrum making sure that no single signal could ever be received by itself. About now you should question "Who in their right mind would do something like this?". Suppose we take a look at the FAA's design, and see.

Initially, the FAA intended to add a collision avoidance function to the existing air traffic control transponder system (ATCRBS). Their thinking was noble if nothing else. Here was an in place, and operating system. Most of the aircraft that fly in controlled airspace are already equipped with such transponders. If it could be made additionally workable as a collision avoidance system, then only those wanting the collision/avoidance function would have to buy something new. This was in 1974, and the intended design was called BCAS, for beacon collision avoidance system. Well, already in dense traffic areas the transponder system was overloaded by too many transmissions being made in response to interrogations made by ground-based air traffic control stations alone. And the ATCRBS reply message requires 20.75 microseconds to complete, a lot more than our attainable .133 microsecond figure. Now, add any interrogations from BCAS equipped aircraft, and you would be exascerbating an already intolerable condition. Yet the FAA tried. Their efforts resulted in a decision to abandon BCAS, and go to a new message format.

Not wanting to have to mandate implementation of new equipment for all, the FAA chose the path of allowing the gradual phase-out of ATCRBS transponder usage, with the replacement transponder designed to be able to operate with either the ATCRBS message format, or the newer message format initially called DABS for discrete address beacon system. The name was subsequently changed to Mode-S, for mode select. Its greatest virtue was the capability of being able to individually interrogate any selected aircraft. This format utilizes what is called pulse position, or pulse-code modulation for reply messages. Such a message consists of transmitted pulses interspersed with period of no pulses according to the encoded message. For interrogations, pulse position modulation is used at the beginning of an interrogation to indentify it as such. A following data segment utilizes what is called bi-phase shift keying to encode the message intelligence. Bi-phase shift keying consists of a continuous transmission with periodic interruptions. The interruptions consist of a complete upside down reversal of the signal's wave structure. The encoded intelligence determines the timing of these interruptions, or polarity inversions. While both of these types of carrier-modulation means are widely used, neither is suitable for this multi-party application simply because they require too much transmitter-on time to send a message.

Now, knowing that the ATCRBS was no longer usable as either an acceptable air traffice control data exchange, or the more pressing collision avoidance data exchange means because of too many interrogations and excessive reply message time, you would think that the FAA's new improved message format would somehow reduce the numbers of required interrogations, and approach the desired minimum time length for all transmissions so as to ensure the best possible 2-way communications reliability. Not so. Their new design maximizes the numbers of interrogations an aircraft would make during each data update period, and has replies lasting a destructively long time.

Recall that an example of a worst possible design would have replies last for an entire range time of 68.6 microseconds? Well, the FAA chose to do just that. Only the digital world, it is better to use numbers that are integral powers of two. Such a number that is less than 68.6 is 64. The next higher number is 120. Please know that the FAA intends that the replacement for the unacceptable 20.75 microsecond reply time of the ATCRBS transponders is to be replies having either a length of 64 microseconds, or a length of 120 microseconds. They both will be used to effect an average reply length that can be greater than the full-range time of 68.6 microseconds. On the number of intended interrogations, rather than just one interrogation per update period for all, the FAA intends that there will be one interrogation for every reply sought, once Mode-S is fully implemented. In the example given earlier, it was shown that as many as 5313 replies would be elicited by 29 aircraft interrogations, and 40 ATC station interrogations. 29+40=69 interrogations which is enough to do the job. Instead of just 69, the FAA would use 5313 interrogations, and the average length of each could be 29 microseconds instead of .133 microseconds, an attainable value. That's 5313×29=154,077 microseconds instead of .133×69=9.2 microseconds for interrogations that a better design would need. More than 16,747 times as much time (154,077/9.2=16,747).

In order to allow continual usage of the ATCRBS and yet add collision avoidance, the FAA intends a complicated arrangement of limits to both the numbers of interrogations made, and the power level of each is to be employed. Employed in equipment now termed TCAS for traffic alert and collision avoidance system. In areas where the numbers of aircraft are low, there will be made not just one ATCRBS interrogation, but as many as 32 during each second of time by each aircraft. As the aircraft density becomes higher, the number of allowed interrogations will be reduced, and also the power so as not to interfere significantly with normal air traffic control functions. So, operations will still be made with dual-frequency transponders, only the new ones must include a dual encoding/decoding means as well. This, so that they can operate compatibly with either the ATCRBS message formats, or the replacement Mode-S message formats. All air traffic control stations will continue to use their mechanically rotating antennas and provide controllers with updates only once every 4 or 9 seconds.

Once all ATCRBS transponders are replaced, and this is now estimated to be sometime after the year 2000, only addressed interrogations are to be employed. To do this, each aircraft must accumulate and continually update a list of all aircraft

within communications range. Addressed interrogations will be a must because of the full-range length of the Mode-S replies. Only one reply can be made per interrogation to be sure of no overlap. While the theory sounds plausible, there are practical limits. Aircraft will have to have antennas both on top of their fuselages, and on the bottom. Today, all ATCRBS antennas are bottom-mounted. The frequencies employed are so high that the radio signals behave much like light. They cannot penetrate metal. Therefore, in certain aircraft attitudes, communications are best made with bottom-mounted antennas to avoid 'shadowing' effects of an aircraft's protuberances. Whenever this is done, there will be an Interference problem from surface-reflected signals. The so-called short 64 microsecond Mode-S message is one that is almost 11.9 miles long (that's how far radio signals will travel in 64 microseconds). This means that anytime two communicating aircraft are flying at less than 31,000 above the ground, a ground-reflected signal will overlap a direct aircraft-to-aircraft one at the receiving aircraft. Thus causing destructive interference. That's one drawback of the lengthy replies of Mode-S. Another is the need to establish and maintain a 'roll-call' list of in range aircraft then make a separate interrogation to each once a second. This will only transfer the problem of excessive replies to one of excessive interrogations. The Mode-S interrogation message is also one having two possible lengths. Like the Mode-S replies not something close to a minimum in time length but times that will either be 22 or 36 microseconds long. They will be susceptible to destructive overlap. Any change in the encoded message of an interrogation by overlap will result in either a wrong aircraft being called, or the wrong information requested. It could also be both.

Let's look at what might be the spectrum usage by TCAS with Mode-S in a worst-case traffic environment. That's one where there will be .3 aircraft in each square nautical mile of airspace. A 40-second range time would be 5.56 nautical miles, and cover an area of 97 square nautical miles. However, as cited earlier, a signal detection range may be twice as far of 11.11 nautical miles. Over this extended range, there could be as many as 116 aircraft trying to communicate with those nearby. If each makes 22 interrogations to those thought to be within an area of interest there will be a total of $116 \times 22 = 2552$ interrogations made and detected by all of the aircraft. All of the 2552 replies generated will likewise be detected by all others. Hence, in such a situation the 2-way communications (interrogator to replier & replier to interrogator) reliability would be on the order of just 40%. Now the FAA is aware of degraded performance that may occur under such situations. What's their fix? Not make a change to improve reliability under these conditions, but simply change the ground rules. Don't provide a full 40-second warning time like the private designs did, and like the pilots want. Cut back both on the numbers of transmissions made, and the transmitter power. This reduces the circle of communications and will result in better reliability. Of course, the pilots may only get 20 second warnings. The FAA, in its infinite wisdom, considers this acceptable. To this writer its another admission of failure. The FAA, in seeing a shortcoming of their design, rather than make a constructive change, resorts to subterfuge. Cheat the pilots, and cheat the flying public. That it will work with these complexities is a fact and herein admitted. That's like saying it will "fly". But like aircraft designer's say, "We can make anything fly, given enough power". In my opinion, the attainable performance of TCAS with Mode-S is not acceptable, and it comes at too high a cost.

For such equipment serving in a life and death situation must itself be without compromise. Not only must it be of optimum design for performance, but it must also include a comprehensive self-test capability. The pilots, depending upon such equipment for safety, must know at all times that the equipment is working properly. Any collision-avoidance equipment, before being accepted, will have to include an automatic self-test capability. This means be able to make a self-test once each second, as it accumulates data once each second. Equipment for usage aboard air liners, or military craft would have redundant capabilities. Anytime a fault is noted in one equipment module, operation would change to the backup unit and the pilot notified of its status. Also, self-test would be made before an aircraft's engine is started prior to flight. If the CAS equipment doesn't work, the aircraft just don't go. Once a system is fully implemented, the air traffic controller could be given the capability to exercise an aircraft's collision-avoidance system before giving that aircraft permission to take off. By doing this, all will know the equipment of others is working properly. Anytime an inflight failure occurs leaving one system completely inoperative, then the flight crew of that aircraft will be responsible for using every other facility available to ensure safety, and would notify the nearest air traffic control station.

Let's talk about costs to implement. A dual-frequency, dual encoder/decoder Mode-S transponder is estimated to cost anywhere from $1,500 to $2,500 without any collision-avoidance function. Add a minimum collision-avoidance function and the price jumps to something like $4,000. The deluxe version known as TCAS III, and planned for air carriers and the military has an estimated cost that ranges from $70,000 to $250,000. A less exotic version known as TCAS II has already been proclaimed by our Department of Transportation to be this nation's standard for collision-avoidance equipment. This was made so in an order (6367.1) issued on June 19, 1984. That's over two years ago. Yet, today there is no air line company using this equipment to enhance safety or improve flight efficiency. No avionics company offers such equipment as part of their standard production line. You ask the FAA why, and might be told is because of no customers. Air line companies can't afford the equipment, general aviation aircraft owners can't either and they don't want it, according to the FAA. They also say that another problem is the reluctance of the International Civil Aviation Organization to accept it. Of course they're reluctant. The whole concept of TCAS/Mode-S makes for a very expensive and very poor collision-avoidance system, and we're expected to wait at least another 14 years for full implementation. Recall the Air Transport Association of America had specified that an acceptable design be on able to provide pilots with a 40-second warning time? Well, the 3 rejected private designs all met this specification in their submissions made to the FAA in 1974. Here today, 12 years later, our FAA will only guarantee 20 seconds with their TCAS design. Why does the FAA feel free to loosen requirements for its design, while holding, at the time, private designs to the 40-second requirement? Especially when a very comprehensive analysis showed that pilots really need this much time in order to make an assessment of their predicament, then respond with a smooth gradual correction. In my opinion, this is just another indication of failure of the FAA's design.

Any new private design utilizing a message-encoding format requirement little transmitter-on time would have no trouble providing a full 40-second warning to all and in all areas. A 40-second warning time without a lot of nuisance, or false alarms by making one change. The FAA intends that all aircraft include an exchange of altitude information. The altitude they have in mind is called pressure altitude. That is simply the present altimeter indicated altitude when the altimeter is adjusted for a standard day pressure (29.92 mm. of mercury). Rather than this, a better parameter to exchange would be that altitude to be attained in the next 40 seconds (future altitude). By making such a change all would have included the effects of their vertical speed. This is easy to do, and would permit threat computers to do a more accurate job of predicting potential collisions with a 40-second lead time.

Getting back to costs. With TCAS estimated to be so costly, most small aircraft owners won't buy, and the FAA says that they don't have to. That's nice, but leaves us with a problem. In any encounter between a TCAS-equipped air liner, and a none-equipped small aircraft, it will be incumbent upon the air liner to always yield the right-of-way to the little guy. This, even though the little guy is the most maneuverable aircraft (almost 85% of the aircraft in this country fall into this category). If a good private design were adopted to replace the FAA's TCAS offerings, the reverse could be true. All aircraft would be required to have collision-avoidance equipment, and at a cost less than that required for one of the FAA's Mode-S transponders. The right design could enable air liners to always have the right-of-way over smaller aircraft. Here's one way of accomplishing that. Added to the data exchange would be aircraft-type identity. Once a threat situation arose between a small aircraft and an air liner, the equipment in the small aircraft, recognizing a threat from an air liner, would provide a warning with a 44-second lead time. The equipment in the air liner would always delay a warning by 4 seconds if the offending aircraft is recognized as a small one. By doing this, the small aircraft would have 8 seconds in which to start a correction. Most of the time the small aircraft would have started a correction making one by the air liner unnecessary. This is certainly the more equitable way to go. Now think about midair collisions.

Presently there is an average of about 32 mid-air collisions occurring in this country per year. If we have to wait for so-called full implementation of collision avoidance for 14 more years, then we can expect 448 midair collisions involving 896 aircraft. If each had an average of just 3 passengers who died as a result of the collision, then we're talking about close to 2,700 people who will die needlessly. Of course, statisticians can argue that this is a small number compared to those who will die in other aircraft, and automobile accidents. Yes, its small but in this case we are talking about avoidable accidents, and avoidable deaths. Also, there is no reason not to believe that out of the 448

anticipated midairs at least one will involve an air liner and a lot more people both in the aircraft, and on the ground may have to die needlessly.

Let us look at managing immediate full implementation of a good design. A good private design. If operation were to be made on a single frequency rather than on two as is now the case, then there could be simplification of hardware and a cost savings. Since a new design need have only one message encoding and decoding means another savings would be realized. All-in-all today such a design could include a reliable collision avoidance function as well as serve in air traffic control and sell for the same price as today's ATCRBS transponders. These transponders are priced at under $1000 for three different models. The FAA argues that aircraft owners can't afford the equipment. Let's say that may be so, but how about if each is given a subsidy? Not a taxpayer subsidy but another. Here's what sounds practical to me. There are about 220,000 aircraft in this country that would need such equipment. If we were to give $1000 to the owner of each stipulating that the money need be spent on implementing collision-avoidance equipment, then the total outlay would be 220 million dollars. That would be enough money to outfit all aircraft with minimum equipment.

Right now in a trust fund known as the Airports and Airways Trust Fund there is a balance of 7 billion dollars. Of this, 4 billion is committed to support several programs. This leaves an uncommitted surplus of 3 billion dollars. An embarrassingly high surplus. This money has come from taxes applied to aircraft owners. It is their money. Though not now available for such usage, a change in legislation could make it available. Thus, minimum equipment could be made available to all with an expenditure that is really less than 8% of monies accrued for which there is no other need. Money not paid directly by taxpayers, but monies collected from aircraft owners. There could be no better expenditure for 100% of this money let alone just 8%.

Another factor of concern to the FAA is in phasing-in another system. What happens during a transition period? Since it has been shown that a single-frequency operation is both practical and most cost effective, it makes sense to go to that. Leave present air traffic control as it is, and phase in collision-avoidance equipment on another frequency. Use the frequency of 1607.5 MHz already allocated by the FCC for such usage. Then, allow a period of time for all aircraft owners to install equipment. That period of time to be one that is reasonable from both a equipment production schedule, and an installation schedule. Once that established period of time has elapsed, no unequipped aircraft would be allowed to fly over populated areas, or in controlled airspace. Such a transition period may be a period of three years. That means someone buying equipment today would not be able to enjoy full usage of it for three years. The FAA has stated that this should not be. However, any worthwhile undertaking of man requires an initial investment, then time to complete. This whether it be a bridge, freeway, or building. Here, collision avoidance is no different.

Concluding.

Pilots need the help available from electronic traffic surveillance (collision avoidance), and the flying public deserves it. Today a most efficient collision avoidance system can be made and full implementation realized in as little as 3 years after approval of design and start of production. It would be most cost effective and could easily be adopted as a world standard. Being equipment able to effect flight savings to all, all would soon accept it both for the savings and also for the freedom of more unrestricted flight coupled with better safety. Cost cannot be an objection when there is money in the Airport and Airway Trust Fund that could be used to initiate implementation. Time to implement cannot be an objection for all have already waited over 20 years for something. One more thing. Mention was made of the fact that private avionics engineers were participating in TCAS development as members of the Radio Technical Commission on Aeronautic's (RTCA) committee No. 147. Please know that this committee includes members that are engineers from Japan, England, Belgium, France, and Russia. If the American people can't come up with a design worthy of being adopted as a world standard, you can bet somebody else will. I argue that that shouldn't and needn't be. Also, this point should be clearly made. There is no suggestion here that all of the work that has been accomplished over the years by so many be entirely discarded. No charge need be made in the information to be exchanged. No change need be made in just how best to use the information. Only change the message encoding means. Only change from Mode-S to something else that's both a more efficient means of encoding data, and one that would be less costly to implement. Keep TCAS, but get rid of Mode-S as the data exchange format.

You have been reading something critical of an agency of the United States government. Something written by just one man. About now you should question why such a story hasn't come from one of the nation's Avionics firms. After all, they would be the ones to profit more by developing a design worthy of becoming first a U.S. standard, then ultimately a world standard. You talk to them looking for corroboration of what has been given here, and you may get either a "no comment" or something else. That something else may be the logic that they aren't "pioneers". Speculating in a new field in risky, and rather than gamble, they would rather see someone make a design, then participate in producing that design. Get their share of the market rather than going for the big plum. That's one view, but there is another more ominous one. Today, all Avionic firms need to have their products approved by the FAA. You get the FAA mad at you for any reason, then you might find approval a little hard to come by. In my opinion, its simply a question of intimidation. If the FAA wants the whole collision-avoidance design pie, the FAA gets the whole pie, and the public be dammed.

This discussion would not be complete without looking at another order already made by the department of transportation. That is their order number 6365.1A issued on January 3, 1983. Its subject is: U.S. National Aviation Standard for the Mode Select Beacon System (Mode-S). It describes the purpose of the order to establish Mode-S as the new beacon system to replace the ATCRBS. Two paragraphs of that order bear some study, and they are give here.

"4. Background.—a. It was recognized in a study conducted for the Department of Transportation in 1968, that improvements would be required in the Air Traffic Control Radar Beacon System (ATCRBS) to support air traffic control through the 1990's. Also recognized was the need for a data link system to support enhanced automation with sufficient capacity to meet traffic growth through the same period.

"c. In December 1981 the concept was modified to remove all ground based collision-avoidance functions and associated complexities reducing cost substantially. The name was changed to Mode S at that time to be consistent with the international name adopted for these systems."

Paragraph 4a says that there is a need for enhanced automation. One way to enhance automation at all Air Traffic Control Stations is to add a collision-avoidance function to the equipment at each station. Think about the job of the air traffic controller. It's both dull, and repetitive yet carries an awesome responsibility. It's a job far better suited to a machine (computer). With a good collision-avoidance system providing good reliable data and at an update rate of once a second, a computer could essentially take over the job completely. While a controller tries to assess the safety of one aircraft out of maybe 100 displayed on his screen, the computer could check all within the same period of time. Should a safety problem arise between any two, the computer could both alert the traffic controller and provide him with directions to give to the flight crews of each affected aircraft.

Paragraph 4c in removing all collision-avoidance functions wipes this out, and I read this as saying: "We can't make it work reliably so let's just cut it out". We have to ask why. Why if their design is so good as to become the national standard, why if it's good enough for aircraft, why not good enough for air traffic control stations? If it's too complex, and too costly for a ground station, wouldn't the same equipment be too complex and costly for an aircraft? Especially a small general aviation aircraft? In my opinion, this is another admission of failure. The FAA's collision avoidance cannot be added to the air traffic control stations equipment because the data is neither reliable enough, nor available at an acceptable rate. If we were to go to a new private design. That new design could also be used by the air traffic control stations. They could throw out their mechanically rotated antennas used for operation and replace them with a fixed omni-directional one that could be used for interrogations. With this, each station could then get good data, and have it available at at least once a second. Hence, having it available for a computer to use in assisting traffic controllers. Of course, to use such an antenna, the reply message format must be one of a short transmission time. The cited optimum figure given in this document would permit air traffic control stations to make omni-directional interrogations and have a 34-foot range resolution. This means that aircraft only have to differ in range by a 34-foot length in order to be separately identified. And 34 feet is less than the length of all airliners.

Thus the picture seen by one engineer. One who is not trying to sell just one design, but one who has tried to make the point that the work of the FAA lends credence to the allegations made by Mr. Pope that the FAA really doesn't want to ever see any such equipment implemented. Either the FAA's engineers aren't very smart, or they are. If they're not, then they should be taken out of the design effort. If they are, and they have been deceiving the public, then they should be taken out of the design effort, and also removed from the public's

payroll. It is my opinion, after many years of watching them spinning their wheels, that it's just like Mr. Pope says. They just don't want to see any collision-avoidance equipment water down the monopoly they now have on air traffic control. Not any sooner than they have to. I'll argue that if the FAA were taken out of the CAS design picture, this Nation's avionics engineers would immediately step forward with a number of designs all of which would be substantially better than TCAS/Mode-S, cost a lot less, and be made available sooner. Designs for equipment able to provide protection 100 percent of the time whereas air traffic controller must time-share their services. Services that a flight crew may not have when they are needed the most.

Today airline companies are having trouble making ends meet. General aviation business has declined over 80 percent. Partly because of high fuel costs and high product liability costs. Partly because of ever increasing air space restrictions reduces the value of flying. The equipment being discussed here can help both. Can make commercial flyng more profitable, and private flying less costly and safer. Since it is a product that can save all money, while providing benefits of flight efficiency and safety, there is no reason not to believe all aircraft owners would go for it once shown a good package, and a good price. Pilots expressed their needs in 1967. Three firms, Honeywell, RCA, and McDonnell-Douglas, had designs meeting all specifications ready in 1974, over 12 years ago. How much longer should pilots, and the flying public, have to wait? How many more need die before action is taken? Action to get an agency of the Federal Government out of unfair competition with private industry. Private industry that can do the job both a lot better, and a lot quicker. I say that time for change is now. Change that will help both pilots and air traffic controller. Beyond that, just this.

It's true that the probability of mid-air collision involving an airliner is low today. Yet, in the game of large numbers, the event of low probability will occasionally occur. Commercial flying is a game of large numbers, thus each of us has to ask ourselves these questions. "When will it occur?" "How many may die?" "How close to home will it strike?" and, "What could I have done to prevent it?" Mr. Pope has done his part, and is still trying. By this paper I am trying. Now it's your turn. How about helping effect change? Change to help yourself and all those dear to you.

[Press release from Government Accountability Project, June 18, 1985.]

WHISTLEBLOWER CHARGES NEEDLESS MIDAIR COLLISIONS—FAA COVERUP TO PROTECT R&D BOONDOGGLE

A former Federal Aviation Administration ombudsman today charged that FAA has permitted hundreds of needless deaths over the last 10 years by failing to certify an inexpensive, proven device to backup air traffic controllers in avoiding midair collisions. The reason was that approval of the collison avoidance device would obviate the need for FAA's own Research and Development program into the same problem, according to a "whistleblowing disclosure" filed today with the Office of the Special Counsel at the Merit Systems Protection Board. But FAA's version still hasn't been developed. As Pope explains, "Ten years, $125 million in R&D, and 548 deaths later, we still don't have a backup device to protect us when the controllers make a mistake." Pope's charges come just as FAA is about to test the latest version of its program, known as Total Collision Avoidance System (T/CAS).

The stakes are high both in terms of public safety and economics. Pope and many industry leaders say that an air-based backup system is needed, because that approach guarantees an independent check on electronic failures or human errors in the existing ground-based air traffic control system. The Honeywell Corporation developed such a device, known as the Aircraft Separation Avoidance System (ACAS), in the early 1970's. After a four year, congressionally mandated study, on December 16, 1975 an internal FAA study concluded that the Honeywell model was available for immediate implementation and met all agency objectives but should be rejected. The study committee explained that if Honeywell's model were approved, FAA's own R&D program for a backup collision-avoidance device no longer would be necessary.

Unfortunately, FAA's version is ground-based, which leaves it vulnerable to the same flaws of the controller system it is backing up. A 1977 report for FAA by the MITRE Corporation concluded that the air-based ACAS could have prevented all 228 conceivably avoidable midair collisions, while two ground-based FAA models could have prevented only 190 and 2, respectively. FAA has denied the report's existence to Congress. Since the secret 1975 decision, 548 passengers have died in midair collisions, many of which were avoidable. "There is no decent excuse, for the avoidable accidents," declared Pope's attorney Thomas Devine, legal director of the Government Accountability Project. "These Americans were sacrificed at the altar of FAA's R&D budget."

It's an expensive altar. In the last ten years FAA has thrown nearly $125 million in taxpayer funds after the ground-based system, which still has not been implemented. "The wasted R&D funds are only the beginning," explained Pope. "It will cost another $7-8 billion to construct all the new ground terminals necessary for T/CAS to function, even if it worked."

GAP, a non-partisan, public interest whistleblower organization, took the case, according to Devine, because "Mr. Pope's experience is a classic case where the government exists to benefit itself, not the public. Cutting this boondoggle out of the budget would not hurt anyone except the bureaucrats. The only thing we accomplish by continuing FAA's research is to risk another aircraft tragedy."

GOVERNMENT ACCOUNTABILITY PROJECT,
Washington, DC, September 10, 1985.

Hon. ELIZABETH DOLE,
Secretary of Transportation, U.S. Department of Transportation, Washington, DC.

DEAR SECRETARY DOLE: I am writing on behalf of our client, Mr. James Pope, in regard to a current Department of Transportation (DOT), Office of Inspector General (OIG) investigation of the Federal Aviation Administration (FAA). The Office of the Special Counsel (OSC) referred to you, under 5 U.S.C. §§ 1206(b) (3) and (4), Mr. Pope's whistleblowing allegations of wrongdoing by the FAA in its ongoing midair collision-avoidance research and development program. The OIG has been conducting the investigation ordered by the Special Counsel.

We recently learned that the OIG has not engaged in a good faith, reasonable effort to investigate Mr. Pope's charges. As the attached affidavit clearly shows, the OIG has merely organized previous FAA denials of Mr. Pope's allegations to match up with his current charges. The OSC did not order a cursory comparison of pre-existing documentation; the OSC ordered an investigation based upon its assessment that there was a "substantial likelihood" that the information brought forward by Mr. Pope disclosed improprieties. The OSC referral could not have occurred if the previous FAA denials had credibility.

5 U.S.C. § 1206(b)(4)(B) requires you to include "a description of the conduct of the investigation" in your written report to the OSC. The information that we currently possess shows that the OIG has not conducted an investigation. Pulling old reports from a file and resubmitting them to the Special Counsel under a new cover letter does not qualify as an investigation.

We request that you look into this matter before completing your report to the OSC, and seek an extension of time under 5 U.S.C. § 1206(b)(3)(A)(ii) in order to assure that the DOT conducts a thorough, good faith investigation into Mr. Pope's allegations, as required by law.

Sincerely,

THOMAS DEVINE,
DONALD APLIN,
Counsel for Mr. Pope.

Mr. VENTO. Mr. Chairman, will the gentleman yield?

Mr. DORNAN of California. I yield to the gentleman from Minnesota.

Mr. VENTO. Mr. Chairman, I appreciate the gentleman's concern, and I understand the importance that this issue has to the district that he represents and really to all of our districts with regard to air safety.

I just want to explain to the gentleman that early on, the Interior Committee in terms of dealing with these oversite flights over parks did examine some of the different issues in terms of look-down radar, transponders, and other types of technology that could in fact help avoid these types of midair collisions, because clearly that was something that came up and was brought to our focus of attention, the terrible loss of life that occurred after our hearings had really begun on dealing with the issue that we have before us.

The decision was to defer that and to permit the Committee on Public Works and Transportation, especially the subcommittee of the gentleman from California [Mr. MINETA] and others, to deal with that issue so that we could narrow the focus of this. It is an important issue that the gentleman raises, but we are trying to deal with a more limited focus with this, and I appreciate the gentleman's comments and his understanding of the matter.

Mr. DORNAN of California. Reclaiming my time, Mr. Chairman, in no way did I accept the gentleman's point of order as indicating not having equal concern with me for air safety, and I just hope that the gentleman understands my frustration that this seemed

to be the only vehicle to discuss this and move it forward on a priority basis.

We lost seven people in the space shuttle *Challenger,* and look at the focus of concern there. We lost 9 people on the ground alone, 70 in the air, combining the two airplanes over my district and on the ground in my district, and I want to see the same focus and concern on getting an airborne collision avoidance system. I am still not convinced that the T-CAS is anything except a complementary system. I want to see redundancy.

The CHAIRMAN. The question is on the committee amendment in the nature of a substitute.

The committee amendment in the nature of a substitute was agreed to.

The CHAIRMAN. Under the rule, the Committee rises.

Accordingly the Committee rose; and the Speaker pro tempore (Mr. GRAY of Illinois) having assumed the chair, Mr. PICKLE, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 4430) to require the Secretary of the Interior to conduct a study to determine the appropriate minimum altitude for aircraft flying over national park system units, pursuant to House Resolution 533, he reported the bill back to the House with an amendment adopted by the Committee of the Whole.

The SPEAKER pro tempore. Under the rule, the previous question is ordered.

The question is on the amendment.

The amendment was agreed to.

The SPEAKER pro tempore. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

The SPEAKER pro tempore. The question is on the passage of the bill.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. SENSENBRENNER. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum if not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 378, nays 12, not voting 41, as follows:

Mr. DORNAN of California changed his vote from "yea" to "nay."

So the bill was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. VENTO. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on H.R. 4430, the bill just passed.

The SPEAKER pro tempore (Mr. GRAY of Illinois). Is there objection to the request of the gentleman from Minnesota?

There was no objection.

PERMISSION FOR SUBCOMMITTEE ON INTERGOVERNMENTAL RELATIONS AND HUMAN RESOURCES OF THE COMMITTEE ON GOVERNMENT OPERATIONS TO SIT TODAY DURING 5-MINUTE RULE

Mr. WEISS. Mr. Speaker, I ask unanimous consent that the Subcommittee on Intergovernmental Relations and Human Resources of the Committee on Government Operations be permitted to meet during the

5-minute rule on H.R. 2482 this afternoon.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

MAKING REPAYABLE ADVANCES TO THE HAZARDOUS SUBSTANCE RESPONSE TRUST FUND

Mr. WHITTEN. Mr. Speaker, I ask unanimous consent for the immediate consideration of the joint resolution (H.J. Res. 727) making repayable advances to the hazardous substance response trust fund.

The Clerk read the title of the joint resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Mississippi?

Mr. CONTE. Mr. Speaker, I reserve the right to object.

Mr. WALKER. Mr. Speaker, will the gentleman yield?

Mr. CONTE. I yield to the gentleman from Pennsylvania.

Mr. WALKER. Mr. Speaker, I just want to confirm for the record that what we are doing here is taking money that was previously appropriated in this year and transferring it into the Superfund trust fund so that it has sufficient money with which to operate; but we are not coming up with any new dollars, and there is no dificit add-on involved in this particular appropriation bill.

Mr. CONTE. Mr. Speaker, the gentleman is absolutely right.

Mr. Speaker, I rise once again in support of this joint resolution on Superfund.

As I explained in great detail during Tuesday's debate, when we had first attempted to bring this up, what we are trying to do here is save about $600 million in Superfund appropriations. That's $600 million that we appropriated last November but that we will lose if we don't pass this resolution.

Let me emphasize for my colleagues that this action provides no new budget authority and no additional outlays. None. It simply transfers in a manner of speaking the $600 million already in the Superfund account to the trust fund where it can be used when we have a Superfund reauthorization enacted.

We are trying to address a technical problem here, but it is not a small one. We can't afford to lose $600 million because of a technicality. The Superfund Program can't afford to lose it, either. Lee Thomas—the Administrator of EPA—will tell you that. He's been pinching pennies for over a year waiting for a reauthorization bill. The Office of Management and Budget, and the General Accounting Office recognize that if there is no cash balance in a trust fund during the year of an appropriation, then the appropriation expires. That is the situation we are facing with the Superfund trust fund. That fund is broke. If new taxing authority and reauthorization is not enacted by September 30—12 days from now—the $600 million we have already appropriated will vanish.

Now, perhaps some of our conferees on the reauthorization bill can assure us that they will have a new bill enacted in 12 days. I haven't received any such assurances. But, as a member of the Appropriations Committee, my interest is to ensure that these funds are available as we intended them to be for the Superfund Program, whenever it is resuscitated.

Even though Superfund is gasping right now, none of this $600 million is available for expenditure under the provisions of this bill. It is fenced off. We still need the taxing authority and the reauthorization before a penny of this money can be spent. The same fence applies to the $861 million in our 1987 bill passed on Friday.

If we lose the $600 million, there's no way we'll be able to replace it in our 302(b) allocation. The big losers are going to be all of our communities with Superfund sites.

I don't like these bandaid approaches to maintaining one of the most vitally important health and environmental issues of our time. I regret that our Appropriations Committee must take this action today. But we have no choice.

I hope that my colleagues will support this resolution, and urge our friends on the Superfund conference to complete action on the reauthorization bill.

Mr. CONTE. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

The Clerk read the joint resolution, as follows:

H.J. RES. 727

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That language under the heading "Environmental Protection Agency, Hazardous Substance Response Trust Fund" in Public Law 99-160, as amended by Public Law 99-270 and Public Law 99-411, is further amended by deleting "$702,000,000 shall be derived from the Hazardous Substance Response Trust Fund and $198,000,000 shall be derived from advances from the general fund of the Treasury to the Hazardous Substance Response Trust Fund to be repaid in accordance with section 223(c)(3) of Public Law 96-510 and notwithstanding section 223(c)(2)(D) of Public Law 96-510: *Provided,* That none of the $150,000,000 made available by Public Law 99-270 shall be available for obligation after May 31, 1986: *Provided further,* That of the additional $48,000,000 made immediately available, $15,000,000 shall be obligated by September 30, 1986, for continuation of ongoing remedial and removal site work and $19,000,000 shall be used only to continue ongoing contracts and to replace contracts for essential services:" and inserting in lieu thereof "$102,000,000 shall be derived from the Hazardous Substance Response Trust Fund and $798,000,000 shall be derived from advances from the general fund of the Treasury to the Hazardous Substance Response Trust Fund to be repaid in accordance with section 223(c)(3) of Public Law 96-510 and notwithstanding section 223(c)(2)(D) of Public Law 96-150: *Provided,* That none of the $150,000,000 made available by Public Law 99-270 shall be available for obligation after May 31, 1986: *Provided further,* That of the $48,000,000 made available by Public Law 99-411, $15,000,000 shall be obligated by September 30, 1986, for continuation of ongoing remedial and removal site work and $19,000,000 shall be used only to continue ongoing contracts and to replace contracts for essential services: *Provided further,* That none of the additional $600,000,000 advanced to the Hazardous Substance Response Trust Fund by this joint resolution shall be available for obligation until Superfund taxing authority is enacted:".

The SPEAKER pro tempore. The gentleman from Mississippi [Mr. WHITTEN] is recognized for 1 hour.

Mr. WHITTEN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, this resolution will take care of what is essentially a technical problem in regard to the Superfund issue.

At the end of this month there will be about $600 million remaining of the 1986 Superfund appropriation, which EPA has not obligated because the trust fund is out of money. The Appropriations Committee intended these funds to be carried over into 1987—and we specifically provided that the funds "remain available until expended."

However, both OMB and GAO recognize that if there is no cash balance in a trust fund during the year of the appropriation—the appropriation expires. That is exactly the situation we face in Superfund—if new taxing authority and reauthorization is not enacted before September 30, $600 million will be lost on October 1.

This resolution will take care of the problem. It will permit the $600 million to be advanced from the general fund to the Superfund trust fund—so that it can be carried over into 1987. The action provides no new budget authority and no additional outlays. Finally, language has been included to "fence" these funds so that EPA cannot make any obligation until after taxing authority has been enacted.

This $600 million is essential to provide for an expanding Superfund program in 1987 and 1988. The 1987 HUD bill provides $861 million, assuming substantial funds would carry over. If this $600 million is lost, it cannot be replaced within our 302 allocation. So the Superfund program will suffer in 1987 and beyond.

Without a doubt, the Superfund program is now suffering from a severe shortage of funds. However, the solution must be a long-term reauthorization bill—not another bandaid. Most members of there authorizing committees and supporters of Superfund believe that making additional funds available at this point would backfire and actually work to undermine or delay passage of reauthorizing and tax legislation.

This will in no way breach the $8.5 billion authorization total. This concerns the other side of the ledger—and the Appropriations Committee's problem in preserving the budget authority to provide the levels of funds anticipated in the legislation. We will not exceed the $8.5 billion total for Superfund during the 1987-91 period.

It is my understanding that this has been cleared with the affected authorizing committees, on both sides of the aisle. I am told that all parties to this are in agreement that this needs to be done.

Mr. FLORIO. Mr. Speaker, will the gentleman yield,

Mr. WHITTEN. I yield to the gentleman from New Jersey.

Mr. WHITTEN. Mr. Speaker, I urge the adoption of the joint resolution and I yield back the balance of my time.

The joint resolution was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

URGENT SUPPLEMENTAL APPROPRIATIONS FOR EMERGENCY ASSISTANCE TO THE PHILIPPINES

Mr. WHITTEN. Mr. Speaker, I ask unanimous consent for the immediate consideration of the joint resolution (H.J. Res. 732) making urgent supplemental appropriations for the fiscal year ending September 30, 1986, for emergency assistance to the Government of the Philippines.

The Clerk read the title of the joint resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Mississippi?

Mr. WALKER. Mr. Speaker, I reserve the right to object.

I do so, Mr. Speaker, in order to understand the procedure here. We are asking for consideration only. Immediately following the gentleman's request, we will in fact have debate time on the bill and there will in fact be a chance to vote yes or no on the bill; is that correct?

Mr. Speaker, I yield to the gentleman from Mississippi [Mr. WHITTEN].

Mr. WHITTEN. Mr. Speaker, may I say I expect to yield to the gentleman from Wisconsin [Mr. OBEY], chairman of the Subcommittee on Foreign Operations, and he will be in control of the time and the handling of the bill. I intend to yield my time to the gentleman from Wisconsin [Mr. OBEY].

Mr. WALKER. Further reserving the right to object, Mr. Speaker, I just want to make certain what kind of procedure we are establishing here. I do not particularly want us to proceed on this bill under the objection rule. I would prefer to see us go to a regular consideration of the bill.

It is my understanding that what the gentleman has asked for is consideration only. That will be perfectly acceptable with this gentleman, but I do not want us to either pass the bill by unanimous consent, nor do I want us to operate under the objection rule for the debate on the bill.

□ 1335

Does this gentleman understand what your request is?

Mr. WHITTEN. I understand that will be done.

Mr. WALKER. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore (Mr. GRAY of Illinois). Is there objection to the request of the gentleman from Mississippi?

There was no objection.

The Clerk read the joint resolution, as follows,

H.J. RES. 732

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the following sums are appropriated, out of any money in the Treasury not otherwise appropriated, to supply urgent supplemental appropriations for the fiscal year ending September 30, 1986, namely:

BILATERAL ECONOMIC ASSISTANCE

FUNDS APPROPRIATED TO THE PRESIDENT

AGENCY FOR ECONOMIC DEVELOPMENT

ECONOMIC SUPPORT FUND

For an additional amount for the "Economic Support Fund", $200,000,000 to be made available only for the Philippines: *Provided,* That such amount shall be obligated and expended prior to October 1, 1986: *Provided further,* That such amount shall be made available as a grant cash transfer, *Provided further,* That section 524 of the Foreign Assistance and Related Programs Appropriations Act, 1986 and section 634A of the Foreign Assistance Act of 1961 shall not apply: That such funds shall be made available not withstanding section 10 of Public Law 91-672 and section 15 of the State Department Basic Authorities Act of 1956.

The gentleman from Mississippi [Mr. WHITTEN] is recognized for 1 hour.

Mr. WHITTEN. Mr. Speaker, I yield 1 hour to the gentleman from Wisconsin [Mr. OBEY].

Mr. KEMP. Mr. Speaker, will the gentleman yield?

Mr. OBEY. I yield to the gentleman from New York.

Mr. KEMP. I thank the gentleman for yielding.

Mr. Speaker, as the ranking minority member of the subcommittee upon which the gentleman from Wisconsin is our chairman, he does plan, I hope, to yield half the time to the minority?

The SPEAKER pro tempore. The gentleman from Wisconsin [Mr. OBEY] is recognized for 1 hour.

Mr. OBEY. Mr. Speaker, I yield 30 minutes of that time to the gentleman from New York [Mr. KEMP], the ranking member of the subcommittee.

The SPEAKER pro tempore. Without objection, the gentleman from Wisconsin [Mr. OBEY] may yield 30 minutes.

There was no objection.

Mr. KEMP. I thank the gentleman for yielding time.

At this point I yield such time as he needs to my friend, the gentleman from New York [Mr. SOLOMON] in order that he may make his speech in opposition immediately.

The SPEAKER pro tempore. Without objection, the gentleman from New York [Mr. SOLOMON] is recognized for such time as he may consume.

There was no objection.

Mr. SOLOMON. Mr. Speaker, if the gentleman would yield, I am not prepared to make my opposition remarks at this time. I would prefer to have the gentleman go ahead. I wanted to make sure that those of us who are in opposition and did not object to this unanimous-consent request do have ample time to make our points.

Mr. KEMP. Mr. Speaker, let me say to my colleagues that I very much appreciate the gentleman from New York [Mr. SOLOMON], as well as the gentleman from Pennsylvania [Mr. WALKER], allowing us to bring this bill to the floor under unanimous consent.

So, at this point I would defer to my friend, the gentleman from Wisconsin [Mr. OBEY] to present the case, and then I reserve the balance of my time.

The SPEAKER pro tempore. The gentleman from New York [Mr. KEMP] reserves the balance of his time.

The Chair recognizes the gentleman from Wisconsin [Mr. OBEY].

Mr. OBEY. Mr. Speaker, I yield myself 8 minutes.

Mr. Speaker, as I think the membership understands, earlier today we heard a tremendously moving speech by the new President of the Philippines, President Aquino.

I may have heard a more eloquent speech on the floor of this House in the 17 years that I have been here, but if I have, I cannot remember what it was.

She laid out the moral foundation for her position attacking the economic problems of the country, attacking the military problems of the country, and I think did so in a way which drew on the best traditions of American history.

I know of no recent event worldwide that has been more thrilling to anyone who is concerned with the expansion of democracy around the world than to see the abusive regime of the previous Philippine President replaced by this one, after a magnificent display of dedication to democratic principles on the part of the Filipino people.

After that event, I had been asked on a number of occasions if we could not provide additional financial assistance to the Philippines in the fiscal year 1987 appropriations bill. I tried to explain to people that because of the requirements of Gramm-Rudman and the limitations placed on us by the Budget Act pursuant to Gramm-Rudman changes which were enacted last year, that we simply did not have any room in the budget for fiscal year 1987 to provide some additional assistance to the Philippines and that I could not support additional assistance if it did not come from some other place.

I was then asked why not support putting in the continuing resolution additional financial assistance for the Philippines for fiscal year 1986? The problem with that would have been that in my judgment the continuing resolution is probably not going to become law before the expiration of this fiscal year. Ideally it ought to, but if we follow our past track record we will probably get that continuing resolution to the President, at best, on midnight the day before the fiscal year expires, and I suspect it will have a lag of a day or so.

That would mean that, if moneys were expended under that continuing resolution, they would be scorekeeped by CBO as actually having occurred in fiscal year 1987, and that would mean that we would breach the Gramm-Rudman ceiling for fiscal year 1987.

So at the suggestion of a number of parties, what we are trying to do on a bipartisan basis is to respond to the moving and eloquent statement that Mrs. Aquino made this morning in a way which does not damage the commitment that I strenuously feel to abide by the budget ceilings for fiscal year 1987.

As you know, there is a different set of rules which applies as far as Gramm-Rudman is concerned for fiscal year 1986. The technical ceiling for that year has already been breached, it has been breached a long time ago. So we really do not face that specific problem.

So what we are doing here today is bringing an emergency supplemental up which provides $200 million in fiscal year 1986 economic support funds for the Philippines. This resolution provides that funds must be obligated and expended in this fiscal year so that it would not affect Gramm-Rudman ceilings for 1987.

This will provide immediate assistance to the Philippines to help meet their debt repayment problems. It will be provided by way of direct budget support. It follows the authorization bill that passed the House on August 11.

At that time you may remember that I indicated on the floor that, while I would support the authorization bill, I could not guarantee under the processes then being contemplated that we could actually provide the assistance to the Philippines.

This is the only way that I know of that we can provide additional assistance which I deeply believe is in the national interest, our national interest, in a manner which will actually get to them.

I believe that any other process would simply hold out a false promise when in fact we probably could not deliver because of procedural impediments which lie in the way.

I would like to make one other point. I do not believe that this additional assistance will do anything except assist the Aquino government on the margins. That is all it will do. I think we have to face the fact—and here the gentleman from New York [Mr. KEMP] and I are in significant although not total agreement—I think we have to face the fact that whether we are talking about the Philippines or whether we are talking about Latin America, that it makes no sense to be following policies which require these countries to repay to American and other banks all or most of the assistance which they get in foreign aid simply to repay past loans. And I would suggest, therefore, that until we actually establish as national policy and until we can get greater cooperation from the IMF in changing the manner in which we and they are trying to bring austerity to these areas, until we can manage to fine tune that program in a better way than we are doing it today, we will not really address the central economic problem, and therefore, we will not really address the central social problem that any of those countries face.

All we will be doing is to be dealing on the margins as best we can with the limited tools available. I think that is what we ought to do today.

Mr. FASCELL. Mr. Speaker, will the gentleman yield?

Mr. OBEY. I yield to the gentleman from Florida [Mr. FASCELL], the chairman of the Committee on Foreign Affairs.

Mr. FASCELL. I thank the gentleman for yielding.

Mr. Speaker, I simply want to associate myself with the remarks of the gentleman from Wisconsin in toto, in pointing out the entire problem as it relates to this specific request.

I also wanted to express the appreciation of the Committee on Foreign Affairs for the cooperation that we got from the chairman of the Committee on Appropriations, from the distinguished gentleman from Wisconsin, the chairman of the subcommittee, and from the ranking member, Mr. KEMP, and Mr. CONTE, who is the ranking member, the leadership on both sides for proceeding in this fashion.

I want to emphasize again it is the only way that we can get the funds if they are going to do any good in this fiscal year because there is no way to get them in 1987. This is really an urgent matter.

I agree with the gentleman that it is in our national interest, and I hope we will get an overwhelming vote of support on this bill.

The SPEAKER pro tempore. The time of the gentleman from Wisconsin [Mr. OBEY] has expired.

The Chair recognizes the gentleman from New York [Mr. KEMP].

Mr. KEMP. Mr. Speaker, I appreciate again my friend from New York's extraordinary courtesy in allowing us to bring to the floor this historic opportunity to send a signal that this House, which Mrs. Aquino called the home of democracy—my colleagues, when she gave that speech she said she was here in the home of democracy. In my view what we are doing today is sending a very strong signal not only to her but to her fledgling democratic government that we are partners in the promotion of democratic governments around the world. I would suggest on a bipartisan basis we do all we can to quickly respond to the very urgent appeal that she made for support from the United States of America.

Again I want to thank my colleagues.

Today would give us a memorable moment, that is she gave us a memorable moment when she came before us and suggested the type of plans that she has for the Philippines. She once again reiterated her friendship for the United States of America.

Let me tell you we have a big stake in the freedom and the independence and the democratic progress of the Philippines. My friend from New York, Mr. SOLARZ, has made it very clear, and those of us on this side of the aisle have made it very clear that there is no substitute, there is none in the western Pacific, no substitute in the western Pacific for the Philippines. We need them. They obviously need us. We have made great progress and certainly her speech today was a testimony to the inspiration of this system that we call democracy in America, to her government. She talked about common ideals. Now, I have discussed this, I want to say to my friends on the Republican side of the aisle, with Mr. LOTT, who is going to support it, Mr. BROOMFIELD, our ranking member on the Committee on

Foreign Affairs, Mr. CONTE, my leader on the Committee on Appropriations and my good friend, we have discussed this in the Democratic Party leadership. So I would hope that there would be unanimity, if not unanimity at least some unity today on passing this urgent supplemental and help Mrs. Aquino deal with those fundamental economic problems that are causing, in large part, this insurgency.

While I am on the subject of insurgency, let me make one last footnote: let me say to my conservative friends we spent money yesterday to help an anti-Communist movement in southern Africa, in Angola; we spent $100 million, over time, to our anti-Communist friends in Nicaragua, Central America; we supported Afghanistan, as well we should. Here we have a legitimate government, a legitimate anti-Communist, pro-Western government that is making economic reforms with an eye toward free enterprise and strong resistance to the spread of communism in the southern, western Pacific.

I would suggest this would be a highly important effort that we are making on behalf of freedom and democracy around the world.

Mr. Speaker, I yield such time as he may consume to the gentleman from Michigan [Mr. BROOMFIELD], the ranking minority member of the Committee on Foreign Affairs.

The SPEAKER pro tempore. Without objection, the gentleman from Michigan [Mr. BROOMFIELD] is recognized for such time as he may consume.

There was no objection.

□ 1350

Mr. BROOMFIELD. Mr. Speaker, I do want to join the gentleman from New York [Mr. KEMP], and also compliment the gentleman from Wisconsin [Mr. OBEY], and all the others, Mr. FASCELL, Mr. SOLARZ, Mr. LEACH of Iowa, and Mr. CONTE.

This is extremely important. I think anyone who had the privilege of sitting here today and listening to Mrs. Aquino understands the importance of this particular bill before us.

Mr. Speaker, I urge the passage of this particular measure.

Mr. KEMP. Mr. Speaker, I yield such time as he may consume to the gentleman from New York [Mr. SOLOMON].

The SPEAKER pro tempore (Mr. GRAY of Illinois). Without objection, the gentleman from New York [Mr. SOLOMON] is recognized for such time as he may consume.

There was no objection.

Mr. SOLOMON. Mr. Speaker, I will be brief.

Mr. Speaker, I did not object to this matter being brought on the floor, although I should because it cannot even be amended.

But let me just say this. There is nobody who respects and admires and loves the Filipino people more than this gentleman right here, and I would do anything in my power to help them become a shining light of the free world.

But let me tell you what we are doing. We met privately with Mrs. Aquino in the Foreign Affairs room not more than an hour ago, and many serious questions were posed to Mrs. Aquino. I do not know if we should even be discussing them here in this open meeting at this particular time.

But let me just say this. We have need right now in repairs and maintenance to Subic Bay and Clark Air Force Base in the Philippines of more than $1 billion. We need to start that repair and maintenance yesterday, not tomorrow, not next year or the year after.

When the question was posed to Mrs. Aquino, who I have a deep respect for and who built up my own confidence in her when she spoke today, we asked her if she could commit her own personal feelings to renewing those base agreements of the Philippines. She said in answer, very sincerely, that she would start the negotiations in 1988.

Ladies and gentlemen, if we have to replace Clark Air Force Base and Subic Bay by moving it to Guam or some other place at some future time, we have to start that yesterday. That is a $6 billion expenditure. How can we sit here and commit another $200 million on top of the $500 million, half a billion dollars, that we have already given the Philippines this year alone, how can we do that when we do not even have that money, and without any kind of a personal commitment that, yes, she will support those bases, and it is only a question of how much they will charge?

Mr. Speaker, I yield such time as he may consume to the gentleman from Georgia [Mr. RAY], who is on the Armed Services Committee and can speak to this matter.

The SPEAKER pro tempore. Without objection, the gentleman from Georgia [Mr. RAY] is recognized for such time as he may consume.

There was no objection.

Mr. RAY. Mr. Speaker, I just want to commend the gentleman for those fine remarks. I posed that question to Mrs. Aquino, and we do support her and wish her well. I am going to support this aid today.

But I will tell you that the Armed Services Committee has taken out this year $72 million of the military construction budget simply because of the uncertainty of sending those dollars to an area where we will not be. We do need to spend $1 billion there in the next 5 years.

I asked Mrs. Aquino, as the gentleman has so well pointed out, that she needs to send us a signal to give us some idea if we are going to be able to stay there and to maintain those bases.

So I ommend the gentleman for bringing that up. I do think that we need to not be jerked around in this particular area. We need those bases. But if we are not going to be able to move forward with some certainty, then we need to know if we are going to be moving at least 6,000 jobs to Guam sometime in the next 3 years.

Mr. BROOMFIELD. Mr. Speaker, will the gentleman yield?

Mr. SOLOMON. I yield to the distinguished ranking member of the committee.

Mr. BROOMFIELD. Mr. Speaker, as long as we are discussing this issue, it ought to be made very plain that Mrs. Aquino did not give any indication one way or another, but said that as long as the bases contract right now goes to 1989, she thought 1988 was a reasonable time to make that decision and she wanted time to give some thought to it.

Mr. SOLOMON. Mr. Speaker, I am not going to use up all of the time, because I know there are other people who want to speak.

But let me just say this. This is an urgent supplemental that is brought before us with less than 2 weeks to go before the end of the fiscal year. There is no way that this money can even be appropriated and handed over to the Philippines and spent during this 2-week period. If we are going to enact this today, then we are going to be coming right back here in 2 weeks asking for the same thing all over again. That is the reason to rush it through today. It is not going to work. We are wasting this money, and we should be using this as a bargaining chip on a very friendly basis for setting up the renegotiation of our bases and getting that commitment now on behalf of the free world.

Mr. Speaker, I reserve the balance of my time.

Mr. OBEY. Mr. Speaker, I yield 7 minutes to the gentleman from New York [Mr. SOLARZ].

The SPEAKER pro tempore. Without objection, the gentleman from New York [Mr. SOLARZ] is recognized for 7 minutes.

There was no objection.

Mr. SOLARZ. Mr. Speaker, I thank the gentleman for yielding this time to me.

Mr. Speaker, in a way, the very fact that this bill is now before us is almost as miraculous as the peaceful democratic revolution which took place in the Philippines several months ago.

I want to pay very special tribute to the leadership on both sides of the aisle, the Speaker, the majority leader and the whip, the minority leader and the minority whip, for their willingness to facilitate the consideration of this legislation under a unanimous-consent procedure.

I also want to pay tribute to our extraordinarily distinguished chairman of the Appropriations Committee, who fought with Douglas MacArthur in the Philippines, and who, as a result of the adoption of this legislation, will rank second in the hearts of the Filipino only behind General MacArthur.

I want to pay special tribute to the chairman of the Subcommittee on Foreign Operations of the Appropriations Committee, the gentleman from Wisconsin, who had the idea to strike while the iron was hot and who was the one who advanced the suggestion in the wake of President Aquino's speech that we bring up this bill today if we could get unanimous consent to do so.

I want to pay tribute to my very, very dear friend from New York [Mr. KEMP] who, over the course of the last several months, has worked assiduously to cultivate support in the Appropriations Committee and among all of our colleagues for the adoption of this supplemental appropriation, because he understood in a way more than almost anyone else how much the adoption of this legislation would advance America's national interests.

I want to pay tribute to the gentleman from Michigan, the distinguished ranking minority member of the Foreign Affairs Committee [Mr. BROOMFIELD], who has been with us all the way and whose support has been so helpful.

I would be remiss if I did not point out the essential role played by the ranking minority member on the Asian and Pacific Affairs Subcommittee, the gentleman from Iowa [Mr. LEACH], whose support for this supplemental helped to ensure a bipartisan majority in favor of the authorizing legislation.

And last but not least, and I do not want to leave out too many of our colleagues, my dear, dear friend, the chairman of the Foreign Affairs Committee [Mr. FASCELL], whose willingness to take the ball and run with it this afternoon to get the support of all the relevant factors, has made it possible.

Let me also say a word about my other good friend from New York [Mr. SOLOMON], who opposes this legislation and who will probably vote against it. I want to thank the gentleman for at least letting us consider it. We worked together long and hard on the Philippines over the last several months. We have not always agreed on how to deal with the problems that face us in that part of the world but, without exception, the gentleman has invariably accommodated the concerns of the majority and has permitted the process to go forward without obstructing it in ways which he would have been perfectly free to do. For that I am very grateful.

Now let me just say a word or two about the substance of this bill. This may well be one of the most significant votes we cast in this session. We have an opportunity this afternoon to send a message to the people of the Philippines that we support democracy. The heady work of deposing a dictatorship is behind us, but the hard work of sustaining democracy has just begun.

Let me tell you that Corazon Aquino may well be the last best hope for democracy in the Philippines. If she fails, the Communists stand poised, ready, willing and able to take over. And if they do so, it will be a political tragedy for the people of the Philippines and a strategic disaster for us. It is in our fundamental national interest to strengthen the hand of this courageous woman who came before us earlier today.

Let me tell you, my friends, the single most important factor in determining the success or failure of democracy in the Philippines will be the ability of the new Government to revive the declining economy of that country which was ravaged by a decade of crony capitalism and corruption. Our willingness to provide these additional funds at this time will constitute a resounding vote of confidence on the part of the Congress and of the American people in the ability of the new Government of the Philippines to cope with those problems, and substantively the aid will be important as well.

Let me say to my friend from New York this is coming in the form of budgetary assistance. If it passes the House today, I think the support is there to get it through the Senate as well, and all we have to do then is write the check for $200 million to the Government of the Philippines before the fiscal year is over. It is technically feasible.

Some of our colleagues express some concern about the bases. Those bases are, of course, important. They are the most important military facilities we have in the world anywhere outside the continental United States.

□ 1400

But we all understand that Mrs. Aquino faces a very delicate political situation and problem at the present time. Let me say that if we want to make sure that we stay in those facilities and that we can continue to utilize them, the single most significant thing we could do would be to approve this legislation today. The good will it will generate in the Philippines will greatly facilitate a successful conclusion of the negotiations.

Let me say I heard what President Aquino said to our committee. Sometimes you can accomplish more with a wink than a handshake. I heard her say that she will be looking to conclude these negotiations in a way which is compatible with the interests of both our countries, and that was enough for me, and I think it is enough for most of our colleagues at the present time.

Mr. KEMP. Mr. Speaker, will the gentleman yield?

Mr. SOLARZ. I yield to the gentleman from New York.

Mr. KEMP. I thank the gentleman for yielding.

Mr. Speaker, I just want to associate myself with the understanding that the gentleman received from his discussions with Mrs. Aquino. I received the same impression, and I heartily associate myself with his outstanding remarks.

Mr. SOLOMON. Mr. Speaker, will the gentleman yield?

Mr. SOLARZ. I yield to the gentleman from New York.

Mr. SOLOMON. I thank the gentleman for yielding to me.

Mr. Speaker, I really am glad the gentleman brought it up. I know he is sincere, but the time may come when you and I may have to go back to the Philippines on behalf of whoever the President of the United States is at that time and remind everyone of that situation.

Mr. SOLARZ. I will be happy to go with you. Let me say that sincerely.

Mr. Speaker, I just want to say in conclusion when President Aquino finished her stirring address this morning, the distinguished majority leader of the other body said to her. "Madam President, you hit a home run." Without missing a step, President Aquino responded, "I hope the bases were loaded."

Let me tell you, Cory, in the ninth inning of the seventh game of the World Series you hit a grand slam.

Mr. SOLOMON. Mr. Speaker, I yield 1 minute to the gentleman from Massachusetts [Mr. CONTE].

The SPEAKER pro tempore. Without objection, the gentleman from Massachusetts is recognized for 1 minute.

Mr. CONTE. I thank the gentleman for yielding me this time.

Mr. Speaker, I rise in strong support for this urgent supplemental appropriation of $200 million in economic assistance for the Philippines.

By making this timely response to a most moving and convincing appeal to the joint session this morning by President Corazon Aquino, Congress and the people of the United States are sending a material signal of support for the democratic process and

freedom in the Philippines. We are sending that signal to all parties, both in and out of that country.

Freedom and democracy deserve and need monetary support at this time. The Philippines are presently burdened with an external debt of $26 billion. They are fighting an insurgency. They are trying to correct years of graft and neglect.

The United States has recently provided $300 million in economic support funds, but this additional assistance is needed now. The House passed the authorization bill for this $200 million on August 7, and the specific amendment for the Philippines passed by a vote of 320 to 76.

I trust that this appropriation will pass by at least as large a margin.

Mr. OBEY. Mr. Speaker, I yield myself 4 minutes.

Mr. Speaker, I would just like to ask the chairman of the Budget Committee one question. I think it is important that the membership understand what the implications of this legislation would be for the fiscal 1987 Gramm-Rudman situation in which we find ourselves.

It is my understanding that the way this measure is drafted, there is in fact no problem in terms of Gramm-Rudman limitations for fiscal 1987.

I yield to the gentleman from Pennsylvania [Mr. GRAY] for his response.

Mr. GRAY of Pennsylvania. I would say to the gentleman from Wisconsin and chairman of the Foreign Operations Committee that he is correct.

If the House decides to pass this legislation and if the President signs it into law, it will not affect 1987 deficit targets and therefore will not be added to the goal that must be met in order to comply with Gramm-Rudman, the threshold of 144 to 154.

Mr. OBEY. The second question I would ask is this: Does this run into any Gramm-Rudman impediment for fiscal 1986? I have been assuring them that it does not because there was a different set of ground rules established for the first year of Gramm-Rudman.

I yield to the gentleman for his response.

Mr. GRAY of Pennsylvania. Under the present Budget Act which incorporates the Gramm-Rudman law of 1985, there is a cap for total aggregate deficit for 1987. There is no such cap for 1986. If this bill were debated and passed and signed into law, it would not affect 1987. The impact would be on 1986.

Mr. KLECZKA. Mr. Speaker, will the gentleman yield?

Mr. OBEY. I yield to the gentleman from Wisconsin.

Mr. KLECZKA. I thank the gentleman for yielding.

Mr. Speaker, I think I understand how this expenditure of $200 million will have no effect on 1987. But I was under the impression that we are running a deficit for 1986 also, and regardless of what the effect is on Gramm-Rudman, does this appropriation increase the deficit for 1986?

Mr. OBEY. I do not think there is any question that it would increase the deficit for 1986. The judgment you have to make is whether in a trillion-dollar economy it is a more important consideration for us to be concerned about a decimal point change in the deficit situation or the shoring up of our national interests by assisting the Aquino government to get through some very difficult days in its first year in office.

Mr. KLECZKA. If the gentleman will continue to yield, with that being said, nevertheless I think the 1987 fiscal year is upon us. If in fact these dollars are so direly needed, which I probably admit they are, I think we should have the wherewithal to look in that 1987 either foreign aid appropriation or other appropriations around here and cut back sufficiently to make up those additional $200 million.

I agree with the bulk of the speakers today. The speech we heard this morning by President Aquino was very stirring, but the sad part this afternoon is that we are legislating with our heart instead of our head.

The gentleman from New York indicates that on the way out of town if this resolution is expedited she could possibly pick up the check and leave. My question is: Will we have time to go to the bank and borrow the money first?

I hate to slow down a stampede, my fellow Members, but clearly this adds to the deficit. If in fact it is needed, which I agree it is, let us look for it in the 1987 dollars. Clearly, to increase the deficit today when I have to say "no" to my cities and towns and counties through shared revenue is not the way to legislate.

Let us legislate with our heads, not our hearts.

Mr. OBEY. Mr. Speaker, I do not think I need to apologize to anyone in this body in terms of my insistence that we scale back foreign assistance requests in the coming year rather than having to take it out of farmers and take it out of cancer research and take it out of student aid.

I have made the largest percentage cuts in the administration requests of any appropriations subcommittee chairman. We have cut that budget to the extreme and as a result OMB is indicating that they will veto the bill as it now stands. For the first time in history they are saying they are going to veto the bill because it does not spend enough money. So with all due respect to the gentleman from Wisconsin, I think this gentleman has indicated clearly his intent to see to it that we follow fiscal stringency in 1987. Not one dime is going to come out of revenue sharing because of this action today. Not one dime is going to come out of education. Not one dime is going to come out of domestic expenditures. It is correct that the deficit for fiscal 1986 will be increased. That is a judgment that every Member is entitled to make for himself, but it is not correct to suggest that revenue sharing is endangered because of this act or any other domestic expenditure in fiscal 1987. That is simply not the fact.

Mr. SOLOMON. Mr. Speaker, I yield such time as he may consume to the gentleman from Iowa [Mr. LEACH].

The SPEAKER pro tempore. Without objection, the gentleman from Iowa is recognized for such time as he may consume.

Mr. LEACH of Iowa. I thank the gentleman for yielding time to me.

Mr. Speaker, President Aquino and the people of the Philippines have inscribed a new chapter in the history of nonviolent political change.

The myth that developing countries have less of an interest and less of a stake in the democratic process than mature Western democracies was punctured this year in the Philippines. The courage demonstrated by the Philippine people demands our attention and commands our respect.

For citizens to stand up and vote for a candidate whose only weapon was her convictions and then sit down before the tanks of the certified winner whose only claim to legitimacy was his control of the vote count may be unprecedented in human history.

Hitherto armies have been designed to protect people, not vice versa. But when Filipinos of all ages responded to the request of the church-controlled radio station to become a human dike between the elite palace guard and elements of the professional military who questioned the integrity of the election process, Stalin's sneering query as to how many divisions the Pope controlled was definitively answered: more than any autocrat.

For the moment at least, the widow of the martyred hero Benigno Aquino stands tall as a modern day Joan of Arc.

President Marcos found that it was simply impossible to loot a people and at the same time advance their welfare.

The economic and political infrastructure of the Philippines collapsed because the moral fiber of the leadership of the country itself collapsed. Corruption bred cynicism and the attendant poverty of opportunity for the masses bred an irrepressible demand for change.

In his wanton theft of the financial resources of his people, Ferdinand Marcos lost the moral capacity to govern. In his theft of the ballot box, he lost all stamp of legitimacy. Marcos' house of illegitimate wealth and power, therefore, had to fall and the United States had no responsible option except to recognize the legitimacy of Cory Aquino's assertion of authority and support the fledging democracy being reestablished in the Philippines.

Now that the politics of the Philippines appear to have been righted, the bigger chal-

lenge of righting the economy and dealing with the Communist insurgency lies ahead. To change the Government has taken great courage; to turn the economy around and address the insurgency will take great perseverance. The world community has a responsibility to help an extraordinary people address an extraordinary problem. This resolution deserves our support.

Mr. SOLOMON. Mr. Speaker, I yield 2 minutes to the gentleman from New York [Mr. GILMAN].

The SPEAKER pro tempore. Without objection, the gentleman from New York is recognized for 2 minutes.

There was no objection.

□ 1410

Mr. GILMAN. Mr. Speaker, I am pleased to rise in strong support of this supplemental appropriation for emergency assistance to the Government of the Philippines for fiscal year 1986 in order to provide some $200 million in immediate assistance to that Government.

In her moving appearance before today's joint session of Congress, Corazon Aquino, the President of the Philippines, eloquently reminded us that we have "spent many lives and much treasure to bring freedom to many lands that were reluctant to receive it. Here we have a people who want it by themselves and need only help to preserve it."

Mr. Speaker, I urge my colleagues to respond, with wholehearted support, to Cory Aquino's invitation to join with the Philippine people as they build their new democracy. Let us be generous in our efforts in helping them to become another beacon of freedom throughout the world.

Mr. OBEY. Mr. Speaker, may I inquire as to how much time is remaining on each side?

The SPEAKER pro tempore (Mr. GRAY of Illinois). The gentleman from Wisconsin [Mr. OBEY] has 11 minutes remaining and the gentleman from New York [Mr. SOLOMON] has 17 minutes remaining.

Mr. SOLOMON. Mr. Speaker, I yield 1 minute to the gentleman from Wisconsin [Mr. ROTH].

The SPEAKER pro tempore. Without objection, the gentleman from Wisconsin [Mr. ROTH] is recognized for 1 minute.

There was no objection.

Mr. ROTH. Mr. Speaker, yes, President Aquino gave a very excellent speech today, but is it worth a quarter-billion-dollar honorarium? We, the American people have been very generous to the Philippines. We have given them over half a billion dollars this year.

I would like to help all countries. I would like to help all the people throughout the world, but the fact remains that we have big, big, big deficits in our country and we have not addressed those deficits.

When we have a balanced budget, then maybe legislation like this is appropriate. But first, we must sweep in front of our own door.

As long as we have not balanced our budget, we have an obligation to our own people and to our own problems first for a change.

I appeal to you to let cool heads prevail. Do not let the emotions of the moment carry away your better judgment. If a half billion dollars will not buy good will, three-quarters of a billion dollars will not, either.

Let us think of our people and our problems first for a change.

Mr. SOLOMON. Mr. Speaker, I yield 3 minutes to the gentleman from Pennsylvania [Mr. WALKER].

The SPEAKER pro tempore. Without objection, the gentleman from Pennsylvania [Mr. WALKER] is recognized for 3 minutes.

There was no objection.

Mr. WALKER. Mr. Speaker, President Aquino is a great lady; she is a great advocate of democracy; she gave a magnificent speech on the floor today. No one could have better made the case for her country than President Aquino.

Now we are called upon to respond, and we do so immediately. How do we respond? We respond with $200 million of 1986 deficit add-on. No prioritization. We are not prioritizing the spending in any way. We did not hear Mrs. Aquino and say that her case was so persuasive that we should readjust our spending priorities.

No. We in this bill simply call for more deficit. What is that deficit for? It is deficit for more foreign aid.

I remember very well a few weeks ago when we had Contra aid out here on the floor and some of the very people who are speaking here came to the floor and said we could not have $100 million, not of new money, but of transferred money, for the freedom fighters, the courageous freedom fighters in Nicaragua, because we needed that money for our farmers and for our students and for our elderly and for all of these people. We had to have all kinds of controls on that money.

But, no, today we are coming to the floor; we have got no transfer; we have got no controls. We have simply got more deficit for more foreign aid.

I cannot vote for this measure for that reason.

If you want to reprioritize the money to get the money for this purpose, I will consider that. But we have an obligation to our own people to be responsible with their money and the debt that we incur on their behalf.

I recognize that we want to respond emotionally to a magnificent speech that we heard today and to do this is to respond exactly that way. But this bill is wrong as it relates to our obligations to our taxpayers.

I urge a "no" vote.

Mr. SOLOMON. Mr. Speaker, I yield 1 minute to the gentleman from Indiana [Mr. BURTON].

The SPEAKER pro tempore. Without objection, the gentleman from Indiana [Mr. BURTON] is recognized for 1 minute.

There was no objection.

Mr. OBEY. Mr. Speaker, I yield 2 minutes to the gentleman from New Jersey [Mr. TORRICELLI].

The SPEAKER pro tempore. Without objection, the gentleman from New Jersey [Mr. TORRICELLI] is recognized for 2 minutes.

There was no objection.

Mr. TORRICELLI. Mr. Speaker, the point has been raised as to whether we are acting today with our heads or with our hearts. Let me suggest to my colleagues that we are acting with both.

With our hearts because we reach out to the Philippine people in this critical moment in their history, trying to restore their democracy and to lead struggling people around the world to understand that in the struggle between freedom and communism, America will continue to provide leadership; but also with our heads, knowing that this is not an investment in the government as it was in the Marcos dictatorship; that more than democracy has been restored. Mrs. Aquino has broken the corruption, the cronyism. This is an investment in a sound Philippines. But also with our heads because we recognize another choice.

The question is not whether we provide assistance today or not at all, but whether we invest in a sound democracy in the Philippines today, in peace in the Philippines, or rather have to invest years in the future in war in the Philippines, in increasing insurgency in the Philippines.

No investment could make more sense than today, $200 million, lest we have to fight again tomorrow in a growing insurgency out of control in the Philippines.

I urge an affirmative vote, to vote for peace, stability, democracy, indeed, for our own security, as much as the security of the Philippines.

Mr. SOLOMON. Mr. Speaker, I yield 2 minutes to the gentlewoman from New Jersey [Mrs. ROUKEMA].

The SPEAKER pro tempore. Without objection, the gentlewoman from New Jersey [Mrs. ROUKEMA] is recognized for 2 minutes.

There was no objection.

Mrs. ROUKEMA. Mr. Speaker, I rise in opposition to this proposal today, in strong opposition.

Let us be clear about what we are talking about. We are not debating who has more respect for Mrs. Aquino. We are not debating who has more concern about the future of that fledg-

ling democracy. We are talking about a procedure here that is clearly going to add to our budget deficit.

We are talking about juggling the books, so to speak. We are going to put it on this year quickly and then see what we are going to do about it next year.

I will not go back to the senior citizens who appeared at my health forum last Saturday and explain to them that I voted for $200 million more in foreign assistance on a moment's notice when they stood before me with fear, anger, frustration, and concern about their future health needs.

I will not do that until we come up with a sound plan, fiscal plan, as to how we are going to pay for these things without having it come out of the hides of our domestic programs or without necessarily raising taxes, I will vote "no."

Mr. SOLOMON. Mr. Speaker, will the gentlewoman yield?

Mrs. ROUKEMA. I yield to the gentleman from New York.

Mr. SOLOMON. Mr. Speaker, I just say that the gentlewoman makes an excellent point in the fact that Mrs. Aquino has not even asked for this money.

Mrs. ROUKEMA. May I add, I would be happy, in fact, I would like to lead the procedure for working this out in next year's budget, but it has to be done in a sound, planned way, and not through fiscal slight of hand which adds to the deficit.

Mr. SOLOMON. Mr. Speaker, I yield 2 minutes to the gentleman from California [Mr. DORNAN], a member of the Foreign Affairs Committee.

The SPEAKER pro tempore (Mr. GRAY of Illinois). Without objection, the gentleman from California is recognized for 2 minutes.

There was no objection.

Mr. DORNAN of California. Mr. Speaker, I understand the serious trepidation with which Members are looking at both our budget process and the rapidity with which this is being done.

The gentleman from Wisconsin [Mr. ROTH] got off a good line about a $200 million honorarium for an excellent speech. I thought Mrs. Aquino gave the most moving speech I have heard on the floor from the head of a state, bar none.

Now, I am going to be on the winning side on this and I think the winning side is going to be that she gets that honorarium. I agree she has not asked for it and we have already put up $500 million; but let me tell you why I was 1 of the 24 Republicans who voted against Gramm-Rudman, principally because of what it does under that unfair formula to gut defense. I mentioned at the time of the Gramm-Rudman vote that we had helped to behead three countries, Grenada, Haiti, and the Philippines, and properly so in all three cases; but I remember November 1, 1963, when we beheaded a nation under Communist assault, Vietnam by name, and look at the blood and treasure we lost there; so I am willing to go out on a limb for Mrs. Aquino. I think she may be the answer.

I am placing in the RECORD the article by Ross Monroe comparing the NPA, not even to the Soviet Union Communist style or China but comparing them to the Khmer Rouge, which means this scholar sees the potential on those 7,200 islands for an unbelievable genocidal slaughter. That is how ugly and vicious the NPA is.

THE NEW KHMER ROUGE

(By Ross H. Munro)

April 13, 1974. Three U.S. Navy officers are riding in a jeep along a new road hugging the boundary of the Subic Bay naval base in the Philippines. All three are Seabees—Navy construction men—and their destination is a half-mile farther north where a Seabee battalion is continuing work on the road. Suddenly shots ring out. One officer is killed instantly. A moment later, the two others, badly wounded, are finished off with shots to the head fired at point-blank range. Later, Philippine intelligence informs U.S. authorities that the Navy men had been ambushed by members of the still fledgling Communist guerrilla group, the New People's Army (NPA). The guerrilla leader responsible for the attack, as he had been for previous attacks on U.S. military personnel stationed in the Philippines, is a twenty-six-year-old former engineering student who calls himself Commander Bilog. His real name is Rodolfo Salas.

Rodolfo Salas has long since graduated from being the leader of a five-man NPA hit squad. Now thirty-seven, he is the ruthless and brilliant leader of the Communist Party of the Philippines (CPP), presiding over the fastest growing, most threatening, and arguably the most brutal Communist insurgency in the world today. U.S. analysts believe that if the corrupt and exhausted regime of President Ferdinand Marcos remains in power and the situation in the Philippines continues to deteriorate at its current pace. Rodolfo Salas could one day be leading the People's Democratic Republic of the Philippines, the name the Communists have already chose for their new state.

Yet only a tiny minority of Filipinos has ever heard of Salas and only a handful of non-Communist politicians has met him during the eight years he has been chairman of the CPP. Most politically-minded Filipinos, if asked, will say that the leader of the Communists in the Philippines is Jose Maria Sison, who founded the CPP in 1968. But Sison, a poet, university teacher, and Maoist ideologue, has been languishing in jail since 1977, his influence largely eroded. It has been Salas the engineer who has turned Sison's vision of a nationwide Communist insurgency into a full-fledged reality. From a few thousand party members and guerrilla fighters who were at most a serious nuisance in Sison's day, Salas has been instrumental in building the Communist movement into a formidable force. Today, the CPP credibly boasts that it has "way over" 30,000 members, while the NPA has "way beyond" 20,000 guerrillas, now fighting in at least 59 of the nation's 73 provinces.

In news reports from the Philippines, nearly all the responsibility for the Communist upsurge is being given to Ferdinand Marcos. And indeed he has played an essential role. During his twenty years in power, the country has suffered from colossal mismanagement of its economy, corruption akin to looting, and the near destruction of the nation's basic political institutions. Without all this help from Marcos, it seems, the Communists would have remained about as inconsequential as they are today in, say, Indonesia or Thailand.

Yet by trashing the Marcos regime and blaming it alone for the Communist upsurge, we fail to give proper attention and credit to the Communists themselves. For it has been their fanaticism, bequeathed by Sison, combined with their increasing ruthlessness and opportunism since Salas became leader, that have also proved essential to their success.

While Salas shares Sison's original radical goal of transforming the Philippines into a Communist dictatorship, he seems to be far less concerned than the party's Maoist founder about what methods are used to achieve that goal. Under Salas, the Communist guerrillas are waging a largely unreported campaign of terror, assassination, and torture in the Philippine countryside. As a radical but independent leftist who knows both the CPP and the NPA well says: "I'm afraid we might be staring at a Pol Pot future." In the cities, the working style of the CPP is so paranoid, rigid, and totalitarian that even left-wing nationalists have quit anti-Marcos alliances controlled by the Communists. The most respected of these independent nationalists, former Senator Jose Diokno, states: "They [the Communist] feel they're so close to victory that they only need two or three of us "Abroad, the once Maoist CPP has dropped its pro-Chinese stance and, with Salas taking the lead, is avidly courting the Soviet Union for official recognition and for financial and military aid.

Most chilling of all is the rapidly mounting evidence of the NPA's reign of terror, rivaling the Khmer Rouge in savagery if not yet in scale. Most of the reports come from the countryside, where the more than 20,000 Communist guerrillas, with far less than one modern rifle per man, have a largely demoralized corrupt, and ineffective Philippine military tied up in knots. From the foothills of the Cagayan Valley in northern Luzon to the city slums of southern Mindanao, the NPA continues to tighten its hold. That its primary means of accomplishing this is terror seems well known among leftists, civil-rights lawyers, rural parish priests, and others whose anti-Marcos credentials give them rare access to information about how the NPA really operates.

Typical is a leftist professor in Manila whose radical teachings have helped inspire many students to join Communist-front groups like the League of Filipino Students. Recently, several of his students won much-sought-after invitations to visit NPA strongholds in various parts of the countryside and view the revolution first-hand for a couple of weeks. But, recounts this professor, many returned sickened and appalled by what they had witnessed. They watched as Communist guerrillas killed "suspected informers" before an audience of villagers. "But it's not just an execution. It's cruel,

slow, painful." The professor demonstrates how the guerrillas stab the victim in the legs, buttocks, back, shoulders, and stomach before plunging a dagger into his heart. "Is this happening in a particular region of the country?" the professor is asked. "All over," is his pained reply.

"Suspected informer" is a phrase heard again and again in accounts of how the NPA holds sway over thousands of villages. The NPA readily applies the condemnatory label to a villager who turns down the "invitation" of a newly arrived NPA squad to a lecture in a nearby hut on the evils of capitalism. Or to a minor local official who speaks out against the Communists. Or to a peasant who resists paying NPA "taxes."

In a village in southern Luzon this spring, a Philippine journalist accompanying an NPA band witnessed a man being led away for execution, again on grounds that he was a suspected informer. The journalist, vaguely sympathetic to the NPA, pointed out to a guerrilla that the case against the man, a recent arrival in the village, was a circumstantial one, and flimsy at that. The guerrilla's response was a dismissive shrug. The journalist accompanied the NPA to several villages in the area and discovered that in every one, no matter how small, the NPA had executed people.

Desperate for more funds to feed and arm their burgeoning ranks, NPA units are applying their terrorist methods to extorting money from rich and poor alike. No one seems exempt anymore. Early this year, for example, when Philippine Protestant missionaries in the province of Surigao del Norte resisted NPA demands for a hefty share of their Sunday collections, an NPA squad invaded their chapel during Sunday services where they shot and killed one pastor in front of his congregation, beat up a "deaconess" at another chapel, and, that night, tracked down and killed another pastor.

As law and order continue to deteriorate, NPA hit squats (the foreign media have adopted the NPA's slightly heroic-sounding name, Armed City Partisans, for such groups) are operating with increasing ease in urban areas. Recent targets have included unsympathetic Philippine journalists (whose deaths draw little attention compared with those of anti-Marcos journalist). In the city of Cebu, the NPA issued statements taking credit for shooting and killing two outspokenly anti-Communist radio commentators. The Communists are also turning their guns on the leaders of democratic trade unions. According to Ernesto Herrera, the courageous general secretary of the Trade Union Congress of the Philippines (TUCP), the Communists began killing rival labor leaders last year. "We've lost nine [TUCP leaders killed by the Communists] in the last ten months," he reports.

There is also a steady stream of official accounts of NPA atrocities from the Philippine military that are carried mainly in progovernment newspapers. Such reports have little impact because the credibility of the military and the pro-Marcos media has long since been squandered. But independent sources say that the government accounts hardly do justice to the full horror of the violence perpetrated by the NPA in the countryside.

Here are a few of the more recent military accounts of NPA violence, confirmed by secondary sources:

In trying to establish its control over a remote gold-rush site in the province of Davao del Norte, the NPA executed at least 45 people in a period of less than five months, ending this March. Most of the victims were retrieved from a body pit. Many showed signs of having been tortured; and indeed, eyewitnesses confirmed that the NPA had tortured many of the victims before killing them.

On June 15 of this year three NPA guerrillas grabbed Corazon Pacana Coloso, a minor municipal official in northern Mindanao who had the misfortune of being the provincial governor's sister. The guerrillas told the hastily assembled townspeople that they were convening a "people's court," They accused her of corruption, pronounced her guilty, and then shot her in the head. She died instantly.

The military statistics show that the NPA killed 138 local Philippine officials in 1984. And the number of such killings this year is running ahead of last. No one appears to be challenging these numbers, even though a good case can be made that they understate the reality. Some of the local officials being executed are undoubtedly corrupt by Western standards. But because the aims of the killings is not to clean up corruption but to terrorize officials and villagers alike into knuckling under to the NPA, strong and popular local officials are being killed also. Says a U.S. official saddened by *deja vu:* "It's just like Vietnam. The guerrillas are killing the worst and the best local officials. They don't worry about the mediocre ones; they know they'll go along."

Inevitably, the increasingly violent NPA is turning on itself. Intelligence sources say the NPA recently executed several of its own members in southern Luzon in the belief that they were government agents. They discovered, too late, that they were mistaken. In the Davao area of Mindanao, Brigadier General Dionisio Tan-Gatue claims the NPA Killed 28 or 29 of its own men who had been wounded in an encounter May 14 and were slowing down the escape of the other guerrillas.

Although the NPA's reign of terror is largely ignored by foreign correspondents and the anti-Marcos media, it is no secret among Communist-party members. On the final day of my most recent trip to the Philippines, I told a key member of the CPP that I had repeatedly heard horror stories about NPA terror and violence directed against civilians in almost every part of the Philippines. He offered not a word of argument, not even a suggestion that the stories might be overblown. "It is the biggest problem we have right now," he conceded. Yet evidently only a minority of his fellow members agree that it is a problem. The issue of NPA brutality toward civilians was raised at a clandestine meeting of national CPP and NPA cadres in late 1984. The outcome then was inconclusive. The belated response of Salas and the top CPP leadership came in the CPP's official, underground newspaper, *Ang Bayan* ("The Nation"), this spring. Charges of NPA abuses amount to "slander," *Ang Bayan* stated, because everyone knows that the NPA has "iron discipline."

Few but the most naive city-bound party members would believe such a claim. Instead, typical party members seem to have accepted the fact that they are players in an increasingly violent drama. These days, the phrase "blood debts will be paid in blood" rolls off the lips of party members as easily as it does off the pages of *Ang Bayan.* Such members have stopped making distinctions among the people who are murdered by the NPA. As three party members made clear in a discussion with me, by definition anyone killed by the NPA must be a "*demonyo*"—a term that the NPA initially used to describe enemy spies but which has evolved into a label for anyone the NPA decides to execute. *A Guide to Establishing a Mass Base in the Rural Areas,* a manual prepared for the exclusive use of party cadres inside the NPA, makes it clear that the guerrillas have party approval to kill virtually anyone they want. Among the broadly defined categories of people who can be executed are "enemies of the people, spies, and unreformed elements who hinder the development of the revoluntionary movement in the *barrio.*"

The Armed Forces of the Philippines (AFP) claims that the NPA is currently killing more than 130 civilians a month, not including local government officials. Most of the civilians are victims of so-called liquidations, meaning murders, assassinations, or executions. Although the Marcos regime's statistics are often suspect, these numbers seem to be "clean." For one thing, the same military reports that tally these civilian deaths contain other statistics on NPA gains that are remarkably consistent with claims that the NPA is making in its underground publication, *Pulang Bandila* ("Red Flag"). And dissidents in the armed forces who are otherwise critical of how the military conducts its business say the reporting of NPA killings is carefully corroborated by death certificates or eyewitness accounts.

But while these numbers are apparently without doubt, the actual number of civilian liquidations carried out by the NPA is much higher, quite possibly four or five times higher, than the military claims. The explanation is that NPA killings in remote *barrios* where its power is greatest are rarely reported, particularly not to the untrusted military. A peasant who journeys into town to tell officials of a Communist-ordered execution in his *barrio* is inviting, at best, a clumsy military raid on his village or, much worse, an NPA accusation that he is an informer.

If one ventures into areas in the Philippines where NPA guerrillas are active, the story is always the same. Where the NPA prevails, a code of fearful silence prevails: even if the NPA kills your brother or your best friend, you do not report it. When the NPA killed one of those Protestant missionaries in his home in Surigao del Norte, the guerruillas told his wife that she too would be killed if she reported the killing to the authorities. The civilian killings that do become widely known are usually those that the NPA wants widely known—where the guerrillas make an example of a victim by staging a pre-execution "trail" or by simply leaving his bullet-ridden body in the town square.

But usually only the local villagers hear about the killing. In a small city in Bicol, the southern tail of Luzon, a young and well-informed lawyer who often defends dissidents says that an NPA unit was killing civilians in a village just a few miles from his home for more than three years before he or anyone else in the city heard about it. The villagers were simply too frightened, he says, to report the deaths.

In the province of Davao del Norte, where the NPA controls much of the population, I asked Father Eligio Bianchi why he and other churchmen in the area had not reported the many killings by the NPA as diligently as they had reported the relatively few killings by the military. Bianchi replied that, while he believed all killings were equally wrong, he rarely heard from frightened villagers about NPA killings. "Now and

then you might hear someone whisper that somebody had been killed by the NPA, but that's all. They didn't want to talk about it."

This fearful silence prevailing in the countryside wherever the NPA is active is almost completely overlooked by middle-class Manilans and other Filipinos who still live far from the everyday insurgency. Filipinos, they themselves readily concede, are traditionally a garrulous lot, chronically unable to keep a secret, and they still take it as a given that they are the recipients of a free and plentiful flow of information. Manila's upper classes in particular pride themselves on knowing what is happening in their family's home province on the basis of an occasional visit from a retainer, relative, or friend. But the visitor probably lives in the provincial capital and knows less about what is going on in the surrounding countryside than the Bicol lawyer.

II

But the prevailing silence only partly explains why NPA brutality is largely ignored by the foreign-press contingent in Manila as well as by the independent or anti-Marcos newspapers that have been thriving in the Philippines during the past two years. Another important part of the explanation is that the media can learn nothing about NPA atrocities from Philippine organizations that claim to be committed to civil liberties and human rights.

By far the most prominent of these groups is Task Force Detainees (TFD). In an almost incredible feat of public relations, the openly pro-Communist TFD has become recognized as the leading defender of human rights in the Philippines. Its accounts and statistics regarding "political prisoners" and the frequent abuses committed by the Philippine military are cited by Amnesty International, the Lawyers' Committee for International Rights, and even the U.S. State Department. And its claims and statistics find their way into innumerable articles by foreign correspondents reporting from the Philippines.

Despite its international standing, the TFD has consistently ignored NPA killings and other abuses of civilians. It resolutely refuses to investigate, report, or act on killings by the NPA. In my visits to the TFD offices in Manila over several years, officials have offered several explanations for their one-sided view of what constitutes a human-rights abuse. TFD spokesman Fidel Agcaoili made it clear in an interview this summer that the TFD is interested in exposing only those human-rights abuses that reflect badly on the military. "Definitely our main line of inquiry [is] human-rights abuses being committed by the government." Agcaoili referred in a dismissive tone to "the alleged abuses being committed by the NPA," then quickly caught himself and said, "No, I won't say any more." But as far as the TFD's position on people who take up arms and join the NPA is concerned, Agcaoili readily volunteers that "we respect their right to do so."

That Task Force Detainees has a benign view of the New People's Army should surprise no one; the TFD has never made a secret of its politics. A visit to its offices in suburban Manila finds activists, widely reputed even by leftists to be Communists, wandering in and out and being treated by the TFD staff with everyday familiarity. Staff members talk about their plans to attend rallies organized by a Communist-front group. The head of the TFD, Sister Mariani Dimaranan, has remained on the executive board of BAYAN, one of the most tightly controlled of those fronts, even though virtually every independent leftist on the executive has quit in protest against the CPP's heavy-handed domination. Gerardo Bulatao, for several years the key administrator of the TFD's parent organization, the Association of Major Religious Superiors, was sentenced this year to twenty years in jail after the government made a strong case that he had played an important role in the Communist insurgency on the island of Samar. The TFD's fortnightly publication. *Political Detainees Update*, usually devotes its front page to highly favorable reports of the activities of BAYAN and other Communist-party fronts, like KMU, the labor alliance. Headlines use CPP terminology—"U.S.-Marcos Dictatorship"—to describe the regime.

The TFD takes its heavy ideological baggage along in pursuing its main task, which is chronicling the human-rights abuses committed by the Marcos regime and the Armed Forces of the Philippines. The pursuit is relentlessly well-organized. The TFD currently has a staff of 280 and a large budget. Most of the money comes from foreign church-related organizations, but the TFD refused to answer both oral and written questions this summer about the origin and amount of the donations and the size of its total budget.

As countless news reports from the Philippines have made clear, the TFD has no shortage of raw material to work with in building its case against the Marcos regime. There are many documented instances of the Philippine military and other government security forces abducting, torturing, and killing Communist suspects. But even here, the TFD constantly plays with the facts. Victims of the military are regularly portrayed not as members of the NPA or the CPP who are trying to overthrow the government by force but merely as "farmers, . . . fishermen, . . . students" implicitly innocent of any wrongdoing. In many cases, the most cursory investigation would reveal that a victim of the military's mistreatment was an NPA guerrilla or a key NPA informer. Crucial facts such as these could not possibly justify a killing by the military. But the TFD's omission of such facts represents a conscious attempt to suppress an important part of the story for political reasons.

This was so when the TFD portrayed an ugly mass killing that occurred on the island of Negros in 1980 which, more than any other single incident, marked the Marcos regime internationally as brutal and murderous. In the spring of 1980, in the rural municipality of Kabankalan in the province of Negros Occidental, several peasants were killed by military units acting at the behest of a local political boss. In the protests and publicity emanating from the TFD and other human-rights organizations, two of the victims came to symbolize the injustice. Alex Garsales and Herman Moleta were portrayed as simple farmers who had been murdered because they were active members of the local branch of Basic Christian Communities, which in turn was portrayed as a Christian form of community organization for the poor. Yet a left-wing but non-Communist priest in Negros told me that it was well known in Kabankalan that the two men were key figures in the NPA organizational structure in their mountain village. Another leftist, with close ties to the CPP and first-hand knowledge of the situation in Negros, said it was taken for granted that the Basic Christian Communities of Negros formed "the basic infrastructure for the NPA." (This is by no means true everywhere in the Philippines. For instance, Basic Christian Communities in Bukidnon province in Mindanao that were begun under the leadership of Bishop Francisco Claver are wary of both the regime and the NPA.) But there was never a hint of this either in TFD literature, or in a 1982 Amnesty International pamphlet that described the incident, or in a New York Times article (January 29, 1981) about the case.

In addition to suppressing crucial information, the TFD's reports also artifically inflate the extent of political violence for which the authorities are responsible. The TFD does this by refusing to make clear distinctions between persons killed by the military for political reasons and those killed by a variety of armed groups because they are involved in criminal activities, economic disputes, or even personal quarrels. Agcaoili conceded, for instance, that the TFD would define as political the killing of a peasant involved in a land dispute. After grouping together a wide variety of killings in a countryside beset for centuries with rampant violence, the TFD then suggests that all the violence is somehow connected to the regime's current counterinsurgency efforts.

What discredits the TFD's reports even more is that, even where there are virtually no facts available, it is ready to blame a murder on the authorities. This is particularly true in the TFD's tally of "salvagings," a uniquely Philippine term for an incident in which the military kills a civilian in cold blood because he is a suspected Communist.

Here, for instance, is the TFD's full account (in Political Detainees Update, May 15, 1985) of a recent case it classified as a salvaging:

"Butuan City—An unidentified man was found dead along KM 8 of the National Highway in Ampayon at 5:30 a.m., March 17. The victim was approximately 30 years old, 5'4" and of fair complexion. He was wearing denim pants and a red T-shirt. The victim suffered stab wounds all over his body."

The TFD has less opportunities to manipulate the statistics concerning "political prisoners." Here, each prisoner is a confirmed resident of a prison detection center. The TFD's own statistics show that the number of political prisoners peaked in 1983 and has been declining ever since, from 851 on January 1 of this year to 695 on July 15. It is important to understand that many of these prisoners are picked up in raids on guerrilla strongholds and held for only a short period. The majority of the 695 prisoners have been in jail for less than one year, many for just a few days.

It is appropriate to call these people "prisoners of war" rather than political prisoners. There seems to be universal agreement in the Philippines that virtually all the long-term prisoners are NPA guerrillas or Communist-party members actively involved in trying to overthrow the regime. The TFD itself implicitly conceded this by distributing a statement this July saluting "the political prisoners who dare risk their freedom for the sake of our people's liberation." In other words, these are prisoners of war captured in the midst of a fierce, nationwide insurgency.

What the TFD's tally really tells us is how pitifully ineffective the Armed Forces of the Philippines have become. After fighting Communist guerrillas for more than a decade, they have succeeded in capturing only some 200 CPP and NPA members im-

portant enough or threatening enough to keep in jail.

Nor, by the standards of rural insurgencies elsewhere in the world today, is the Philippine military particularly brutal. The language used in TFD reports ("state terrorism . . . escalating military abuses . . . alarmingly rampant salvaging . . .") and the tenor of some news reports suggest that the Philippines is akin to military-ruled Argentina or Guatemala. That is far from the truth. Even if the TFD's inflated statistics are used, the rate of political killings and disappearances over the past decade is no more than one-fiftieth that of Guatemala.

In fact, the Philippine military is no longer marauding much around the countryside. Mostly the soldiers are huddling in their barracks, demoralized and on the defensive, while the NPA extends its reign of terror. Many so-called combat units no longer have the gasoline or even the boots to move around. One statistic sums up the portrait of an almost defeated military: a minuscule 2 percent of the clashes between the AFP and the NPA during the first half of this year were initiated by the military. Two-thirds of the clashes were initiated by the Communist guerrillas. The remaining incidents were classified as "encounters," a catch-all term that includes incidents where the soldiers of the two sides stumble into each other.

Significantly, the Philippine military units most often on the offensive against the NPA are the very units most trusted and respected by the people in the countryside—the Marines and Scout Rangers. But these groups are a minority within the AFP; the majority of the armed forces is composed of passive, corrupt, and demoralized units. It is these units that are driving rural Filipinos into a sullen alienation that makes continuing Communist gains almost certain. They are led by officers who siphon off defense-ministry funds, sell their units' services to provincial political bosses or landgrabbers, or use their power to muscle into local business. The enlisted men, understanding full well the connection between their officers' wealth and their own lack of adequate food and clothing, run petty, but vicious protection rackets in the towns, steal chickens in the villages, and, at checkpoints on the roads, demand payoffs from farmers bringing their produce to market. Shunned by civilians, the enlisted men express their frustration in drinking and fighting.

When a demand for action against the guerrillas comes down the command structure, a hapless lieutenant is dispatched to a village where he may grab the first two young men in sight and threaten to beat them unless they reveal the identity and whereabouts of the local NPA. Even villagers terrorized by the NPA and inclined to give information to the military know that the lieutenant will not be there the next day to help protect them from an NPA death sentence for being an informer. In short, the people are learning every day that the military cannot be trusted or relied upon. An army like that cannot win a guerrilla war.

III

The roots of that guerrilla war can be traced to the mid-1960's when a group of young radicals began coalescing at the University of the Philippines. At their center was Jose Maria Sison, first a student and then a lecturer at the university, who had joined the old Moscow line Communist party, then as now referred to as the PKP.

In late 1964, Sison founded, *Kabataang Makabayan* (KM, or Nationalist Youth). Although KM was organized as the PKP's youth wing, it was first and foremost Sison's organization. The intense, brilliant, energetic, and disputatious Sison recruited and trained a phalanx of loyalists who formed the hard core of KM. Almost from the beginning, it seems, Sison chafed under PKP leaders he viewed as old failures. The heady politics of China's cultural revolution energized and legitimized his discontent and, by 1967, Sison had completed his first draft of a history of the PKP that incisively dissected and condemned the party's failure since 1942 under the leadership of the three Lava brothers. This draft, *Rectify Errors and Rebuild the Party,* became one of the founding documents of the originally Maoist CPP. Polemical and one-sided as it is, it remains the best available history of the PKP.

In April 1967, the Moscow-oriented PKP leadership expelled Sison and his supporters from the party. Almost immediately they formed their own provisional Politburo and issued a May Day statement hailing China's cultural revolution. But it was not until the day after Christmas 1968, when Sison and ten trusted comrades secretly gathered in Pangasinan province and opened what they called a "Congress of Reestablishment," that the new Communist Party of the Philippines was formally founded. The name given to the CPP's first meeting underlined Sison's contention that the old PKP was no longer a legitimate Communist party.

By now the CPP might have been a defunct and forgotten Maoist sect if Sison had not found Bernabe Buscayno. Commander Dante, as he is to this day better known, was the leader of a small group of guerrillas who were among the remnants of the 12,000 Huks who had challenged the Philippine government in the late 1940's and early 1950's. Dante had an apparently well-deserved reputation as a ruthless and well-practiced killer but, by all accounts, he wanted to devote his talents to revolution, not to serving the criminal syndicate into which the Huk hierarchy had degenerated. When the two would-be makers of revolution joined forces, Dante had his ideology and Sison had his army. The New People's Army was founded on March 29, 1969, with 35 rifles and handguns, the discipline code of China's Red Army, and Mao's strategy of protracted people's war.

There was a slavish quality in the Maoist cant ("punish the evil gentry) . . . establish firmest relations with Albania") that was woven into the CPP's founding manifesto, *Programme for a People's Democratic Revolution.* But the "central task" of the CPP then as now was straightforward: "Seizing political power through armed revolution."

Amid the Maoist jargon and formulas in the CPP's early documents there was only a hint of Sison's analytical and visionary mind. That became more evident in 1970 in *Philippine Society and Revolution,* his comprehensive Marxist critique of what ailed the Philippines, which contained a hint of the Maoist prescription that he had in mind for its cure.

Sison's most important contribution in the literature of the Philippine revolution was published in 1974. With *Specific Characteristics of Our People's War,* Sison presented his fellow Philippine Communists with the strategic game plan they have been following ever since. At that time, Marcos was at the peak of his power and the CPP and the NPA together numbered no more than 3,000. But Sison saw victory ahead. He believed that the NPA could defeat the Philippine military slowly but surely by creating guerrilla strongholds in the mountains and hills of every major island. "In the long run," he reassured his doubting comrades, "the fact that our country is archipelagic will turn out to be a great advantage for us and a great disadvantage for the enemy. The enemy shall be forced to divide his attention and forces not only to the countryside but also to so many islands."

Sison believed that the Huks under PKP leadership had seriously blundered by effectively confining their guerrilla warfare to the island of Luzon. This allowed the Philippine military to concentrate its countersurgency forces there. It was Sison's idea to establish guerrilla fronts in all the major islands of the Philippines, dispersing the armed forces throughout the archipelago and then gradually grinding them down.

Sison had a special role in mind for the largest island in the south. "The long-term task of our Mindanao forces is to draw enemy forces from Luzon and destroy them." The supremely confident Sison issued this master plan at a time when not a single NPA guerrilla band was active in Mindanao. With fanatic dedication, the Communists would try again and again and finally succeed in achieving Sison's goal of turning Mindanao into the military meatgrinder it is today. In early 1971, the CPP dispatched a lone student radical, Benjamin de Vera, to the city of Davao in eastern Mindanao. By the end of that year, de Vera had sworn in three party members and they had recruited 30 candidate members. A few months after Marcos declared martial law on September 21, 1972, the CPP put together a small guerrilla unit to test the revolutionary waters in the countryside between Davao and the city of Cotabato. By the end of 1973, party documents reveal, this unit had been virtually wiped out.

But the CPP and the NPA persevered. More former student radicals were sent to Mindanao to "integrate with the masses" and to organize small villages. The NPA began over again, but painfully slowly. By July 1975, again according to party documents, the NPA in Mindanao consisted of only seven men with seven guns. It seemed that most of the young, educated Communists who came from the cities ended up dying. By mid-1976, 300 of the first 370 party members in Mindanao had died, dropped out, defected, or been detained. Elsewhere in the Philippines—in Isabela province and the Cagayan Valley in northern Luzon, and on the islands of Negros and Samar—the former student activists, along with the few members of the rural lumpenproletariat they could recruit, were doing only a little better. One pro-Communist account of the guerrilla fighting in northern Luzon reported that the life expectancy of an NPA member in those days was three years.

It was during this period—the early to mid-1970's when the Philippine economy was booming and Marcos was at the height of his power—that the highly favorable image of the New People's Army became fixed in the minds of the many middle-class Filipinos outside the guerrilla zones. The image was grounded partly in reality but to a substantial extent, even in those days, in myth. The fact that countless student radicals with comfortable backgrounds and promising futures were dying or going to prison for their cause made a deep impression on many middle- and upper-class Filipinos. Adrift in an increasingly cynical and

materialistic society, privileged and educated Manilans often viewed the fanaticism of the Communists as an enviable virtue. To this day, an upper class Manila dinner party seems incomplete until a guest, who invariably has no first-hand knowledge of how the guerrillas operate, begins speaking in admiring tones of the young Communists in the hills and prisons. The other guests nod knowingly and approvingly as dollar-a-day servants hover over them. Even politically moderate activists like Agapito (Butz) Aquino, brother of the assassinated political leader Benigno (Ninoy) Aquino, see something to admire in the fanatic dedication of the Communists. "I have always been impressed by the conviction of these guys. . . . I envy these guys . . . they're struggling for a philosophy they believe in . . ."

Many Filipinos came to think that if the Communists' fanaticism was selfless than it must also be benign. So they were instant believers in the myths surrounding how the NPA operated: guerrillas were idealistic students who won over the peasants by providing them with medical care (heavy on the acupuncture) and with political instruction that opened their eyes to their oppression. Now and then the guerrillas might shoot someone but the victims were all bad people—cattle rustlers, rapists, sadistic policemen—who should have been punished by the authorities. The peasants were so delighted that they referred to the NPA as the Nice People Around.

This myth may have overlapped with reality in some parts of the Philippines for a brief period in the 1970's. It is difficult to say because there are virtually no independent accounts available of how the NPA operated a decade or more ago. Certainly some radical leftists who are appalled by the NPA's actions today insist that there was a golden era. But even if that were true, the tarnish was already visible. As early as 1970, about one-third of the ranking NPA members belonged to liquidation squads. And the most upward mobile of all the NPA guerrillas during this supposed golden period was Rodolfo Salas, who was riding his reputation as a gunslinger to greater power and status inside the CPP.

VI

Contribution to the myth of a benign NPA was the growing awareness among educated Filipinos that many priests and nuns were becoming deeply involved with the Communists. Many Filipinos, who are more than 90-percent Roman Catholic, seem to believe that if nuns and priests support the Communists, then Communism must have many commendable qualities.

But very few Filipinos appreciate how deep the involvement of many members of the Catholic clergy has become. Nowhere else in the world, it seems, have so many priests and nuns been so committed to the Communist cause. As a Philippine leftist puts it: "Liberation theology has gone much further in the Philippines than in Latin America. In Latin America, it justifies collaboration with the Communists. Here it means joining the Communists."

Although a great deal of publicity has been given to a handful of priests who have become gun-toting NPA guerrillas, these clerics turned killers from just a small and unrepresentative minority of the Communists inside the Church. In the Philippines, hundred of priests and nuns effectively become Communist-party members by joining a highly secretive, possibly unique, organization called Christians for National Liberation (CNL). The CNL's members included some Catholic lay workers and some Protestants, but its core consists of an estimated 1,200 priests and nuns who form secret cells inside the Catholic Church and its many organizations. The CNL constitution mandates a secretive, highly disciplined structure "based on the principle of Marxism-Leninism. The policies of the CNL are also explicitly Communist; its constitution requires members to pledge support for "protracted people's war" and the "armed struggle and the underground movement." The key task is "to overthrow the U.S.-Marcos dictatorship."

The first program adopted by the CNL all but announced the Communists' intention to establish Task Force Detainees under the control of the CNL. The wording left no doubt that the aim was not to protect human rights but to aid the NPA. The program declared that "the CNL must develop a massive, sustained, and militant protest movement against militarization. This seeks to block the full escalation of military activity against the guerrilla fronts. . . . We denounce military atrocities." In 1974, about a year after the CNL program was written, Task Force Detainees came into existence. To this day, all of TFD's 13 regional and subregional directors are priests or nuns and most, if not all, are members of the CNL.

For priests and nuns, joining the CNL amounts to a secret rejection of the Roman Catholic Church. Their acceptance of the CNL's unqualified call for revolutionary violence represents a philosophical break with the Church, but they also break with it in an organizational sense by endorsing a constitution that rejects the Church hierarchy from the local bishopric to the Vatican. Besides requiring members to fight for democratic decisionmaking in the Church, the CNL constitution says another aim of the organization is "to fight for truly self-reliant and self-determining Filipino churches against the interventions of foreign Church bodies and institutions." Presumably that includes the Pope.

What is particularly insidious about the CNL's presence within the Church is its secrecy. Bishop Francisco Claver, a left-wing critic of the Communists, has often said that he objects not so much to the presence of Communists inside the Church as to their dishonesty and deceit. Priests will live in the same residence or work in the same Church organization as other priests for years without telling them they are CNL members. There is no open and honest debate because they never reveal to their fellow priests precisely what they stand for or where their ultimate loyalties lie.

Partly because virtually no Filipinos outside the CNL know anything of substance about the group, its constitution, or its program, it is still widely believed that the presence of priests and nuns inside the Communist movement is a force for moderation and mercy. Such comforting thoughts are promoted by people like the nun who told me that she knew guerrillas who, after being exposed to some of the Communists in the Church, began carrying Bibles in their packs. Yet the evidence suggests that the CNL members are more radical and rigid than other Communists. In statements commenting on the Aquino assassination that were issued within days of each other in the fall of 1983, the CPP endorsed all forms of protest, both violent and nonviolent, against the Marcos regime while the CNL called only for armed struggle.

It is not only the rhetoric of the CNL that is radical. Any curious visitor to provincial conventos where priests live and work will soon discover that many of them harbor clerics who are working virtually full time for the revolution. CNL members find shelter for wounded guerrillas, help party cadres move through their towns on the way to NPA base areas, and serve as message drops.

For a period in the middle to late 1970's, in some areas where the NPA's existence was still tenuous, the help of CNL priests and nuns was probably essential in permitting the NPA to hang on. In other areas, the CNL and its allies hastened the growth of the Communists. In Mindanao, for instance, the Communists took virtually complete control of the day-to-day running of the Mindanao-Sulu Pastoral Conference, the organization that the bishops of Mindanao and the Sulu archipelago had set up to administer social programs. The bishops eventually conceded that the only way they could regain control of their own organization was to abolish it. After much agony and delay, that is exactly what they did.

On the island of Negros, leftist sources confirm personal impressions that some priests were involved in organizing sugar workers for the Communists. Years before, the PKP, the old Communist party, had tried to organize these workers but had been quickly thrown off the isolated haciendas where the sugar workers lived. Said one participant in that old struggle: "We failed completely." But the new CPP succeeded: "When priests come to organize the workers under the banner of religion, better yet when the priests are Australian or Irish, it's easy. The landlords will never think that this is a Communist organization. But that is what happened; the Basic Christian Communities [organized by the priests] in Negros became the infrastructure of the NPA."

One account of how the CPP has infiltrated and seized control of Church organizations in the Philippines is the testimony of the late Father Edgardo Kangleon. Father Kangleon was deeply involved in the Communist-party network operating inside the Roman Catholic Church on the island of Samar. After being arrested, he had a change of heart and consented to have a dialogue with Defense Minister Juan Ponce Enrile in front of three Catholic bishops.

Kangleon talked freely about how the Communists and a few trusted members of front groups had taken virtually complete control of the Church's social-action programs in Samar. Church programs ostensibly aimed at helping peasants, fishermen, and illiterates were in reality initiated and controlled by the Communist party, said Kangleon. "We geared these programs toward our own motives." Applications for financial help from Philippine and foreign agencies were passed through a regional organization, the Visayan Secretariat for Social Action, where other Communists forwarded them with a favorable recommendation to potential donor organizations.

The same thing is happening today to a greater or lesser extent in every region of the Philippines. It seems that no one in the Marcos regime or even in the CPP has a good estimate of the total amount. But no one doubts that hundreds of thousands, quite possibly millions, of dollars from abroad are flowing into Communist-controlled organizations and projects in the Philippines. One intelligence analyst estimates that Church-related organizations in Western Europe alone last year donated $750,000 to Communist-controlled organiza-

tions under the umbrella of the Roman Catholic Church. But that is only a semi-educated guess.

Despite the great inroads that the Communists have made in the Catholic Church since Christians for National Liberation was formed in February 1972, the Church as a whole is still far from being pro-Communist. Less than 10 percent of the country's 14,000 priests and nuns belong to the CNL; most, if asked point blank, would say they are opposed to Communism. But this rank-and-file majority, now deeply disillusioned with the Marcos regime, has failed to come up with any coherent political stance that is both anti-Marcos and anti-Communist.

Thus the majority is easily cowed by the pro-Communist minority, even most conservative bishops now try to ignore pro-Communist activism among their priests, just as they themselves refrain from making anti-Communist statements. In fact, the Church majority has been bullied into such a flaccid neutrality regarding the Communists that it was an unusual, newsworthy event this summer when the Archbishop of Zamboanga, Francisco Cruces, pleaded that publicity given to NPA atrocities be as extensive as publicity given to military atrocities.

There is little immediate prospect that the Church will come to grips with the Communist challenge. Instead, the implicit policy of the Church hierarchy, from the Archbishop of Manila, Jaime Cardinal Sin, to the lowliest provincial bishop, is to maintain a state of ignorance about the CPP presence inside the Church. Cardinal Sin, in particular, is known to place the survival of a unified Catholic Church above almost everything else. If he were to launch a comprehensive examination of the CPP presence in the Church, he would, to borrow a Marxist term, be heightening the contradictions within the Church, and possibly precipitating a crisis.

V

Back in 1976, the Communists did not seem to pose much of a threat to the Church, or to any other institution in the Philippines. On June 25, 1976, after the CPP leadership had spent months analyzing the failure of the party and the NPA to make significant gains, the CPP issued a cautious new position paper. Although it has apparently been circulated only clandestinely and in mimeographed form, Our Urgent Tasks remains one of the key documents in the CPP's history. It would also prove to be the last important party paper written by Sison before his arrest.

Although Tasks brimmed with Sison's rhetorical optimism ("the soil for the revolutionary antifeudal movement and armed struggle in the countryside is more fertile than ever before"), the overall message was glum. The Marcos regime was killing or arresting NPA guerrillas and CPP cadres at a rapid rate. There had been hardly any net growth in party membership since 1973. The party remained a small organization, perhaps 3,000 members, who were almost all one-time student radicals and other educated Fillipinos from the middle and upper classes. In fact, most party members then seem to have been former members of KM, the radical youth organization, or had been recruited by KM members. The party of the masses it definitely was not. As Tasks almost plaintively stated: "We must increase the number of party members who are of worker and peasant status. In this regard, we must keep in mind that we do not wish to be an exclusively cadre party."

With false bravado, the Tasks paper declared that "in no year [since 1968] has the enemy struck down more than 5 percent of the party." Even taken at face value, this was an admission that as many as two-fifths of the Filipinos who had joined the CPP since 1968 had been killed. But few of these deaths occurred among the large number of party members who had remained in the towns and cities. What Sison was really admitting was that the many party members fighting with the NPA were dying like flies.

One of the key problems then faced by the NPA was its lack of modern rifles. On that score, the party document was more hortatory than helpful: "We make sure that at the core of such weapons as bolos [a machete-like knife], spears, bows and arrows, and homemade explosives are good guns." And if that is not possible, then "a full enemy squad . . . caught by surprise . . . can be easily overpowered by our militia with bolos or even with bare hands."

The bottom-line advice Our Urgent Tasks had for the NPA was to avoid military action as much as possible and, instead, return to the task of consolidating control over rural base areas in remote parts of the country. Only after there is "painstaking work" and "solid organizational work," said Sison, should the NPA attempt military action. Cautioned the CPP strategist: "We can advance only step by step."

The NPA proceeded to build those secure base areas with a vengeance. "Solid organizational work" soon came to mean the total mobilization and control of the people in the base areas. This is how the Communist-party publication, Ang Bayan, described what was happening to civilians in NPA areas by the late 1970's:

"In the guerrilla fronts, the day-to-day work of the masses includes giving material support to the people's army, keeping the enemy under surveillance, and helping to safeguard the security of the revolutionary forces. The people also participate in military operations carried out by the guerrilla units. They also play an important role in exposing and punishing enemy spies."

Many such "civilians" forced by the NPA into semi-conbatant roles were among the first victims when the military came hunting the guerrillas. It was classic guerrilla-warfare strategy: coop civilians and put them between you and the government's armed forces. Their deaths have continued to provide grist for the mills of groups like Task Force Detainees.

But there was another reason why the NPA had concluded by the mid-1970's that it had to be ruthless in asserting control over the guerrilla base areas. In Mindanao Party Situation and Policies, another CPP document issued about the same time as Our Urgent Tasks, guerrilla leaders blamed their losses on their failure to kill "bad elements" and "local government informants." What the NPA had to confront was the fact that, unlike virtually all Communist guerrilla movements that had ever achieved victory, it had no completely secure base area or sanctuary. There was no friendly foreign territory just across an international boundary where its guerrillas could flee when the fighting got particularly heavy. Nor did it have a remote base inside the country like Mao's Yenan that government troops could not penetrate. Instead, to this day, there is no NPA base area anywhere in the Philippines that a large contingent of government troops could not penetrate and occupy if it wished to. Since the NPA cannot depend on territory, there is nowhere the enemy cannot come, the NPA has to make certain there is no one who might talk to the enemy when he arrives.

The literally terrifying solution that the party and the NPA came up with was to demonstrate their willingness to kill anyone who might possibly hinder the consolidation of their base areas. A defender of the NPA might say that, forced by military realities, the NPA terrorized the rural population. The NPA killed real, possible, and even, in its view, potential informers. It killed at the slightest pretext just to demonstrate its power and coldbloodedness. In Bukidnon province, for instance, we have first-hand accounts of the NPA killing a man solely because he once bragged that he had no fear of the NPA and, in another town, killing two men because, the guerrillas announced afterward, they had maintained mistresses. There are also countless second-hand accounts that make it clear that the NPA is less interested in whom it kills than in demonstrating to a cowed populace that it is ready to kill.

The NPA's new ruthlessness was endorsed by the top CPP leadership. The party in effect told the NPA that it should feel free to kill anyone it felt it was necessary to kill. By including on the death list "unreformed bad elements who hinder the development of the revolutionary movement in the *barrio*," the CPP was giving the NPA virtual carte blanche. If that was not subjective enough, *Ang Bayan* (December 31, 1980) seemed to suggest that any killing was permissible if a village mob approved:

"What kind of criminals are meted out the death penalty by the revoluntionary movement? The masses clearly express the answer to this by their feeling of relief every time a "*demonyo*" (enemy spy) or some other bad element is given capital punishment by the NPA. . . . The crimes of these bad elements vary but these are all so grave as to warrant death as a just penalty."

In this period of reconsolidation, NPA guerrilla bands gravitated neither to the poorest areas in the Philippines nor to those areas where military abuses were necessarily the greatest. Instead, the NPA sunk new roots into remote and isolated areas where the government and the military had little if any effective presence and authority. The interior of the island of Samar was one of these vacuum areas; Davao del Norte, a province in eastern Mindanao, was another.

It was in Davao del Norte that I learned what the NPA had become. By the late 1970's the NPA was well on its way to taking effective control of much of the province. The center of NPA strength was the municipality (equivalent in size to a large U.S. county) of San Vicente, still known to its inhabitants by its previous name, Laac. There, in late 1981, the Philippine military finally reacted to the NPA's gains by setting up variations of strategic hamlets. They forced farm families in small settlements to dismantle their houses and rebuild them in the municipality's larger towns where small military units were posted to stand guard. The military's aim was to isolate the NPA guerrillas from their support base. The move, which appeared to be a pilot project, alarmed the Communist party; clandestine CPP publications had long warned that hamletization represented a dire threat to the NPA.

So the Communists decided to launch a concerted propaganda campaign aimed at portraying the hamlets as a rank injustice foisted on an unwilling population. The first two journalists invited, indirectly by the

Communists, to visit San Vicente, where they could be expected to write unfavorably on the hamlets, were a good-hearted missionary-journalist, who had great sympathy for the far Left, and myself.

By then I had reported several stories from the Philippines that reflected harshly on the Marcos regime, several of which had been attacked by the Pro-Marcos press in Manila. The best-known article, provocatively headlined by *Time* "Pacific Powderkeg" (September 24, 1979), may have been the first comprehensive portrait in a major U.S. media outlet of the decay that was besetting the Marcos regime and the country at large. Reports of this kind had given me substantial access to Communists and their fellow-travelers. They seemed to think that I was their sort of reporter.

Not, as it turned out, in Davao del Norte. This was so despite reporting conditions heavily skewed in favor of the guerrillas. A pro-NPA group accompanied me virtually everywhere. The interpreter for all my interviews with local farmers was very close to, probably a member of, the Communist party. (An unqualified statement of CPP membership is hard to come by; membership status is so secret that fellow members are forbidden to acknowledge membership to one another unless they have been directed to work together.) But one advantage I did have was that many of the peasants I talked to addressed me as "father," believing I was a Catholic missionary in whom they could, presumably, confide. The peasants were not parroting anybody's line: they were obviously relieved that the guerrillas had fled, but they seemed wary of the military who were the powers-that-be. All conversations were held well out of sight of military personnel.

Everywhere we went, the story was the same. The area was relatively well off; most farmers worked their own small landholdings. Until a few months before, there had been no significant military abuses; in fact, the area had generally been ignored by the authorities. There was no real government presence except in the *poblacion* (central town) of San Vicente. Roads were no better than dirt tracks, increasing the isolation of the area. The NPA had moved in just a few years before and had already killed scores of people. In the *sitio* of Linumbaan, a small village of 83 families, an NPA supporter and resident told us, the NPA had killed 20 people in the village and immediate surrounding area. The killings he described were aimed at demonstrating the NPA's power more than anything else. The NPA, he said, had killed people who had spoken out against the guerrillas. It had killed a woman, whom the villagers referred to simply as Tomboy, solely because she was a reputed lesbian. At another *sitio* that was home to 72 families, the NPA had killed two local people in the past two years. Villagers said the NPA had steadily raised "revolutionary taxes" that were paid in cash and food.

The NPA has set up forced-labor plots in some locations; local farmers had no choice but to work a three-day stint on them every few weeks. Nearly all the produce from the plots was appropriated by the guerrillas; a small amount was apparently put in collective storage for the entire village.

In three separate interviews, local farmers summed up the NPA's methods by slicing their hands across their throats, graphically conveying their firm belief that they would have been killed if they had not complied with the NPA's demands.

VI

While the NPA was resorting to increasingly brutal methods in the latter half of the 1970's, an almost complete turnover was not so coincidentally under way in the Communist-party leadership. Starting in the mid-1970's, members of the KM generation of leaders began to be killed or captured. Names well known in Philippine radical circles—Ocampo, Corpuz, Jopson—fell one by one. And on November 10, 1977, the party chairman himself, Jose Maria Sison, was captured. Sison's comrade and top military man, Bernabe Buscayno, had been captured more than a year earlier.

During this period, a gloating President Marcos publicly declared that the elimination of the top party leaders had broken the Communist movement. Even today, Marcos is fond of rolling out statistics on how many CPP and NPA leaders have been killed or jailed. He apparently still does not understand that the ability of the CPP and the NPA to survive these repeated setbacks and then to continue growing under a new corps of leaders is compelling evidence of the Communists' strength, discipline, and resilience.

At a central committee meeting in January 1977, ten months before Sison was captured, Salas had reportedly already been designated as Sison's successor. In any event, he was quickly and formally elected party head in early 1978, capping a meteoric rise in the ranks of the CPP.

Born in the province of Pampanga on December 23, 1947, he went to high school in Angeles City, the prosperous next-door neighbor of Clark air-force base. He arrived on the campus of the University of the Philippines (UP) in 1965 where he studied mathematics and then chemical engineering. Soon caught up in radical student politics, Salas is said to have been recruited into the Communist orbit by Sison himself. Technically this made Salas a member of UP's KM generation of radicals. But Salas's contemporaries on the UP campus in the 1960's now say that he was an unassuming fellow who was never part of the inner circle of student leftists. By most accounts it was only after leaving the university and going underground that Salas became important in the party.

Even today, as the undisputed leader of the Communist insurgency, Salas does not leave a vivid impression with Filipinos outside the CPP who occasionally meet with him surreptitiously. They describe him as a man of ordinary appearance ("except for his ears, which stick out and make him look like Alfred E. Neuman," said one opposition politician). He speaks quietly and exudes self-confidence.

With no claims to being an intellectual like Sison, Salas developed a reputation as a good underground organizer and a daring military tactician. He was conducting military actions like the Subic Bay ambush at a time when the NPA nationwide had only a few modern guns. Although he was arrested in June 1973, he soon escaped. Salas was given the powerful post of party chairman for Central Luzon and was reportedly already in charge of party-building nationwide when he became the leader of the entire CPP.

Once he was chairman, Salas immediately began putting his stamp on the party. Sison, the poet, Maoist intellectual, and grand strategist, had placed great emphasis on ideological correctness and procedural purity. But Salas, the engineer and military tactician, though no less radical than Sison in his ultimate political goals, seems from the beginning to have been much more concerned with ends than with means. Whatever was required to win the struggle for power was justified. It was Salas, for instance, who wrote or at least authorized those party statements, issued since the late 1970's, which establish and defend the party's carte-blanche policy toward the killing of civilians in NPA guerrilla base areas.

The first whiff of the new opportunism came in 1978 when a CPP directive authorized local party leaders to jettison strict procedures set up during Sison's leadership for the careful screening and training of prospective party members before they were admitted to the CPP. For the sake of party-building, the new directive stated, instant memberships could now be granted in areas where the party was just starting to organize.

In the late summer of 1980, members of the Communist party's central committee gathered at a temporary hideout in the foothills near the Bicol town of Daet. It was a typical central-committee plenum, with intense discussion lasting for weeks. The meeting ended with agreement on a growth plan that reflected Salas's ambition to speed up the revolution. Party membership, then totaling 8,000, was to be tripled and NPA strength, then just a few thousand, was to be doubled over the next three years. The party's plans for Mindanao were particularly ambitious. The number of guerrilla fronts on the island was to be increased to 14 by 1984, even though there were only five in existence at the end of 1980.

For the party, the timing of the decision to launch a major expansion effort could not have been better. The Philippine economy had begun to unravel in 1979 due in part to the second oil crisis that hit Third World oil importers like the Philippines particularly hard. Unlike the aftermath of the 1973 crisis, the Philippines could not borrow or export its way out of its problem. There was no new flood of credits for economies as badly managed as the Philippines and there was no new surge in commodity prices. In fact, the prices of sugar and coconut oil, two key exports for the Philippines, were in the basement.

But the lion's share of the credit for the economic collapse was due to the corrupt and wasteful economic policies of the Marcos regime that were finally coming home to roost. Businesses run by Marcos cronies and propped up by billions of dollars in government loans went bankrupt, some because of incompetence, others because the cronies had looted their own companies. Institutions that might have helped the Philippines weather the storm had been crippled by Marcos. The legislature had been abolished, the judiciary deeply compromised, the military politicized, the independent business sector cronyized.

With no jobs luring Filipinos from the countryside to the cities and newly unemployed Filipinos returning to the villages where there was a better chance of eating regularly, the agricultural labor force suddenly began to balloon. There was an increase of at least three million, or 34 percent, from 1979 to 1984, according to government statistics. Suddenly, the NPA was awash in potential recruits, but they were a new breed. For years, the core of the NPA had been young educated Communists from the cities who completely dominated the local recruits, best described as members of the rural lumpenproletariat. The newcomers flooding into the NPA were acting pri-

marily out of economic necessity, not ideological commitment, but they were able to feel right at home. Under Salas the CPP and the NPA had been paying less attention to ideology, and more to achieving victory; to collecting more money and guns to make that victory possible; and to cutting down anyone who might stand in the way.

Inevitably, the new circumstances created a new kind of guerrilla leader. No one personifies this change better than Romulo (Rolly) Kintanar, who today is the single most powerful guerrilla leader in the Philippines. The party dispatched Rolly Kintanar to Mindanao in late 1974 or early 1975, about the time the NPA on the island had been reduced to a pitiful handful of seven men with seven guns. Kintanar was initially charged with giving military training to new and existing NPA guerrillas. But he quickly emerged as the key military tactician and commander in the NPA, building up NPA forces in Mindanao from a total of seven gun-carriers in 1975 to about 100 by the end of 1976.

It was Kintanar, according to some reports, who perfected the NPA's solution to its critical shortage of guns: he created and trained small hit squads, which assassinated policemen and military personel, often on crowded streets, and stole their guns.

When the economic crisis hit the Philippines, it hit commodity-dependent Mindanao the hardest. And no guerrilla leader was more ready than Kintanar to exploit the new circumstances, and transform the insurrection from an ideological to an economic one. Today, Mindanao is home to several thousand NPA guerrillas and, thanks more to Kintanar than to anyone else, the island has become the nemesis of the Armed Forces of the Philippines just as Sison envisioned.

Kintanar's success did not immediately endear him to the national party leadership. He was repeatedly passed over for top party positions in Mindanao and was not even admitted to the central committee until 1979, when Salas was firmly in control. There is no mystery about why the old generation of party leaders in particular were not eager to embrace their military genius in the south. The most positive comment heard about Kintanar in leftist circles is that "he's a first-rate military commander who doesn't know anything about political ideology." Others are not to charitable, describing him as "a warlord who's operating a massive protection racket" and "a psychotic . . . who loves to put a bandanna around his forehead and then go out and kill people."

The number of would-be guerrillas needing to be equipped and fed has continued growing faster in Mindano than in other parts of the Philippines. This created an economic crisis for the NPA because it was already coming close to exhausting in traditional "tax base." For years, the NPA's rural guerrillas had been demanding what amounted to protection money from the operators of mines, logging camps, plantations, and ranches. Those refusing to pay had either to hire their own private armies to keep the NPA at bay or to wait for the guerrillas' tax-enforcement bureau to show up and drive ore-carrier trucks off cliffs, burn logging equipment, or rustle cattle.

Most businessmen paid, reluctantly but without any great sense of outrage. After all, in Mindanao, payoffs to political leaders, military officers, and sometimes criminal bosses had long been considered part of the cost of doing business. But as NPA "taxes" rose, some of the taxpayers said they were being driven out of business. A few of the more reasonable NPA leaders actually sent accountants who were CPP members to examine the books of some of the businessmen who were pleading poverty and waived taxes if it was shown they were losing money.

Kintanar's solution was to start collecting taxes in Davao, the sprawling city of an estimated million people on Mindanao's east coast. Businessmen who did not comply might be kidnapped; storeowners risked having their stores bombed or vandalized in the night. Kintanar dispatched NPA gunmen into Davao to enforce tax collection and to collect a commodity even more precious to the NPA than money—guns to arm the countless would-be guerrillas in the area. Over the past few years, dozens of policemen have been shot and killed in the streets of Davao by NPA hit men who grab their guns and race away.

To kill policemen and enforce his protection rackets, Kintanar has drawn around him a bunch of thugs who are a world apart from the campus Maoists who launched the revolution seventeen years ago. In their hideouts, the walls sport posters not of Mao but of Charles Bronson, for them a symbol of macho violence. Says a Davao City resident with leftist sympathies: "These people aren't good Communists." But the national Communist party leadership no longer seems to care. Kintanar's boys are doing their job: Davao continues to slip slowly out of the Marcos regime's control and business is grinding to a halt.

All the available evidence suggests that Kintanar launched urban guerrilla warfare in Davao City despite the deep misgivings, if not the outright opposition, of the CPP's national leadership. Underground party publications long ignored what was happening in the city. Then they began running the occasional article endorsing urban guerrilla warfare in principle but stressing that the time was not yet ripe.

Some Filipinos on the Left argue that Kintanar at that time was ignoring CPP directives and was on the verge of becoming an independent warlord or bandit leader. But recently the national party leadership seems to have decided that, thug or no thug, Kintanar is one of them. Kintanar has been promoted; he was recently named head of the NPA's central military staff and of its national operational command. CPP publications are now endorsing urban guerrilla warfare in general terms and are reporting favorably on what they have dubbed the NPA's Armed City Partisans (ACP's). The ACP's are essentially hit men and saboteurs. Previously, the euphemism used by the NPA for its assassins in both city and countryside was "sparrow units." In the good old days, they were simply members of "liquidation squads."

At the same time, party leaders may be trying to cut Kintanar off from his power base. While the new job titles sound impressive, it is uncertain how much real power they carry with them. The jobs could keep him in metropolitan Manila, or the provinces just north of the capital, where the underground headquarters of the CPP and the NPA are believed to be located. Either place is far from his base in southern Mindanao. The party also seems to be trying to reduce the independence of Kintanar and any other would-be guerrilla warlords by ordering that large Manila-based companies with logging, mining, or other business operations in the provinces pay their "revolutionary taxes" to representatives of the party in Manila and not to local NPA leaders.

These efforts by the national party leadership to maintain strong central control are consistent with the entire history of the CPP. Although the party encourages local CPP and NPA leaders to use their initiative in formulating tactics and carrying out operations, it has always acted like a classic Communist party in demanding total adherence of its members to the party hierarchy and to official party policy.

This insistence on unity and discipline helps explain the marathon meetings where top party leaders will often spend weeks thrashing out policy and personal differences before reaching an ironclad consensus which, from that point on, is considered unbreachable. It also explains why the CPP commits substantial resources to maintaining an extensive courier network so that party communications can flow quickly from one end of the archipelago to the other. In addition, the party leadership is constantly reassigning party cadres to various parts of the country to counter the regionalist tendencies that are historically so strong in the Philippines.

Because the CPP is secretive to the point of paranoia about its affairs, and because it almost never gives its leaders any public exposure, many otherwise well-informed Filipinos strongly doubt that a cohesive national Communist party even exists. This was the consensus, for instance, of a group of Philippine legislators, representing both the government and opposition parties, who recently visited Washington. Their collective view was that the NPA guerrillas in various parts of the country are effectively autonomous groups that have, at best, tenuous ties with each other.

Only a few Filipinos are better informed. Another recent visitor to Washington, Jaime Ongpin, the chief executive of the Philippines' leading mining company, Benguet, has no doubt about the centralized nature of the party. He said that guerrillas harassing his company's operations in Mindanao knew precisely how Benguet had handled similar harassment at another company operation in northern Luzon, several hundred miles away.

VII

The Philippine Communists are not waging revolution only through the outlawed New People's Army. They are also stepping up their efforts to topple the Marcos regime by using an ever-changing network of tightly controlled but legal front groups. And as Communist power grows both underground and aboveground in the Philippines, the front groups are making less and less of a secret of their Communist affiliation. This past spring, a coalition of CPP fronts called a general strike aimed at shutting down the Mindanao economy and creating political havoc. A pamphlet issued by the coalition calling for such actions as "the putting up of barricades" on Davao's main streets left no doubt that the strike organizers were calling for an urban insurrection:

"The primary objective of the *Welgang Bayan* [national strike] is to paralyze the economic, political and social machinery of the dictatorship. . . . The *Welgang Bayan* will develop from partial to sustained strikes, from temporary to complete paralysis. . . . This will result in the paralysis of the economy and political foundation of the U.S.-Marcos dictatorship and facilitate its downfall."

Shortly after the strike, the key publicly identifiable organizers were arrested. One of those was Davao lawyer Laurente Iligan. His incarceration has become a minor *cause célèbre* among human-rights activists. However, news reports, including one in the New York *Times*, have failed to indicate the declared goals of the strike.

The granddaddy of all the CPP fronts is the *National Democratic Front of the Philippines*, the NDF grandly describes itself as a broad coalition "made up of Filipino nationalists, democrats, progressive christians [the NDF uses the lower-case c] and church people, national minority autonomists, women's emancipationists, socialists, communists, and other genuine patriots here and abroad, representing a wide variety of political and ideologists trends." And within this coalition, promises *Liberations*, the NDF's own publication, "no single party . . . will be allowed to dominate. . . ."

This is all fiction. The NDF has been the total creature of the CPP since 1971 when a central committee directive ordered its creation. It was formally founded on April 24, 1973, but only after CPP members had established the Christians for National Liberation and other front groups that, in turn, were designated as the founding members of the NDF "coalition." Other founding groups in this ostensibly broad alliance were the NPA and the CPP itself, as well as CPP captive organizations like KM, the Communist youth group founded by Sison.

Not only is the NDF completely controlled by the Communists; so, apparently, are all its constituent organizations. Some, like the CNL, are effectively part of the CPP. There are other constituent organizations of students and workers—a good example being the KMU labor alliance—in which the majority of members are not Communists but the leaders are.

The NDF is organized into secret cells, similar to those of the Communist party. Apparently most of the NDF's membership is composed of CPP candidate members and of CNL members who do not want to take that final step of formally joining the party. The CPP administers the NDF through its National United Front Commission. The key roles in the NDF are filled by senior party members. Recently, the NDF's leading clandestine spokesman has been Tony Zumel, who not coincidentally is the CPP's propaganda chief.

A few years ago, the CPP faced the fact that the NDF had failed to develop into a classic Communist front, that is, a political umbrella organization with a program broad enough so that a respectable cross-section of non-Communist leftists and nationalists would be willing to endorse it. So recently the party set up a new generation of legal fronts—a good example being the Nationalists Alliance for Justice, Freedom, and Democracy—meant to draw in non-Communists. But the CPP's control of such organizations has been so obvious and heavy-handed that they have failed to develop broad bases. The Communists also infiltrated groups they had not started—like the August Twenty-One Movement, or ATOM, founded by Butz Aquino. But here again, any hope that the Communists might have had to influence a popular, grass-roots organization was destroyed by their seemingly compulsive need for total control. This summer ATOM split in half, with the Communists going one way and Aquino's people another.

For a while this spring, the Communists appeared to some anti-Marcos activities to be genuinely willing to participate in the creation of BAYAN, a broad opposition alliance in which they would not have automatic control. In the original Communist proposal, BAYAN would have three equal voting blocs: "National democrats," i.e., the pro-Communist group; social democrats; and "liberal democrats," i.e., moderates.

But once preliminary meetings got under way, recalls Butz Aquino, the Communists repeatedly and successfully demanded that the voting formula be changed in their favor. When the founding congress began on Saturday, May 5, it soon became obvious to Aquino that the Communists were determined to manipulate and control the entire event. The Communists orchestrated workshop discussions, broke standing agreements by shipping the names of trusted party members into the nomination lists for the executive, and referred every major decision to top Communists not even at the meeting. Recounting Butz Aquino:

"The people outside the hall who we didn't even see were calling the shots. . . . Party members were giving the orders. Whenever there was a crucial decision to be made, they'd ask for a recess. They they'd come back with their hard position."

Angered by the CPP's manipulative approach, virtually every respected and independent political figure in the anti-Marcos opposition—from moderates like Aquino to left-wing nationalists like former Senator Jose Diokno—have quit BAYAN. After working on and off with the Communists for the two year since his brother was assassinated, Aquino concludes: "You can't trust these guys." But how could it be otherwise when the CPP's explicit policy toward all front-group activity is one of deceit? This is how the basic party directive on front groups described the need for secret party control:

"These concentric circles [anti-Marcos elements NDF members, party members] are expressive of our effort to have the party . . . committee always at the center of anti-fascist and other legal activities, leading those activities without being clearly visible to the enemy."

To many it seems that those hurt most by the Communist machinations inside BAYAN were the Communists themselves. Today, BAYAN is known as just another CPP front. If the Communist had restrained themselves, they would today be a strong, perhaps decisive, influence within a popular, broadly based, anti-Marcos alliance. The explanations being advanced for this seemingly self-defeating behavior are all rather ominous. Aquino offers two reasons suggesting that we are merely witnessing a totalitarian party in action. The first is a paraphrase of the CPP directive: "their wanting to dominate completely any organization they join . . ." The other, "their feeling that they're the only ones who have the answers to everything." Jose Diokno suspects the explanation lies in the Communists' growing belief that they are so close to taking power that they no longer need to make significant compromises with the non-Communist opposition.

Certainly there were few real compromises evident in the new National Democratic Front program that was issued at the beginning of this year. Although Communists have repeatedly described the program as a moderate appeal to non-Communists, in reality it is overtly Marxist and covertly Leninist. The heart of the program is a call for the establishment of a People's Democratic Republic of the Philippines (PDRP). The program is like that of most other nations with names that start out "People's Democratic Republic of. . . ." The United States is, of course, the enemy. The program promises that the PDRP's "revolutionary army as well as the people shall be constantly in a state of readiness to repel any act of intervention and aggression from foreign forces, including the United States." Furthermore, "the United States must leave its military bases in the Philippines. . . ." And "as a rule, direct investments and profit-making assets of the U.S. and other big foreign capitalists, especially those in the vital and strategic industries, shall be nationalized.

In addition to Americans, a lot of Filipinos might feel unwelcome in the new People's Democratic Republic of the Philippines:

"Upon victory, a people's tribunal shall be created. This tribunal will have jurisdiction to try and punish enemies of the revolution and their collaborators who have committed crimes against the people, and to escheat *[sic]* properties and ill-gotten wealth amassed by the ruling elite of the old order."

The program also promises "severe punishment of those with grave crimes (i.e., those who owe the people blood debts) and reeducation of those who deserve leniency. . . ."

The NDF program repeatedly states that the PDRP will be run by a "democratic coalition" government. What is most unsettling about that statement is the NDF's assurance that the coalition will be as pluralistic as the NDF is today. "As in the course of the people's war, no political party, group, or individual shall be allowed to monopolize the decision-making processes and the execution of state affairs." If there is any remaining doubt about the CPP's concept of a coalition, it should have been dashed by NDF spokesman Tony Zumel who said earlier this year that the NDF rejected the suggestion that the Communists in the National Liberation Front of South Vietnam had overwhelmed the front's non-Communist reformers.

While the "democratic-coalition" government the Communists are promising through the NDF cannot be described as a coalition, neither should it be described as democratic. The NDF program declares that "all the basic democratic rights shall be embodied in the constitution of the People's Democratic Republic. These shall include the right . . . to free speech and the free press. . . ." But the CPP's underground monthly, *Ang Bayan*, confided to party members this year that, contrary to what its front organization is promising, freedom of the press will be tightly restricted:

"Under the People's Democratic Republic, press freedom shall be enjoyed by the toiling classes and the strata of the bourgeoisie allied to them—in short by the overwhelming majority of the people who are at present exploited and oppressed. But should we allow the same freedom to be enjoyed by those who would seek the restoration of imperialist, landlord, comprador, and facist rule? Democracy will be enjoyed by the majority composed of the nationalist and democratic classes, while their class adversaries shall be suppressed—that is, prevented from regaining power."

This sort of duplicity could not possibly be surprising to any student of Communist history, but there are few such people in the Philippines. There is a whole generation of young, vaguely leftish Filipinos who view

the NDF program as a completely credible document deserving of serious discussion.

The Communists' intention of crushing a free press while their totally controlled front group, the NDF, promises otherwise is simple and straightforward duplicity. But the CPP's leadership is also quite adept at complex, multi-layered duplicity. Nowhere is this more evident than in how the party leaders are handling the emotional and controversial issue of the U.S. military bases on Philippine soil.

At first glance, the Communist position seems unambiguous. The NDF program declares that "the United States must leave its military bases in the Philippines. . . ." In fact, says the NDF, "no foreign power shall be allowed to set up military bases on Philippine soil. . . ." For years, the CPP has ridden this issue, using it to mobilize students and other nationalists to demonstrate in front of the U.S embassy in Manila. Yet simultaneously, CPP leaders have been repeatedly signaling U.S. officials that they are willing to make a deal with the United States whereby the U.S. bases could continue operating after the Communists came to power.

The CPP began sending such a signal as early as 1981 when Horacio (Boy) Morales told a journalist that, despite the NDF's clear-cut pledge to remove the bases, all the NDF really wanted was to negotiate their future status. This year, people who have spoken with Salas and other figures in the Communist movement say that they also have expressed their readiness to junk the NDF program and make a deal on the bases.

But this is not necessarily the final word on where the Communists really stand on the issue. This is because Philippine nationalists who are strongly opposed to the bases say that Salas has been reassuring them this year that his offers to make a deal are a tactical ruse aimed at nothing more than lulling the United States.

This is consistent with the NPA's apparent decision a few years ago to avoid military action aimed at the bases or at U.S. military personnel. Long gone are the days when Salas was a hit-squad leader ambushing U.S. Navy personnel at Subic. Today the areas immediately adjacent to Clark and Subic are among the most peaceful in the Philippines. Instead of attacking U.S. military officers and heightening Washington's alarm over the deteriorating situation in the Philippines, the NPA is quietly collecting "revolutionary taxes" from the businesses that prosper at the periphery of the bases.

VIII

The logical question to ask about the issue of U.S. military bases, or any other major issue, should be: what is the official position of the Communist Party of the Philippines? In fact, what is the official program of the Communist Party of the Philippines? Every Communist party on earth, after all, has an official program. But ask any rank-and-file member of the CPP what his party's program is and watch the uncertainty flicker over his face. When he recovers, he always has an answer. The trouble is that every CPP member seems to have a different answer.

Answer One: "The CPP's program is that of the founding document, *Programme for a People's Democratic Revolution*, issued in 1968." Obviously not, say other party members. And with good reason: the 1968 other party members. And with good reason: the 1968 program, with its praise of MAO and Albania and its attacks on institutions that no longer exist, has long been out of date.

Answer Two: *"Our Urgent Tasks* [1976) was an update of the party program." This answer was offered only by Jose Maria Sison, in a written response to questions I relayed to him this summer. The document he refers to was offered only by Jose Maria Sison, in a written response to questions I relayed to him this summer. The document he refers to was the last party document he wrote before being jailed.

Answer Three: "The party has no program." This answer, volunteered by more than one party member, is not credible. It is true only in the very narrow, technical sense that the CPP has apparently not held a full Dress party congress, at which party programs and the like are formally ratified, since the founding meeting in 1968. But this does not prevent the top CPP leadership from having its own program that it keeps secret from party members.

Answer Four: "The CPP program is the same as the program of the National Democratic Front." That sounds like a confession of what we know is true—that the Communists completely control the NDF. But the fact that the CPP controls the NDF does not mean that the public NDF program is the same as the secret CPP program.

With its promises of reeducation camps, sweeping nationalization of private business, and an anti-American stance in foreign policy, the NDF program by most yardsticks earns a Communist label. But the NDF's parent, the CPP, is telling its members that the NDF program represents only the beginning of the revolution in the Philippines. Says the CPP's *Ang Bayan*:

"In essence, the [current] people's democratic revolution is a bourgeois democratic revolution and not a proletarian revolution. . . . What will be the direction of the people's democracy that will be established? Depending on the class composition of the revolutionary coalition, it could lead toward socialism or toward capitalism.

In other words, when the NPA is marching down the streets of Manila, the real struggle has just begun: "The party of the revolutionary Filipino proletariat [i.e., we of the CPP] will bend every effort to advance Philippine Society toward the correct path of socialism. . . ." Said a member of the central committee in an interview this summer: "That [the NDF program] is the minimum program. The maximum program is Communism."

So what are the constituent parts of the CPP program? In informal conversations this past summer, CPP members talked loosely about a second, radical stage of the revolution that would push the Philippines to the far Left of the Communist world. Evoking memories of the Khmer Rouge's forced evacuation of Phnom Penh, one CPP member said that "most probably" the population of Manila would have to be significantly reduced. "We can't support Manila the way it is."

Another said that the NDF promise "to distribute land to the landless tillers" represents only a halfway house on the road to the total communization of agriculture. "There will be a transition period of land reform and cooperatives. . . . We will invite them [the peasants] to join cooperatives and try to show them the benefits of collective labor. Collectivization will be implemented step by step." And how long will all this take? "A few years," said one. "Easily ten to twenty years," said another.

In truth, none of these relatively low-level party members really knows what the CPP program is. They were simply repeating the kind of talk they had been hearing inside party circles. Like the low-ranking Khmer Rouge soldiers who entered Phnom Penh not knowing that the next day they would be ordering the populace to evacuate, these good soldiers of the CPP are ready to carry out the second stage of the revolution when their leaders unveil the plan. Among the thousands of members of the Communist Party of the Philippines, it seems that only the estimated half-dozen members of the Politburo's executive committee share knowledge of the secret program.

IX

The party leadership's ultra-elitist style was evident as early as 1981 when Rodolfo Salas and a small group around him secretly decided to seek aid from the Soviet bloc. The decision was a momentous one. Since Sison had founded the CPP as a classic Maoist party, all the basic documents of the CPP and the NDF had denounced the foreign policy of the Soviet Union as social-imperialist. This was still the party's position when Salas approved a scheme to smuggle arms from Eastern Europe into the Philippines through South Yemen, which is firmly within the Soviet bloc and East German military personnel based on its soil.

For the record, the arms were donated to the Philippine Communists not by the Soviets but by a branch of the Palestine Liberation Organization. But this was a veneer that even Haracio Morales, a key figure in the smuggling operation, had difficulty in treating seriously. In a one-on-one courthouse interview after he had been arrested, I asked Morales why the CPP had decided to accept aid from the Soviets. "It's a few steps removed from the Soviets," he said with a nervous laugh, adding, "but it's still considered separate, no?"

Long after the arms (AK-47's) and Makharov pistols) were aboard a freighter and on their way to the Philippines, the CPP leadership continued to suggest to rank-and-file members that there had been no change in the party's antagonism toward the Soviet Union. The August 1981 issue of *Ang Bayan*, for instance, denounced "Soviet social-imperialism." When the smuggling operation was later exposed and a few angry party members accused Salas and others of secretly acting contrary to party policy, the leadership lamely replied that the arms smuggling was the work of the CPP's National Democratic Front and not of the CPP itself. The fact that the NDF did not drop the anti-Soviet planks from its program until the year after the arms arrived was never explained. Nor was the fact that it was party leader Salas who gave final approval to the Soviet arms shipment.

The CPP leadership did not go public with its swing to a pro-Soviet position until January 1982, when it authorized the NDF to issue a new draft program that dropped all the Maoist jargon and the attacks on the Soviets. The party's Maoist founder, Jose Maria Sison, who had been watching developments in the CPP under Salas with increasing unhappiness since being captured in 1977, was enraged. In an exchange with me of questions and answers from prison in mid-1982, he contemptuously referred to the new NDF program as "this supposed draft." He also suggested that anyone in the CPP or the NDF who had approached the Soviet Union for aid was a renegade: "I do not believe that the National Democratic Front as a whole has ever approached the Soviet Union for assistance. Nobody wants a

bear hug. It can be fatal." He added that "China's diplomatic line is correct."

During this period Sison several times signaled his opposition to the changes under way in the CPP. But it soon became obvious that the founding father was being ignored. By mid-1983, the CPP had turned the corner and was openly leaning toward the Soviets while almost completely ignoring the People's Republic of China. *Ang Bayan* began praising developments in Cambodia, Vietnam, Mozambique, and Angola and dropped its earlier attacks on Soviet and Cuban aggression. Except for the occasional reference to "antagonistic contradictions" between Vietnam and Cambodia, the CPP's statements on foreign affairs are completely consistent with Soviet policy. And this summer, in the exchange of questions and answers, Sison himself seemed to have accepted in principle the idea of the CPP's receiving Soviet aid.

Meanwhile, using the National Democratic Front as its vehicle, the CPP is actively courting the Soviets in Europe. Luis Jalandoni, a Filipino and former priest who serves as the NDF's international representative in Amsterdam, is successfully tying the NDF, and by implication the CPP, ever closer to the Soviet bloc. Jalandoni was a delegate to last year's International Conference on Nicaragua and for Peace in Central America held in Lisbon. There he conferred with Vietnam's education minister. Jalandoni also worked hard at identifying the NDF and its European supporters with the movement opposed to the deployment of U.S. missiles in Western Europe.

Jalandoni's most important task has evidently been raising funds for the Communist movement back home in the Philippines. He seems to have been very successful. As far back as the summer of 1981, according to unchallenged affidavits, Jalandoni provided $30,000 for travel and transportation to the CPP arms smugglers who passed through Europe on their way to South Yemen. Today, the amount of money flowing into the Philippines from Western Europe each year is estimated by Philippine and U.S. analysts to be at least in the hundreds of thousands of dollars. As already noted, the lion's share of this money seems to be flowing from Church-related bodies in Europe to Communist-dominated organizations within the Roman Catholic Church in the Philippines. At least some members of the European Church organizations know precisely what is happening to their money. *Ang Bayan* reported some time ago that "a number of foreign Church people . . . have also visited the NPA guerrilla zones."

Another, increasingly important, source of funds are the so-called Philippine "solidarity groups" that Jalandoni has been instrumental in setting up in Europe. Such groups exist in Sweden, Norway, West Germany, Belgium, Holland, Ireland, and apparently several other countries. Some of these groups appear to be the offspring of small, radical splinter parties. Recently, several of them sent envoys to the Philippines to see first-hand how their donations are being spent by the NPA. A U.S. journalist who spent several days this summer at an NPA camp said a Norwegian woman was in the camp for discussions with the NPA guerrilla leader about giving financial help that would enable the NPA to obtain additional arms. Several German and Japanese radicals have also spent time with the NPA.

The financial help that the CPP is receiving from abroad does not seem to have increased to the point that it is making a huge difference. But it is already substantial, a fact that is almost universally ignored by the U.S. media. In August alone, the Washington *Post* reported that the NPA is receiving "negligible foreign support" while the Washington *Times* flatly stated that "there is no evidence of any material foreign support."

In fact, the CPP has been openly acknowledging since 1974 that it is actively seeking and often receiving material aid from abroad. As recently as this spring, Tony Zumel declared in an NDF news release that:

"We have made an appeal to all freedom-loving peoples around the world for political and material assistance and the response has been heartening. Such assistance comes from revolutionary, progressive, and democratic organizations, institutions and individuals who care deeply for our people's liberation struggles and welfare."

The question left hanging is whether the Soviets are involved in the flow of foreign assistance to the Philippine Communists. Since the 1981 arms shipment, which embarrassed both the Soviets and the CPP leadership when it became public, not a single well-documented case of Soviet aid has surfaced. Rumors abound that Vietnam is helping the NPA, but no hard evidence seems to exist. A strong circumstantial case is made by some that at least a few of the radical and Church organizations funneling money from Europe to the Philippine Communists must be controlled or bankrolled by Soviet agents.

But the most persuasive case that the Soviets have begun aiding the Philippine Communsits was made by two Filipinos in separate interviews this summer in Manila. Both are very knowledgeable about what is going on inside the Communist party. One is hostile to the CPP; one is very sympathetic. Both said that Moscow is split over how to handle the CPP.

On one side, according to both these sources, is the International Department (of the Central Committee) of the Communist Party of the Soviet Union (CPSU). This organization usually takes the leading role in the USSR's relations with foreign Communist parties. But afflicted with bureaucratic inertia, the International Department today is run by conservatives who are comfortable with their decades-long ties to the old, pro-Moscow Communist party in the Philippines, the PKP (which since the expulsion of Sison and his supporters in 1967 has been declining in size and influence in comparison with the CPP and whose existence today largely depends on Moscow's recognition of it as a fraternal Communist party). According to this analysis, the International Department bureaucrats have resisted the CPP's repeated requests that they withdraw their recognition of the PKP and recognize the CPP instead.

Though a reading of CPP and PKP statements suggests that the International Department has been trying to convince the PKP to negotiate a modus vivendi with the CPP, hopes for any such agreement seem to have collapsed. By early this year, the CPP had escalated its attacks on the PKP's leaders, calling them "professional political swindlers [who] are trying to sneak into the ranks of the revolutionary Left." The CPSU's International Department responded in June by inviting the PKP's general secretary, Felicisimo Macapagal, to Moscow where the CPSU and the PKP, according to Tass, pledged their "fraternal solidarity."

But the more pragmatic and energetic KGB shares neither the old loyalties nor the new qualms of the International Department, according to my informants. Recently, they say, the KGB has developed close relations with the CPP. The two sides are in frequent contact with each other both in the Philippines and abroad, but precisely what kind of business they are transacting is unknown. Both sources assume that the KGB is assisting the CPP but they have no proof.

Clearly the CPP's new generation of coldly opportunistic leaders would no longer hesitate to accept substantial aid from the Soviets if it were offered. And just as clearly the CPP currently needs a generous foreign backer. For in the last year, the Communists' successes have brought them to a critical juncture where the issue of outside aid is more and more pressing. The guerrillas of the New People's Army are increasing rapidly in number. Moving in ever larger units, they have a soaring demand for arms, food, and equipment. The NPA also has enough potential recruits to double in size if it had the money to equip and support them as well. But the economic depression that helps produce so many potential recruits also makes NPA "tax collecting" increasingly less lucrative, no matter how much extortionate violence is applied.

If the future brings no substantial flow of money to the Communists from abroad, and if Marcos were to die or be toppled and succeded by a competent, reformist government, it is quite conceivable that the current rapid growth of the Communists could stall. But if the money were to start flowing in substantial amounts and Marcos, who has lost the moral authority necessary to fight the Communists, were to hang onto power, then it is highly likely that Rodolfo Salas will be heading the People's Democratic Republic of the Philippines sometime in the 1990's and unveiling "a Pol Pot future."

This fine lady is up against it and I want to be on the side that gives her every advantage to make democracy work, because I can hear in my ears right now in this Chamber if it all turns to hell there that we cannot go back to Southeast Asia because that is the part of the world those 7,200 islands are located.

If I were in the politburo, other than Afghanistan and the Baluchistan part of Iran, I would want those 7,200 islands. I think they are desperately out to get them. That will leave us with no base from Osumi all the way around the greatest landmass in the world to Diego Garcia; so I am going out on a limb for a fine lady and I am going to vote for this $200 million.

Mr. SOLOMON. Mr. Speaker, I yield 1 minute to the gentleman from Ohio [Mr. TRAFICANT].

The SPEAKER pro tempore. Without objection, the gentleman from Ohio [Mr. TRAFICANT] is recognized for 1 minute.

There was no objection.

Mr. TRAFICANT. Mr. Speaker, I agree with the beautiful speech this morning. Mrs. Aquino is trying to help her country and certainly will be a help to the world; however, we will be setting a very dangerous precedent sending this money here on such short notice. We are endangering revenue

sharing funds. We have farmers in this country who are looking for what is next. We have senior citizens worried about the future. We have cities literally in a state of depression and economic collapse.

I would say this. There are two things we should concern ourselves with here today. If we are going to do it, we should have a negotiated agreement on permanence on those bases, not on a speech.

No. 2, the money should come from the 1987 foreign aid appropriations, and I agree with the gentleman from Wisconsin [Mr. KLECZKA]. You can give a man a fish and he will eat for a day. You can teach him to fish and he will eat forever.

I think we cannot set a dangerous precedent, letting everyone who has a defense establishment in their region and their country come to the United States on a critical impasse asking for dollars. We have got to stop throwing these dollars around and hold our stand here today. I say that we vote no.

Mr. SOLOMON. Mr. Speaker, I yield 2 mintues to the distinguished gentleman from Oklahoma [Mr. EDWARDS], a member of the Appropriations Committee.

The SPEAKER pro tempore. Without objection, the gentleman from Oklahoma [Mr. EDWARDS] is recognized for 2 minutes.

There was no objection.

(Mr. EDWARDS of Oklahoma asked and was given permission to revise and extend his remarks.)

Mr. EDWARDS of Oklahoma. Mr. Speaker, I have been in the House for 10 years. In that time I have voted for a foreign aid bill only one time. I am a member of the Foreign Operations Subcommittee and I have voted for a foreign aid bill only one time.

I am not a great advocate of foreign aid, but I do understand that there are times when we act in our national security interests.

I was not here on the floor. I did not hear Mrs. Aquino's speech. I met her later at coffee.

I am not advocating support of this money because I think she deserves an honorarium. I am not advocating giving her this money because I think that it is the heartfelt thing to do. I am not advocating giving her the money. I am advocating putting money into the Philippines where we have Subic Bay and Clark Air Force Base and where we need to keep them, where there is a Communist threat that we need to stop.

We on this floor recently took up the issue of Central America and we said we must make an investment in stopping communism and preserving democracy.

Yes, it adds to the deficit. Everything we do, everything we spend on anything adds to the deficit, but we have to choose priorities, and one of those priorities is to defend freedom and democracy in the world, and this is one way to do it.

I advocate support of this money for the Philippines for our own national security.

Mr. OBEY. Mr. Speaker, I yield myself 2½ minutes.

Mr. Speaker, I would like to put some things in perspective. I want to make it quite clear that I regard this $200 million effort that is being made here today as a one-shot operation to try to provide some emergency help to an ally who needs it very badly at the moment. That does not mean that it can be counted on in the next fiscal year, because I would point out that because of the fiscal stringencies that have already been cited, the foreign operations bill which will be a part of the continuing resolution which we consider next week will cut the pool of money available for all those countries in the military credit sales portion of that bill by 50 percent and it will cut under the ESF provision, and this is in the ESF today, that discretionary pool of funds available for all the countries that are not earmarked in that bill by 32 percent.

So lest anybody think that the foreign assistance bill coming out for fiscal year 1987 is loose, I want to emphasize again that we have massive reductions in that bill. What we are trying to do is balance off our requirement to comply with Gramm-Rudman in the fiscal year under consideration with the necessity to provide some assistance to a critical ally at a critical time, and procedurally we have only one way to do it and this is the way.

In terms of base rights and bargaining chips, I want to say that I agree with those who have raised questions about the base rights negotiations. I have minimum high regard for the kind of negotiations which our previous administrations—plural—engaged in in terms of obtaining a decent price for the use of those bases, not just in the Philippines but in a number of other countries around the world. I think our negotiators were soft and I think they paid too much.

I do think that our negotiators have to be tougher on the next round of negotiations, but there is a time and place, there is a smart way to go about applying pressure on negotiations and a bad way. This is the best way to do it if we want to protect our negotiating rights in the future and to protect our allies and democracy today.

Mr. SOLOMON. Mr. Speaker, I yield 1 minute to the gentleman from Colorado [Mr. BROWN].

The SPEAKER pro tempore. Without objection, the gentleman from Colorado [Mr. BROWN] is recognized for 1 minute

There was no objection.

Mr. BROWN of Colorado. Mr. Speaker, I thank the gentleman for yielding the time.

I would like to ask my colleagues to give some thought to what we are about today. The first question we should ask ourselves is are we on target with regard to the budget deficit?

Remember when we talked about $170-some billion deficits for this year? We were outraged that it was that high.

Does anybody want to guess how close we are? We missed it by more than $50 billion. Now, that is not close.

The simple fact is this House has ignored its budget, has ignored its responsibility and has imposed a terrible burden on the taxpayers.

Now, what we are doing is saying that we are not going to set priorities. We are not going to care whether we stay within the budget. We are not going to care about planning for future years. We are going to take $200 million and appropriate it over and above the budget and ignore our responsibilities to the American people in the Budget Act. That is wrong. Every Member in this Chamber knows that is wrong.

It is not a question of the Philippines. It is not a question of national defense. It is whether or not we ignore the responsibilities we have under the Budget Act and ignore the responsibilities we have to the American people.

Mr. Speaker, I would hope before we give away another $200 million of the taxpayers' money, we give some thought to our obligations.

Mr. SOLOMON. Mr. Speaker, I yield myself such time as I may use.

Mr. Speaker, we have heard that this is just a one-shot deal. If that were true, it would be one thing, but in my opinion we really are establishing an entitlement program. By enacting this legislation as an urgent supplemental now with 2 weeks to go in this fiscal year, we really are exempting it from all the other foreign aid Gramm-Rudman cuts, as we are giving exemptions to Egypt and Israel and Pakistan.

I just do not think that we can afford to do this.

Now, Mrs. Aquino made a point to us today in her very sincere statement that, yes, her country needs money and she needs to provide an income to the rebels, the insurgents, the Communists, so that they will not be poor and depressed people.

What she needs is to revise her economy. We asked Marcos, the gentleman from New York [Mr. SOLARZ] and myself, when we were in the Philippines over a year ago, begging him to make the reforms that were necessary, to make the political, the economic, and the military reforms. He refused to do it and he went down, as well he

should; but those reforms have not been made under this administration yet, either.

What I am saying to all of you here is that if they do need the money, they need to establish this confidence in the rest of the world. Japan is not investing a nickel. None of the other countries are investing a nickel, and until they make those reforms, those countries will not.

If we need to give them $200 million today, let us give $200 million to our military construction program and let us spend the $200 million in the Philippines refurbishing those two bases and that money will end up in the Philippines. It will help them and it will help us, but let us not go through this charade of appropriating now $200 million, adding to our deficit, as the gentlewoman from New Jersey [Mrs. ROUKEMA] has said so eloquently before, and as the gentleman who replaced our dear friend from Wisconsin, Clem Zablocki, has said, let us do this in a normal procedure 2 weeks from now in the 1987 budget when it should be done.

I for one will do everything I can to help the Philippines and even to help this kind of an appropriation within the 1987 budget, but I cannot be fiscally irresponsible and support this legislation today.

I hope the legislation will be defeated so that we can act on it intelligently at another time.

Mr. OBEY. Mr. Speaker, I yield our remaining 6½ minutes to the distinguished majority leader, the gentleman from Texas [Mr. WRIGHT].

The SPEAKER pro tempore. Without objection, the gentleman from Texas [Mr. WRIGHT] is recognized for 6½ minutes.

There was no objection.

Mr. WRIGHT. Mr. Speaker, I rise in support of this legislation. It has been reported to us on a bipartisan basis from our Foreign Affairs Committee. I think it is an imperative national need. This is in our own national strategic interest.

Surely our forward most military bases, the far-flung battleline of the United States, stretches to the Philippine Islands.

I do not know how long our memories may be, those of us who were of an age that we can remember, I recall how vital the Philippines were to our national self-interest in World War II. We remember General MacArthur's ordeal and how he held on as long as he could before being driven from the Philippines and vowed upon leaving, "I shall return." We remember the thrill that we experienced when he did.

Many of us can still remember the news reels how he came aboard with the gingerbread showing on his hat, with wet feet walking into the Bay in the Philippines from the landing craft.

The Philippine Islands has such a long history of identity with the United States that we cannot divorce them. There is no way that we can divorce the Philippine Islands from our own best national interests. Militarily, from the standpoint of the investment we have in those military bases, surely it would cost us many times more than the amount that is contemplated in this bill if, God forbid, the tenuous tentative government they have established, the fragile flower of democracy that has begun to flourish, should be rooted up by the tides of insurrection, and that could happen. Surely that definitely could happen, unless this fragile flower has the seedbed and the rainfall and the nourishment in which to grow.

Democracy is not an automatic thing. What Mrs. Aquino and her government have undertaken to do is to demonstrate that a free government operating under constitutional laws with protection of the rights of individual citizens can solve the legitimate social and economic problems of the people, and do it better than a slave government driven by a dictatorship of either the left or right.

I cannot imagine a better investment. I cannot imagine a more necessary demonstration of our continuing interest in that bastion of freedom that exists that far away in the Far East. I just ask Members to bear in mind the longstanding obligations that we have had to them and that they have had and discharged to us, beginning at a time when we helped them win their liberty in a sense from the shackles of a colonial empire, and for a long while they were associated with us, sharing our burdens and our responsibilities.

Then at the end of World War II, when they wanted it, we gave to them their independence. We have a responsibility, it seems to me, to see to it that the thing that happened at the same time in history when we helped them attain their independence does not occur as occurred in Cuba, and that that country should go by the wayside.

I would just ask that Members bear in mind the prayer of the poet who said:

God of our fathers, known of old,
Lord of our far-flung battle-line,
Beneath whose awful Hand we hold
Dominion over palm and pine—
Lord God of Hosts, be with us yet,
Lest we forget—lest we forget!

Mr. RAY. Mr. Speaker, I must oppose with regret this supplemental legislation because there is no clear-cut plan to fund it during this time of budget deficits.

I have seen no effort to reprogram funds from other foreign aid recipients who are of a lower priority than the Philippines.

The Philippines are a priority, and Mrs. Aquino has made a sincere plea for assistance. However, Mrs. Aquino has not responded positively to my own concerns and the concerns of others about the future of our military bases—the Subic Bay Naval Base and Clark Air Force Base.

She says that we can depend on her to work out a mutually satisfactory agreement in 1988.

Mr. Speaker, the infrastructure of these bases is deteriorating and cannot wait till 1988.

DOD has requested $72 million for 1987 and has stated that $1 billion will be needed by 1990 to provide for quality of life programs and needed repairs.

The House Armed Services Committee has deleted the 1987 funding.

It does not seem to bother DOD that, in 1988, Mrs. Aquino may or may not decide to renew the lease for just 1 more year at a time beginning in 1991—yet we are expected to make investments which will last 20 or 30 years and which may, in fact, benefit some other country who may not be a friendly ally.

Mr. Speaker, our military bases in the Philippines are being held hostage.

A gun is to our head, and we are being jerked around in a manner which I don't believe we should tolerate.

Under these circumstances, because of my obligations as a fiscally responsible Member of Congress, I cannot support this supplemental appropriations bill.

Mr. BROOMFIELD. Mr. Speaker, I offer my strong support for this joint resolution giving additional economic assistance to the Philippines. Now is the time to help that new government rebuild the economy of that country.

This morning, we were honored to have the President of the Philippines, President Corazon Aquino, address a joint session of Congress. She is to be commended for her excellent remarks. President Aquino told us of the tragic loss of her husband, and of her vision for the Philippines.

Her new government is bringing new hope to the Philippine people. The dark days of the Marcos regime are behind us. Now, however, is not the time to sit back and hope that all will go well in that country. We must ensure that the democratic revolution of the Philippine people becomes a reality. We must work with Mrs. Aquino to ensure that the Philippines moves smoothly and confidently along the road to political and economic recovery.

President Aquino briefly told us of the financial damage done to the Philippines by the previous government. The Philippines have been left in an economically emasulated and fragile position. These are difficult times for that country. That island nation is in dire need of substantial emergency economic assistance. America needs a strong and stable democratic government in that important region of the world. America also needs a good and loyal ally in the Pacific. Who can doubt the strategic importance of that country? Who can ignore the fact that Communist insurgents are threatening the viability of the Philippines?

I join my colleagues in supporting this request for additional economic aid, in the form of economic support funds, for the Philippines. This emergency economic package is the

right medicine at the right time. That country deserves renewed U.S. investment, banker confidence and economic support. Now is the time to extend a helping hand to an old ally that has stood by America in past days. President Aquino, we stand with you in your efforts to bring new strength and vitality to your land. I urge my colleagues to join me in this worthwhile cause.

Mr. OBEY. Mr. Speaker, I move the previous question on the joint resolution.

The previous question was ordered.

The SPEAKER pro tempore (Mr. GRAY of Illinois). The question is on the engrossment and third reading of the joint resolution.

The joint resolution was ordered to be engrossed and read a third time, and was read the third time.

The SPEAKER pro tempore. The question is on the passage of the joint resolution.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. SOLOMON. Mr. Speaker, I object the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present

The Sergeant at Arms will notify absent Members.

Mr. MARTIN of New York changed his vote from "nay" to "yea".

So the joint resolution was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

AUTHORIZING THE CLERK TO MAKE CORRECTIONS IN ENGROSSMENT OF HOUSE JOINT RESOLUTION 732

Mr. OBEY. Mr. Speaker, I ask unanimous consent that in the engrossment of the joint resolution just passed, the Clerk be authorized to make technical corrections in punctuation, spelling, and cross-references.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

INDIAN HEALTH CARE AMENDMENTS OF 1986

Mr. FROST. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 528 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 528

Resolved, That at any time after the adoption of this resolution the Speaker may, pursuant to clause 1(b) of rule XXIII, declare the House resolved into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 1426) to reauthorize and amend the Indian Health Care Improvement Act, and for other purposes, and the first reading of the bill shall be dispensed with. After general debate, which shall be confined to the bill and shall continue not to exceed one hour, thirty minutes to be equally divided and controlled by the chairman and ranking minority member of the Committee on Interior and Insular Affairs and thirty minutes to be equally divided and controlled by the chairman and ranking minority member of the Committee on Energy and Commerce, the bill shall be considered for amendment under the five-minute rule. In lieu of the amendments recommended by the Commit-

tees on Interior and Insular Affairs and Energy and Commerce now printed in the bill, it shall be in order to consider an amendment in the nature of a substitute consisting of the text of the bill H.R. 5222 as an original bill for the purpose of amendment under the five-minute rule, said substitute shall be considered for amendment by titles instead of by sections and each title shall be considered as having been read, and all points of order against said substitute for failure to comply with the provisions of clause 5(a) of rule XXI are hereby waived. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and any Member may demand a separate vote in the House on any amendment adopted in the Committee of the Whole to the bill or to the amendment in the nature of a substitute made in order as original text by this resolution. The previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit with or without instructions.

The SPEAKER pro tempore. The gentleman from Texas [Mr. FROST] is recognized for 1 hour.

Mr. FROST. Mr. Speaker, for purposes of debate only, I yield 30 minutes to the gentleman from Tennessee [Mr. QUILLEN], pending which I yield myself such time as I may consume.

Mr. Speaker, House Resolution 528 is an open rule providing for the consideration of H.R. 1426, a bill to reauthorize and amend the Indian Health Care Improvement Act. The resolution provides for 1 hour and 30 minutes of general debate to be divided in the following manner: 1 hour to be equally divided and controlled by the chairman and ranking minority member of the Committee on Interior and Insular Affairs and 30 minutes to be equally divided and controlled by the chairman and ranking minority member of the Committee on Energy and Commerce.

The rule provides that in lieu of the amendments recommended by the Committees on Interior and Insular Affairs and Energy and Commerce, which are now printed in the bill, that it shall be in order to consider an amendment in the nature of a substitute, consisting of the text of H.R. 5222, as an original bill for the purpose of amendment under the 5-minute rule. The rule further provides that the substitute shall be considered for amendment by titles instead of by sections and that each title shall be considered as having been read.

Mr. Speaker, H.R. 5222, which is made in order as the amendment vehicle by this rule, represents a compromise proposal developed by the two committees having jurisdiction over Indian health programs. H.R. 1426 was reported from both the Interior Committee and the Energy and Commerce Committee in slightly differing forms in May 1985. In April of this year, the two committees agreed to a version of the bill, embodied in H.R. 4600, which was presented to the House under suspension of the rules, but that version failed to receive the necessary two-thirds vote for passage. Since last April, the two committees have developed a new consensus bill which includes many provisions from H.R. 1426 which are mutually agreeable to the two committees. However, there remain matters in the consensus bill which are still subject to some disagreement and consequently, the rule providing for the consideration of H.R. 1426 and the substitute, H.R. 5222, provides for the consideration of all germane amendments.

Mr. Speaker, the rule further provides a waiver of points of order against the substitute for failure to comply with the provisions of clause 5(a) of rule XXI, which prohibits the consideration of appropriations in a legislative bill. The substitute provides for the expenditure of moneys held in trust for Indian tribes by the U.S. Government, by those Indian tribes for the renovation or modernization of Indian Health Service facilities. This provision of the substitute specifically states that the expenditure of these trust fund moneys does not obligate the Indian Health Service to further expenditures on the facility in question, but since the provision does provide for expenditure from the Federal Treasury, a waiver is necessary against the substitute.

In addition, the rule provides that at the conclusion of the consideration of the bill for amendment, the committee shall rise and report the bill to the House with such amendments as may have been adopted, and that any Member may demand a separate vote in the House on any amendment adopted in the Committee of the Whole to the bill or to the amendment in the nature of a substitute made in order as original text by this rule. Finally, the rule provides that the previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit with or without instructions.

Mr. Speaker, in 1976 when the Congress first passed the Indian Health Care Improvement Act, it acted in response to well documented evidence of deficiencies in the health of the Native American population. The 1976 act was designed to provide additional funding for Indian health care over and above services made available to the Native American population through the 1921 Synder Act, as well as to establish new programs such as manpower training for health care professionals and urban health clinics. The act's purpose was, then, to raise the health status of Indian and Alaska Natives over a 7-year period, ending in fiscal year 1984, to a level comparable to that of the general U.S. population. While the act was revised and extended in 1980 and provided the authorization that carried these programs through fiscal year 1984, the goal to achieve health parity has not been completely met.

H.R. 1426 is designed to not only reauthorize those programs of the 1976 act for an additional 4 fiscal years, but to, within the constraints of a limited Federal budget, provide a continued commitment to improving the status of Indian health until it is at a parity with the rest of the Nation. The bill provides authorizations of $23.5 million in fiscal year 1987, $75.5 million in fiscal year 1988, $79.9 million in fiscal year 1989, and $65.2 million in fiscal year 1990. These authorization levels will provide expanded health manpower and training, targeted assistance for those tribes that are most deficient in health services, a catastrophic health emergency fund to assist in meeting extraordinary costs associated with disasters or catastrophic illnesses, sanitation facilities, and continued outreach and referral services for urban Indians.

Mr. Speaker, the commitment of our Government to the native American population is not one we should shirk even in these times of spending restraint. I urge my colleagues to adopt this rule which provides for a full and fair debate of the issues embodied in H.R. 1426 and in our Government's commitment to the American Indian.

□ 1505

Mr. QUILLEN. Mr. Speaker, I yield myself such time as I may consume.

You know, Mr. Speaker, our native Americans have long been overlooked. We have pushed them around. In earlier days we slaughtered them.

We do not treat them with the respect that they deserve, and it is time we started doing that.

Improvement of health care is most important. I believe that this measure provides that, not only to our American Indians but Native Alaskans as well.

We devoted a lot of time on this House floor trying to say what is wrong in South Africa, and what is wrong in the countries of the world. Yet we have blindfolds as to what is wrong with our native Americans.

We need to get down to the business of helping them. Health care is only one measure.

Mr. Speaker, I sincerely plead with the Members of this House to open their eyes to what is going on and what has gone on and what has to be done instead of focusing on other countries around the world. We must concentrate on a problem that has long been overlooked in our own country.

Mr. Speaker, I yield 2 minutes to the gentleman from Arizona [Mr. MCCAIN].

Mr. MCCAIN. I thank the gentleman for yielding this time to me on this rule.

Mr. Speaker, I rise in support of the rule. Similar legislation, H.R. 4600, was brought up before this body under suspension. That bill was defeated because certain Members wanted to retain the right to perfect the bill. The rule provides for 1 hour of open debate, equally divided between the two authorizing committees and further divided between the minority and majority. It also provides that it is open to amendment during the reading of the bill by title.

I, for one, will have an amendment concerning the eligibility of California Indians. This is a provision cited by the President in his veto statement on similar legislation in the last Congress, and present in the administration's statement of opposition to this bill. My amendment will address that specific concern and improve the chances of signature on this important piece of legislation for Indian tribes. Additionally, my amendment is supported by the National Tribal Chairman's Association, a body made up of the selected leaders of Indian tribes, including California Indian tribes.

The Indian Health Care Amendments of 1986 is one of the most important pieces of legislation for the future of Indian tribes. It is an attempt to provide minimal adequate care to Indian people. It is said that medical care in Indian country is one generation behind that of the rest of the Nation. Because of this it is important to perfect the bill so that the President will sign it into law. I believe we are very close to that point. I urge my colleagues to support the rule and H.R. 1426.

Mr. QUILLEN. Mr. Speaker, I have no further requests for time, but I urge adoption of the rule and the measure when it is debated on the House floor.

We must not continue to overlook the first Americans of this great land of ours.

Mr. Speaker, I yield back the balance of my time.

Mr. FROST. Mr. Speaker, I yield back the balance of my time and I move the previous question on the resolution.

The previous question was ordered.

The SPEAKER pro tempore (Mr. GRAY of Illinois). The question is on the resolution.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. QUILLEN. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

Mr. BROWN of Colorado changed his vote from "nay" to "yea."

So the resolution was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

The SPEAKER pro tempore. Pursuant to House Resolution 528 and rule XXIII, the Chair declares the House in the Committee of the Whole House on the State of the Union for the consideration of the bill, H.R. 1426.

□ 1533

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill

(H.R. 1426) to reauthorize and amend the Indian Health Care Improvement Act, and for other purposes, with Mr. ANTHONY in the chair.

The Clerk read the title of the bill.

The CHAIRMAN. Pursuant to the rule, the first reading of the bill is dispensed with.

Under the rule, the gentleman from Arizona [Mr. UDALL] will be recognized for 15 minutes, the gentleman from Arizona [Mr. MCCAIN] will be recognized for 15 minutes, the gentleman from California [Mr. WAXMAN] will be recognized for 15 minutes, and the gentleman from Utah [Mr. NIELSON] will be recognized for 15 minutes.

The Chair recognizes the gentleman from Arizona [Mr. UDALL].

Mr. UDALL. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I am pleased to bring before the House for its consideration the bill, H.R. 1426, the Indian Health Care Amendments of 1986.

The purpose of this bill is to:

Reauthorized funding for the Indian Health Manpower Program and the Urban Indian Health Program established in the 1976 Indian Health Act;

Provide new programs, direction, and guidance in providing health services to Indian people; and

Make basic reforms in the administration of Indian health programs.

Mr. Chairman, the United States has a unique legal and moral responsibility to ensure that Indian people have available adequate health care. That responsibility is founded upon many treaties and statutes and the historical relationship with Indian tribes.

The record made before the Interior Committee over the last 4 years have made it very clear that we have not adequately met that responsibility. It is my hope and belief that enactment of this bill will go a long way toward meeting that responsibility.

Since the enactment of the Indian Health Care Improvement Act in 1976, significant progress has been made in raising the health standards of Indian people toward that of the rest of the Nation.

Yet, Mr. Chairman, I must advise the House that Indians still lag far behind the rest of the Nation in health status and health conditions. By way of example, I will read from the 1984 testimony of Dr. Frank Billingsley of the American College of Obstetricians and Gynecologists who stated:

> I have served in volunteer situations in southern communities, in Southeast Asia and in South America, and I can say that the Indian health situation is probably lower in many areas than many of these other countries * * *.

What Dr. Billingsley and the many other witnesses who appeared before my committee are saying is that, in the most affluent and advanced Nation in the world, there is a segment of our population who have a health standard lower than that of many Third World countries.

This disagreeable state of affairs hardly comports with the unique obligations we owe to the Indian tribes and their members. It is unacceptable. Passage of H.R. 1426 will represent a clear statement of the House of Representatives that it is unacceptable.

Mr. Chairman, H.R. 1426 was jointly referred to my committee and the Committee on Energy and Commerce. Both committees have reported the bill, but in different versions. We have compromised our differences and that compromise has been introduced by myself and Congressman WAXMAN as H.R. 5222. Under the rule, the text of H.R. 5222 will be considered as original text for purpose of amendment.

I am sure that Members may have further amendments which will further improve this most important legislation.

I would like to commend the chairman of the Subcommittee on Health and Environment, Mr. WAXMAN, for his great concern and efforts in the development of this legislation.

I would also like to commend Mr. MCCAIN and Mr. RICHARDSON and many other members of my committee who worked so hard on the bill.

Mr. Chairman, I urge the House to pass H.R. 1426, as amended.

Mr. McCAIN. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, as an original cosponsor of H.R. 1426, I rise in strong support of the measure. Based on the Constitution, historical development, treaties, and statutes, the United States has assumed a legal and moral obligation to provide adequate health care and services to the Indian tribes and their members. It is the stated purpose of the 1980 Indian Health Care Improvement Act that this obligation shall be met in a manner that will ensure a health status for members of Indian tribes at a parity with the rest of the Nation.

Recently, the Office of Technology Assessment issued a report on Indian health care. It stated that since 1955 substantial improvement had been made in the health status of our native Americans, "but Indians still lag behind the general U.S. population." The mortality rate is 1.4 times that the general population, 37 percent of Indian deaths occur before the age of 45, death from diabetes is 2.8 times the U.S. rate, diseases such as pneumonia and influenza are still common causes of death among Indians, the suicide rate is 1.7 times the general population, and the list goes on. Most experts consider the state of Indian health and health care to be a generation behind the rest of the Nation.

H.R. 1426 represents a reaffirmation of our commitment to Indian tribes and Indian people. It reauthorizes several programs including urban health programs, and the Health Care Improvement Fund. It also authorizes new programs such as the Catastrophic Fund. The bill is not without controversy, and I will offer my own amendment at the proper time concerning the eligibility of California Indians. Additionally, I believe there will be other technical amendments. I do caution the Members that the provisions of H.R. 1426 are the result of careful analysis of the unmet health needs of Indian tribes. Deep cuts in the authorization levels should not be made. H.R. 1426 is our commitment to Indian tribes and it is important to live up to our commitments.

I urge my colleagues to support H.R. 1426, the Indian Health Care Amendments of 1986.

□ 1540

Mr. WAXMAN. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I rise in strong support of H.R. 1426, the Indian Health Care Amendments of 1986.

Let me first thank the distinguished chairman of the Committee on Interior and Insular Affairs, Mr. UDALL, for his leadership on this bill and on Indian affairs generally.

H.R. 1426, which is before the House with a substitute text introduced as H.R. 5222, would revise and extend, for 4 years, the Indian Health Care Improvement Act. This legislation was first enacted in 1976 to raise the health status of American Indians and Alaska natives to the level of the general U.S. population.

In a recent report, the Office of Technology Assessment found that, despite some progress over the past decade, Indians still suffer from mortality rates that are higher than the national average. The most recent data compiled by OTA show that death rates were higher among Indians for liver disease, pneumonia, diabetes, kidney disease, homicide, and suicide, among others. The Indian death rate for tuberculosis—a preventable disease that is almost unknown in this country except among the homeless and Asian refugees—is seven times that of the U.S. population.

Clearly, this is an unacceptable situation. The Federal Government has a moral and legal obligation to improve the health status of the Indian people. The bill before us today is intended to enable the Federal Government meet that obligation.

H.R. 1426, as revised by the text of H.R. 5222, represents a compromise between the bills reported in May of last year by the Energy and Commerce Committee and the Interior Committee. It contains most of the provisions reported out by each committee.

Chairman UDALL has ably summarized the bill. I would only note that those provisions that were reported by the Committee on Energy and Commerce are more fully explained in House Report 99-94, part 2.

The funding in this bill is extremely modest. Authorization levels have been reduced to $244.1 million over 4 years, down from $336.1 million in the Interior version and $287.1 million in the Energy and Commerce version.

Just as there is no question about the inferior health status of the Indian people, there is no question that they need Federal health resources. The native American population is disproportionately poor. The poverty rate among Indians is more than twice as high as that among the U.S. population as a whole. In 1980, a staggering 45 percent of Indians living on reservations were poor. While some tribes may benefit from oil or mineral wealth, this is a population that, for the most part, lacks the resources necessary to afford needed health care.

When this bill last came before the House under suspension of the rules, it contained an authorization level of $99.2 million over 3 years. These levels were vigorously attacked by the distinguished chairman of the Republican Task Force on Indian Affairs, Mr. MCCAIN, as, and I quote, "much too low to address real problems." I am delighted that the minority recognized the need for additional resources for Indian health, and I look forward to their support for the higher authorization levels in the version before us today.

It has been 10 years since the Indian Health Care Improvement Act was first enacted, and 3 years since its authorizations expired. It is time for us to reaffirm our commitment to improving the health status of the Indian people. I urge my colleagues to vote for this bill.

Mr. Chairman, I reserve the balance of my time.

Mr. NIELSON of Utah. Mr. Chairman, I yield 2 minutes to the gentleman from Wisconsin [Mr. ROTH].

Mr. ROTH. Mr. Chairman, I want to compliment the members of the various committees that have worked on this legislation and the people who have put a lot of hard work and effort into it.

Eighty percent of the native Americans who live in the State of Wisconsin live in my congressional district. So I am well aware of many of these problems and I am very thankful that we have legislation like H.R. 1426.

Mr. Chairman, I support this legislation. This important measure provides needed funding to correct deficiencies in the health programs for native American Indians.

The Indian Health Care Act was established to bring the health status of the first Americans up to the level of the general population. While some progress has been made over the past 10 years, a report recently issued by the Office of Technology Assessment clearly illustrates that we still have a long way to go.

The health profile of native American and Alaska Indians lags far behind the general U.S. population. The average-age adjusted mortality rate for Indians is 10 percent greater than that of the general U.S population. Although the infant mortality rate has decreased since 1976, it is still at an intolerable level, 11 percent higher than the national average. The reauthorization of H.R. 1426 will bring positive improvement in health care to the 29,000 Indians in Wisconsin, 80 percent of whom live in the Eighth Congressional District.

Alcoholism and drug abuse continue to be chronic health problems among the youth and adult Indian population. The incidence of alcohol-related deaths is almost 5 times the average of the general population. Under H.R. 1426, an Office of Alcohol and Drug Abuse will be created to administer rehabilitation and prevention programs. The measure also targets additional funding for increased recruitment of health professionals.

H.R. 1426 represents a comprehensive approach to the serious health problems facing Indians. I urge my colleagues to support this responsible and necessary legislation.

Mr. Chairman, I yield back the balance of my time.

Mr. NIELSON of Utah. Mr. Chairman, I reserve the balance of my time.

Mr. RICHARDSON. Mr. Chairman, I yield myself 2 minutes.

Mr. Chairman, first, I would like to commend all of the people who have worked so hard on H.R. 1426, the Indian Health Care Amendments Act. Mr. UDALL has devoted a great deal of his time to improving the quality of life for American Indians—perhaps in no other area does his devotion show as much as it does in the field of Indian health. In light of the President's previous veto of this legislation, and the substantial unmet health care needs of Native Americans, the passage of this bill by the House is of the utmost importance. I am in strong support of this bill, and urge my colleagues to support it, too.

There are over 110,000 American Indians in my home State of New Mexico. My district has the highest Native American population in the country. Ninety-six thousand Indians in New Mexico's Third Congressional District depend on the Indian Health Service for their medical care. While tribal leaders in my district are making every effort to improve the quality of life for their people, unemployment remains high and health care needs are many. In my district alone, 45 percent of all admissions to IHS facilities are alcohol related. Infant mortality is much higher than that of the rest of the Nation, and in fact, the list of diseases, such as tuberculosis, affecting Indians disproportionate to the rest of this country's population is very lengthy.

The Constitution, numerous treaties, statutes, and historical development have all contributed to the unique moral and legal obligation which the Federal Government has to American Indians. Part of this obligation is to provide health care services. Inherent in this unique relationship is the responsibility that Indians enjoy a health status comparable to that of the rest of the Nation.

This administration has taken a callous, uncaring approach to the provision of services to American Indians. Indian education, economic development, and health care programs have all suffered as a result of the administration's attitude. Every time I return to my district, I see the extreme health care needs of the reservations, the pueblos, and the urban areas. I believe that this bill will play an important role in improving the health status of American Indians in New Mexico and around the country. The time for the assistance it mandates for the provision of health care services to Indians is long overdue. I strongly support this bill, and urge my colleagues to do so, also.

Mr. MCCAIN. Mr. Chairman, I yield such time as he may consume to the gentleman from Nebraska [Mr. BEREUTER].

□ 1550

Mr. BEREUTER. Mr. Chairman, I rise in strong support of H.R. 1426 and urge my colleagues to support the legislation as well.

As an original cosponsor, I am very pleased that we have had the great leadership from both sides of the aisle in both committees. I am pleased also that finally agreement has been reached on at least a few of the remaining controversial elements of this legislation; but regardless how this body votes on those amendments, I urge Members to vote for the passage of this bill.

Contained in it are several provisions on which this Member has worked for a considerable period of time. One such provision creates a catastrophic health emergency fund. This Member cannot stress too emphatically the importance of creating a small catastrophic health emergency fund. Several years ago, for example, eight children were critically injured when a propane gas tank exploded on the Santee Sioux Indian Reservation in my district. Miraculously, all eight children lived, despite severe injuries. The direct health care budget for the entire Indian health service area in

which the children resided, however, was depleted by some 25 percent during the first year of their care alone, due to the costs of ongoing medical treatment. As a result of that extraordinary cost for the treatment of these eight children, the more routine health matters were unattended for other tribal members in that service area.

Additionally, I want to express my support for the authorization for the program to train educators and counselors to prevent and to attack juvenile alcohol and drug abuse.

Mr. Chairman, no Indian tribes should ever have to face such an untenable situation again as the one I mentioned regarding the eight children. The inclusion of a small health emergency catastrophic fund, carefully managed, is a wise and humane investment for both the Federal Government and the Indian tribes.

Mr. Chairman, I ask my colleagues to support H.R. 1426.

Mr. WAXMAN. Mr. Chairman, we have no further requests for time, and I yield back the balance of our time.

Mr. UDALL. Mr. Chairman, I have no requests for time, and I yield back the balance of my time.

Mr. NIELSON Of Utah. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I rise to express my opposition to H.R. 1426 as amended by H.R. 5222. My objections relate primarily to excessive authorizations for appropriations which are $160 million above the amount contained in H.R. 4600, a bill to authorize an extension to the Indian Health Care Improvement Act that received a 241-163 vote on April 29, 1986, but failed for lack of two-thirds majority. I plan to offer H.R. 4600 as an amendment in the nature of a substitute at the conclusion of the amendment process.

H.R. 4600 is a compromise introduced by Chairmen WAXMAN and UDALL which contains authorization levels significantly less than those contained in the legislation reported out of the Energy and Commerce and Interior and Insular Affairs Committees.

During the markup of Indian health legislation, I offered several amendments to reduce authorizations for several of the titles in the bill. Some of these amendments were adopted by the committee. Others were not. One of the amendments that I offered which was not adopted, would have stricken new authority for a catastrophic fund. I am not convinced that a catastrophic fund makes sense and am encouraged that authorization for the fund has been reduced to $3 million in H.R. 4600 from $12 million in the energy and commerce version of H.R. 1426.

I am also encouraged to see that several of the new authorities contained in title VII of H.R. 1426 have been stricken from H.R. 4600.

Overall, H.R. 4600 authorizes just under $100 million over the next 3 fiscal years. In contrast, the energy and commerce version of H.R. 1426 authorized $212 million for those same fiscal years. This is a very significant reduction.

The Indian Health Care Improvement Act, which this legislation reauthorizes and amends, was first enacted in 1976. The act was designed to bring the health status of American Indians and Alaska Natives up to a level equal to that of the general population. We have made some progress in reaching that goal but must continue to fund specific programs to completely succeed. Substituting the text of H.R. 4600 for H.R. 1426 will go a long way in helping that process.

Mr. McCAIN. Mr. Chairman, I have no further requests for time, and I yield back the balance of my time.

The CHAIRMAN. Pursuant to the rule, the text of H.R. 5222 is considered by titles as an original bill for the purpose of amendment under the 5-minute rule in lieu of the amendment recommended by the Committees on Interior and Insular Affairs and Energy and Commerce printed in the bill and each title is considered as having been read.

The Clerk will designate section 1.

The text of section 1 is as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Indian Health Care Amendments of 1986".

The CHAIRMAN. Are there any amendments to section 1? If not, the Clerk will designate section 2.

The text of section 2 is as follows:

"(1) $500,000 for fiscal year 1987,

"(2) $526,300 for fiscal year 1988,

"(3) $553,800 for fiscal year 1989, and

"(4) $582,500 for fiscal year 1990.".

AMENDMENT OFFERED BY MR. NIELSON OF UTAH

Mr. NIELSON of Utah. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. NIELSON of Utah: Page 3, line 1, strike "$4,000,000" and insert "$3,000,000".

Page 3, line 2, strike "$4,700,000" and insert "$3,700,000".

Page 3, line 3, strike "$5,400,000" and insert "$4,400,000".

Page 3, line 4, strike "$6,100,000" and insert "$5,100,000".

Page 4, line 24, strike "$6,100,000" and insert "$5,100,000".

Page 4, line 25, strike "$7,100,000" and insert "$6,000,000".

Page 5, line 1, strike "$8,100,000" and insert "$7,100,000".

Page 5, line 2, strike "$9,234,000" and insert "$8,234,000".

Mr. NIELSON of Utah (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Utah?

There was no objection.

Mr. NIELSON of Utah. Mr. Chairman, this amendment strikes $1 million from each of the years in section 103 under Manpower, so the amounts will be instead of $4 million, $4.7 million, $5.4 million and $6.1 million respectively, will now become $3 million, $3.7 million, $4.4 million and $5.1 million in pages 3, 4, and 5 as appropriate.

I do this to bring the bill a little more in line with the fiscal realities. This does not cripple the programs. Indian health care will continue to be an effective program. This reduction does give us more a fiscally responsible bill and it is one which I hope the majority and the minority Members will be able to accept.

Mr. UDALL. Mr. Chairman, will the gentleman yield?

Mr. NIELSON of Utah. I am happy to yield to the gentleman from Arizona.

Mr. UDALL. Mr. Chairman, I am reluctantly going to vote for the gentleman's amendment. It is, as the gentleman said, difficult fiscal times we are in. I think we can make these reductions and show our cooperation in the drive toward a balanced budget without doing unnecessary damage to the long-term goals that we all seek here, so I will reluctantly vote for the gentleman's amendment.

Mr. McCAIN. Mr. Chairman, will the gentleman yield?

Mr. NIELSON of Utah. I yield to the gentleman from Arizona.

Mr. McCAIN. Mr. Chairman, I also reluctantly agree with the amendment proposed by the gentleman from Utah.

I would also like to state that I appreciate the efforts of the gentleman from Utah to bring about financial reductions in these days of Gramm-Rudman and reduce budget situations.

At the same time, I would like to mention to the gentleman from Utah that I will not accept other amendments at this time, or I will have substitutions for some of the gentleman's amendments, which I think could be very crippling and damaging to the bill.

This amendment I do reluctantly accept. I appreciate the gentleman's efforts in behalf of this entire piece of legislation.

Mr. NIELSON of Utah. Mr. Chairman, I thank the gentleman.

Mr. RICHARDSON. Mr. Chairman, will the gentleman yield?

Mr. NIELSON of Utah. I am happy to yield to the gentleman from New Mexico.

Mr. RICHARDSON. Mr. Chairman, is it correct that the gentleman's amendment only affects title I?

Mr. NIELSON of Utah. It is title I, section 103, a $1 million reduction in each of the 4 fiscal years.

Mr. RICHARDSON. And that is all there is in the amendment?

Mr. NIELSON of Utah. I have other amendments that the gentleman may wish to address, but this is the one that I think is generally agreeable.

Mr. RICHARDSON. Mr. Chairman, I thank my colleague.

Mr. NIELSON of Utah. Mr. Chairman, I yield back the balance of my time.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Utah [Mr. NIELSON].

The amendment was agreed to.

The CHAIRMAN. Are there other amendments to title I? If not, the Clerk will designate title II.

The text of title II is as follows:

TITLE II—HEALTH SERVICES

SEC. 201. IMPROVEMENT OF INDIAN HEALTH STATUS.

Section 201 is amended to read as follows:

"INDIAN HEALTH CARE IMPROVEMENT FUND

"SEC. 201. (a)(1) To further implement the national policy of raising the health status of Indians to a zero level of deficiency as defined in subsection (c) by eliminating backlogs in health care services and meeting unmet Indian health needs as soon as possible and in an equitable manner, the Secretary is authorized to expend, through the Service, over the three year period beginning with fiscal year 1988 the amounts authorized to be appropriated by subsection (h) of this section. Funds requested under this section shall be separately stated in the Service budget request as submitted to Congress under section 1104 of title 31, United States Code, and funds appropriated under this section shall not be used to offset or limit appropriations made to the Service under authority of the Act of November 2, 1921 (25 U.S.C. 13), or any other law. Funds appropriated under this section in any fiscal year shall be included in the base budget of the Service for the purpose of determining appropriations under this section in subsequent fiscal years.

"(2) Nothing in this section is intended to diminish the primary responsibility of the Service to eliminate existing backlogs in unmet health care needs, nor is it intended to discourage the Service from undertaking additional efforts to achieve parity among tribes.

"(b)(1) Funds appropriated under this section shall be expended to augment the ability of the Service to meet the following health service responsibilities—

"(A) clinical care (direct or indirect);

"(B) preventive health;

"(C) dental care (direct or indirect);

"(D) mental health, including community mental health services, inpatient mental health services, dormitory mental health services, therapeutic and residential treatment centers, and training of traditional Indian practitioners;

"(G) accident prevention programs;

"(H) community health representative programs;

"(I) home health care; and

"(J) maintenance and repair.

"(2) Where any funds allocated to a service unit are used for a contract under the Indian Self-Determination Act, a reasonable proportion of such funds may be used for health planning, training, technical assistance, and other administrative support functions.

"(3)(A) To the extent that all or a portion of the funds appropriated under subsection (h) are required to raise tribes which are below a level II deficiency, as defined in subsection (c)(2), to such level, such funds shall not be available for allocation to service units serving only tribes at or above such level. Funds appropriated under this section shall be allocated on a service unit basis. Apportionment of a service unit's allocation of funds among the health service responsibilities listed in paragraph (1) shall be as determined by the Service and the Indian tribe or tribes whose deficiency level was the basis on which the funds were allocated.

"(B) In the case of multitribal service units, the allocation of funds under this section shall be made, apportioned, and expended upon the basis of the health resources deficiency level of each separate tribe within that service unit.

"(c)(1) Within 60 days of the date of enactment of the Indian Health Care Amendments of 1986, the Secretary shall submit to the Congress the current health services priority system report of the Service for each tribe including units serving newly recognized or acknowledged tribes. Such report shall contain—

"(A) the methodology for determining tribal health resources deficiencies; the level of health resources deficiency for each

tribe; the amount of funds necessary to raise all tribes below a level II deficiency to a level II deficiency; the amount of funds necessary to raise all tribes below a level I deficiency to a level I deficiency; and the amount of funds necessary to raise all tribes to a zero level of deficiency;

"(B) an estimate of—

"(i) the amount of health service funds appropriated under the authority of this or any other Act for the preceding fiscal year which is allocated to each service unit; and

"(ii) the number of Indians eligible for health services in each service unit and each tribe; and

"(C) an evaluation of—

"(i) the preventive health, health protection, and health promotion needs of Indians identified in tribal specific health plans;

"(ii) the preventive health, health protection, and health promotion services necessary to meet such needs;

"(iii) the resources which would be required to enable the Service to provide such services; and

"(iv) the resources currently available to the Service which could be used to provide such services.

"(2) For purposes of this section, health resources deficiency levels shall be defined as follows:

"Level I—0 to 20 percent deficiency.

"Level II—21 to 40 percent deficiency.

"Level III—41 to 60 percent deficiency.

"Level IV—61 to 80 percent deficiency.

"Level V—81 to 100 percent deficiency.

"(3) The Secretary shall establish by regulation procedures which allow any Indian tribe to petition the Secretary for a review of any determination of the health resources deficiency level of such tribe.

"(d) Upon enactment of the Indian Health Care Amendments of 1986, the Secretary, acting through the Service, shall take all necessary action, in cooperation with each Indian tribe, to bring current the tribal specific health plans which were developed as a part of the plan required by section 703 of this Act and which formed the basis for such plan in response to the requirements of section 701 of this Act. These plans shall be based upon the methodology submitted under subsection (c), as may be further modified through tribal consultation, and shall form the basis for the health services priority system report to be submitted by the Secretary for fiscal years 1989 and 1990. Such reports shall be submitted to the Congress not more than 30 days after the submission of the annual budget for such fiscal years to the Congress by the President.

"(e) The Secretary, acting through the Service, shall expend directly or by contract not less than 1 percent of the funds appropriated under subsection (h) for research in the areas of Indian health care set out in subparagraphs (A) through (G) of subsection (b)(1). Indian tribes and tribal organizations contracting with the Service pursuant to the Indian Self-Determination Act shall be given an equal opportunity to compete for and receive such research funds.

"(f) Programs administered by any Indian tribe or tribal organization under the authority of the Indian Self-Determination Act shall be eligible for funds appropriated pursuant to subsection (h) on an equal basis with programs that are administered directly by the Indian Health Service.

"(g) The President shall include with the budget submitted under section 1105 of title 31, United States Code, for each fiscal year a separate statement which specifies the total amount obligated or expended in the most recently completed fiscal year to carry out subsection (d) and to carry out each of the subparagraphs of subsection (b)(1).

"(h) There are authorized to be appropriated for the purpose of carrying out the provisions of this section—

"(1) $28,000,000 for fiscal year 1988,

"(2) $29,000,000 for fiscal year 1989, and

"(3) such sums as may be necessary for fiscal year 1990.

Any funds appropriated under this subsection shall be designated as the 'Indian Health Care Improvement Fund'.".

SEC. 202. CATASTROPHIC HEALTH PROGRAM.

Title II is amended by adding at the end thereof the following new section:

"CATASTROPHIC HEALTH PROGRAM

"SEC. 202. (a) There is established an Indian Catastrophic Health Emergency Fund (hereinafter in this section referred to as the 'Fund') to be administered by the Secretary, acting through the Service, solely for the purpose of meeting the extraordinary medical costs associated with the treatment of victims of disasters or catastrophic illnesses falling within the responsibility of the Service. The Fund shall be administered by the central office of the Service and shall not be allocated, apportioned, or delegated on a service unit or area office basis. Funds appropriated under subsection (c) shall not be used to offset or limit appropriations made to the Service under authority of the Act of November 2, 1921 (25 U.S.C. 13), or any other law. No part of the Fund or its administration shall be subject to contract or grant under any law, including the Indian Self-Determination Act (Public Law 93-638).

"(b) The Secretary shall, through the promulgation of regulations consistent with the provisions of this section—

"(1) establish a definition of disasters and catastrophic illnesses for which the cost of treatment, whether provided under contract or directly by the Service, would qualify for payment from the Fund; and which shall provide that a service unit shall not be eligible for reimbursement for the cost of treatment from the Fund until its cost of treating any victim of such catastrophic illness or disaster shall have reached a certain threshold cost which the Secretary shall establish at not less than $10,000 or not more than $20,000;

"(2) establish a procedure for the reimbursement of service units or facilities rendering treatment or, whenever otherwise authorized by the Service, the reimbursement of nonservice facilities or providers rendering treatment;

"(3) establish a procedure for payment from the Fund where the exigencies of the medical circumstances warrant treatment prior to the authorization of such treatment by the Service; and

"(4) establish a procedure that will assure that no payment shall be made from the Fund to any provider to the extent that the provider is eligible to receive payment for the treatment from any other Federal, State, local, or private source of reimbursement for which the patient is eligible or by which the patient is covered.

"(c) There are authorized to be appropriated for the purpose of carrying out the provisions of this section—

"(1) $12,000,000 for fiscal year 1988, and

"(2) for each of the fiscal years 1989 and 1990, such sums as may be necessary to maintain the fund at $12,000,000.

Funds appropriated under this subsection shall remain available until expended.

"(d) By no later than January 1, 1989, the Secretary shall report to Congress on the operation of the Fund. Such report shall include—

"(1) the number and nature of disasters and catastrophic illnesses for which reimbursement was sought;

"(2) the costs associated with such disasters or illnesses;

"(3) the amounts reimbursed by the Fund in connection with such disasters and illnesses;

"(4) the effect of the Fund on the ability of service units to meet the health needs of their service populations; and

"(5) the Secretary's recommendations regarding the future operation of the Fund.".

SEC. 203. COMPETITIVE PROCUREMENT.

Title II is amended by adding at the end thereof the following new section:

"COMPETITIVE PROCUREMENT

"SEC. 203. (a) Notwithstanding any other provision of law, the Secretary, acting through the Service, may waive any statutory or administrative requirement for competitive procurement of health services if, in the judgment of the Chief Medical Officer who will have jurisdiction over such health services, such competitive procurement would compromise the accessibility, quality, or continuity of health services or would not result in any appreciable competition or savings.

"(b) Notwithstanding any other provision of law, the Secretary, acting through the Service, shall reject any bid submitted under any statutory or administrative requirement for competitive procurement of health services upon the certification of the Chief Medical Officer who will have jurisdiction over such health services that acceptance of such bid would compromise the accessibility, quality, and continuity of health services.".

SEC. 204. PREVENTIVE HEALTH, HEALTH PROTECTION, AND HEALTH PROMOTION.

Title II, as amended by sections 202 and 203 of this Act, is further amended by adding at the end the following new section:

"PREVENTIVE HEALTH, HEALTH PROTECTION, AND HEALTH PROMOTION

"SEC. 204. (a) The Congress finds that—

"(1) preventive health, health protection, and health promotion services will—

"(A) improve the health and well-being of Indians; and

"(B) reduce the expenses for medical care of Indians;

"(2) preventive health, health protection, and health promotion services should be provided by the coordinated efforts of Federal, State, local, and tribal governments; and

"(3) in addition to the provision of primary health care, the Service should provide preventive health, health protection, and health promotion services to Indians.

"(b) The Secretary, acting through the Service, shall—

"(1) require, by regulation, that each Indian tribe include within any tribal specific health plan submitted to the Secretary—

"(A) an identification of the preventive health, health protection and health promotion needs of such tribe; and

"(B) a comprehensive plan for providing such services to such tribe;

"(2) develop from tribal specific health plans a comprehensive plan for the provision by the Service of preventive health, health protection, and health promotion services to Indians;

"(3) establish a schedule for the provision of such services by the Service; and

"(4) provide such services to Indians in accordance with such comprehensive plan and schedule.".

AMENDMENT OFFERED BY MR. NIELSON OF UTAH

Mr. NIELSON of Utah. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. NIELSON of Utah: Page 12, strike line 1 and all that follows through page 14, line 20 (and redesignate the subsequent sections of title II of the bill accordingly).

Mr. NIELSON of Utah. Mr. Chairman, if we look at title II for health services, the current fiscal year 1986 and also fiscal year 1987 has no funding at all in that particular account. In fiscal years 1988 and 1989 there is $40 million in services for the first year and $41 million for the second year and $40 million again in fiscal year 1990.

Of that, $28 million goes to the improvement fund which I support, because that provides equity. It provides for Indian services to people who are now not getting their equitable share of services.

It will help go a long way toward help solving the problems of Indian health I do support that particular section and the gentleman from California in this regard because of sheer equity and fairness in dealings with problems of Indian care I oppose the gentleman from Arizona on this issue.

My concern, however, is with the catastrophic fund which the gentleman from Nebraska praised and which on a revolving fund basis may have some merit.

I would have supported a level of $3 million, as I did on the suspension calendar, but I cannot accept the $12 million level. I think that is excessive. It is a new program. It is coming out with too much money and without proper wages. I would prefer to phase in funds up to $12 million over a period of time. I have no objection to phasing it up gradually, but I think $12 million at the beginning is excessive.

I therefore move to strike the fund. As I say, I would have accepted a $3 million funding level, as I did in H.R. 4600, but I cannot accept the $12 million and for that reason I oppose these funds.

I suggest this is not the time to start new programs. It is not clear how effective it will be. We currently have the ability to shift funds already where necessary and we are giving additional money in the manpower area and also in the improvement fund which should take care of any contingency.

PERFECTING AMENDMENT OFFERED BY MR. MC CAIN

Mr. McCAIN. Mr. Chairman, I offer a perfecting amendment.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Perfecting amendment offered by Mr. MCCAIN: Section 201 is amended by striking:

"(h) There are authorized to be appropriated for the purposes of carrying out the provisions of this section—

"(1) $28,000,000 for fiscal year 1988

"(2) $29,000,000 for fiscal year 1989, and

"(3) such sums as may be necessary for fiscal year 1990.

And inserting in lieu thereof the following:

"(h) There are authorized to be appropriated for the purpose of carrying out the provisions of this section—

"(1) $18,000,000 for fiscal year 1988

"(2) $19,000,000 for fiscal year 1989, and

"(3) $19,000,000 for fiscal year 1990.

Section 202 is amended by striking:

"(c) There are authorized to be appropriated for the purpose of carrying out the provisions of this section—

"(1) $12,000,000 for fiscal year 1988, and

"(2) for each of the fiscal years 1989, and 1990, such sums as may be necessary to maintain the fund at $12,000,000.

And inserting in lieu thereof the following:

"(c) There are authorized to be appropriated for the purpose of carrying out the provisions of this section—

"(1) $8,000,000 for fiscal year 1988, and

"(2) for each of the fiscal years 1989, and 1990, such sums as may be necessary to maintain the fund at $8,000,000.

Mr. McCAIN (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Arizona?

There was no objection.

Mr. McCAIN. Mr. Chairman, like others, I am concerned about the objections of the administration about the total authorization of this bill. I am, therefore, proposing that there be a reduction of $16 million from the $28 million down to $12 million for the improvement fund and a reduction of $10 million from the $18 million down to $8 million for the catastrophic fund.

Mr. Chairman, I believe that both the improvement fund and the catastrophic fund require funding. They are both urgent and important programs.

I am willing to submit this amendment in a reduction in funding, but I think it would be a very serious mistake if we adopted the Nielson amendment which would simply zero out the catastrophic fund, which I think is a crucial part of this bill.

Mr. Chairman, I urge my colleagues to accept this perfecting amendment.

Mr. NIELSON of Utah. Mr. Chairman, will the gentleman yield?

Mr. McCAIN. I am glad to yield to the gentleman from Utah.

Mr. NIELSON of Utah. Mr. Chairman, the gentleman said the improvement fund was $12 million and then $12 million for the catastrophic fund; is that the gentleman's amendment?

Mr. McCAIN. It is $12 million for improvement, $8 million for catastrophic.

Mr. NIELSON of Utah. Mr. Chairman, if the gentleman will yield further, what about the other fiscal years, 1989 and 1990?

Mr. McCAIN. It is consistent for all 3 years.

Mr. NIELSON of Utah. All 3 years frozen. If the gentleman will yield further, the effect of the gentleman's amendment then is to cut out $20 million, whereas my amendment cuts out only $12 million, but the effect of the gentleman's amendment is to keep both funds, rather than just the improvement fund; is that correct?

Mr. McCAIN. Indeed, that is the case.

Mr. NIELSON of Utah. Mr. Chairman, if the gentleman will yield further, would the gentleman consider giving a lump sum and letting them use it in both funds as they see fit? If so, I could support it.

Mr. McCAIN. I cannot at this time, because I feel that it is important that the funds be earmarked in both separate areas; otherwise, we could have problems in administering these funds.

Mr. UDALL. Mr. Chairman, will the gentleman yield?

Mr. McCAIN. I yield to the gentleman from Arizona.

Mr. UDALL. Mr. Chairman, I strongly support the McCain substitute and strongly oppose the Nielson amendment.

This catastrophic fund is a key part of the funds in the bill that we have here on the floor today. The administration always tells us that they already have authority to do this, but the fact is that they have not used that authority. As between zeroing out this program and going partway with the McCain amendment, clearly the responsible position is to go forward with Mr. MCCAIN. So I support his substitute and oppose the Nielson amendment, and I urge my colleagues to vote accordingly.

Mr. BEREUTER. Mr. Chairman, will the gentleman yield?

Mr. McCAIN. I yield to the gentleman from Nebraska.

Mr. BEREUTER. Mr. Chairman, I thank the gentleman for yielding.

Mr. Chairman, I do support the amendment that the gentleman from Arizona [Mr. MCCAIN] is offering, and I believe that I can provide an example of why it is essential that we not rely strictly on the discretion of the administration.

We had an opportunity to move funds to assist Indian tribes in South Dakota and Nebraska who suffered as a result of the catastrophic experience for eight Indian children, but they did not move it. Therefore, I think that it

is essential that we do have adequate funding in both of those funds, including the catastrophic health emergency fund.

The gentleman's amendment would do that. I think that it is very preferable, quite desirable, to have this approach. In the absence of this approach the discretion has been proven to be wanting, and I thank the gentleman for his amendment.

The CHAIRMAN. The question is on the perfecting amendment offered by the gentleman from Arizona [Mr. MCCAIN] to title II.

The perfecting amendment was agreed to.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Utah [Mr. NIELSON].

The amendment was rejected.

The CHAIRMAN. Are there other amendments to title II?

If not, the Clerk will designate title III.

The text of title III is as follows:

TITLE III—HEALTH FACILITIES

SEC. 301. HEALTH FACILITIES.

Section 301 (25 U.S.C. 1631) is amended to read as follows:

"HEALTH FACILITIES

"SEC. 301. (a)(1) Within 60 days after the date of enactment of the Indian Health Care Amendments of 1986, the Secretary shall submit to the Congress a report which shall set forth the current health facilities priority system of the Service and which shall include the planning, design, construction, or renovation needs for the ten top priority inpatient care facilities and the ten top priority ambulatory care facilities together with required staff quarters, the justification for such priority listings, and the projected cost of such projects. The report shall also include the methodology adopted by the Service in establishing priorities under its health facilities priority system.

"(2)(A) Within 30 days of the submission of the annual budget to the Congress by the President for each of the fiscal years 1989 and 1990, the Secretary shall submit to the Congress a report which complies with the requirements for paragraph (1).

"(B) In preparing such report in such fiscal years, the Service shall consult with tribes and tribal organizations including those tribes or tribal organizations operating health programs or facilities with funds from the Service under the Indian Self-Determination Act, and shall review the needs of these tribes and tribal organizations for inpatient and outpatient facilities, including their needs for renovation and expansion of existing facilities.

"(3) The Service shall use the same criteria for each of the fiscal years 1988, 1989, and 1990 to evaluate the needs of facilities operated under contract under the Indian Self-Determination Act as it uses to evaluate the needs of facilities operated directly by the Service in such fiscal years.

"(4) The Secretary shall ensure that the planning, design, construction, and renovation needs of Service and non-Service facilities which are the subject of a contract for health services entered into under the Indian Self-Determination Act are fully and equitably integrated into the development of the health facility priority system.

"(b)(1) All funds appropriated under the Act of November 2, 1921 (25 U.S.C. 13), for the planning, design, construction, or renovation of health facilities for the benefit of a tribe or tribes shall be subject to the provisions of sections 103 and 104(b) of the Indian Self-Determination Act. The United States shall hold title to any facility constructed under a grant pursuant to section 104(b) of that Act.

"(2) Any tribal contractor or grantee shall expend the funds described in paragraph (1) for the purpose for which appropriated pursuant to rules and regulations established by the Secretary for contracting and procurement.

"(c) Prior to the expenditure of, or the making of any firm commitment to expend, any funds appropriated for facilities planning and design, construction, or renovation under the Act of November 2, 1921 (25 U.S.C. 13), the Secretary, acting through the Service, shall—

"(1) consult with any Indian tribe that would be significantly affected by such expenditure for the purpose of determining and, wherever practicable, honoring tribal preferences concerning size, location, type, and other characteristics of any facility on which such expenditure is to be made, and

"(2) ensure, wherever practicable, that such facility, not later than one year after its construction or renovation, shall meet the standards of the Joint Commission on Accreditation of Hospitals.

"(d) The Secretary shall not close, under any existing authority, any Service hospital or other outpatient health care facility or any portion thereof unless he has submitted to the Congress at least one year prior to the planned closure date an evaluation of the impact of the proposed action which shall include the following factors—

"(1) accessibility of alternative health care resources for the service population;

"(2) cost effectiveness of the closure;

"(3) quality of health care to be provided to the service population after closure;

"(4) availability of contract health care funds to maintain current levels of service; and

"(5) the views of the Indian tribe or tribes served by such facility on the planned closure.

This subsection shall not be applicable to temporary closures where such closure is specifically determined to be necessary to avoid jeopardizing the health or safety of patients.".

SEC. 302. SAFE WATER AND SANITARY WASTE DISPOSAL FACILITIES.

Section 302 (25 U.S.C. 1632) is amended to read as follows:

"SAFE WATER AND SANITARY WASTE DISPOSAL FACILITIES

"SEC. 302. (a)(1) Congress finds that—

"(A) the provision of safe water supply and sanitary sewage and solid waste disposal systems is primarily a health consideration and function;

"(B) Indian people suffer an inordinately high incidence of disease, injury, and illness directly attributable to the absence or inadequacy of such facilities;

"(C) the long-term cost to the United States of treating and curing such disease, injury, and illness is substantially greater than the short-term cost of providing such facilities and other preventive health measures;

"(D) many Indian homes and communities still lack safe water supply and sanitary sewage and solid waste disposal facilities; and

"(E) it is in the interest of the United States and it is the policy of the United States that all Indian communities and Indian homes, new and existing, be provided with safe and adequate water supply and sanitary sewage and solid waste disposal facilities as soon as possible.

"(2) Congress reaffirms the primary responsibility and authority of the Service to provide the necessary sanitation facilities and services as provided in section 7 of the Act of August 5, 1954 (42 U.S.C. 2004a).

"(b) Beginning in fiscal year 1987, the Secretary, acting through the Service, shall develop and begin implementation of a 10 year plan to provide safe water supply and sanitary sewage and solid waste disposal facilities to existing Indian homes and communities and to new and renovated Indian homes.

"(c)(1) Within 60 days of the date of the enactment of the Indian Health Care Amendments of 1986, the Secretary shall report to Congress on the Service's sanitation facilities priority system. The Secretary, in preparing such report, shall uniformly apply the methodology for determining sanitation deficiencies to all Indian tribes. Such report shall identify the methodology for determining sanitation deficiencies; the level of deficiency for each Indian community or tribe; the amount of funds necessary to raise all communities to a level I deficiency; and the amount of funds necessary to raise all communities or tribes to a zero level of deficiency. For the purpose of such report—

"(A) a level I deficiency means a sanitation system which complies with all applicable water supply and pollution control laws and regulations in which the defined deficiencies consist of routine replacement, repair, or maintenance needs;

"(B) a level II deficiency means a sanitation system which complies with all applicable water supply and pollution control laws and regulations in which the defined deficiencies consist of capital improvements necessary to improve the facilities to meet the needs of the communities for domestic sanitation facilities;

"(C) a level III deficiency means a sanitation system which has an inadequate or partial water supply and sewage disposal facility which does not comply with applicable water supply and pollution control laws and regulations or which has no solid waste disposal facility;

"(D) a level IV deficiency means a sanitation system which lacks either a safe water supply system or a sewage disposal system; and

"(E) a level V deficiency means the absence of a safe water supply and sewage disposal system.

Any tribe or community which lacks the operation and maintenance capability to meet all applicable water supply and pollution control laws and regulations shall be deemed to have a rating no higher than a level III deficiency.

"(2)(A) Within 30 days of the submission of the annual budget to the Congress by the President for fiscal years 1988, 1989, and 1990, the Secretary shall submit a report to the Congress which meets the requirements of paragraph (1).

"(B) In preparing such report for each of the fiscal years 1988, 1989, and 1990, the Secretary, acting through the Service, shall consult with tribes and tribal organizations including those operating health care programs or facilities under contracts under

the Indian Self-Determination Act to determine the sanitation needs of each tribe.

"(d)(1) To clarify the powers conferred by subsection (a) of section 7 of the Act of August 5, 1954 (42 U.S.C. 2004a), the Secretary, acting through the Service, is authorized to provide—

"(A) financial and technical assistance to Indian tribes and communities in the establishment, training, and equipping of utility organizations to operate and maintain Indian sanitation facilities,

"(B) ongoing technical assistance and training in the management of utility organizations, and

"(C) operation and maintenance assistance for, and emergency repairs to, tribal sanitation facilities when necessary to avoid a health hazard or to protect the Federal investment in sanitation facilities in situations where the community, tribe, or family is not financially or technically capable of performing the required emergency repairs with their own resources.

"(2)(A) This section is not intended to diminish the primary responsibilities of the Indian community or tribe to establish, collect, and utilize reasonable user fees, or otherwise set aside funding, for the purpose of operation and maintenance of sanitation facilities.

"(B) The financial and technical capability of an Indian tribe or community to safely operate and maintain a sanitation facility shall not be a precondition for the provision or construction of such facilities and the Secretary may not require a tribe or community to accept a transfer of such facilities where he has determined the tribe or community does not have, or may not be reasonably expected to achieve, such capability.

"(e) Programs administered by Indian tribes or tribal organizations under the authority of the Indian Self-Determination Act shall be eligible for—

"(1) funds appropriated pursuant to subsection (f), and

"(2) funds appropriated for the purpose of providing water supply or sewage disposal services,

on an equal basis with programs that are administered directly by the Indian Health Services.

"(f)(1) There are authorized to be appropriated for each of the fiscal years 1988, 1989, and 1990, $3,000,000 for the purpose of providing funds necessary to implement the expanded responsibilities of the Service under subsection (d).

"(2) In addition to the amount authorized under paragraph (1), there are authorized to be appropriated for each of the fiscal years 1988, 1989, and 1990, $850,000 for the purpose of providing thirty new full-time equivalents for the Service which shall be used to carry out the expanded responsibilities of the Service under subsection (d).".

"(b) The requirements of this subsection are met with respect to any renovation or modernization if the renovation or modernization—

"(1) does not require or obligate the Secretary to provide any additional employees or equipment,

"(2) is approved by the appropriate area director of the Service, and

"(3) is administered by the Indian tribe in accordance with the rules and regulations prescribed by the Secretary with respect to construction or renovation of Service facilities.

"(c) A renovation or modernization shall not be authorized by this section if such renovation or modernization would require the diversion of funds appropriated to the Service for any project which has a higher priority under the health facility priority system of the Service.".

SEC. 304. BETHEL, ALASKA, HOSPITAL.

Title III is amended by adding at the end thereof the following new section:

"BETHEL, ALASKA, HOSPITAL

"SEC. 306. (a) If a final administrative ruling by the Department of the Interior holds that the Bethel Native Corporation is entitled to conveyance of the title to the real property described in subsection (d)(1) under the Alaska Native Claims Settlement Act, such ruling shall not be subject to judicial review and title to such property shall be conveyed to the Bethel Native Corporation.

"(b) The Secretary is authorized, notwithstanding any other provision of law, to enter into an agreement with Bethel Native Corporation for an exchange of the real property described in subsection (d)(1) for—

"(1) the lands described in subsection (d)(2), or

"(2) any other Federal property which Bethel Native Corporation would have been able to select under the Alaska Native Claims Settlement Act.

"(c) If an agreement for the exchange of land is not entered into under subsection (b) by the date that is 90 days after the date of the ruling described in subsection (a), the Secretary shall purchase the lands described in subsection (d)(1) at fair market value.

"(d)(1) The real property referred to in subsection (a) is United States Survey Numbered 4000 other than the lands described in paragraph (2).

"(2) The lands referred to in subsection (b)(1) are the lands identified as tracts A and B in the determination AA-18959 of the Bureau of Land Management issued on September 30, 1983, pursuant to the Alaska Native Claims Settlement Act.".

PARLIAMENTARY INQUIRY

Mr. NIELSON of Utah. Mr. Chairman, I have a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. NIELSON of Utah. Mr. Chairman, on the perfecting amendment of the gentleman from Arizona [Mr. MCCAIN], that amendment passed but my amendment failed. That means that his amendment went down with mine; is that correct?

The CHAIRMAN. The perfecting amendment of the gentleman from Arizona prevailed to the bill, not to the gentleman's amendment, and at the present it is the prevailing amendment.

Mr. NIELSON of Utah. It is part of the bill, then?

The CHAIRMAN. The gentleman is correct. Yes; it is part of the bill.

AMENDMENT OFFERED BY MR. NIELSON OF UTAH

Mr. NIELSON of Utah. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. NIELSON of Utah: Page 17, strike line 3 and all that follows through page 28, line 13 (and redesignate the subsequent titles of the bill accordingly).

Mr. NIELSON of Utah. Mr. Chairman, I will not take long on this. This is again a brandnew program which calls for $3.85 million in each of the next 3 years—that is, fiscal years 1988, 1989, and 1990—for facilities for sanitation, operation and maintenance, and also administration.

The reason that I oppose this is not because it is not a good idea to have sanitation facilities. It is not because I do not think that the Indians should have these sanitation facilities provided by the people with whom they work. It is simply that that is out of the purview of the Indian health care. It ought to come under Occupational Safety and Health Administration, or some other program. It does not need to be handled here. We have adequate means to take care of it elsewhere, and I do not think that it is time to start a brandnew program. Therefore, I offer to strike title III.

Mr. UDALL. Mr. Chairman, I rise in strong opposition to the gentleman's amendment.

This title makes some basic reforms in the way the administration handles the construction of Indian health and sanitation facilities.

Aside from the authorization of small amounts of funds to provide assistance to Indian tribes for emergency repair to sanitation facilities, all this title does is to require the Department of Health and Human Services to provide to the Congress reports and information that it already prepares.

This information is needed by the Congress in authorizing such projects and providing funding for them. The Department routinely prohibits the Indian Health Service from freely making that information available.

The administration opposes this title on the grounds that it requires burdensome new reporting requirements. That is not true. All it does is require them to give to the Congress information it already compiles.

I urge rejection of the amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Utah [Mr. NIELSON].

The amendment was rejected.

The CHAIRMAN. Are there other amendments to title III? If not, the Clerk will designate title IV.

The text of title IV is as follows:

TITLE IV—ACCESS TO HEALTH SERVICES

SEC. 401. GRANTS AND CONTRACTS WITH TRIBAL ORGANIZATIONS.

(a) Section 404 (25 U.S.C. 1622) is amended—

(1) by striking out "and" at the end of subsection (a)(2) and inserting in lieu thereof "or", and

(3) by adding "or" at the end of subsection (b)(3).

(b) Section 404(c) (25 U.S.C. 1622(c)) is amended by striking out "and" after "1983" and by insertifg before the period a comma and "$3,000,000 for the fiscal year ending September 30, 1988, $3,500,000 for the fiscal year ending September 30, 1989, and $4,000,000 for the fiscal year ending September 30, 1990".

SEC. 402. MEDICAID PROVISIONS.

(a) SKILLED NURSING FACILITY.—Section 1911 of the Social Security Act is amended by striking out "or skilled nursing facility" each place it appears and inserting in lieu thereof in each instance "skilled nursing facility, or any other type of facility which provides services of a type otherwise covered under the State plan".

(b) REIMBURSEMENT.—Section 1911 of the Social Security Act is amended by adding at the end thereof the following new subsections:

"(c) The Secretary is authorized to enter into agreements with the State agency for the purpose of reimbursing such agency for health care and services provided in Indian Health Service facilities to Indians who are eligible for medical assistance under the State plan.

"(d) Notwithstanding any other provision of law, payments to which any facility of the Indian Health Service (including a hospital, intermediate care facility, skilled nursing facility, or any other type of facility which provides services of a type otherwise covered under the State plan) is entitled under a State plan approved under this title by reason of this section shall be placed in a special fund to be held by the Secretary and used by him (to such extent or in such amounts as are provided in appropriation Acts) exclusively for the purpose of making any improvements in the facilities of such Service which may be necessary to achieve compliance with the applicable conditions and requirements of this title. In making payments from such fund, the Secretary shall ensure that each service unit of the Indian Health Service receives at least 50 percent of the amounts to which the facilities of the Indian Health Service, for which such service unit makes collections, are entitled by reason of this section, if such amount is necessary for the purpose of making improvements in such facilities in order to achieve compliance with the conditions and requirements of this title. This subsection shall cease to apply when the Secretary determines and certifies that substantially all of the health facilities of such Service in the United States are in compliance with such conditions and requirements.".

(c) REPEALS.—Subsections (b) and (c) of section 402 of the Indian Health Care Improvement Act (42 U.S.C. 1396j, note) are repealed.

(d) EFFECTIVE DATE.—The amendments made by this section shall apply to health care services performed on or after the date of the enactment of this Act.

SEC. 403. STUDY OF BARRIERS TO MEDICAID PARTICIPATION.

Title IV is amended by adding at the end thereof the following new section:

"STUDY OF BARRIERS TO MEDICAID PARTICIPATION

"SEC. 405. (a) The Secretary shall, in consultation with Indian tribes and tribal organizations, conduct a study of any barriers which may prevent Indians from receiving medical assistance under State plans approved under title XIX of the Social Security Act.

"(b) By no later than the date which is one year after the date of enactment of the Indian Health Care Amendments of 1986, the Secretary shall submit to the Congress a report on the study conducted under subsection (a). Such report shall include—

"(1) recommendations for legislation which—

"(A) would remove any barriers identified in such study which prevent Indians from receiving medical assistance under plans described in subsection (a) and,

"(B) would encourage participation by Indians in such plans; and

"(2) estimates, by service unit, of—

"(A) the number of Indians potentially eligible for medical assistance under such plans, and

"(B) the number of Indians receiving medical assistance under such plans.".

AMENDMENT OFFERED BY MR. NIELSON OF UTAH

Mr. NIELSON of Utah. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. NIELSON of Utah: Page 28, strike line 14 and all that follows through page 31, line 26 (and redesignate the subsequent titles of the bill accordingly).

Mr. NIELSON of Utah. Mr. Chairman, this is another brandnew program, Medicaid and Medicare. This is getting into an area which is covered elsewhere. This is something that the administration opposes and does not think is necessary, and it is another $3 million one year, $3½ million, then $4 million. Who knows how it may grow in the future?

Again, I think that it is a matter of adding areas that do not belong in Indian health care, that should be administered directly under the Medicare and Medicaid Programs and do not belong in this bill, and I propose striking them, as I did the facilities and also the catastrophic aspects of the bill.

Mr. WAXMAN. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, I oppose this amendment, which would strike all of title IV of the bill. This title is designed to increase access of eligible Indians to the Medicare and Medicaid Programs. The total lost, over 3 years, is only $10.5 million, for grants and contracts to Indian tribes. This is a reasonable provision, approved by the Congress 2 years ago.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Utah [Mr. NIELSON].

The amendment was rejected.

The CHAIRMAN. Are there other amendments to title IV? If not, the Clerk will designate title V.

The text of title V is as follows:

"OTHER CONTRACT REQUIREMENTS

"(4) $15,800,000 for fiscal year 1990.".

AMENDMENT OFFERED BY MR. NIELSON OF UTAH

Mr. NIELSON of Utah. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. NIELSON of Utah: Page 40, line 18, strike "$13,200,000" and insert "$10,000,000".

Page 40, line 19, strike "$14,400,000" and insert "$10,000,000".

Page 40, line 20, strike "$15,800,000" and insert "$10,000,000".

Mr. NIELSON of Utah. Mr. Chairman, the first amendment that I offered was basically an amendment to section 103 which reduced the money and kept it fiscally responsible. The next amendments I offered were to strike new programs, not to start new programs at the present time with our budget situation as it is.

This is like the first amendment. It is a freeze amendment. It leaves the urban program at $10 million for each of the fiscal years.

This was the amount which H.R. 4600 that was on the Suspension Calendar had, $10 million throughout, which I supported, and which many of us supported.

The administration would like to strike this fund entirely. They do not think that the urban program is doing what it is supposed to do, and they would prefer that it be struck entirely.

I do think that the urban program does some good, particularly for those Indians who are not living on reservations who need this access, and so I do not wish to strike it. However, I would like to freeze it. The reason that I would like to freeze it, as we have done on many bills this year, is because of our budget situation; we really should be freezing all programs or cutting whenever we can. Certainly this bill adds new programs. By the Members' votes they have indicated that they want those new programs. This is one that we have now which I believe is doing a good job, but I do not think that we have the funds to increase it by 32 percent, as this bill calls for in 1988, and so I suggest that it be frozen.

□ 1615

AMENDMENT OFFERED BY MR. MCCAIN AS A SUBSTITUTE FOR THE AMENDMENT OFFERED BY MR. NIELSON OF UTAH

Mr. McCAIN. Mr. Chairman, I offer an amendment as a substitute for the amendment.

The Clerk read as follows:

Amendment offered by Mr. MCCAIN as a substitute offered by Mr. NIELSON of Utah:

Section 501 is amended by striking:

"SEC. 509. There are authorized to be appropriated for contracts under this title—

"(1) $10,000,000 for fiscal year 1987,

"(2) $13,200,000 for fiscal year 1988,

"(3) $14,400,000 for fiscal year 1989, and

"(4) $15,800,000 for fiscal year 1990.

And inserting in lieu of the following:

"SEC. 509. There are authorized to be appropriated for contracts under this title—

"(1) $10,000,000 for fiscal year 1987,

"(2) $11,200,000 for fiscal year 1988,

"(3) $12,400,000 for fiscal year 1989, and

"(4) $13,800,000 for fiscal year 1990.

Mr. McCAIN (during the reading). Mr. Chairman, I ask unanimous consent that the amendment offered as a substitute for the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Arizona?

There was no objection.

Mr. McCAIN. Mr. Chairman, this amendment basically simply allows for what appears to be inflation in the following years.

I understand the concerns of the gentleman from Utah. I believe that urban health care clinics are crucial to urban Indians and Indian urban health care clinics are an important factor in this health care equation.

This amendment basically allows increases for fiscal years 1988, 1989, and 1990 to the extent of what I think would take care of inflation. It would reduce from the present bill some $6 million over a 3-year period leaving, however, the $10 million number for fiscal year 1987.

I would just like to point out again that urban health care clinics are a crucial part of the health care equation for our Indian population. I believe that some fiscal reductions can be made, but at the same time I do not believe that they should be as draconian as that suggested in the amendment of the gentleman from Utah [Mr. NIELSON].

I urge my colleagues to support this amendment as a substitute.

Mr. UDALL. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I rise in opposition to the amendment. In 1976, Congress made a conscious decision that the Federal Government has some responsibility to ensure that Indian people who are forced to migrate to the urban areas receive adequate health services.

It did so, not by making provision for direct Federal health services, but by giving urban Indians the ability to reach out to existing health services in that urban area.

When health care costs and the costs of accessing such care are rising, this amendment would freeze these Indian people into a substandard health condition.

I oppose the amendment and urge the House to reject it.

Mr. WAXMAN. Mr. Chairman, I rise in opposition to the Nielson amendment. I rise in opposition to the amendment because it would reduce the authorizations for the urban Indian health program by $13.4 million over 3 years, leaving the program frozen at $10 million for each of the next 3 years.

This program is essential to California which has far more urban Indians than any other State. For that reason, among others, I would strongly oppose the amendment.

Mr. NIELSON of Utah. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I would like to indicate that while I would prefer my amendment, which is a freeze for this program, as we have in many other programs, $10 million is a figure that both the chairman of the Committee on Interior and Insular Affairs and the chairman of the Committee on Energy and Commerce, Subcommittee on Health and the Environment, were willing to accept 4 or 5 short months ago. If $10 million was acceptable at that point, I do not know why it is so inadequate now. I am for the urban programs and the program the gentleman from Arizona [Mr. MCCAIN] has suggested as being a modest increase for inflation. I hope he is wrong on his numbers, because these are 12-percent increases each year. I would hope that inflation does not go back to 12 percent a year. I think the amount is excessive.

Obviously, I do not have sufficient votes to freeze. I wish I did. I will probably reluctantly support the amendment offered by the gentleman from Arizona [Mr. MCCAIN], but I want to point out it is a 12-percent increase per year. I think that it is much more than inflation, as he suggests.

Mr. Chairman, I yield back the balance of my time.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Arizona [Mr. MCCAIN] as a substitute for the amendment offered by the gentleman from Utah [Mr. NIELSON].

The amendment offered as a substitute for the amendment was agreed to.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Utah [Mr. NIELSON], as amended.

The amendment, as amended, was agreed to.

The CHAIRMAN. Are there other amendments to title V?

If not, the Clerk will designate title VI.

The text of title VI is as follows:

TITLE VI—ORGANIZATIONAL IMPROVEMENTS

SEC. 601. ESTABLISHMENT OF INDIAN HEALTH SERVICE AS AN AGENCY OF THE PUBLIC HEALTH SERVICE.

(a) AMENDMENT.—Title VI (25 U.S.C. 1661) is amended to read as follows:

"TITLE VI—ORGANIZATIONAL IMPROVEMENTS

"ESTABLISHMENT OF THE INDIAN HEALTH SERVICE AS AN AGENCY OF THE PUBLIC HEALTH SERVICE

"SEC. 601. The Indian Health Service shall be administered by a Director, who shall be appointed by the President, by and with the advice and consent of the Senate. The Director of the Indian Health Service shall report to the Secretary through the Assistant Secretary for Health, of the Department of Health and Human Services, and shall not report to, or be under the supervision of, any other officer or employee of such Department.

"(b) The Indian Health Service shall be an agency within the Public Health Service of the Department of Health and Human Services, and shall not be an office, component, or unit of any other agency of the Department.

"(c) The Secretary shall carry out through the Director of the Indian Health Service—

AMENDMENT OFFERED BY MR. MC CAIN

Mr. McCAIN. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. McCAIN: Strike section 705 and insert the following:

SEC. 705. ELIGIBILITY OF CALIFORNIA INDIANS.

Section 709 (25 U.S.C. 1679) is amended by placing a "period" at the end of the September 30, 1982" and deleting", and ending with the fiscal year ending September 30, 1984.",

Strike section 706 and insert in lieu thereof the following:

SEC. 706. "CALIFORNIA AS A CONTRACT HEALTH SERVICE DELIVERY AREA".

"SEC. 710. The State of California, excluding the counties of Alameda, Contra Costa, Los Angeles, Marin, Orange, Sacramento, San Francisco, San Mateo, Santa Clara, Kern, Merced, Monterey, Napa, San Benito, San Joaquin, San Luis Obispo, Santa Cruz, Solano, Stanislaus, and Ventura shall be designated as a contract health service delivery area by the service for the purpose of providing contract health services to Indians in such State.".

Mr. McCAIN (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Arizona?

There was no objection.

Mr. McCAIN. Mr. Chairman, I regret that this issue has come up today because I think it is important that we get this bill passed and resolved.

As you may recall, some time ago, this bill, the Indian health care amendments, was brought to the floor under suspension of the rules. At that time, I objected to the passage of the bill under suspension of the rules, and the bill was defeated.

A major reason why I objected was simply because of the so-called California or Waxman amendment to this piece of legislation.

After the bill was defeated, Mr. Chairman, I approached the gentleman from California [Mr. WAXMAN] and told him that I was more than happy to try to compromise and work out some kind of an accommodation on this issue. He nodded in the affirmative, and there has been no communication between him or his staff with me or my staff since that time. I had hoped that we could at least at some time work out some kind of an accommodation to satisfy what are his genuine concerns about California Indians, and mine about what this does to the scarce dollars that are available for Indian health care.

Unfortunately, that did not take place, and we are now here on the floor with a portion of the bill which the administration has stated categorically will lead to a presidential veto if we pass this bill. If the bill is vetoed, I do not believe there is anyone who believes we can revisit it again this year, and we will again deprive our Native Americans of much needed health care that they deserve.

My amendment would make permanent the existing law concerning eligibility of California Indians by removing the sunset provision. This means that those Indians in California currently served by the Indian Health Care Service will remain eligible for services.

There would be no way of expanding services beyond this service group, except by tribes, and tribes traditionally can determine their own membership.

This amendment would address the problems described by the administration in its position and in the President's veto statement of similar legislation last Congress. The definition of California contract care delivery areas is strongly opposed by the administration and by this Member. It is this language that would increase eligibility for Federal health care by an estimated 30,000 persons. There has been no evidence presented on why these nontribal persons should receive Federal health care.

This amendment would reduce the areas which would be contract health care delivery areas and reflect the current law. Again, there would be no reduction in existing service.

□ 1625

Together, this two-part amendment would address the concerns of the administration about California eligibility be consistent with our Federal Government-to-Government policy of dealing with Indian tribes, and assure currently eligible California Indians that they will continue to receive services.

Mr. Chairman, the National Tribal Chairman's Association, the elected leaders of Indian country, support this amendment; and later on if I have time, I will quote from some of the letters I have received from Indian tribes throughout this Nation.

I want to point out, Mr. Chairman, it is not the business of this body traditionally to pass legislation for which the vast majority of Indians are opposed, and this piece of legislation is opposed by the National Tribal Council Association, and others.

The Santa Rosa Rancheria California Tribe wrote:

We object to section 709 because the policy of federal recognition would ultimately be undermined, since the benefits that accrue to native people would be diluted because of increased services demanded by "self-identified" Indians in the area of their residence.

The Apache Tribe of Oklahoma, Mr. Chairman, says:

It is feared that the result will be to open the door to thousands of persons for IHS services who are truly not Indian. A precedent might be set for other States to rely upon Federal IHS programs to serve all self-identified Indians in their State; thereby reducing its responsibility to all of its citizens.

The pueblo of Acoma, NM:

The basic Federal Indian Health Services should be limited to members of the federally-recognized Indian tribes wherever they may live.

Mr. Chairman, I believe that this amendment recognizes the unique nature of California Indians. Their history is a sad chapter in U.S.-tribal relations, but Congress addressed this issue in 1980, and the McCain amendment preserves this decision.

I strongly urge, for the sake of the California Indians, for the sake of getting this legislation signed into law by the President, and for the sake of justice, that we approve this amendment overwhelmingly.

(On request of Mr. LAGOMARSINO and by unanimous consent, Mr. McCAIN was allowed to proceed for 1 additional minute.)

Mr. LAGOMARSINO. Mr. Chairman, will the gentleman yield?

Mr. McCAIN. I am glad to yield to the gentleman from California [Mr. LAGOMARSINO], a distinguished member of the committee, who has taken an abiding and long-standing interest, and has deep knowledge on Indian issues.

Mr. LAGOMARSINO. Mr. Chairman, I want to rise in support of the McCain amendment. The Indian Health Service serves both the Santa Ynez Indian Tribe in my district, and the Urban Health Care Clinic, which is also in my district.

The McCain amendment would not affect either of those entities; either of those services, and the Santa Ynez Tribe supports the McCain amendment.

The history of California Indians is a sad one, especially with regard to health care, but I believe the McCain amendment adequately addresses the unique nature of California without providing an opportuntiy to expand eligibility and, as the gentleman from Arizona [Mr. MCCAIN] points out, adoption of his amendment will probably assure signature of this bill; and that is what we should be about, trying to get legislation enacted, not just legislation to the President's desk.

Mr. WAXMAN. Mr. Chairman, I rise in opposition to the McCain amendment.

Mr. Chairman, I rise in opposition to the amendment. I wished I had an opportunity to negotiate any kind of potential compromise with Mr. MCCAIN, but I did not hear from him, and I would have looked forward to talking to him about this matter.

What his amendment does and what he seems to be set on doing is to terminate the health care to roughly 53,000 California Indians and their families who are now eligible for and receiving Indian Health Service health services.

It appears what we have is a scramble for a limited pie in terms of the allocation of the funds. We are not going to save money if the McCain amendment is adopted; what it would do is lead to the reallocation of money, of much of the funding that now goes to California Indians and it would go to Indians in other States; not surprisingly, to the Indians in Arizona.

The McCain amendment makes absolutely no provision for these California Indians who would be terminated from any health care coverage. The McCain amendment would wreck the network of 27 rural Indian health clinics that has been built up throughout the State of California, evidently not in Mr. LAGOMARSINO's district, but throughout the rest of the State, and most of these clinics would be forced to close, forcing their patients to seek care elsewhere.

By limiting eligibility in California to members of federally recognized California tribes, the McCain amendment ignores a long history of Federal termination of California tribes and refusal by the Federal Government to ratify treaties negotiated with California tribes.

Ralph Forquera, a professor of American Indian studies at San Diego State University and a registered California Mission Indian, put it this way in a recent letter:

> The McCain amendment indicates a lack of knowledge with regard to the history of oppression and severe racial discrimination perpetuated against California Indians. Unfortunately, this oppression continues to this day in the form of bureaucratic restrictions through eligibility requirements which fail to recognize the unique conditions in California, through continued racial prejudice within the community, and through other forms of disenfranchisement.

Mr. MCCAIN argues that the California provision would allow Federal health benefits to those who are not now truly needy Indians, or covered. The truth of the matter is the Federal Government right now considers the California Indians, defined by the provisions in the bill, to be eligible for IHS services and pays for their care.

These California Indians certainly view themselves and are viewed by others as truly Indians, even though the Federal Government, for historical reasons, does not recognize their tribes.

So I would urge we oppose the McCain amendment. It would change the basis for the allocation to the various Indian health programs; it would do disastrous disservice to the Indians in California with no jurisdiction that I can see in my mind for doing so.

We are only going to take away from those who are now getting services, where there is such a great need for expansion, and take away those funds to give to other States, to other Indians based on some kind of notion of Federal recognition of the tribes.

This was the provision in the bill which would be struck by the McCain amendment. Part of the bill that passed this House in the last Congress; we ought to stay with it. I cannot believe that we cannot work out a bill that the President will sign. In fact, I have every confidence that we will, and I would urge the defeat of the McCain amendment.

Mr. NIELSON of Utah. Mr. Chairman, I rise in opposition to the amendment.

The gentleman from Arizona [Mr. MCCAIN] has, by his amendment to title II, provided some $20 million each year for services. He has opposed the motion to strike the facilities, and has given a modest increase to the urban program.

It seems to me that this is a very good program. We worked over it very carefully in the Committee on Energy and Commerce where it had careful review. We had a look at the amount of money going to the Indian health care throughout the country.

Arizona leads the list. Arizona, per capita, is the highest in the country. No wonder the people in Arizona do not wish to share their wealth. They do not even share it well within the Navajo members outside Arizona: Utah, New Mexico, and Colorado do not get their fair share of the Navajo funds in that area.

California Indians receive almost the bottom amount per State, along with Utah Indians, among the lowest in the country.

I support the gentleman from California, who has worked diligently on this. I think he has good arguments on his side. This bill has passed twice in this Congress and several times in the House in committees. I think we should stick with it. The amount of money we are talking about is something like $2,650,000 next year. We did not want to cut $12 million earlier; we did not want to cut $4 million or $3 million, so we are worrying about $2 million, which is far more justifiable than the ones I tried to strike.

So I do oppose the amendment, and support the gentleman from California for what I think is a good program. If you are talking about fairness and equity, and giving true Indian health care to those who need it, I think we should defeat the McCain amendment.

Mr. STRANG. Mr. Chairman, I rise in support of the McCain amendment and in support of the comments offered in its favor by Mr. MCCAIN and my colleague, Mr. LAGOMARSINO; and I would yield to the gentleman from Arizona [Mr. MCCAIN].

Mr. MCCAIN. Mr. Chairman, I think that it is very foolish for the gentleman from California [Mr. WAXMAN] to think that this bill is going to be signed by the President with this provision included.

I also reject his statements concerning the draconian effects that it would have on California Indians. It does not—I repeat—does not require a reduction of service, nor is there any intent of this gentleman or the legislation to have that happen.

I cannot imagine the National Tribal Council Association, the leading body of native Americans in this country, supporting the McCain amendment if they thought it was going to deprive native Americans of health service. It is ludicrous to expect that they would be endorsing the McCain amendment if that were going to be the case; and I believe the gentleman from California knows better.

So I strongly suggest that without the support of the Indian community in America, that the Waxman amendment, that the Waxman part of this bill should be removed by means of the McCain amendment and I strongly urge my colleagues to do so.

□ 1635

Mr. STRANG. Reclaiming my time, Mr. Chairman, I would point out that the California provisions would allow Federal benefits to thousands of persons who are not truly Indians and would make it difficult for real tribes to achieve the stated goal of health equity. The California provisions would provide a precedent for many groups nationally to receive Federal funding without a historical or legal claim to those services such as State-recognized tribes. Finally, the Califor-

nia provisions change the basis for Federal tribal relations from a political government-to-government basis to one based on race, which may be subject to a constitutional challenge. I urge the support of the McCain amendment and yield back the balance of my time.

Mr. WAXMAN. Mr. Chairman, I move to strike the last word.

The CHAIRMAN. Without objection, the gentleman will be recognized for 5 minutes.

There was no objection.

Mr. WAXMAN. Mr. Chairman, section 705 of the bill provides that the following California Indians will be eligible for care from the IHS: First, members of federally recognized tribes; second, descendants of Indians who lived in California on June 1, 1852, who are members of the Indian community now served by the IHS; third, Indians holding certain trust interests; and fourth, Indians listed on certain plans for distribution of California rancherias and reservations and their dependents.

The McCain amendment would say only those who are members of the federally recognized tribes would be eligible to be served under the Indian health program. This amendment, and let me just reiterate it: according to tribal estimates compiled by the Office of Technology Assessment would cover 22,000, thus Mr. McCAIN's amendment would terminate from the IHS coverage roughly 53,000 California Indians who are currently eligible for and receiving IHS services. This is not the Waxman amendment; this is the amendment out of the Committee on Energy and Commerce which had bipartisan support and it is part of the bill before us, and I would urge we stick with the bill and defeat the McCain amendment which is so contrary to the interests of 53,000 California Indians.

The CHAIRMAN. The time of the gentleman from California has expired. Do other Members seek recognition?

If not, the question is on the amendment offered by the gentleman from Arizona [Mr. McCAIN].

The question was taken; and the Chairman announced that the noes appeared to have it.

Mr. McCAIN. Mr. Chairman, I demand a recorded vote, and pending that, I make the point of order that a quorum is not present.

The CHAIRMAN. Evidently a quorum is not present. Pursuant to the provisions of clause 2 of rule XXIII, the Chair announces that he will reduce to a minimum of 5 minutes the period of time within which a vote by electronic device, if ordered, will be taken on the pending question following the quorum call. Members will record their presence by electronic device.

The call was taken by electronic device.

The following Members responded to their names:

AMENDMENT OFFERED BY MR. SYNAR

Mr. SYNAR. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. SYNAR: Page 65, after line 11, insert the following:

"ELIGIBILITY POLICY

"SEC. 720. In fiscal years 1987 and 1988, the Indian Health Service shall apply such regulations, policies, and procedures governing eligibility for health services from the Indian Health Service as were in effect on January 1, 1986.".

Page 65, line 11, strike the quotation marks and the final period.

Mr. SYNAR (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Oklahoma?

There was no objection.

Mr. SYNAR. Mr. Chairman, the amendment that I offer, I offer on behalf of the gentleman from Oklahoma: Messrs. JONES, WATKINS, McCURDY, ENGLISH, and EDWARDS.

Mr. Chairman, this amendment prohibits the Indian Health Service from implementing new regulations to govern eligibility for health services under this act.

IHS proposed on June 10 of this year a new rule that would restrict access to health care for native Americans of more than one-quarter blood quantum. While I have been told that IHS has withdrawn this rule, I think it is important for Congress to prohibit such action outright.

What IHS has proposed is probably unconstitutional. It has long been settled that special Indian programs are not racial in nature but are based on the unique political relationship between Indian tribes and the Federal Government. The imposition of uniform blood quantum requirements would shift the ground of the relationship from political to racial.

It is inappropriate for IHS to make the determination of who is eligible for health services. This is exclusively a responsibility and prerogative of Congress.

The proposed rule would have a devastating effect on native American Indians. In Oklahoma alone, we estimate that 100,000 Indians who now benefit from these services would become ineligible. This is a class of Americans who suffers from the highest rate of a number of preventable illnesses. They suffer from twice the rate of poverty as the general population. For us to drastically reduce their access to health care would be callous, unnecessary, and unconstitutional.

The administration has argued that the change is necessary to allow them to better meet the needs of Indians. If this is true, why have they attempted to reduce funding for this program year after year? And why do we continually face the threat of veto of this legislation?

I urge my colleagues to support this amendment and ensure that native Americans are allowed to receive the level of health care services to which they are now entitled.

Mr. WAXMAN. Mr. Chairman, will the gentleman yield?

Mr. SYNAR. I yield to the gentleman from California.

Mr. WAXMAN. Mr. Chairman, I rise in strong support of this amendment. The fundamental issue here is who determines who is eligible for IHS services?

I believe this is the prerogative and responsibility of the Congress. The Synar amendment would give the next Congress the opportunity to define eligibility for IHS programs by blocking the administration's effort to go through regulations.

I urge my colleagues to support the amendment.

Mr. JONES of Oklahoma. Mr. Chairman, will the gentleman yield?

Mr. SYNAR. I yield to the gentleman from Oklahoma.

Mr. JONES of Oklahoma. Mr. Chairman, I am delighted to join the gentleman from Oklahoma [Mr. SYNAR] and

the delegation from Oklahoma in sponsoring this amendment.

This proposed regulation would affect about 40 percent of the Indians in Oklahoma and it would provide no health care facilities for them. The State could not pick up the slack because our State is in an economic depression, by and large.

There are several objections to the proposed regulation. Number 1 is that this flies in the face of the administration's proposed policy of tribal self-determination. It should not arbitrarily define who is an Indian. That is for the tribes themselves to define.

So for all of these reasons, I think this amendment should pass and this regulation should be defeated.

Mr. WATKINS. Mr. Chairman, will the gentleman yield?

Mr. SYNAR. I yield to the gentleman from Oklahoma.

Mr. WATKINS. Mr. Chairman, I am happy to join my colleague, the gentleman from Muskogee, OK [Mr. SYNAR], and the entire united Oklahoma delegation in support of this amendment which is badly needed for the health care of Indians, not only in Oklahoma, but throughout this great country of ours.

Mr. UDALL. Mr. Chairman, will the gentleman yield?

Mr. SYNAR. I yield to the gentleman from Arizona.

Mr. UDALL. Mr. Chairman, I would reluctantly accept the amendment of the gentleman. While I support the concept of his amendment, I have some difficulty in including it in this legislation.

First, our committee has been informally advised that the administration is no longer pushing the adoption of the blood quantum criteria.

Second, it is my opinion that the administrative adoption of such a criteria would be unconstitutional in the absence of an act of Congress authorizing them to do so. I do not want the adoption of this amendment to imply that the Congress agrees with their constitutional rights to apply such a criteria.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Oklahoma [Mr. SYNAR].

The amendment was agreed to.

Mr. NIELSON of Utah. Mr. Chairman, I move to strike the last word.

I would like to engage the gentleman from New Mexico [Mr. RICHARDSON] in a colloquy.

There are two programs in the section 7 which I had a concern about. One had to do with juvenile alcohol prevention and the other with Navajo alcohol pilot projects.

These programs, at least the last one and possibly the first one, were placed in the drug bill that we passed last week, and my question to the gentleman from New Mexico is, is he willing to attach language in the report to make sure that these are not funded twice?

If they are funded in the drug bill, then they would not be funded. Is that the gentleman's understanding?

Mr. RICHARDSON. Mr. Chairman, will the gentleman yield?

Mr. NIELSON of Utah. I yield to the gentleman from New Mexico.

Mr. RICHARDSON. Mr. Chairman, I would accept that recommendation by my colleague, the gentleman from Utah. I believe that it is critical that this project be funded. As the gentleman knows, it was put into the drug bill. It is contained in this bill, but as soon as one passes, or one is approved, we are trying to guard against a potential veto, one of them would be stripped.

I assure my colleague that that would happen.

Mr. NIELSON of Utah. Mr. Chairman, with that assurance, I will not offer the amendments I had planned to offer to strike those two.

I thank my colleague.

□ 1720

The CHAIRMAN. Are there any other amendments to title VII? If not, the gentleman from Utah [Mr. NIELSON] is recognized.

AMENDMENT IN THE NATURE OF A SUBSTITUTE OFFERED BY MR. NIELSON OF UTAH

Mr. NIELSON of Utah. Mr. Chairman, I offer an amendment in the nature of a substitute.

"(B) The financial and technical capability of an Indian tribe or community to safely operate and maintain a sanitation facility shall not be a precondition for the provision or construction of such facilities and the Secretary may not require a tribe or community to accept a transfer of such facilities where he has determined the tribe or community does not have, or may not be reasonably expected to achieve, such capability.

"(2) any of the indigenous people residing in Guam, American Samoa, the Trust Territory of the Pacific Islands, or the Northern Mariana Islands; or

"(3) any individual whose direct ancestors are from Guam, American Samoa, the Trust Territory of the Pacific Islands, or the Northern Mariana Islands.".

Mr. NIELSON of Utah (during the reading). Mr. Chairman, I ask unanimous consent that the amendment in the nature of a substitute be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Utah?

There was no objection.

Mr. NIELSON of Utah. Mr. Chairman, this amendment in the nature of a substitute is essentially the bill which we voted on in April of this year. It passed in the House by 263 to 241, that is, it got 263 votes to 241, which was some 6 votes less than it would have needed to pass under suspension; nevertheless, 263 of our number voted for this bill as presented at that time.

Mr. Chairman, as has been said earlier, we are all in favor of having good Indian health care. We want to have the maximum return for our dollar; however, the present bill calls for some $212 million over a 3-year period, plus another $82 million for fiscal year 1990.

The bill we voted on in April this year had $99.3 million, so this is $122 million more than the bill we voted on in April this year. By failing to pass it on suspension, we now have a bill before us which is $120 million more than we had in April.

In my view it was a mistake not to vote for that bill in April, because it would have saved a considerable amount of money. It preserved the manpower requirements. It froze the services. It froze the facilities. It left the Medicaid and Medicare and it froze the urban program.

The total bill at that time was approximately $20 million for the first fiscal year 1987 and approximately $35 million for each of the next fiscal years 1988 and 1989.

This bill will provide a fairly good increase in Indian health care services, approximately a 15-percent increase each year, which adds to a total increase of 50 percent by the fiscal year 1989. This is a healthy increase in years when we have very few budget dollars.

It also has I believe some protections because Indian health care is one of those which is protected from Gramm-Rudman cuts. That being the case, they are assured of the dollars which are appropriated to them.

We have had some amendments to the bill before us, H.R. 5222, and some of those amendments were in the right direction. I think the last amendment by the gentleman from Arizona [Mr. MCCAIN] was in the wrong direction; nevertheless, the bill before us, regardless of those amendments, is way too expensive.

The President vetoed a bill less expensive than H.R. 5222 on the basis of cost. I think he will sign a bill with $99.3 million.

As stated earlier, we have a bill that we need to get passed. It needs to be reauthorized. We need to take care of the Indian health care programs in an economical way. This bill basically does that and in the process saves $120 million in a 3-year period of time, plus another $82 million in the fiscal year 1990.

It is responsible. It continues the good programs which have been successful. It preserves the urban program which has been successful. It preserves the manpower program. It provides for Medicaid and Medicare studies and in general it does what needs to be done in the Indian health care field in a manner consistent with the budget realities we have facing us at the present time.

I hope you will support the amendment in the nature of a substitute.

Mr. MCCAIN. Mr. Chairman, I rise in opposition to the substitute amendment. I reluctantly oppose the substitute.

We have a carefully crafted bill here. It is a bill that is the subject of great compromise.

Just let me say also, Mr. Chairman, the most dramatically growing population in America today is our Indian population. Over half the population of the Indian country in America is below the age of 18. The demand for health care services and the dramatic increase, not decrease, in fact many of the budget reductions that have been enacted over the last 5 years have dramatically affected our Indian population.

I believe that this bill now that the McCain amendment was passed will be accepted by the administration. I think we will fulfill the obligation that was the subject of treaties and agreements for the last 200 years between the U.S. Government and our Indian population.

For those reasons, I reluctantly, although respectfully, oppose the substitute amendment offered by my colleague and friend, the gentleman from Utah [Mr. NIELSON].

Mr. UDALL. Mr. Chairman, I move to strike the last word.

Mr. Chairman, this is the last amendment of which I am aware and we should be finishing up shortly if we dispose of this amendment.

This bill today has been in the jurisdiction of two committees, the Energy and Commerce Committee and the Interior and Insular Affairs Committee.

Mr. Chairman, I rise in strong opposition to this proposed substitute. As the gentleman notes, the substitute contains the text of H.R. 4600 which I

introduced. This bill failed of passage on suspension of the rules in April of this year.

H.R. 4600 was specifically developed as a suspension vehicle in order to accommodate members who felt that this important legislation should be expedited. In order to qualify for consideration under suspension, the total cost of that bill was reduced below $100,000,000. This was accomplished not primarily by reducing the authorization levels of the various programs, but by reducing the years of authorization.

I reluctantly agreed to bring the legislation to the floor under suspension. It failed on suspension not because many Members opposed the legislation, but because many supporters of H.R. 1426 disagreed with the reduction in funding levels and funding years.

Mr. Chairman, H.R. 1426, as brought to the House under the rule, is better legislation and I urge the defeat of this substitute.

Mr. AKAKA. Mr. Chairman, will the gentleman yield?

Mr. UDALL. I yield to the gentleman from Hawaii.

Mr. AKAKA. Mr. Chairman, I rise in strong support of H.R. 1426, the Indian Health Care Amendments, and I urge my colleagues to do the same.

The purpose of this bill, Mr. Speaker, is to address the severe health needs of the Indian people of our Nation. And, well we should.

When the Indian Health Care Improvement Act of 1976 was passed, it was done for the primary reason of raising the health status of American Indians and Alaska Natives to a level at parity with that of the general U.S. population. That measure was passed because Congress recognized that the Federal Government has an historical and unique legal relationship with, and a resulting responsibility to, Indian tribes and their members.

Ten years later, while advances have been made in promoting the aims of that act, the task of providing adequate services to achieve those aims has not yet been met.

Indeed, the health status of Indians continues to be poorer than that of the U.S. population in general. Compared to all Americans, for example, the 1980 age-adjusted tuberculosis death rate for American Indians and Alasks Natives was six times greater than that for the general U.S. population. Statistics on the influenza and pneumonia death rate were no less significant: 1.6 times as great.

Clearly, if the success of a society is measured by the welfare of its citizens, then America, most assuredly, has a long way to go before it can be described as successful.

It is incumbent upon each and every one of us today to recognize the responsibility which is before us. We must, as keepers of the traditions of our country, ensure continuity in our policy of providing needed health services to American Indians, a policy which dates back to as early as 1802. H.R. 1426 helps us to meet our obligation.

There are those who would have us believe that this bill is excessive, overexpansive and burdensome. I simply do not agree. In fact, I believe that H.R. 1426 is a modest effort to address the need for additional health services, facilities, and the like, in an environment of fiscal conservatism.

I want to compliment Chairman UDALL and Chairman WAXMAN for their work on this measure. They have fought an uphill battle this year, and it is time for us to lend them a hand.

I urge the adoption of this bill.

The CHAIRMAN. The question is on the amendment in the nature of a substitute offered by the gentleman from Utah [Mr. NIELSON].

The question was taken; and the Chairman announced that the noes appeared to have it.

TITLE I—REGISTRATION

SEC. 101. PREREGISTRATION ACCESS TO DATA.

(a) IN GENERAL.—Section 3(c) (7 U.S.C. 136a(c)) is amended by adding at the end thereof the following new paragraph:

"(9) PREREGISTRATION ACCESS TO DATA.—

"(A) If an application for—

"(i) a registration of a pesticide containing a new active ingredient, or

"(ii) a registration of a pesticide to authorize the initial food use of a pesticide active ingredient,

is submitted to the Administrator, the Administrator, before acting on such application, shall provide, in accordance with this paragraph, public access to health, safety, and environmental data that are submitted or cited in support of such application.

"(B) To obtain access to the data referred to in subparagraph (A), a person shall send by certified mail—

"(i) not later than 30 days after the publication under paragraph (4) of a notice of the application referred to in subparagraph (A), and

"(ii) simultaneously to the Administrator and to the applicant for the registration of the pesticide,

a request for such access and the affirmation required by subparagraph (D).

"(C)(i) Unless within 15 days after the Administrator's receipt of a request for access to such data and of an affirmation complying with subparagraph (D) the applicant submits to the Administrator an objection to the request asserting that the affirmation is inaccurate and the reasons for the objection, the Administrator shall grant the request. If an objection to a request is submitted to the Administrator within such 15-day period, the Administrator shall determine whether to grant the request within 5 days after the receipt of the objection. If the Administrator determines to grant the request, access shall not be permitted until 5 days after the applicant making the objection has been notified that access has been granted.

"(ii) If access to data is denied under clause (i), comments on the application for which such data were submitted or cited shall be filed within 60 days after the decision of the Administrator denying access.

"(D)(i) Data referred to in subparagraph (A) may be made available only to a person who provides an affirmation (and such supporting evidence as the Administrator considers necessary) containing the information prescribed by clause (ii).

"(ii) The affirmation required under clause (i) shall—

"(I) state that the person is not engaged in, and is neither employed by nor acting (directly or indirectly) on behalf of any other person or affiliate thereof engaged in, the production, sale, or distribution of a pesticide,

"(II) identify any business, employer, or other person, if any, on whose behalf the person is requesting access to the data, and

"(III) state that the person will not intentionally or recklessly violate this paragraph.

For purposes of this clause, an affiliate of a person is a person who directly or indirectly, through one or more intermediates, controls or is controlled by or is under common control with the other person.

"(iii) Section 1001 of title 18, United States Code, shall apply to an affirmation made under this subparagraph.

"(E)(i) Data supporting an application may be made available under subparagraph (A) to a person only for the purpose of permitting the person to comment to the Administrator on such application. Such comments may reasonably quote data submitted to the Administrator. No person, including the Administrator, may make such comments public before the decision of the Administrator on the application for the registration of the pesticide for which such data were submitted or after such decision if the application for registration is denied.

"(ii) Except as provided in clause (iii), a person who obtains data under subparagraph (A) (directly or indirectly) may not—

"(I) publish, copy, or transfer the data to any other person to obtain approval to sell, manufacture, or distribute a pesticide anywhere in the world, or

"(II) use the data for any purpose in any court or agency of the United States or any State or political subdivision thereof before the decision of the Administrator on the application for the registration of the pesticide for which such data were submitted or after such decision if the application for registration is denied.

"(iii) Such data and comments may be disclosed consistent with section 10 after registration of the pesticide for which such data were submitted.

"(F)(i) Data made available under this paragraph may be examined at an office of the Environmental Protection Agency or an appropriate State agency under the conditions prescribed by this paragraph and may not be removed from such office.

"(ii) The Administrator shall maintain a record of the persons who inspect data. A copy of such record shall be sent to the data submitter on request.

"(G) Once access to data respecting an application is granted, the data may be examined and notes may be taken for use in developing comments on the application. Such comments on the application shall be filed within 60 days after the decision of the Administrator granting access, unless the comment period is extended by the Administrator for an additional 30 days for good cause.".

(b) NOTICE OF APPLICATION.—Section 3(c)(4) (7 U.S.C. 136a(c)(4)) is amended—

(1) in the first sentence, by striking out "promptly" and inserting in lieu thereof "not later than 30 days", and

(2) in the second sentence—

(A) by striking out "The notice" and inserting in lieu thereof "Except as provided in paragraph (9), the notice", and

(B) by striking out "30" and inserting in lieu thereof "60".

SEC. 102. CRIMINAL PENALTIES FOR DISCLOSURE OF INFORMATION.

Paragraph (3) of section 14(b) (7 U.S.C. 1361(b)(3)) is amended to read as follows:

"(3) DISCLOSURE OF INFORMATION.—

"(A) Any person who, with intent to defraud, uses or reveals information relative to the formula of a product acquired under section 3 shall be fined not more than $25,000, or imprisoned for not more than 3 years, or both.

"(B) Any person, including any officer, contractor, or employee of the United States or a State, who—

"(i) is granted access to data under section 3(c)(9), and

"(ii) in furtherance of a commercial purpose involving the production, registration, distribution, or sale of a pesticide—

"(I) knowingly violates such section, or

"(II) knowingly allows data to be made available in violation of such section,

shall be fined not more than $100,000, or imprisoned for not more than 3 years, or both.".

SEC. 103. CONDITIONAL REGISTRATION.

Subparagraphs (B) and (C) of section 3(c)(7) (7 U.S.C. 136a(c)(7)) are amended to read as follows:

"(B)(i) The Administrator may conditionally amend the registration of a pesticide under this subparagraph to permit additional uses of such pesticide notwithstanding the fact that data concerning the pesticide may be insufficient to support an unconditional amendment, if the Administrator determines that—

"(I) the applicant has submitted or cited the additional data that the Administrator may require solely for the proposed additional use,

"(II) amending the registration in the manner proposed by the applicant would not materially increase the risk of any unreasonable adverse effect on the environment, and

"(III) the additional use is in the public interest.

"(ii)(I) Except as provided in subclause (II), if the Administrator has issued a notice stating that a pesticide, or any ingredient thereof, meets or exceeds risk criteria associated in whole or in part with human dietary exposure and specified in regulations issued under paragraph (8), no registration of the pesticide may be amended under clause (i) to add any food or feed use during the pendency of any evaluation by the Administrator initiated by such notice.

"(II) If the Administrator has issued a notice stating that a pesticide, or any ingredient thereof, meets or exceeds risk criteria associated in whole or in part with human dietary exposure and specified in regulations issued under paragraph (8), the Administrator may amend the registration of the pesticide under clause (i) to add a minor food or feed use if the Administrator determines, with the concurrence of the Secretary of Agriculture, that there is not available an effective alternative pesticide that does not meet or exceed such risk criteria.

"(iii) An applicant seeking an amended registration of a pesticide under this subparagraph shall submit or cite to the Administrator such data as would be required to obtain a registration of a similar pesticide under paragraph (5). Except as provided in

clause (iv), if the applicant is unable to submit or cite an item of such data because it has not yet been generated, the Administrator may amend the registration of the pesticide under such conditions as will require the submission or citation of such data not later than the time such data are required to be submitted for the maintenance of a registration of the similar pesticide under this section.

"(iv) If data concerning chronic dosing, oncogenicity, reproductive effects, mutagenicity, neurotoxicity, or teratogenicity are required to support the registration of a pesticide and if a period reasonably sufficient for the generation and submission of such data has elapsed since the Administrator first imposed the data requirement, a conditional amendment to permit an additional use of the pesticide for other than a minor use shall not be granted under clause (i) unless such data have been submitted.

"(C)(i) The Administrator may conditionally register a pesticide under this subparagraph containing an active ingredient not contained in any registered pesticide for a period reasonably sufficient for generation and submission of required data that have not been submitted because a period reasonably sufficient for generation of the data has not elapsed since the Administrator first imposed the data requirement (I) on the conditions that by the end of such period the Administrator receives such data and that the data that the Administrator receives do not meet or exceed risk criteria enumerated in regulations issued under paragraph (8), and (II) on such other conditions as the Administrator may prescribe.

"(ii) A conditional registration under this subparagraph shall be granted only if the Administrator determines that—

"(I) use of the pesticide during the period referred to in clause (i) will not cause any unreasonable adverse effect on the environment, and

"(II) use of the pesticide is in the public interest.

"(iii) The Administrator shall not conditionally register a pesticide under this subparagraph if data concerning chronic dosing, oncogenicity, reproductive effects, mutagenicity, neurotoxicity, or teratogenicity would be required for registration of such a pesticide under paragraph (5), a period reasonably sufficient for generation of such data has elapsed since the Administrator first imposed the data requirement, and such data have not been submitted to the Administrator.".

SEC. 104. DEFINITION OF OUTSTANDING DATA REQUIREMENT.

Section 2 (7 U.S.C. 136) is amended by adding at the end the following new subsection:

"(ff) OUTSTANDING DATA REQUIREMENT.—

"(1) IN GENERAL.—The term 'outstanding data requirement' means a requirement for any study, information, or data which is necessary to make a determination under section 3(c)(5) and which study, information, or data—

"(A) has not been submitted to the Administrator, or

"(B) if submitted to the Administrator, the Administrator has determined must be resubmitted because it is not valid, complete, or adequate to make a determination under section 3(c)(5) and the regulations and guidelines issued thereunder, as determined by the Administrator.

"(2) FACTORS.—In making a determination under paragraph (1)(B) respecting a study, the Administrator shall examine, at a minimum, relevant protocols, documentation of the conduct and analysis of the study, and the results of the study to determine whether the study and the results of the study fulfill the data requirement for which the study was submitted to the Administrator.".

SEC. 105. REREGISTRATION OF REGISTERED PESTICIDES.

(a) AMENDMENT.—The Act is amended by inserting after section 3 (7 U.S.C. 136a) the following new section:

"(a) GENERAL RULE.—The Administrator shall reregister, in accordance with this section, each registered pesticide containing any active ingredient contained in any pesticide first registered before November 1, 1984, except for any pesticide as to which the Administrator has determined, after November 1, 1984, and before the effective date of this section, that—

"(1) there are no outstanding data requirements, and

"(2) the requirements of section 3(c)(5) have been satisfied.

"(b) SPECIAL AUTHORITIES OF ADMINISTRATOR.—

"(1) GUIDELINES.—Not later than one year after the date of enactment of the Federal Insecticide, Fungicide, and Rodenticide Act Amendments of 1986, the Administrator, by order, shall issue guidelines to be followed by registrants in—

"(A) summarizing studies,

"(B) reformatting studies,

"(C) identifying adverse information, and

"(D) identifying studies that have been submitted previously that may not meet the requirements of section 3 or regulations issued under such section,

in accordance with subsection (f)(1). Guidelines issued under this paragraph shall not be subject to judicial review.

"(2) MONITORING.—The Administrator shall monitor the progress of registrants in acquiring and submitting the data required under this section.

"(3) SUSPENSIONS AND PENALTIES.—

"(A) The Administrator shall issue a notice of intent to suspend the registration of a pesticide in accordance with the procedures prescribed by section 3(c)(2)(B)(iv) if—

"(i) the Administrator determines that progress is insufficient to ensure the submission of the data required for such pesticide under a commitment made under subsection (e)(3)(B) or (f)(1)(H) within the time period prescribed by subsection (e)(4)(B) or (f)(2)(B) or the registrant has not submitted such data to the Administrator within such time period,

"(ii) the Administrator determines that tests necessary to fill an outstanding data requirement for such pesticide have not been initiated within 1 year after the issuance of a notice under subsection (g)(1)(B),

"(iii) the Administrator determines that progress is insufficient to ensure submission of the data referred to in clause (ii) within the time period prescribed by subsection (g)(2)(B) or the required data have not been submitted to the Administrator within such time period, or

"(iv) a registrant fails to comply with clause (ii) or (iii) of section 3(c)(2)(B).

"(B) A registrant who submits a certification under subsection (f)(1)(G) that is false shall be considered to have violated this Act and shall be subject to the penalties prescribed by section 14.

"(c) REREGISTRATION PHASES.—Reregistrations of pesticides under this section shall be carried out in the following phases:

"(1) The first phase shall include the listing under subsection (d) of the active ingredients of the pesticides that will be reregistered.

"(2) The second phase shall include the submission to the Administrator under subsection (e) of notices by registrants respecting their intention to seek reregistration, identification by registrants of missing and inadequate data for such pesticides, and commitments by registrants to replace such missing or inadequate data within the applicable time period.

"(3) The third phase shall include submission to the Administrator by registrants of the information required under subsection (f).

"(4) The fourth phase shall include an independent, initial review by the Administrator under subsection (g) of submissions under phases two and three, identification of outstanding data requirements, and the issuance, as necessary, of requests for additional data.

"(5) The fifth phase shall include the review by the Administrator under subsection (h) of data submitted for reregistration and appropriate regulatory action by the Administrator.

"(d) PHASE ONE.—

"(1) PRIORITY FOR REREGISTRATION.—For purposes of the reregistration of the pesticides described in subsection (a), the Administrator shall list the active ingredients of pesticides and shall give priority to, among others, active ingredients (other than active ingredients for which registration standards have been issued before the date of enactment of the Federal Insecticide, Fungicide, and Rodenticide Act Amendments of 1986) that—

"(A) are in use on or in food or feed and may result in postharvest residues,

"(B) may result in residues of potential toxicological concern in potable groundwater, edible fish, or shellfish,

"(C) have been determined by the Administrator before the date of enactment of the Federal Insecticide, Fungicide, and Rodenticide Act Amendments of 1986 to have significant outstanding data requirements, or

"(D) are used on crops, including in greenhouses and nurseries, where worker exposure is most likely to occur.

"(2) REREGISTRATION LISTS.—For purposes of reregistration under this section, the Administrator shall by order—

"(A) not later than 70 days after the date of enactment of the Federal Insecticide, Fungicide, and Rodenticide Act Amendments of 1986, list pesticide active ingredients for which registration standards have been issued before such date,

"(B) not later than 4 months after the date of enactment of the Federal Insecticide, Fungicide, and Rodenticide Act Amendments of 1986, list the first 150 pesticide active ingredients, as determined under paragraph (1),

"(C) not later than 7 months after the date of enactment of the Federal Insecticide, Fungicide, and Rodenticide Act Amendments of 1986, list the second 150 pesticide active ingredients, as determined under paragraph (1), and

"(D) not later than 10 months after the date of enactment of the Federal Insecticide, Fungicide, and Rodenticide Act Amendments of 1986, list the remainder of the pesticide active ingredients, as determined under paragraph (1).

Each list shall be published in the Federal Register.

"(3) JUDICIAL REVIEW.—The content of a list issued by the Administrator under paragraph (2) shall not be subject to judicial review.

"(4) NOTICE TO REGISTRANTS.—On the publication of a list of pesticide active ingredients under paragraph (2), the Administrator shall send by certified mail to the registrants of the pesticides containing such active ingredients a notice of the time by which the registrants are to notify the Administrator under subsection (e) whether they intend to seek or not to seek reregistration of such pesticides.

"(e) PHASE TWO.—

"(1) IN GENERAL.—The registrant of a pesticide that contains an active ingredient listed under subparagraph (B), (C), or (D) of subsection (d)(2) shall submit to the Administrator, within the time period prescribed by paragraph (4), the notice described in paragraph (2) and any information, commitment, or offer described in paragraph (3).

"(2) NOTICE OF INTENT TO SEEK OR NOT TO SEEK REREGISTRATION.—

"(A) The registrant of a pesticide containing an active ingredient listed under subparagraph (B), (C), or (D) of subsection (d)(2) shall notify the Administrator by certified mail whether the registrant intends to seek or does not intend to seek reregistration of the pesticide.

"(B) If a registrant submits a notice under subparagraph (A) of an intention not to seek reregistration of a pesticide, the Administrator shall publish a notice in the Federal Register stating that such a notice has been submitted.

"(3) MISSING OR INADEQUATE DATA.—Each registrant of a pesticide that contains an active ingredient listed under subparagraph (B), (C), or (D) of subsection (d)(2) and for which the registrant submitted a notice under paragraph (2) of an intention to seek reregistration of such pesticide shall submit to the Administrator—

"(A) in accordance with regulations issued by the Administrator under section 3, an identification of—

"(i) all data that are required by regulation to support the registration of the pesticide with respect to such active ingredient,

"(ii) data that were submitted by the registrant previously in support of the registration of the pesticide that are inadequate to meet such regulations, and

"(iii) data identified under clause (i) that have not been submitted to the Administrator, and

"(B) either—

"(i) a commitment to replace the data identified under subparagraph (A)(ii) and submit the data identified under subparagraph (A)(iii) within the applicable time period prescribed by paragraph (4)(B), or

"(ii) an offer to share in the cost to be incurred by a person who has made a commitment under clause (i) to replace or submit the data and an offer to submit to arbitration as described by section 3(c)(2)(B) with regard to such cost sharing.

For purposes of a submission by a registrant under subparagraph (A)(ii), data are inadequate if the data are derived from a study with respect to which the registrant is unable to make the certification prescribed by subsection (f)(1)(G) that the registrant possesses or has access to the raw data used in or generated by such study. For purposes of a submission by a registrant under such subparagraph, data shall be considered to be inadequate if the data are derived from a study submitted before January 1, 1970, unless it is demonstrated to the satisfaction of the Administrator that such data should be considered to support the registration of the pesticide that is to be reregistered.

"(4) TIME PERIODS.—

"(A) A submission under paragraph (2) or (3) shall be made—

"(i) in the case of a pesticide containing an active ingredient listed under subsection (d)(2)(B), not later than 3 months after the date of publication of the listing of such active ingredient,

"(ii) in the case of a pesticide containing an active ingredient listed under subsection (d)(2)(C), not later than 3 months after the date of publication of the listing of such active ingredient, and

"(iii) in the case of a pesticide containing an active ingredient listed under subsection (d)(2)(D), not later than 3 months after the date of publication of the listing of such active ingredient.

On application, the Administrator may extend a time period prescribed by this subparagraph if the Administrator determines that factors beyond the control of the registrant prevent the registrant from complying with such period.

"(B) A registrant shall submit data in accordance with a commitment entered into under paragraph (3)(B) within a reasonable period of time, as determined by the Administrator, but not more than 48 months after the date the registrant submitted the commitment. The Administrator, on application of a registrant, may extend the period prescribed by the preceding sentence by no more than 2 years if extraordinary circumstances beyond the control of the registrant prevent the registrant from submitting data within such prescribed period.

"(5) CANCELLATION AND REMOVAL.—

"(A) If the registrant of a pesticide does not submit a notice under paragraph (2) or (3) within the time prescribed by paragraph (4)(A), the Administrator shall issue a notice of intent to cancel the registration of such registrant for such pesticide and shall publish the notice in the Federal Register and allow 60 days for the submission of comments on the notice. On expiration of such 60 days, the Administrator, by order and without a hearing, may cancel the registration or take such other action, including extension of applicable time periods, as may be necessary to enable reregistration of such pesticide by another person.

"(B) If no registrant of a pesticide containing an active ingredient listed under subsection (d)(2) notifies the Administrator under paragraph (2) that the registrant intends to seek reregistration of any pesticide containing that active ingredient, if no such registrant complies with paragraph (3)(A), or if no such registrant makes a commitment under paragraph (3)(B) to replace or submit all data described in clauses (ii) and (iii) of paragraph (3)(A), or if the fee prescribed by subsection (j)(1) has not been paid with regard to the active ingredient, the Administrator shall publish in the Federal Register a notice of intent to remove the active ingredient from the list established under subsection (d)(2) and a notice of intent to cancel the registrations of all pesticides containing such active ingredient and shall provide 60 days for comment on such notice. After the 60-day period has expired, the Administrator, by order, may cancel any such registration without hearing, except that the Administrator shall not cancel a registration under this subparagraph if—

"(i) during the comment period a person acquires the registrant's rights in that registration,

"(ii) during the comment period that person furnishes a notice of intent to reregister the pesticide in accordance with paragraph (2), and

"(iii) not later than 120 days after the publication of the notice under this subparagraph, that person has complied with paragraph (3) and the fee prescribed by subsection (j)(1) has been paid.

"(f) PHASE THREE.—

"(1) INFORMATION ABOUT STUDIES.—Each registrant of a pesticide that contains an active ingredient listed under subparagraph (B), (C), or (D) of subsection (d)(2) who has submitted a notice under subsection (e)(2) of an intent to seek the reregistration of such pesticide shall submit, in accordance with the guidelines issued under subsection (b)(1), to the Administrator—

"(A) a summary of each study concerning the active ingredient previously submitted by the registrant in support of the registration of a pesticide containing such active ingredient and considered by the registrant to be adequate to meet the requirements of section 3 and the regulations issued under such section,

"(B) a summary of each study concerning the active ingredient previously submitted by the registrant in support of the registration of a pesticide containing such active ingredient that may not comply with the requirements of section 3 and the regulations issued under such section but which the registrant asserts should be deemed to comply with such requirements and regulations,

"(C) a reformat of the data from each study summarized under subparagraph (A) or (B) by the registrant concerning chronic dosing, oncogenicity, reproductive effects, mutagenicity, neurotoxicity, teratogenicity, or residue chemistry of the active ingredient that were submitted to the Administrator before January 1, 1982,

"(D) where data described in subparagraph (C) are not required for the active ingredient by regulations issued under section 3, a reformat of acute and subchronic dosing data submitted by the registrant to the Administrator before January 1, 1982, that the registrant considers to be adequate to meet the requirements of section 3 and the regulations issued under such section,

"(E) an identification of data that are required to be submitted to the Administrator under section 6(g)(4) indicating an adverse effect of the pesticide,

"(F) an identification of any other information available that in the registrant's view supports the registration,

"(G) a certification that the registrant or the Administrator possesses or has access to the raw data used in or generated by the studies that the registrant summarized under subparagraph (A) or (B),

"(H) either—

"(i) a commitment to submit data to fill each outstanding data requirement identified by the registrant, or

"(ii) an offer to share in the cost of developing such data to be incurred by a person who has made a commitment under clause (i) to submit such data, and an offer to submit to arbitration as described by section 3(c)(2)(B) with regard to such cost sharing, and

"(I) evidence of compliance with section 3(c)(1)(D)(ii) and regulations issued thereunder with regard to previously submitted data as if the registrant were now seeking the original registration of the pesticide.

"(2) TIME PERIODS.—

"(A) The information required by paragraph (1) shall be submitted to the Administrator—

"(i) in the case of a pesticide containing an active ingredient listed under subsection (d)(2)(B), not later than 12 months after the date of publication of the listing of such active ingredient,

"(ii) in the case of a pesticide containing an active ingredient listed under subsection (d)(2)(C), not later than 12 months after the date of publication of the listing of such active ingredient, and

"(iii) in the case of a pesticide containing an active ingredient listed under subsection (d)(2)(D), not later than 12 months after the date of publication of the listing of such active ingredient.

"(B) A registrant shall submit data in accordance with a commitment entered into under paragraph (1)(H) within a reasonable period of time, as determined by the Administrator, but not more than 48 months after the date the registrant submitted the commitment under such paragraph. The Administrator, upon application of a registrant, may extend the period prescribed by the preceding sentence by no more than 2 years if extraordinary circumstances beyond the control of the registrant prevent the registrant from submitting data within such prescribed period.

"(3) CANCELLATION.—

"(A) If the registrant of a pesticide fails to submit the information required by paragraph (1) within the time prescribed by paragraph (2), the Administrator, by order and without hearing, shall cancel the registration of such pesticide.

"(B)(i) If the registrant of a pesticide submits the information required by paragraph (1) within the time prescribed by paragraph (2) and such information does not conform to the guidelines for submissions established by the Administrator, the Administrator shall determine whether the registrant made a good faith attempt to conform its submission to such guidelines.

"(ii) If the Administrator determines that the registrant made a good faith attempt to conform its submission to such guidelines, the Administrator shall provide the registrant a reasonable period of time to make any necessary changes or corrections.

"(iii) If the Administrator determines that the registrant did not make a good faith attempt to conform its submission to such guidelines, the Administrator may issue a notice of intent to cancel the registration. Such a notice shall be sent to the registrant by certified mail. The registration shall be cancelled without a hearing or further notice at the end of 30 days after receipt by the registrant of the notice unless during that time a request for a hearing is made by the registrant. If a hearing is requested, a hearing shall be conducted under section 6(d), except that the only matter for resolution at the hearing shall be whether the registrant made a good faith attempt to conform its submission to such guidelines. The hearing shall be held and a determination made within 75 days after receipt of a request for hearing.

"(g) PHASE FOUR.—

"(1) INDEPENDENT REVIEW AND IDENTIFICATION OF OUTSTANDING DATA REQUIREMENTS.—

"(A) The Administrator shall review the submissions of all registrants of pesticides containing a particular active ingredient under subsections (e)(3) and (f)(1) to determine if such submissions identified all the data that are missing or inadequate for such active ingredient. To assist the Administrator's review under this section, the Administrator may require a registrant seeking reregistration to submit complete copies of studies summarized under subsection (f)(1).

"(B) The Administrator shall independently identify and publish in the Federal Register the outstanding data requirements for each active ingredient that is listed under subparagraph (B), (C), or (D) of subsection (d)(2) and that is contained in a pesticide to be reregistered under this section. The Administrator, at the same time, shall issue a notice under section 3(c)(2)(B) for the submission of the additional data that are required to meet such requirements.

"(2) TIME PERIODS.—

"(A) The Administrator shall take the action required by paragraph (1)—

"(i) in the case of a pesticide containing an active ingredient listed under subsection (d)(2)(B), not later than 18 months after the date of the listing of such active ingredient,

"(ii) in the case of a pesticide containing an active ingredient listed under subsection (d)(2)(C), not later than 24 months after the date of the listing of such active ingredient, and

"(iii) in the case of a pesticide containing an active ingredient listed under subsection (d)(2)(D), not later than 33 months after the date of the listing of such active ingredient.

"(B) If the Administrator issues a notice to a registrant under paragraph (1)(B) for the submission of additional data, the registrant shall submit such data within a reasonable period of time, as determined by the Administrator, but not to exceed 48 months after the issuance of such notice. The Administrator, on application of a registrant, may extend the period prescribed by the preceding sentence by no more than 2 years if extraordinary circumstances beyond the control of the registrant prevent the registrant from submitting data within such prescribed period.

"(h) PHASE FIVE.—

"(1) DATA REVIEW.—The Administrator shall conduct a thorough examination of all data submitted under this section concerning an active ingredient listed under subsection (d)(2) and of all other available data found by the Administrator to be relevant.

"(2) REREGISTRATION AND OTHER ACTIONS.—

"(A) ELIGIBILITY FOR REREGISTRATION.—Within 1 year after the submission of all data concerning an active ingredient of a pesticide under subsection (g), the Administrator shall determine whether pesticides containing such active ingredient are eligible for reregistration. For extraordinary circumstances, the Administrator may extend such period for not more than 1 additional year.

"(B) PRODUCT-SPECIFIC DATA.—Before reregistering a pesticide, the Administrator shall obtain any needed product-specific data regarding the pesticide by use of section 3(c)(2)(B) and shall review such data within 90 days after its submission. The Administrator shall require that data under this subparagraph be submitted to the Administrator not later than 8 months after a determination of eligibility under subparagraph (A) has been made for each active ingredient of the pesticide, unless the Administrator determines that a longer period is required for the generation of the data.

"(C) REREGISTRATION.—After conducting the review required by paragraph (1) for each active ingredient of a pesticide and the review required by subparagraph (B) of this paragraph, the Administrator shall determine whether to reregister a pesticide by determining whether such pesticide meets the requirements of section 3(c)(5). If the Administrator determines that a pesticide is eligible to be reregistered, the Administrator shall reregister such pesticide within 6 months after the submission of the data concerning such pesticide under subparagraph (B).

"(D) OTHER ACTION.—If after conducting a review under paragraph (1) or subparagraph (B) of this paragraph the Administrator determines that a pesticide should not be reregistered, the Administrator shall take appropriate regulatory action.

"(i) COMPENSATION OF DATA SUBMITTER.—If data that are submitted by a registrant under subsection (e), (f), (g), or (h) are used to support the application of another person under section 3, the registrant who submitted such data shall be entitled to compensation for the use of such data as prescribed by section 3(c)(1)(D). In determining the amount of such compensation, the fees paid by the registrant under this section shall be taken into account.

"(j) FEES.—

"(1) INITIAL FEE FOR FOOD OR FEED PESTICIDE ACTIVE INGREDIENTS.—The registrants of pesticides that contain an active ingredient that is listed under subparagraph (B), (C), or (D) of subsection (d)(2) and that is an active ingredient of any pesticide registered for a major use on food or feed shall collectively pay a fee of $50,000 on submission of information under paragraphs (2) and (3) of subsection (e) forsuch ingredient.

"(2) FINAL FEE FOR FOOD OR FEED PESTICIDE ACTIVE INGREDIENTS.—

"(A) The registrants of pesticides that contain an active ingredient that is listed under subparagraph (B), (C), or (D) of subsection (d)(2) and that is an active ingredient of any pesticide registered for a major use on food or feed shall collectively pay a fee of $100,000 (i) on submission of information for such ingredient under subsection (f)(1) if data are reformatted under subsection (f)(1)(C), or (ii) on submission of data for such ingredient under subsection (f)(2)(B) if data are not reformatted under subsection (f)(1)(C).

"(B) The registrants of pesticides that contain an active ingredient that is listed under subparagraph (A) of subsection (d)(2) and that is an active ingredient of any pesticide registered for a major use on food or feed shall collectively pay a fee of $100,000 at such time as the Administrator shall prescribe.

"(3) FEES FOR OTHER PESTICIDE ACTIVE INGREDIENTS.—

"(A) The registrants of pesticides that contain an active ingredient that is listed under subparagraph (B), (C), or (D) of subsection (d)(2) and that is not an active ingredient of any pesticide registered for a major use on food or feed shall collectively pay fees in amounts determined by the Administrator. Such fees may not be less than one-half of, nor greater than, the fees required by paragraphs (1) and (2). A registrant shall pay such fees at the times corresponding to the times fees prescribed by paragraphs (1) and (2) are to be paid.

"(B) The registrants of pesticides that contain an active ingredient that is listed under subparagraph (A) of subsection (d)(2) and that is not an active ingredient of any pesticide that is registered for a major use on food or feed shall collectively pay a fee of not more than $100,000 and not less than

$50,000 at such time as the Administrator shall prescribe.

"(4) REDUCTION OR WAIVER OF FEES FOR MINOR USE AND OTHER PESTICIDES.—

"(A) In the case of an active ingredient of a pesticide that is registered solely for an agricultural or nonagricultural minor use or in the case of a pesticide the value or volume of use of which is small, the Administrator, upon application and in the sole discretion of the Administrator, may reduce or waive the fees prescribed by paragraph (3).

"(B) In the case of an antimicrobial active ingredient for which the production level does not exceed 1,000,000 pounds per year, the Administrator, upon application and in the sole discretion of the Administrator, may reduce or waive the fees prescribed by paragraph (3).

"(C) In the case of a small business registrant that produces an active ingredient of a pesticide, the Administrator, upon application and in the sole discretion of the Administrator, may reduce or waive the fees prescribed by paragraph (3). For the purpose of this subparagraph, a small business registrant is a corporation, partnership, or unincorporated business that—

"(i) has 125 or fewer employees, and

"(ii) for the last 3 years before application is made for a reduction or waiver had an average annual gross revenue that did not exceed $20,000,000.

"(5) OTHER FEES.—On payment of fees for the reregistration of a pesticide in accordance with paragraph (1), (2), (3), or (4), the Administrator may not levy any other fees for the reregistration with respect to that active ingredient.

"(6) APPORTIONMENT.—If two or more registrants are required to pay any fee prescribed by this subsection with respect to a particular active ingredient, the fees for such active ingredient shall be apportioned among such registrants on the basis of the market share in United States sales of the active ingredient for the three calendar years preceding the date of payment of such fee. The Administrator, by order, may require such registrants to submit such reports as the Administrator determines to be necessary to allow the Administrator to apportion fees under this paragraph. If any such report is not submitted by a registrant after receiving notice of such report requirement, or if any fee prescribed by this subsection for an active ingredient is not paid by a registrant to the Administrator by the time prescribed under paragraph (1), (2), or (3)(B), the Administrator, by order and without hearing, may cancel each registration held by such registrant of a pesticide containing the active ingredient with respect to which the fee is imposed. The Administrator then shall reapportion the fee among the remaining registrants and notify such registrants that they are required to pay to the Administrator any unpaid balance of the fee within 30 days after receipt of such notice.

"(k) EXEMPTION OF CERTAIN REGISTRANTS.—The requirements of subsections (e), (f), (g), and (j) regarding data concerning an active ingredient and fees for review of such data shall not apply to any person who is the registrant of a pesticide to the extent that, under section 3(c)(2)(D), the person would not be required to submit or cite such data to obtain an initial registration of such pesticide.

"(l) REREGISTRATION FUND.—

"(1) There shall be established in the Treasury of the United States a reregistration fund.

"(2) All fees collected by the Administrator under subsection (j) shall be deposited into the fund and shall be available to the Administrator, without fiscal year limitation, to carry out this section.

"(3) Money in the fund not currently needed to carry out this section shall be—

"(A) maintained on hand or on deposit,

"(B) invested in obligations of the United States or guaranteed thereby, or

"(C) invested in obligations, participations, or other instruments that are lawful investments for fiduciary, trust, or public funds.

"(4) The Administrator shall—

"(A) provide an annual accounting of the fees collected and disbursed from the fund, and

"(B) take all steps necessary to ensure that expenditures of such funds are used only to carry out this section.

"(m) JUDICIAL REVIEW.—Any failure of the Administrator to take any action required by this section shall be subject to judicial review under the procedures prescribed by section 16(b).".

(b) TECHNICAL AMENDMENT.—Subsection (g) of section 3 (7 U.S.C. 136a(g)) is repealed.

(c) DEFINITION.—

(1) Section 2 (7 U.S.C. 136) (as amended by section 104) is amended by adding at the end the following:

"(gg) ANTIMICROBIAL.—The term 'antimicrobial' means any active ingredient that is contained only in pesticides that are not registered for any food or feed use and that are—

"(1) sanitizers intended to reduce the number of living bacteria or viable virus particles on inanimate surfaces or in water or air,

"(2) bacteriostats intended to inhibit the growth of bacteria in the presence of moisture,

"(3) disinfectants intended to destroy or irreversibly inactivate bacteria, fungi, or viruses on surfaces or inanimate objects, or

"(4) sterilizers intended to destroy viruses and all living bacteria, fungi, and their spores on inanimate surfaces.".

(2) Section 2(u) (7 U.S.C. 136(u)) is amended by striking out "and" immediately before the first clause (2), by adding ", and" at the end of the first clause (2), and by adding a new clause (3) as follows: "(3) any substance or mixture of substances intended for a purpose described in subsection (gg)".

SEC. 106. ADMINISTRATOR'S AUTHORITY TO REQUIRE DATA ON INERT INGREDIENTS.

(a) SECTION 3(c)(2)(A).—Subsection (c)(2)(A) of section 3 (7 U.S.C. 136a(c)(2)(A)) is amended by inserting after "any additional kind of information under subparagraph (B) of this paragraph" the following: "including information regarding an inert ingredient in a pesticide".

(b) PRIORITY LIST AND DATA REQUIREMENTS.—Section 3 (7 U.S.C. 136a) is amended by adding at the end thereof the following new subsection:

"(g) PRIORITY LIST AND DATA REQUIREMENTS FOR INERT INGREDIENTS.—

"(1) ESTABLISHMENT OF LIST.—Subject to paragraph (4), the Administrator shall establish a priority list of inert ingredients consisting of—

"(A) inert ingredients that appear to cause a pesticide to meet or exceed a criterion for initiating a public interim administrative review under subsection (c)(8),

"(B) inert ingredients (i) for which additional data are reasonably necessary to assess the risk that the inert ingredient may result in a pesticide causing an unreasonable adverse effect on the environment, (ii) that are similar in molecular structure to a chemical that is oncogenic, mutagenic, or teratogenic or causes another similarly significant adverse effect, and (iii) that have significant use in pesticides or to which there is significant exposure from pesticides, and

"(C) inert ingredients for which additional data are reasonably necessary to assess the risk that the inert ingredient may result in a pesticide causing an unreasonable adverse effect on the environment and to which there is significant exposure from pesticides.

"(2) PUBLICATION OF LIST.—Not later than 90 days after the effective date of the Federal Insecticide, Fungicide, and Rodenticide Act Amendments of 1986, the Administrator shall publish the priority list required under paragraph (1). The Administrator shall publish revisions to such list at least annually.

"(3) JUDICIAL REVIEW.—The priority list under paragraph (1), the inclusion or exclusion of an ingredient on or from the priority list, and any revision of the priority list shall not be subject to judicial review.

"(4) NUMBER OF INGREDIENTS.—The priority list under paragraph (1) shall consist of not less than 50 inert ingredients unless the Administrator determines that there is not a sufficient number of inert ingredients meeting the requirements for listing under paragraph (1) to reach such minimum number. Such list may not exceed 75 inert ingredients.

"(5) ADDITIONAL DATA.—

"(A) The Administrator shall determine whether additional data are required for an inert ingredient in a registered pesticide not later than 1 year after the inert ingredient is placed on the priority list under paragraph (1). The Administrator shall require submission of such data from each registrant of such pesticide under this Act or from manufacturers and processors of the inert ingredient under the Toxic Substances Control Act. Such data shall be submitted within a reasonable time but not later than 4 years after the date of the request. The Administrator may extend the period for the submission of data by not more than 2 years if extraordinary circumstances beyond the control of the registrant or producer prevent the submission of the necessary data.

"(B) Data requirements imposed under subparagraph (A) or a decision not to require data for an inert ingredient shall be subject to judicial review under section 16(b).

"(6) EVALUATION.—Within 1 year after the receipt of additional data under paragraph (5) for an inert ingredient, the Administrator shall evaluate the data and take such steps as are appropriate to prevent unreasonable adverse effects on the environment caused by pesticides containing such inert ingredient. Under exceptional circumstances, the Administrator may extend the period for evaluation by not more than 1 year.

"(7) CONSTRUCTION.—This subsection shall not be construed to affect the authority of the Administrator—

"(A) to regulate under this Act impurities, contaminants, degradants, or other ingredients of pesticides that have not been deliberately added to the pesticides,

"(B) to regulate under this Act any deliberately added inert ingredient that has not previously been used in a pesticide or a sig-

nificant new use in a pesticide of a deliberately added inert ingredient,

"(C) to require the submission of short-term, environmental fate, or residue studies for deliberately added inert ingredients, or

"(D) to require the submission of revised formula statements under subsection (c)(2)(B).".

(c) DATA COMPENSATION.—Section 3(c)(1)(D)(ii) (7 U.S.C. 136a(c)(1)(D)(ii)) is amended—

(1) by striking out "or for reregistration" and inserting in lieu thereof "for reregistration, or to support the safety of an inert ingredient", and

(2) by inserting "or in support of the safety of an inert ingredient" before "by any other person".

SEC. 107. DEFINITION OF INGREDIENT STATEMENT.

Subsection (n) of section 2 (7 U.S.C. 136(n)) is amended to read as follows:

"(n) INGREDIENT STATEMENT.—The term 'ingredient statement' means a statement that contains—

"(1) the name and percentage of each active ingredient, and the total percentage of all inert ingredients, in a pesticide,

"(2) the name of each inert ingredient in the pesticide that the Administrator determines must appear in the ingredient statement because of the hazard that the Administrator has determined may be posed by the use pattern and concentration level of the inert ingredient in the pesticide,

"(3) if the pesticide contains arsenic in any form, a statement of the percentages of total and water soluble arsenic, calculated as elementary arsenic,

"(4) any other information concerning the chemical composition or identity of any active ingredient of the pesticide, including information on chemical equivalency, that the Administrator requires to appear in the ingredient statement so that the nature of the active ingredient is accurately represented, and

"(5) the name of any inert ingredient for which the Administrator has required additional data under section 3(g)(5) because such ingredient is listed under section 3(g)(1)(A) as appearing to cause a pesticide to meet or exceed a criterion for initiating a public interim administrative review under subsection (c)(8).".

SEC. 108. DISCLOSURE OF INERT INGREDIENTS.

Section 10(d) (7 U.S.C. 136h(d)) is amended in the first sentence of paragraph (3) by striking out "If" and inserting in lieu thereof "Except with respect to disclosure of information on inert ingredients in ingredient statements in accordance with section 2(n), if".

SEC. 109. COMPENSATION FOR DATA ON INERT INGREDIENTS.

Subparagraph (D) of section 3(c)(2) (7 U.S.C. 136a(c)(2)) is amended to read as follows:

"(D) EXEMPTION.—

"(i) No applicant for registration or amended registration of a pesticide who proposes to purchase a registered pesticide from another producer to formulate such purchased pesticide into the pesticide that is the subject of the application shall be required to—

"(I) submit or cite data pertaining to such purchased pesticide, or

"(II) offer to pay reasonable compensation otherwise required by paragraph (1)(D) for the use of any such data.

"(ii) No applicant for registration or amended registration of a pesticide who proposes to purchase an inert ingredient from another person to formulate the pesticide shall be required to offer to pay reasonable compensation otherwise required by paragraph (1)(D) for a study concerning such ingredient if any portion of the cost of the study will be or could be included in the price of the purchased ingredient.".

The CHAIRMAN. Are there any amendments to title I?

AMENDMENT OFFERED BY MR. BEDELL

Mr. BEDELL. I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. BEDELL: Page 38, line 17: delete the words "$100,000" and insert in lieu thereof the words "$150,000".

Mr. BEDELL. Mr. Chairman, I am offering this amendment at the request of the administration.

I would like to take this opportunity to thank EPA officials for the outstanding cooperation which they have shown throughout this effort to write a new FIFRA bill.

The purpose of this amendment is to provide for uniform reregistration fees for all pesticide active ingredients, regardless of where those pesticides are in the current reregistration process.

H.R. 2482 requires that reregistration fees be paid in two stages. The initial fee is paid in order to help EPA defray the cost of examining the registration file on each pesticide to determine if any required data are missing. Because EPA has already completed this work on nearly 130 pesticides, the bill exempts these pesticides from the first part of the reregistration fee. This amendment would apply this fee to those pesticides that have undergone the initial review at EPA but have not yet been reregistered.

Although I offer this amendment with some reluctance, the fact remains that the administration is concerned whether sufficient resources will be available to complete reregistration under the timetable established in the bill.

This amendment would help to close the resource gap by providing nearly $6 million in additional revenue, and I urge its adoption.

Mr. ROBERTS. Mr. Chairman, I move to strike the last word, and I rise in support of the amendment.

Mr. Chairman, I said yesterday during general debate on this legislation that there were some problems with the legislation that we are considering. One problem is that it mandates a time, a deadline for the EPA to complete a reregistration process, but according to the EPA the user fees imposed on the registrant fall short by nearly $50 million. That is the point my colleague from Iowa has made.

The plain fact of the matter, the truth of the matter is the bill contains numbers and demands on the Office of Pesticide Programs that will be nearly impossible for it to meet even with the reregistration fees that are provided in this bill. I am well aware of the budget restrictions we face within many of our regulatory agencies but once again without the gentleman's amendment Congress is mandating that an agency do its job without providing adequate resources for it to do the job.

I warned my colleagues in my remarks at that time that the shortfall in resources will surely mean that the Office of Pesticide Programs will not meet the mandated deadlines in this bill.

For that reason, to make this bill whole, so to speak, to pay for what we are about, I rise in support of the gentleman's amendment.

I would note that my colleague from Wisconsin [Mr. GUNDERSON] will come with an amendment to the amendment of the gentleman to provide full funding for the FIFRA bill and would urge my colleagues to pay very close attention to that amendment as well.

Mr. Chairman, I yield back the balance of my time.

AMENDMENT OFFERED BY MR. GUNDERSON TO THE AMENDMENT OFFERED BY MR. BEDELL

Mr. GUNDERSON. Mr. Chairman, I offer an amendment to the amendment.

The Clerk read as follows:

Amendment offered by Mr. GUNDERSON to the amendment offered by Mr. BEDELL:

At the end of the amendment (page 38) strike the period, insert a semicolon, and add the following:

Page 37, line 20, strike out "$50,000" and insert in lieu thereof "$100,000";

Page 38, line 6, strike out "$100,000" and insert in lieu thereof "$200,000";

Page 38, line 17, strike out "$100,000" and insert in lieu thereof "$300,000"; and

Page 39, line 13, strike out "$100,000" and insert in lieu thereof "$300,000".

Mr. GUNDERSON (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

Mr. GUNDERSON. Mr. Chairman, I, too, rise in support of the amendment offered by the distinguished chairman of our subcommittee, Mr. BEDELL. However, I would like to suggest to my colleagues that the amendment by the gentleman from Iowa does not go far enough. I would like to take a little bit of time to go with you through the numbers to exactly understand what we are dealing with in this reauthorization. We are undergoing as a result of this legislation directing EPA to pursue the most massive reregistration of active ingredients that has ever occurred in the history of this country. Within 9 years we are frankly to reregister every active chemical ingredient which is used in our agricultural chemical industry in this country.

Now, when you take a look at exactly what this does, the estimated reregistration cost in the legislation in front of us according to the Environmental

Protection Agency is some $206 million.

The current budget over a 9-year period will bring in approximately $110 million, leaving us a revenue shortfall of $96 million.

The legislation in front of us on the revenue side through the registration process brings in in the food use area about $21.9 million for those with no registration standard, about $11.4 million for those with a registration standard; in the area of nonfoods, it brings in about $7.9 million for those with no registration standard and about $1.12 million for those with a registration standard, giving us additional revenue of $42.3 million. That of course, if you do some quick subtraction, would suggest to you that you have approximately a $54 million shortfall over the 9-year period.

If the gentleman from Iowa's amendment is agreed to, that will elevate that number and bring in an additional $6 million, leaving us with a revenue shortfall of approximately $48 million over that same 9-year period.

Now, when you bring this down to a typical annual year, what you are dealing with is a recognition that in the present abatement and control budget for fiscal year 1986 for the Environmental Protection Agency, they spend approximately $12.3 million of that in reregistration.

Now, under the bill that is in front of us, rather than $12.3 million we are going to be going to approximately $23 million annually or $206 million over the 9-year period. But the reregistration fees will only bring in approximately $6 million a year. So even though we have doubled from $12 to $23 million because of the increase in fees under the bill at the present time, we only increase from $12 to $18 million of the cost, we are looking at approximately a $5 to $6 million shortfall each year.

Here is the problem, ladies and gentlemen: while we would all like to be content with that, No. 1, we face opposition from the Office of Management and Budget if we do not properly fund this legislation. I agree with the gentleman from Iowa his amendment goes in the right direction. Is it enough? OMB will not tell him, and they will not tell me it is enough. We do not know for sure.

That is why I bring to you this case scenario that is in front of us at the present time.

But more so than that, I think we need to understand that this bill includes for the first time major time mandates that must be met to achieve the reregistration of all the active ingredients within 9 years and gives the opportunity to sue in court if the Environmental Protection Agency does not meet those mandates and gives the reimbursement for attorney fees anytime such a case is brought to court, absolutely inviting cases to be brought to court to force EPA to meet that mandate.

The problem with this is very obvious. What is going to happen is next year and the year after under Gramm-Rudman we are not going to increase funds for EPA, we are going to pass this legislation which increased the mandates, and all of a sudden the entire regulation and enforcement of pesticides in this country are not going to be done by the Agriculture Committee, it is not going to be done by proper management of the Environmental Protection Agency but it is going to be done by the courts.

The CHAIRMAN. The time of the gentleman from Wisconsin [Mr. GUNDERSON] has expired.

(By unanimous consent, Mr. GUNDERSON was allowed to proceed for 5 additional minutes.)

Mr. GUNDERSON. As the EPA Administrator, Dr. Morse, said, "I am going to respond to the court orders. I am not about to go to jail for not pursuing the timetable on a particular active ingredient."

So there will be no rational decisionmaking process to determine how we implement the FIFRA legislation that we are passing today.

Now, we are not talking about a big amount of dollars here. What we are talking about is approximately $48 million.

□ 1820

Some are going to suggest that this is going to hurt the little companies. I point out to them that we include in this legislation the absolute authority for the administrator to reduce or waive those reregistration fees whenever he believes it is proper and necessary to do so.

So each and every one of us ought to decide today, do you think it is the business of the Congress of the United States and the taxpayers of this country to pay for the cost of reregistration or, frankly, ought the chemical companies which are going to get the money and the revenues from the sale of those active ingredients pay for the reregistration process. You decide, $48 million in my amendment, or are you willing to cut $48 million out of handicapped education, out of Indian health care, out of foreign aid to Mrs. Aquino or some other program near and dear to your heart?

I think the case is very obvious, and that is why I would hope that we would pass not only the amendment offered by Mr. BEDELL, but my amendment to his.

Mr. ROBERTS. Mr. Chairman, will the gentleman yield?

Mr. GUNDERSON. I yield to the gentleman from Kansas.

Mr. ROBERTS. Mr. Chairman, in the interest of my colleagues in terms of information, I would like to inform them with regard to the Administration's position, that in talking with Dr. John Moore, who is the Deputy Administrator of EPA, he has informed me that the administration will oppose the FIFRA bill if the gentleman's amendment is not included.

Mr. GUNDERSON. Mr. Chairman, I thank the gentleman for his comments.

Mr. BEDELL. Mr. Chairman, I move to strike the last word, and I rise in opposition to the amendment.

Mr. Chairman, it is obvious that I am trying to help the administration in paying for the cost of this program. But I hope people realize that this is something that serves the public purpose. This is the only case that I know of where we have gone this far in saying that the industry will have to pay the cost of something that we are doing for the public purpose.

I am on the Agriculture Committee. The Agriculture Committee surely does not believe that we should say that meat inspection will have to be paid by all the meat plants that are slaughtering livestock.

So we have gone a long way. We have already gone further than was in the bill as we passed it out of our committee. The EPA, I understand, says that pesticides are their No. 1 priority at EPA. If that is correct, I believe we have a department of Government which does have a mandate to try to serve the public. Under those circumstances, I believe that the amendment I offered, which does indeed increase the funds that are available to them, goes as far as we should go.

I do not believe it is proper for us to say that when we are mandating something for public purpose that it should be up to the businesses themselves to pay the entire cost of the effort.

So I would hope that this amendment would be defeated and that my amendment would stand without the amendment that has been offered.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Wisconsin [Mr. GUNDERSON] to the amendment offered by the gentleman from Iowa [Mr. BEDELL].

The question was taken; and on a division (demanded by Mr. GUNDERSON) there were—ayes 6, noes 13.

So the amendment was rejected.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Iowa [Mr. BEDELL].

The amendment was agreed to.

AMENDMENT OFFERED BY MR. HATCHER

Mr. HATCHER. Mr. Chairman, I offer an amendment.

The CHAIRMAN. Has the amendment been printed in the RECORD.

Mr. HATCHER. The amendment has been printed in the RECORD, Mr. Chairman.

The Clerk read as follows:

Amendment offered by Mr. HATCHER: Page 40, strike out lines 7 through 19 and insert in lieu thereof the following:

"(C)(i) Notwithstanding any other provision of this subsection, in the case of a small business registrant of a pesticide, the registrant shall pay a fee for the reregistration of each active ingredient of the pesticide that does not exceed an amount determined in accordance with this subparagraph.

"(ii) If during the 3-year period prior to reregistration the average annual gross revenue of the registrant from pesticides containing such active ingredient is—

"(I) less than $5,000,000, the registrant shall pay 0.5 percent of such revenue;

"(II) $5,000,000 or more but less than $10,000,000, the registrant shall pay 1 percent of such revenue; or

"(III) $10,000,000 or more, the registrant shall pay 1.5 percent of such revenue, but not more than $150,000.

"(iii) For the purpose of this subparagraph, a small business registrant is a corporation, partnership, or unincorporated business that—

"(I) has 150 or fewer employees; and

"(II) during the 3-year period prior to reregistration, had an average annual gross revenue from pesticides that did not exceed $40,000,000.

Mr. HATCHER. Mr. Chairman, I rise to seek support for this amendment that will keep small businesses from paying a disproportionate share of the reregistration fees imposed by H.R. 5440.

This amendment sets a cap on reregistration fees paid by small businesses, guaranteeing that all small businesses would contribute toward pesticide reregistration costs. This amendment is not an exemption nor is it a waiver for small businesses. Rather, it creates a fair and progressive fee, based on the registrant's ability to pay, in which the fee rises in proportion to the sales of the active ingredient. If the sales go above $10 million for a pesticide active ingredient, all businesses would be treated equally.

Mr. Chairman, many small businesses cannot afford fees of $75,000 to $150,000 for each active ingredient because low volume, low-profit products cannot support such fees. A significant number of active ingredients will be dropped voluntarily. Small businesses, which often make small batches of specialized pesticide products, would be discouraged from innovating new low volume, low profit products if they have to pay large reregistration fees. And, most important, research and development by small companies would surely decline. I believe this amendment would make FIFRA more equitable for small businesses and should be passed, and I ask for the support of all Members.

Mr. DREIER of California. Mr. Chairman, I rise in support of the amendment.

Mr. Chairman, as a member of the Small Business Committee and a veteran of the small chemical manufacturing industry, I rise in support of this amendment. Small businesses comprise an important part of the pesticide industry, and this amendment would make the fees they must pay for reregistration of active ingredients fair and progressive.

Small businesses are responsible for manufacturing most of the specialized products which are regulated by FIFRA. But requiring them to pay the same $75,000 to $150,000 reregistration fee that duPont and Dow pay does not make sense. Many of these products are manufactured only in small quantities, or contain only small amounts of active ingredients regulated by FIFRA. These small manufacturers tell me that, in the face of fees of this magnitude, they would simply discontinue many of their products.

Furthermore, new products which small businesses are prominent in developing will never see the light of day if the reregistration fee structure makes economically unfeasible.

This is a serious situation. One company in Indiana points out that they would have to discontinue an antimicrobial product used in whirlpool therapy for burn patients because the fee relative to the amount of active ingredient would be prohibitive.

The Hatcher amendment is fair, and would ensure the availability of those products with small markets. The Senate Agriculture Committee has already adopted this approach, and I urge my colleagues to do the same.

□ 1830

Mr. BEDELL. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, what we have just done is try to raise the revenue in order that this would be more in line with the cost of administering the program. I take a back seat to no one in regard to small business. Just as the gentleman from California, I have been on the Small Business Committee, as he knows. I think we should fight for small business.

I hope we realize what has already been done in the bill. The bill as it is now says that for minor use pesticides the maximum that can be charged is $75,000. Half of what is otherwise charged.

We have also said that the Administrator can lower that fee if he feels that the fee is repressive and improper. What this is doing is saying that we here in the Congress are going to decide on a formula which we think should be put into this bill that says that if you sell $5 million worth of a given chemical, and I think $5 million is a sizeable sale, that whereas others will be paying $150,000, you will only have to pay $25,000. Indeed, if it is a million dollars, you only have to pay $5,000 where the others will pay the $150,000.

We have tried to address this problem in committee. I think we do have a problem in the bill in terms of revenues for the bill. We have just passed legislation that would increase the revenues. I cannot, in all good conscience, even though I certainly agree that we need to support small business, support something that has come forth by the small business interests saying now that you are on the floor, why do you not cut the fees for us as we are trying to raise them.

Mr. DREIER of California. Mr. Chairman, will the gentleman yield?

Mr. BEDELL. I yield to the gentleman from California.

Mr. DREIER of California. I thank the gentleman for yielding to me.

Mr. Chairman, first of all I would laud the small business community for ferreting out this problem and realizing that it does exist. I think that is a very complimentary thing for them.

Mr. BEDELL. If I may reclaim my time, what is the problem that exists?

Mr. DREIER of California. The problem that exists is this potential crisis of a lack of new and innovative products which could emanate. That is the question I would like to ask. In response to the example I used about this company in Indiana which has announced that they, because of the prohibitive costs, would be prevented from further researching and expanding this technology dealing with whirlpool therapy, they would be prevented because of the fees.

Mr. BEDELL. Because of the fees? Does the gentleman understand that normally the fees are a very, very small part of the cost? That the big cost to the company is not the fees; the big cost to the company is obtaining all of the data that is necessary in order to apply for the registration.

Does the gentleman understand that?

Mr. DREIER of California. If the gentleman will yield further, I would simply like to say that the gentleman, I hope, would come up with an alternative to address concerns which have been voiced by the small business sector. That really is the stated goal here.

Mr. BEDELL. We have done that. We have said that the fees in no circumstance for minor use chemicals can be over half of what the other fees are.

We have also said that if indeed it appears to the administrator that those fees are a problem, then the administrator has full power to lower the fees if an argument can be shown that the fees are a problem.

In most cases, it is not the fee that is the problem. In most cases, the problem is the cost of getting all the data necessary in order to properly comply with the EPA requirements.

Mr. ROBERTS. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, as I indicated before in my earlier comments, this bill really does cross a very long philosophical bridge for some of us. I do not like user fees. The reason I do not like user fees in this legislation is that regardless of what we are talking about in terms of the registration fees they are going to be passed on to the farmer-stockman and he can ill-afford it.

We decided it was in the public interest to go that route, if you will, because we did not have the appropriations. So now we have the bill. Mr. BEDELL has already offered an amendment that has been passed to almost fully fund this legislation. Then Mr. GUNDERSON became totally immersed, if you will, became Ivory Soap pure. We still lack about $48 million.

We have it in the bill now that it is discretionary that the EPA Administrator can do the very thing that Mr. HATCHER wants to do on a more mandatory basis. I laud him for his efforts. I do not have any other business other than small business in my district. But we have no cost item here; we have no bottom-line cost figure and we are going to go at cross-purposes with the amendment that we just passed.

I do not much like the direction of this amendment. I do not like user fees. I do not like saddling small business and the farmer and the stockman with these costs. But if in fact we are you-know-where-bent in terms of passing this reform legislation, we have got to make it pay for itself.

As a consequence, I reluctantly oppose Mr. HATCHER's amendment and agree with my friend and colleague from Iowa.

Mr. HATCHER. Mr. Chairman, will the gentleman yield?

Mr. ROBERTS. I yield to the gentleman from Georgia.

Mr. HATCHER. I thank the gentleman for yielding.

Mr. Chairman, I would just like to state in response to the gentleman's assertion about the discretion of the Administrator that if this Member had any reason to believe that this Administrator or subsequent Administrators would use that discretion to give the relief that small businesses need, I would not be here presenting this.

I happen to be a Member who believes they have no intention of using it, and I would like to see it in the law so that the small businesses can continue to exist.

Mr. ROBERTS. I would say for the benefit of my colleagues that my colleague made an eloquent plea in that regard during full committee consideration. I am in agreement with him and I hope he becomes a catalyst so that the Administrator will do exactly what the gentleman has suggested.

Mr. RAY. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in support of the Hatcher amendment. But in doing so, I want to compliment Mr. BEDELL on the good job that he has done in putting this bill together. It was not an easy task; I can understand why he would not want it cluttered with amendments. I feel so strongly about this particular amendment that it is important that I get up and speak on its behalf.

This is a small business issue, pure and simple. What this amendment does is to establish a fair and progressive fee scale, so that all small business registrants of pesticide active ingredients will contribute toward pesticide registration costs, but they will pay the EPA fees based on their ability to pay. By adopting this amendment, we assure that small businesses will not be forced to pay a disproportionate share of the reregistration fees on pesticide active ingredients.

Many small companies simply cannot afford the high fees that would be required if this amendment were not adopted. If we don't provide a more equitable way of distributing the burden of these fees, then much of the innovation, research, and development in the area of specialized pesticide products will disappear.

Mr. Chairman, I have spent many years as a small businessman. I was also in the pesticide business, so I feel I have some knowledge of the small companies, many of which do not even exist any more.

During the years, we have seen the number of pesticide manufacturing companies, large and small, diminish in number. Presently the large companies dominate the industry, and it is important that we in this body give these few remaining small companies and businesses and formulators and distributors all the support that we can possibly do so. We cannot leave any doubt existing.

The Hatcher amendment fairly and wisely recognizes this weakness in the legislation and seeks to correct it, and I urge its passage.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Georgia [Mr. HATCHER].

The question was taken; and the Chairman announced that the ayes appeared to have it.

Mr. MARLENEE. Mr. Chairman, I demand a recorded vote, and pending that I make the point of order that a quorum is not present.

The CHAIRMAN. Evidently a quorum is not present. Pursuant to the provisions of clause 2 of rule XXIII, the Chair announces that he will reduce to a minimum of 5 minutes the period of time within which a vote by electronic device, if ordered, will be taken on the pending question following the quorum call. Members will record their presence by electronic device.

The call was taken by electronic device.

The following Members responded to their names:

The CHAIRMAN. Three hundred forty-seven Members have answered to their names, a quorum is present, and the committee will resume its business.

Does the gentleman from Montana [Mr. MARLENEE] insist upon his demand for a recorded vote?

Mr. MARLENEE. Mr. Chairman, I withdraw my demand for a recorded vote.

So the amendment was agreed to.

Mr. HATCHER. Mr. Chairman, the three main wood preservatives—pentachlorophenol, creosote and inorganic arsenicals—will become restricted use pesticides on November 10, 1986. Some States now require all persons who use, distribute, or sell pesticides classified for restricted use to meet each State's certified pesticide applicator requirements for the respective States. This is a hardship on many small businesses which distribute and sell these pesticides in many States. It is also a needless duplication of private and government workers' time and financial resources. Reciprocity for pesticide dealer licensing is needed in those areas without cooperative agreements to mutually recognize uniform licensing requirements.

Report 99-695 on H.R. 2482, the Federal Insecticide, Fungicide, and Rodenticide Act Amendments of 1985, at page 30 contains the following language dealing with the reciprocity of training:

In general, these amendments should be construed in a manner that encourages the States to employ reciprocity for the satisfaction of training requirements in situations where applicators are applying pesticides in more than one State. Reciprocity among the States should be considered an effective means of achieving a consistently high level of competency while encouraging the free flow of commerce across State lines.

This spirit of this report language should apply in situations where dealers, sales representatives, and technical representatives of pesticides are selling their product in multistate areas. Reciprocity in this area would also help to achieve a consistent high level of dealer competency while encouraging the free flow of commerce across State lines.

Mr. DE LA GARZA. Mr. Chairman, I move that the committee do now rise.

The motion was agreed to.

Accordingly the committee rose; and the Speaker pro tempore [Mr. FOLEY] having assumed the chair, Mr. MCHUGH, Chairman of the Committee of the Whole House on the State of the Union, reported that that committee, having had under consideration the bill (H.R. 2482) to amend the Federal Insecticide, Fungicide, and Rodenticide Act, and for other purposes, had come to no resolution thereon.

CONFERENCE REPORT ON H.R. 3838, TAX REFORM ACT OF 1986

Mr. ROSTENKOWSKI submitted the following conference report and statement on the bill (H.R. 3838) to reform the internal revenue laws of the United States:

CONFERENCE REPORT (H. REPT. 99-841)

The committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 3838) to reform the internal revenue laws of the United States, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its disagreement to the amendment of the Senate and agree to the same with an amendment as follows:

In lieu of the matter proposed to be inserted by the Senate amendment insert the following:

"SEC. 7518. TAX INCENTIVES RELATING TO MERCHANT MARINE CAPITAL CONSTRUCTION FUNDS.

"(a) CEILING ON DEPOSITS.—

"(1) IN GENERAL.—The amount deposited in a fund established under section 607 of the Merchant Marine Act, 1936 (hereinafter in this section referred to as a 'capital construction fund') shall not exceed for any taxable year the sum of:

"(A) that portion of the taxable income of the owner or lessee for such year (computed as provided in chapter 1 but without regard to the carryback of any net operating loss or net capital loss and without regard to this section) which is attributable to the operation of the agreement vessels in the foreign or domestic commerce of the United States or in the fisheries of the United States,

"(B) the amount allowable as a deduction under section 167 for such year with respect to the agreement vessels,

"(C) if the transaction is not taken into account for purposes of subparagraph (A), the net proceeds (as defined in joint regulations) from—

"(i) the sale or other disposition of any agreement vessel, or

"(ii) insurance or indemnity attributable to any agreement vessel, and

"(D) the receipts from the investment or reinvestment of amounts held in such fund.

"(2) LIMITATIONS ON DEPOSITS BY LESSEES.—In the case of a lessee, the maximum amount which may be deposited with respect to an agreement vessel by reason of paragraph (1)(B) for any period shall be reduced by any amount which, under an agreement entered into under section 607 of the Merchant Marine Act, 1936, the owner is required or permitted to deposit for such period with respect to such vessel by reason of paragraph (1)(B).

Such stock must be currently fully listed and registered on an exchange registered with the Securities and Exchange Commission as a national securities exchange, and must be stock which would be acquired by prudent men of discretion and intelligence in such matters who are seeking a reasonable income and the preservation of their capital. If at any time the fair market value of the stock in the fund is more than the agreed percentage of the assets in the fund, any subsequent investment of amounts deposited in the fund, and any subsequent withdrawal from the fund, shall be made in such a way as to tend to restore the fund to a situation in which the fair market value of the stock does not exceed such agreed percentage.

"(3) INVESTMENT IN CERTAIN PREFERRED STOCK PERMITTED.—For purposes of this subsection, if the common stock of a corporation meets the requirements of this subsection and if the preferred stock of such corporation would meet such requirements but for the fact that it cannot be listed and registered as required because it is nonvoting stock, such preferred stock shall be treated as meeting the requirements of this subsection.

"SEC. 860G. OTHER DEFINITIONS AND SPECIAL RULES.

"(a) DEFINITIONS.—For purposes of this part—

"(1) REGULAR INTEREST.— The term 'regular interest' means an interest in a REMIC the terms of which are fixed on the startup day, and which—

"(A) unconditionally entitles the holder to receive a specified principal amount (or other similar amount), and

"(B) provides that interest payments (or other similar amounts), if any, at or before maturity are payable based on a fixed rate (or to the extent provided in regulations, at a variable rate).

An interest shall not fail to meet the requirements of subparagraph (A) merely because the timing (but not the amount) of the principal payments (or other similar amounts)

may be contingent on the extent of prepayments on qualified mortgages and the amount of income from permitted investments.

"(2) RESIDUAL INTEREST.—The term 'residual interest' means an interest in a REMIC which is not a regular interest and is designated as a residual interest.

"(3) QUALIFIED MORTGAGE.—The term 'qualified mortgage' means—

"(A) any obligation (including any participation or certificate of beneficial ownership therein) which is principally secured, directly or indirectly, by an interest in real property and which—

"(i) is transferred to the REMIC on or before the startup day, or

"(ii) is purchased by the REMIC within the 3-month period beginning on the startup day,

"(B) any qualified replacement mortgage, and

"(C) any regular interest in another REMIC transferred to the REMIC on or before the startup day.

"(4) QUALIFIED REPLACEMENT MORTGAGE.—The term 'qualified replacement mortgage' means any obligation—

"(A) which would be described in paragraph (3)(A) if it were transferred to the REMIC on or before the startup day, and

"(B) which is received for—

"(i) another obligation within the 3-month period beginning on the startup day, or

"(ii) a defective obligation within the 2-year period beginning on the startup day.

"(5) PERMITTED INVESTMENTS.—The term 'permitted investments' means any—

"(A) cash flow investment,

"(B) qualified reserve asset, or

"(C) foreclosure property.

"(6) CASH FLOW INVESTMENT.—The term 'cash flow investment' means any investment of amounts received under qualified mortgages for a temporary period before distribution to holders of interests in the REMIC.

"(7) QUALIFIED RESERVE ASSET.—

"(A) IN GENERAL.—The term 'qualified reserve asset' means any intangible property which is held for investment and as part of a qualified reserve fund.

"(B) QUALIFIED RESERVE FUND.—For purposes of subparagraph (A), the term 'qualified reserve fund' means any reasonably required reserve to provide for full payment of expenses of the REMIC or amounts due on regular interests in the event of defaults on qualified mortgages. The amount of any such reserve shall be promptly and appropriately reduced as payments of qualified mortgages are received.

"(C) SPECIAL RULE.—A reserve shall not be treated as a qualified reserve for any taxable year (and all subsequent taxable years) if more than 30 percent of the gross income from the assets in such fund for the taxable year is derived from the sale or other disposition of property held for less than 3 months. For purposes of the preceding sentence, gain on the disposition of a qualified reserve asset shall not be taken into account if the disposition giving rise to such gain is required to prevent default on a regular interest where the threatened default resulted from a default on 1 or more qualified mortgages.

"(8) FORECLOSURE PROPERTY.—The term 'foreclosure property' means property—

"(A) which would be foreclosure property under section 856(e) if acquired by a real estate investment trust, and

"(B) which is acquired in connection with the default or imminent default of a qualified mortgage held by the REMIC.

Property shall cease to be foreclosure property with respect to the REMIC on the date which is 1 year after the date such real estate mortgage pool acquired such property.

"(9) STARTUP DAY.—The term 'startup day' means any day selected by a REMIC which is on or before the 1st day on which interests in such REMIC are issued.

"(10) ISSUE PRICE.—The issue price of any regular or residual interest in a REMIC shall be determined under section 1273(b) in the same manner as if such interest were a debt instrument; except that if the interest is issued for property, paragraph (3) of section 1273(b) shall apply whether or not the requirements of such paragraph are met.

"(b) TREATMENT OF NONRESIDENT ALIENS AND FOREIGN CORPORATIONS.—If the holder of a residual interest in a REMIC is a nonresident alien individual or a foreign corporation, for purposes of sections 871(a), 881, 1441, and 1442—

"(1) amounts includible in the gross income of such holder under this part shall be taken into account when paid or distributed (or when the interest is disposed of), and

"(2) no exemption from the taxes imposed by such sections (and no reduction in the rates of such taxes) shall apply to any excess inclusion.

The Secretary may by regulations provide that such amounts shall be taken into account earlier than as provided in paragraph (1) where necessary or appropriate to prevent the avoidance of tax imposed by this chapter.

"(c) REGULATIONS.—The Secretary shall prescribe such regulations as may be necessary or appropriate to carry out the purposes of this part, including regulations—

"(1) to prevent unreasonable accumulations of assets in a REMIC,

"(2) permitting determinations of the fair market value of property transferred to a REMIC and issue price of interests in a REMIC to be made earlier than otherwise provided, and

"(l) PERMITTED DISPARITY IN PLAN CONTRIBUTIONS OR BENEFITS.—

"(1) IN GENERAL.—The requirements of this subsection are met with respect to a plan if—

"(A) in the case of a defined contribution plan, the requirements of paragraph (2) are met, and

"(B) in the case of a defined benefit plan, the requirements of paragraph (3) are met.

"(2) DEFINED CONTRIBUTION PLAN.—

"(A) IN GENERAL.—A defined contribution plan meets the requirements of this paragraph if the excess contribution percentage does not exceed the base contribution percentage by more than the lesser of—

"(i) the base contribution percentage, or

"(ii) the greater of—

"(I) 5.7 percentage points, or

"(II) the percentage equal to the portion of the rate of tax under section 3111(a) (in effect as of the beginning of the year) which is attributable to old-age insurance.

"(B) CONTRIBUTION PERCENTAGES.—For purposes of this paragraph—

"(i) EXCESS CONTRIBUTION PERCENTAGE.—The term 'excess contribution percentage' means the percentage of compensation which is contributed under the plan with respect to that portion of each participant's compensation in excess of the integration level.

"(ii) BASE CONTRIBUTION PERCENTAGE.—The term 'base contribution percentage' means the percentage of compensation contributed under the plan with respect to that portion of each participant's compensation not in excess of the integration level.

"(3) DEFINED BENEFIT PLAN.—A defined benefit plan meets the requirements of this paragraph if—

"(A) EXCESS PLANS.—

"(i) IN GENERAL.—In the case of a plan other than an offset plan—

"(I) the excess benefit percentage does not exceed the base benefit percentage by more than the maximum excess allowance,

"(II) any optional form of benefit, preretirement benefit, actuarial factor, or other benefit or feature provided with respect to compensation in excess of the integration level is provided with respect to compensation not in excess of such level, and

"(III) benefits are based on average annual compensation.

"(ii) BENEFIT PERCENTAGES.—For purposes of this subparagraph, the excess and base benefit percentages shall be computed in the same manner as the excess and base contribution percentages under paragraph (2)(B), except that such determination shall be made on the basis of benefits rather than contributions.

"(B) OFFSET PLANS.—In the case of an offset plan, the plan provides that—

"(i) a participant's accrued benefit attributable to employer contributions (within the meaning of section 411(c)(1)) may not be reduced (by reason of the offset) by more than the maximum offset allowance, and

"(ii) benefits are based on average annual compensation.

"(4) DEFINITIONS RELATING TO PARAGRAPH (3).—For purposes of paragraph (3)—

"(A) MAXIMUM EXCESS ALLOWANCE.—The maximum excess allowance is equal to—

"(i) in the case of benefits attributable to any year of service with the employer taken into account under the plan, 3/4 of a percentage point, and

"(i) in the case of benefits attributable to any year of service with the employer taken into account under the plan, ¾ percent of the participant's final average compensation, and

In no event shall the maximum offset allowance exceed 50 percent of the benefit which would have accrued without regard to the offset reduction.

"(C) REDUCTIONS.—

"(i) IN GENERAL.—The Secretary shall prescribe regulations requiring the reduction of the ¾ percentage factor under subparagraph (A) or (B)—

"(I) in the case of a plan other than an offset plan which has an integration level in excess of covered compensation, or

"(II) with respect to any participant in an offset plan who has final average compensation in excess of covered compensation.

"(ii) BASIS OF REDUCTIONS.—Any reductions under clause (i) shall be based on the percentages of compensation replaced by the employer-derived portions of primary insurance amounts under the Social Security Act for participants with compensation in excess of covered compensation.

"(D) OFFSET PLAN.—The term 'offset plan' means any plan with respect to which the benefit attributable to employer contributions for each participant is reduced by an amount specified in the plan.

"(E) COVERED COMPENSATION.—

"(i) IN GENERAL.—The term 'covered compensation' means, with respect to an employee, the average of the contribution and benefit bases in effect under section 230 of the Social Security Act for each year in the 35-year period ending with the year in which the employee attains age 65.

"(ii) COMPUTATION FOR ANY YEAR.—For purposes of clause (i), the determination for any year preceding the year in which the employee attains age 65 shall be made by assuming that there is no increase in the bases described in clause (i) after the determination year and before the employee attains age 65.

"(F) REGULATIONS.—The Secretary shall prescribe such regulations as are necessary or appropriate to carry out the purposes of this subsection, including—

"(i) in the case of a defined benefit plan which provides for unreduced benefits commencing before the social security retirement age (as defined in section 415(b)(8)), rules providing for the reduction of the maximum excess allowance and the maximum offset allowance, and

"(ii) in the case of an employee covered by 2 or more plans of the employer which fail to meet the requirements of subsection (a)(4) (without regard to this subsection), rules preventing the multiple use of the disparity permitted under this subsection with respect to any employee.

"(6) SPECIAL RULE FOR PLAN MAINTAINED BY RAILROADS.—In determining whether a plan which includes employees of a railroad employer who are entitled to benefits under the Railroad Retirement Act of 1974 meets the requirements of this subsection, rules similar to the rules set forth in this subsection shall apply. Such rules shall take into account the employer-derived portion of the employees' tier 2 railroad retirement benefits and any supplemental annuity under the Railroad Retirement Act of 1974."

(b) CONFORMING AMENDMENT.—Paragraph (5) of section 401(a) is amended to read as follows:

"(5) SPECIAL RULES RELATING TO NONDISCRIMINATION REQUIREMENTS.—

"(A) SALARIED OR CLERICAL EMPLOYEES.—A classification shall not be considered discriminatory within the meaning of para-

graph (4) or section 410(b)(2)(A)(i) merely because it is limited to salaried or clerical employees.

"(B) CONTRIBUTIONS AND BENEFITS MAY BEAR UNIFORM RELATIONSHIP TO COMPENSATION.—A plan shall not be considered discriminatory within the meaning of paragraph (4) merely because the contributions or benefits of, or on behalf of, the employees under the plan bear a uniform relationship to the compensation (within the meaning of section 414(s)) of such employees.

"(C) CERTAIN DISPARITY PERMITTED.—A plan shall not be considered discriminatory within the meaning of paragraph (4) merely because the contributions or benefits of, or on behalf of, the employees under the plan favor highly compensated employees (as defined in section 414(q)) in the manner permitted under subsection (l).

"(D) INTEGRATED DEFINED BENEFIT PLAN.—

"(i) IN GENERAL.—A defined benefit plan shall not be considered discriminatory within the meaning of paragraph (4) merely because the plan provides that the employer-derived accrued retirement benefit for any participant under the plan may not exceed the excess (if any) of—

"(I) the participant's final pay with the employer, over

"(II) the employer-derived retirement benefit created under Federal law attributable to service by the participant with the employer.

For purposes of this clause, the employer-derived retirement benefit created under Federal law shall be treated as accruing ratably over 35 years.

"(ii) FINAL PAY.—For purposes of this subparagraph, the participant's final pay is the compensation (as defined in section 414(q)(7)) paid to the participant by the employer for any year—

"(I) which ends during the 5-year period ending with the year in which the participant separated from service for the employer, and

"(II) for which the participant's total compensation from the employer was highest.

"(E) 2 OR MORE PLANS TREATED AS SINGLE PLAN.—For purposes of determining whether 2 or more plans of an employer satisfy the requirements of paragraph (4) when considered as a single plan—

"(i) CONTRIBUTIONS.—If the amount of contributions on behalf of the employees allowed as a deduction under section 404 for the taxable year with respect to such plans, taken together, bears a uniform relationship to the compensation (within the meaning of section 414(s)) of such employees, the plans shall not be considered discriminatory merely because the rights of employees to, or derived from, the employer contributions under the separate plans do not become nonforfeitable at the same rate.

"(ii) BENEFITS.—If the employees' rights to benefits under the separate plans do not become nonforfeitable at the same rate, but the levels of benefits provided by the separate plans satisfy the requirements of regulations prescribed by the Secretary to take account of the differences in such rates, the plans shall not be considered discriminatory merely because of the difference in such rates."

(1) IN GENERAL.—Subsection (b) of section 402 (relating to taxability of beneficiary of nonexempt trust) is amended by adding at the end thereof the following new paragraph:

"(2) FAILURE TO MEET REQUIREMENTS OF SECTION 410(b).—

"(A) IN GENERAL.—In the case of a trust which is not exempt from tax under section 501(a) solely because such trust is part of a plan which fails to meet the requirements of section 410(b)—

"(i) such trust shall be treated as exempt from tax under section 501(a) for purposes of applying paragraph (1) to employees who are not highly compensated employees, and

"(a) BENEFITS UNDER DISCRIMINATORY PLANS.—

"(1) IN GENERAL.—Notwithstanding any provision of part III of this subchapter, gross income of a highly compensated employee who is a participant in a discriminatory employee benefit plan during any plan year shall include an amount equal to such employee's excess benefit under such plan for such plan year.

"(2) YEAR OF INCLUSION.—Any amount included in gross income under paragraph (1) shall be taken into account for the taxable year of the employee with or within which the plan year ends.

"(b) EXCESS BENEFIT.—For purposes of this section—

"(2) HIGHEST PERMITTED BENEFIT.—For purposes of paragraph (1), the highest permitted benefit under any plan shall be determined by reducing the nontaxable benefits of highly compensated employees (beginning with the employees with the greatest nontaxable benefits) until such plan would not be treated as a discriminatory employee benefit plan if such reduced benefits were taken into account.

"(3) PLANS OF SAME TYPE.—In computing the excess benefit with respect to any benefit, there shall be taken into account all plans of the employer of the same type.

"(4) NONTAXABLE BENEFITS.—For purposes of this subsection, the term 'nontaxable benefit' means any benefit provided under a plan to which this section applies which (without regard to subsection (a)(1)) is excludable from gross income under this chapter.

"(B) at least 50 percent of the employees eligible to participate in such plan are not highly compensated employees, and

"(C) such plan does not contain any provision relating to eligibility to participate which (by its terms or otherwise) discriminates in favor of highly compensated employees.

"(2) ALTERNATIVE ELIGIBILITY PERCENTAGE TEST.—A plan shall be treated as meeting the requirements of paragraph (1)(B) if—

"(A) the percentage determined by dividing the number of highly compensated employees eligible to participate in the plan by the total number of highly compensated employees, does not exceed

"(2) SPECIAL RULES FOR APPLYING BENEFIT REQUIREMENTS TO HEALTH PLANS.—

"(A) ELECTION.—For purposes of determining whether the requirements of subsection (e) are met with respect to health plans, the employer may elect—

"(i) to disregard any employee if such employee and his spouse and dependents (if any) are covered by a health plan providing core benefits maintained by another employer, and

"(II) as not having a spouse or dependents.

"(D) CERTAIN INDIVIDUALS MAY NOT BE DISREGARDED.—In the case of a highly compensated employee who receives employer-provided benefits under all health plans of the employer which are more than 133⅓ percent of the average employer-provided benefit under such plan for employees other than highly compensated employees, the employer may not disregard such employee, or his spouse or dependents for purposes of clause (i) or (ii) of subparagraph (A).

"(5) SEPARATE LINE OF BUSINESS EXCEPTION.—If, under section 414(r), an employer is treated as operating separate lines of business for a year, the employer may apply the preceding provisions of this section separately with respect to employees in each such separate line of business. The preceding sentence shall not apply to any plan unless such plan is available to a group of employees as qualify under a classification set up by the employer and found by the Secretary not to be discriminatory in favor of highly compensated employees.

"(6) SPECIAL RULE FOR APPLYING ELIGIBILITY REQUIREMENTS AND 80-PERCENT TEST TO HEALTH PLANS.—For purposes of determining whether the requirements of subsection (d)(1)(A)(ii) or of subsection (f) are met with respect to health plans, the employer may elect—

"(2) CERTAIN EXCLUSIONS NOT TO APPLY IF EXCLUDED EMPLOYEES COVERED.—Except to the extent provided in regulations, employees shall not be excluded from consideration under any subparagraph of paragraph (1) (other than subparagraph (F)) unless no employee described in such subparagraph (determined with regard to the last sentence of paragraph (1)) is eligible under the plan.

"(3) EXCLUSION MUST APPLY TO ALL PLANS.—

"(A) IN GENERAL.—An exclusion shall apply under any subparagraph of paragraph (1) (other than subparagraph (F) thereof) only if the exclusion applies to all statutory employee benefit plans of the employer of the same type.
